Authority sought to operate as a *common carrier* by motor vehicle, over irregular routes, transporting: *Fabricated or manufactured cement and concrete products on flatbed equipment only;* from points in Louisiana to points in Mississippi and Alabama.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either New Orleans, La., or Houston, Tex.

No. MC 117589 (Sub-No. 41), filed July 5, 1977. Applicant: PROVISIONERS FROZEN EXPRESS, INC., 3801 Seventh Avenue South, Seattle, Wash. 98108. Applicant's representative: Michael D. Duppenthaler, 515 Lyon Building, 607 Third Avenue, Seattle, Wash. 98104. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Inedible packinghouse products*, fresh or frozen, unfit for human consumption, in vehicles equipped with mechanical refrigeration (except in bulk, in tank vehicles), from Denver, Grand Junction, Greeley, Lamar, Pueblo, and Rocky Ford, Colo., Albuquerque, N. Mex., and El Paso, Tex., to Forest Grove and Tualatin, Oreg.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Denver, Colo., or Seattle, Wash.

No. MC 118159 (Sub-No. 216), filed June 24, 1977. Applicant: NATIONAL REFRIGERATED TRANSPORT, INC., P.O. Box 51366—Dawson Station, Tulsa, Okla. 74151. Applicant's representative: Warren Taylor (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are manufactured and distributed by manufacturers and distributors of office supplies; and *equipment, materials*, and *supplies* used in the manufacture and distribution of the above described commodities between the plantsites and warehouse facilities of National Blank Book Co., Inc. at Holyoke and Springfield, Mass., and Meridian, Miss., on the one hand and, on the other, points in Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, New Mexico, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 119619 (Sub-No. 111), filed July 1, 1977. Applicant: DISTRIBUTORS SERVICE CO. (A corporation), 2000 West 43rd St., Chicago, Ill. 60609. Applicant's representative: Piken & Piken, Esqs., One Lefrak City Plaza, Flushing, N.Y. 11368. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods* from Cleveland and Solon, Ohio to points in Colorado, Connecticut, Delaware, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Nebraska, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Chicago, Ill.

No. MC 119765 (Sub-No. 45), filed June 30, 1977. Applicant: EIGHT WAY XPRESS, INC., 5402 South 27th Street, Omaha, Nebr. 68107. Applicant's representative: Arlyn L. Westergren, Suite 530 Univac Building, 7100 West Center Road, Omaha, Nebr. 68106. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts and articles distributed by meat packinghouses* (except hides and commodities in bulk), from the plantsites and facilities of Dugdale Packing Co. located at or near Darr, Nebr., to points in Georgia, Tennessee, North Carolina, South Carolina, Alabama, Mississippi, Florida, Louisiana, Virginia, West Virginia, and Kentucky.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Omaha, Nebr.

No. MC 119789 (Sub-No. 361), filed July 6, 1977. Applicant: CARAVAN REFRIGERATED CARGO, INC., P.O. Box 6188, Dallas, Tex. 75222. Applicant's representative James K. Newbold, Jr. (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs* (except in bulk), from Idaho, Oregon, Utah, and Washington to Alabama, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Iowa, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Mississippi, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Vermont, Virginia, and West Virginia.

NOTE.—If an oral hearing is deemed necessary, applicant requests that it be held at Portland, Oreg. or Seattle, Wash.

No. MC 120251 (Sub-No. 3), filed June 29, 1977. Applicant: MINOT VAN & STORAGE CO., INC., 710–20th Avenue SW., Minot, N. Dak. 58701. Applicant's representative: Alan F. Wohlstetter, 1700 K Street NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Used household goods*, between points in Adams, Benson, Billings, Bottineau, Bowman, Burke, Burcigh, Divide, Dunn, Eddy, Emmons, Foster, Golden Valley, Grant, Hettinger, Kidder, Logan, McHenry, McIntosh, McKenzie, Mercer, Morton, Mountrail, Oliver, Pierce, Renville, Rolette, McLean, Sheridan, Sioux, Slope, Stark, Stutsman, Towner, Ward, Wells and Williams Counties, N. Dak., restricted to the transportation of traffic having a prior or subsequent movement in containers, and further restricted to the performance of pickup and delivery service in connection with packing, crating, and containerization or unpacking, uncrating and decontainerization of such traffic.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Minot, N. Dak.

No. MC 120257 (Sub-No. 37), filed June 29, 1977. Applicant: K. L. BREEDEN & SONS, INC., 401 Alamo Street, Terrell, Tex. 75160. Applicant's representative: Bernard H. English, 6270 Firth Road, Fort Worth, Tex. 76116. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Processed kaolin clay*, in bags, from Hackleburg, Ala., to points in Alabama, Arkansas, Louisiana, Mississippi, Tennessee and Texas.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Birmingham, Ala., or Dallas, Tex.

No. MC 120737 (Sub-No. 46), filed July 6, 1977. Applicant: STAR DELIVERY & TRANSFER, INC., South Fourth Avenue, P.O. Box 39, Canton, Ill. 61520. Applicant's representative: James C. Hardman, Suite 2108, 33 North La Salle Street, Chicago, Ill. 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are dealt in, or used by, agricultural equipment, industrial equipment and lawn and leisure products manufacturers and dealers (except commodities in bulk), (1) Between the facilities of, or

V 42 N 160 AUG 18 77 UM

used by, International Harvester Company at East Moline, Moline and Rock Island, Ill., on the one hand, and, on the other, points in Alabama, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Vermont, Virginia, West Virginia, Wisconsin, Wyoming and the District of Columbia. (2) Between the facilities of, or used by, International Harvester Company at Canton, Ill., on the one hand, and, on the other, points in Alabama, Arkansas, Colorado, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Virginia, West Virginia, Wisconsin and Wyoming, and District of Columbia. (3) Between the facilities of, or used by, International Harvester Company at Memphis, Tenn., on the one hand, and, on the other, points in Alabama, Arizona, Arkansas, California, Colorado, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Mexico, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Carolina, South Dakota, Tennessee, Texas, Utah, Virginia, Washington, West Virginia, Wisconsin, Wyoming and District of Columbia. (4) Between the facilities of, or used by, International Harvester Company at Louisville, Ky., on the one hand, and, on the other, points in the United States (except Alaska and Hawaii).

(5) From the facilities used by International Harvester Company at the Port of New Orleans, La., and points in its commercial zone to points in Arkansas, Illinois, Iowa, Kentucky, Louisiana, Mississippi and Tennessee. (6) From the facilities used by International Harvester Company at the Port of Philadelphia, Pa., and points in its commercial zone to points in Arkansas, Illinois, Indiana, Iowa, Kentucky, Louisiana, Michigan, Mississippi, Ohio, Pennsylvania, Tennessee and West Virginia. (7) From the facilities used by International Harvester Company at the Port of Savannah, Ga., and points in its commercial zone to points in Alabama, Arkansas, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Michigan, Mississippi, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Virginia, West Virginia, and the District of Columbia. RESTRICTION: The authorities in paragraph (1), (2), (3) and (4) above are restricted to the transportation of traffic (a) originating at the facilities of, or used by, International Harvester Company at the points named in each of said respective paragraphs and destined to points in the States named in said paragraphs and the District of Columbia, or (b) originating at points in the States named in each of said respective paragraphs and the District of Columbia and destined to the facilities or, or used by, International Harvested Company at the points named in said paragraphs, except that the restrictions in (a) and (b) above shall not apply to traffic moving in foreign commerce: and the authorities in paragraphs (5), (6), and (7) above are restricted to the transportation of traffic (a) having a prior movement by water and (b) destined to the facilities or dealers of International Harvester Company.

NOTE.—Applicant seeks authority to serve Ports of Entry on the International boundary line between the United States and Canada located in the involved States bordering on Canada and to participate in traffic moving from and to Canadian Provinces which can be served in connection therewith. If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C. or Chicago, Ill.

No. MC 121060 (Sub-No. 44), filed June 22, 1977. Applicant: ARROW TRUCK LINES, INC., P.O. Box 1416, Birmingham, Ala. 35201. Applicant's representative: William P. Jackson, Jr., 3426 N. Washington Boulevard, P.O. Box 1267, Arlington, Va. 22210. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Composition board*, from South Boston, Va., to points in Kentucky, Ohio, and Michigan.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Washington, D.C.

No. MC 121649 (Sub-No. 4), filed June 8, 1977. Applicant: MILAN EXPRESS, INC., P.O. Box 439, Milan, Tennessee 38358. Applicant's representative: Walter Harwood, P.O. Box 15214, Nashville, Tennessee 37215. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting, *general commodities*, except household goods, Classes A and B explosives, and commodities requiring special equipment, 1. Between Atwood and Memphis, Tenn.: (a) From Atwood via U.S. Highway 79 to Memphis, and return over the same route, (b) From Atwood via U.S. Highway 79 to junction with U.S. Highway 45–E; thence via U.S. Highway 45–E to junction with U.S. Highway 45; thence via U.S. Highway 45 to junction with I–40; thence via I–40 to Memphis, and return over the same route, serving the intermediate points of Milan and Gibson on both routes.

2. From Milan to Jackson, Tenn.: From Jackson via U.S. Highway 45–E; thence via U.S. Highway 45–E to junction with U.S. Highway 45; thence via U.S. Highway 45 to Jackson, and return over the same route, serving all intermediate points.

Restriction: Restricted against the handling of traffic which originates at or interlined at Memphis, Tenn., destined to Jackson or points beyond, or originating at, or interlined at Jackson, Tenn., destined to Memphis, Tenn., or points beyond.

3. Between Jackson and Milan, Tenn.: From Jackson via U.S. Highway 45 to junction with U.S. Highway 45–E; thence via U.S. Highway 45–E to Milan and return, serving as off-route points Savannah, and all points on and in an area bounded as follows: Beginning at Rutherford, Tenn., eastwards via Tenn. Highway 105 to junction with Tenn. Highway 54; thence via Tenn. Highway 54 to Greenfield; thence via Tenn. Highway 124 to McKenzie; thence via Tenn. Highway 22 to Lexington; thence via Tenn. Highway 20 to Parsons; thence via Tenn. Highway 69 to Adamsville; thence via U.S. Highway 64 to Selmer; thence via U.S. Highway 45 to Eastview; thence via Highway 57 to Middleton; thence via Tenn. Highway 125 to Bolivar; thence U.S. Highway 64 to Whiteville; thence via Tenn. Highway 100 to Somerville; thence via unnumbered road to Stanton; thence via U.S. Highway 70 to Brownsville; thence via Tenn. Highway 19 to Ripley; thence via U.S. Highway 51 to junction with Tenn. Highway 77; thence via Tenn. Highway 77 to Dyer; thence via U.S. Highway 45W to Rutherford.

Restriction: (a) Restricted against tacking; (b) Restricted against service at Dyersburg, Tenn., and points within 3 miles thereof;

(c) Restricted against the interchange of traffic with other motor carriers at Jackson, Tenn., and points within 4 miles thereof;

(d) Restricted against the interlining of traffic originating at or destined to Jackson, Tenn., from either Nashville or Memphis, Tenn.

(e) Restricted against service at Newbern, Tenn., and points in its commercial zone.

4. Between Jackson, Tenn., and Paduach, Ky., from Jackson, Tenn., via U.S. Highway 45–E to Fulton, Ky., thence via U.S. Highway 45 to Paducah, Ky., and return over the same route, serving the intermediate point of Fulton, Ky., and serving as off route points, Savannah, Tenn., and all points on and in an area bounded as follows: Beginning at Rutherford, eastwards via Tenn. Highway 105 to junction with Tenn. Highway 54; thence via Tenn. Highway 54 to Greenfield; thence via Tenn. Highway 124 to McKenzie; thence via Tenn. Highway 22 to Lexington; thence via Tenn. Highway 20 to Parsons; thence via Tenn. Highway 69 to Adamsville; thence via U.S. Highway 64 to Selmer; thence via U.S. Highway 45 to Eastview thence via Tenn. Highway 57 to Middleton; thence via Tenn. Highway 125 to Bolivar; thence via U.S. Highway 64 to Whiteville; thence via Tenn. Highway 100 to Somerville; thence via unnumbered road to Stanton; thence via U.S. Highway 70 to Brownsville; thence via Tenn. Highway 19 to Ripley; thence via U.S. Highway 51 to junction with Tenn. Highway 77; thence via Tenn. Highway 77 to Dyer; thence via U.S. Highway 45W to Rutherford.

Restriction: (Restricted against serving Dyersburg and Newbern, Tenn., and points in their respective commercial zones, and (2) restricted against the handling of traffic which originates at, is destined to, or interlined at Memphis, Tenn., and points in its commercial zone, on the one hand, and, on the other, that which originates at, is destined to, or interlined at Fulton, Ky., and points in its commercial zone.

5. Between Paducah, Ky., and Nashville, Tenn., from Paducah via U.S. Highway 62 to junction with Ky. Highway 91; thence via Ky. Highway 91 to Hopkinsville; thence via U.S. Highway 41–A to Nashville, Tenn., and return over the same route, serving no intermediate points.

Restriction: Authority sought to serve Memphis, Tenn., is restricted against serving that part of its commercial zone which lies in Arkansas and Mississippi; the sought authorities in (4) and (5) above are restricted against tacking with each other.

NOTE.—Routes 1 through 3 represent presently held registered authority which applicant seeks to convert to an interstate certificate of public convenience and necessity. The request for authority in routes 1 through 3 above has been redrafted to conform with Commission practice. No additional authority is sought in routes 1 through 3 above. Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held at Memphis, Nashville, Jackson, Tenn.; and Paducah, Ky.

No. MC 123090 (Sub-No. 4), filed June 30, 1977. Applicant: FRANK MARCELLO and PAUL R. MARCELLO doing business as MARCELLO'S SERVICE, 431 Portzer Road, Quakertown, Pa.18951.Applicant's representative: Paul F. Gilligan, 330 So. Berks St., Allentown, Pa. 18104. NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Omaha, Nebr., or Dallas, Tex.

No. MC 133703 (Sub-No. 7), filed July 6, 1977. Applicant: WISCONSIN CHEESE SERVICE, INC., 770 North Springdale Rd., Waukesha, Wis., 53186. Applicant's representative: David V. Purcell, 1330 Marine Plaza, 111 East Wisconsin Ave., Milwaukee, Wis. 53202. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Canned fruits and vegetables* from points in Wisconsin to points in the United States (except Alaska and Hawaii) under a continuing contract or contracts with The Larsen Co. located at Green Bay, Wis.

NOTE:—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Green Bay or Milwaukee, Wis.

No. MC 133703 (Sub-No. 8), filed July 6, 1977. Applicant: WISCONSIN CHEESE SERVICE, INC., 770 North Springdale Rd., Waukesha, Wis. 53186 Applicant's representative: David V. Purcell, 1330 Marine Plaza, 111 East Wisconsin Ave., Milwaukee, Wis. 53202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned vegetables* from New Richmond, Coleman, Eden, Gillett, and Oakfield, Wis., to points in the United States (except Alaska and Hawaii), under a continuing contract or contracts with Friday Canning Corp., located at New Richmond, Wis.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests that it be held at Milwaukee, Wis., or Minneapolis or St. Paul, Minn.

No. MC 134090 (Sub-No. 4), filed July 5, 1977. Applicant: ALL BEST TRANSFER & WAREHOUSE, INC., 405 Division St., Elizabeth, N.J. 07201. Applicant's representative: George A. Olsen, P.O. Box 357, Gladstone, N.J. 07934. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lawn and garden products*, in boxes and bags, from O. M. Scott & Sons Distribution Center, located at Elizabethport, N.J., to points in Connecticut, Delaware, Maryland, Massachusetts, New York, Pennsylvania, and the plantsite of O. M. Scott & Sons Co., located at Marysville, Ohio, under a continuing contract or contracts with O. M. Scott & Sons Co., Marysville, Ohio.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at New York, N.Y., or Washington, D.C.

No. MC 134467 (Sub-No. 21), filed July 1, 1977. Applicant: POLAR EXPRESS, INC., P.O. Box 845, Springdale, Ark. 72764. Applicant's representative: Charles M. Williams, 350 Capitol Life Center, 1600 Sherman St., Denver, Colo. 80203. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats meat products, meat by-products, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the Report in Descriptions in Motor Carrier Certificates, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from the plantsites and storage facilities utilized by Monfort of Colorado, Inc., its divisions and subsidiaries, at or near Greeley and Denver, Colo., to points in Maine, New

Hampshire, Vermont, New York, Massachusetts, Rhode Island, Connecticut, Pennsylvania, New Jersey, Delaware, Maryland, Virginia, Illinois, Indiana, Ohio, Michigan, and the District of Columbia, restricted to transportation of shipments originating at the named origins and destined to the named destinations.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests that it be held at Denver, Colo.

No. MC 134716 (Sub-No. 8), filed June 30, 1977. Applicant: RUSH TRUCKING, INC., 200 Southwest 19th St., Fort Lauderdale, Fla. 33315. Applicant's representative: John P. Bond, 2766 Douglas Rd., Miami, Fla. 33133. Applicant seeks authority to operate as a *contract carrier* over irregular routes in the transportation of *radio and electronic component parts and accessories*, between the Miami International Airport on the one hand, and, on the other, points in Dade and Broward Counties, Fla., all shipments restricted to having a prior or subsequent movement by air, under a continuing contract or contracts with Motorola Communications Division.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Fort Lauderdale or Miami, Fla.

No. MC 134755 (Sub-No. 109), filed June 24, 1977. Applicant: CHARTER EXPRESS, INC., P.O. Box 3772, Springfield, Mo. 65804. Applicant's representative: Larry D. Knox, 600 Hubbell Bldg., Des Moines, Iowa 50309. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat by-products and articles distributed by meat packinghouses* as described in Sections A and C of Appendix I to the report in Descriptions in Motor Carrier Certificates, 61 MCC 209 and 766 (except hides and commodities in bulk), from Ford County, Kans., to points in Wisconsin, Illinois, Michigan, Indiana, Ohio, Kentucky, Tennessee, South Carolina, North Carolina, Virginia, West Virginia, Maryland, Delaware, Pennsylvania, New Jersey, New York, Connecticut, Rhode Island, Massachusetts, Vermont, New Hampshire, Maine, and the District of Columbia.

NOTE.—Applicant holds contract carrier authority in No. MC 138398 and subs thereunder, therefore, dual operations may be involved. Common control may also be involved. If a hearing is deemed necessary, applicant requests it be held at Kansas City, Mo.

No. MC 134768 (Sub-No. 2), filed June 10, 1977. Applicant: LEXINGTON-PARIS MOTOR FREIGHT, INC., P.O. Box 439, Milan, Tennessee 38358. Applicant's representative: WALTER HARWOOD, Attorney, P.O. Box 15214, Nashville, Tennessee 37214. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *general commodities*, except household goods, Classes A and B explosives, and commodities requiring special equipment,

1. Between Paris, Tenn., and the Kentucky State line, via Tennessee Highway 54, serving all intermediate points.

2. Between Memphis and Centerville, Tenn.: From Memphis via U.S. Highway 70 to Jackson; thence via Tennessee Highway 20 to junction with Tennessee Highway 100 near Linden, Tenn.; thence via Tennessee Highway 100 to Centerville and return over the same route, serving all intermediate points.

Restriction: Restricted against the handling of traffic which originates at, is destined to, or interlined at Memphis, on the one hand, and, on the other, which originates at, is destined to, or interlined at Jackson, and points between Jackson and Memphis; and against the handling of traffic which originates at, is destined to, or interlined at Memphis, on the one hand, and, on the other, which originates at, is destined to, or interlined at Nashville.

3. Between Nashville and Whiteville, Tenn., over the following routes: (a) From Nashville to Whiteville via Tenn. Highway 100, and return over the same route.

(b) From Nashville via Tenn. Highway 100 to junction with Tenn. Highway 22; thence via Tenn. Highway 22 to Adamsville; thence via Tenn. Highway 15 to Whiteville, and return over the same route.

(c) From Nashville via Tenn. Highway 100 to junction with Tenn. Highway 69; thence via Tenn. Highway 69 to junction with Tenn. Highway 15; thence via Tenn. Highway 15 to Whiteville, and return over the same route.

(d) From Nashville via Tenn. Highway 100 to junction with Tenn. Highway 69; thence via Tenn. Highway 69 to junction with Tenn. Highway 22; thence via Tenn. Highway 22 to Adamsville; thence via Tenn. Highway 15 to junction with Tenn. Highway 5; thence via Tenn. Highway 5 to Tenn. Highway 100; thence via Tenn. Highway 100 to Whiteville, and return over the same route.

Serving intermediate points on all four routes west of the Tennessee River and with the right to tack all of such routes. All four routes shall be construed as conferring a single operating right.

Restriction: Restricted against the handling of traffic which is consigned from Memphis to Jackson: Nashville to Jackson: Nashville to Memphis; and Memphis to Nashville.

4. Between Memphis and McKenzie, Tenn., via U.S. Highway 79, serving all intermediate points between Atwood (but not including Atwood and points within 2 miles thereof) and McKenzie.

5. Between Lexington and McKenzie, Tenn., via Tenn. Highway 22, serving all intermediate points, and Yuma as an off-route point.

6. Between Nashville and Memphis, Tenn.; from Nashville via Tenn. Highway 100 to its junction with U.S. Highway 64 at or near Whiteville; thence via U.S. Highway 64 to Memphis, and return over the same route, serving no intermediate points, as an alternate route for operating convenience only.

7. Between Memphis and Paris, Tenn.: From Memphis via I-40 to junction with Tenn. Highway 22; thence over Tenn. Highway 22 to junction with U.S. Highway 79; thence over U.S. Highway 79 to Paris, and return over the same route, serving no intermediate points, but said authority may be tacked with carrier's other existing authority to serve Memphis, Tenn.

8. (a) Between Jackson and Henderson, Tenn., via U.S. Highway 45, serving all intermediate points.

(b) Between Memphis and Henderson, Tenn.: From Memphis via I-40 to junction with U.S. Highway 45; thence via U.S. Highway 45 to Henderson, and return over the same route, serving all intermediate points between Jackson and Henderson.

(c) Between Nashville and Henderson, Tenn.: From Nashville via I-40 to junction with U.S. Highway 45; thence via U.S. Highway 45 to Henderson, serving all intermediate points between Jackson and Henderson.

(d) Between Nashville and Pinson, Tenn.: From Nashville via I-40 to junction with Tenn. Highway 22; thence via Tenn. Highway 22 to junction with Tenn. Highway 22-A; thence over Tenn. Highway 22-A to junction with Tenn. Highway 100; thence via Tenn. Highway 100 to junction with U.S. Highway 45 at Henderson; thence over U.S. Highway 45 to Pinson, and return over the same route, serving all intermediate points between Henderson and Pinson.

Restriction: Restricted against tacking with the carrier's present authority so as to provide a through service between Davidson County, on the one hand, and, on the other hand, Humboldt, Milan, Huntingdon, McKenzie, and Paris, Tenn., and points within 3 miles of each of the said points. Further restricted against any service at Jackson and points within 4 miles thereof, so as to provide a through service between points in Davidson County, Tenn., and Memphis, Tenn., and points within 5 miles of Memphis.

All four routes shall be construed as conferring a single operating right.

9. Between Nashville, McKenzie and Paris, Tenn., over the following routes:

(a) From Nashville via I-40 to junction with Tenn. Highway 22, thence over Tenn. Highway 22 to McKenzie; thence over U.S. Highway 79 to Paris, and return over the same route, serving McKenzie and all intermediate points between McKenzie and Paris.

(b) From Nashville via U.S. Highway 41-A to Clarksville; thence via U.S. Highway 70 to McKenzie, and return over the same route, serving Paris and all intermediate points between Paris and McKenzie.

Restriction: Restricted against the handling of traffic which originates at, is destined to, or interchanged at points in Davidson County, on the one hand, and, on the other, that which originates at, is destined to, or interchanges at Humboldt and Huntington, Tenn., and points within 3 miles of each said point, and

Clarksville, Tenn., and points within 4 miles thereof.

Restriction: All of the foregoing routes 1 through 9 are restricted against the through transportation of shipments between points in Davidson County, Tenn., and Memphis, Tenn., and points within 5 miles of Memphis.

Restriction: Authority sought to serve Memphis, Tenn., is restricted against service in that part of its commercial zone which lies in Mississippi.

NOTE.—By this instant application, applicant seeks to convert its Certificate of Registration in No. MC 134768 (Sub-No. 1) to a Certificate of Public Convenience and Necessity. Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Jackson, Tenn.

No. MC 134884 (Sub-No. 10), filed July 1, 1977. Applicant: FARWEST FURNITURE TRANSPORT, INC., 6840—112th Avenue, S.E., Renton, Wash. 98055. Applicant's representative: Bruce E. Mitchell, 3379 Peachtree Road, N.E., Suite 375, Atlanta, Ga. 30326. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *New furniture;* and (2) *new fixtures*, uncrated, between points in California, Nevada and Arizona.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Los Angeles, Calif., or Seattle, Wash.

No. MC 135284 (Sub-No. 6), filed June 29, 1977. Applicant: FLEETWOOD TRANSPORTATION CORP., 1030 Reeves Street, Dunmore, Pa. 18512. Applicant's representative: Michael R. Werner, 2 West 45th Street, New York, N.Y. 10036. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs*, (except commodities in bulk), in vehicles equipped with mechanical refrigeration, between points in Franklin County, Ohio, on the one hand, and, on the other points in Indiana, Pennsylvania and West Virginia, under a continuing contract or contracts with The Nestle Co., Inc.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at New York, N.Y. Common control may be involved.

No. MC 135530 (Sub-No. 6), filed: June 30, 1977. Applicant: LAKE CENTER INDUSTRIES TRANSPORTATION, INC., 111 Market Street, Winona, Minn. 55987. Applicant's representative: Bruce A. Rasmussen, 1110 Northwestern Bank Building, Minneapolis, Minn. 55402. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Metal screws, nuts, bolts, shafts, castings, springs, clips and other metal piece parts*, between the plantsite of Winona Heat Treating Incorporated, located at or near Winona, Minn., on the one hand, and, on the other hand, points in Wisconsin, Iowa and Illinois, under contract with Winona Heat Treating Incorporated.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Minneapolis, St. Paul or Winona, Minn.

No. MC 135633 (Sub-No. 12), filed June 30, 1977. Applicant: NATIONWIDE AUTO TRANSPORTERS, INC., 2175 Lemoine Avenue, Fort Lee, New Jersey 07024. Applicants representative: David L. Steinhagen, 333 Chipill Drive, Northbrook, Illinois 60062. Authorization sought to operate as a *common carrier* by motor vehicle over irregular routes transporting: buses in driveaway service between Fort Valley, GA; Buena Vista, VA; Mt. Pleasant, Iowa; and the international boundary line between the United States and Canada, at Buffalo, Niagara Falls, and Champlain, N.Y.; and Detroit, Michigan, on the one hand, and, on the other, points in the United States (including Alaska, but excluding Hawaii).

NOTE.—If a hearing is deemed necessary, applicant requests that it be held in Atlanta, Ga. or Washington, D.C.

No. MC 135895 (Sub-No. 14), filed July 7, 1977. Applicant: DON RAY BOYD and JACKIE ROGERS, PARTNERS, d.b.a. B & R DRAYAGE COMPANY, North Bierdman Road, Jackson, Miss. 39206. Applicant's representative: Douglas C. Wynn, P.O. Box 1295, Greenville, Miss. 38701. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Pre-cast concrete products* and (2) *equipment, materials, supplies, machinery and parts* used in the manufacture or installation of pre-cast concrete products between the plant sites and warehouses of Jackson Ready-Mix Concrete Co. in Hinds and Madison Counties, Miss., on the one hand, and on the other, points in Alabama, Arkansas, Louisiana and Tennessee.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Jackson, Miss.

No. MC 136343 (Sub-No. 112), filed July 5, 1977. Applicant: MILTON TRANSPORTATION, INC., P.O. Box 355, Milton, Pa. 17847. Applicant's representative: George A. Olsen, 69 Tonnele Ave., Jersey City, N.J. 07306. Authority sought to operate as a *common carrier*, in interstate commerce, over irregular routes transporting: *Paper and Paper Products*, from the plant site and warehouse facilities of the International Paper Company located at or near Jay and Livermore Falls, Maine, to points in Alabama, Arizona, Arkansas, California, Colorado, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, New Mexico, North Carolina, Ohio, Oklahoma, South Carolina, Tennessee, Texas, Utah, Virginia, West Virginia, Wisconsin, District of Columbia; points in New York on and West of U.S. Highway 81; Pennsylvania on and west of U.S. Highway 15 and Emigsville, Pa.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either New York, N.Y., or Washington, D.C.

No. MC 136828 (Sub-No. 18), filed July 5, 1977. Applicant: COOK TRANSPORTS, INC., 214 South Tenth Street, Birmingham, Ala. 35233. Applicants representative: Robert M. Pearce, P.O. Box 1899, Bowling Green, Ky. 42101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Machinery, equipment, materials and supplies* used in, or in connection with, the installation, operation, and maintenance of safety and traffic control systems, except commodities in bulk, from points in the United States, except Alaska and Hawaii, to points in Alabama, Florida, Georgia, Mississippi and Tennessee.

NOTE.—If a hearing is deemed necessary, applicant request it be held at either Birmingham, Ala. or Nashville, Tenn.

No. MC 138235 (Sub-No. 14), filed June 24, 1977. Applicant: DECKER TRANSPORT COMPANY, INCORPORATED, 412 Route 23, Pompton Plains, N.J. 07444. Applicant's representative: Hugh T. Matthews, 2340 Fidelity Union Tower, Dallas, Tex. 75201. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Hardware, conveyors* and *conveyor equipment, furniture, power equipment, wheel goods*, and *bicycles and parts* thereof and *attachments* and *accessories* therefor and *materials, equipment* and *supplies* used in the manufacture and distribution thereof, between the plantsites and storage facilities of MTD Products, Inc. at or near Cleveland, Strongsville, Willard and Shelby, Ohio, on the one hand, and, on the other, points in Alabama, Georgia, South Carolina, North Carolina, Tennessee and Florida, under contract with MTD Products, Inc., restricted against the transportation of any of above named commodities in bulk, and further restricted against the transportation of commodities which by reason of size or weight require the use of special equipment.

NOTE.—If a hearing is deemed necessary, applicant requests it be held in Dallas, Tex.

No. MC 138308 (Sub-No. 31), filed July 1, 1977. Applicant: KLM, INC., 2102 Old Brandon Road, P.O. Box 6098, Jackson, Miss. 39208. Applicant's representative: Donald B. Morrison, 1500 Deposit Guaranty Plaza, P.O. Box 22628, Jackson, Miss. 39205. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *pole and transmission line construction materials* (except commodities which by reason of size or weight require the use of special equipment), from the facilities of McGraw-Edison Company at or near Vicksburg, Mississippi to Visalia, California and Lake Oswego, Oregon.

NOTE.—Applicant holds motor contract authority in No. MC 128562 and subnumbers thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, the applicant requests that it be held at Jackson, Miss.

No. MC 138941 (Sub-No. 23), filed July 5, 1977. Applicant: COUNTRY WIDE TRUCK SERVICE, INC., 1110 South

Reservoir, Pomona, Calif. 91766. Applicant's representative: Paul M. Daniell, P.O. Box 872, Atlanta, Ga. 30301. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Kitchen accessories, gum, gum and food dispensing machines, and exhibition equipment for same*, from San Dimas, California, to points in the United States (except Alaska and Hawaii), (2)(a) *exhibition equipment for kitchen accessories, gum, gum and food dispensing machines*, (b) *materials and supplies used in the manufacture of kitchen accessories, gum, gum and food dispensing machines*, and (c) *damaged, refused, rejected or returned shipments of kitchen accessories, gum, gum and food dispensing machines*, from points in the United States, including Alaska and Hawaii, to San Dimas, Calif., under a continuing contract or contracts with Knock On Wood Corporation, located at Covina, Calif.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Los Angeles, Calif.

No. MC 139294 (Sub-No. 1), filed June 24, 1977. Applicant: H.T.L., INC., Post Office Box 122, Fairfield, Ala. 35064. Applicant's representative: Robert E. Tate, Post Office Box 517, Evergreen, Ala. 36401. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lumber, plywood, and particleboard* from the plant and warehouse facilities of MacMillan Bloedel, Inc. at Pine Hill and Opelika, Ala. to points in Florida, Georgia, Mississippi, Louisiana, North Carolina, South Carolina, Virginia, West Virginia, Kentucky and Tennessee.

NOTE.—If a hearing is deemed necessary the applicant requests it be held at either Birmingham, Ala. or Atlanta, Ga. Applicant holds contract carrier authority under MC-135867 (Sub-No. 1) therefore dual operations may be involved.

No. MC 139495 (Sub-No. 246), filed June 17, 1977. Applicant: NATIONAL CARRIERS, INC., 1501 East 8th Street, P.O. Box 1358, Liberal, Kans. 67901. Applicant's representative: Herbert Alan Dubin, Suite 1030, 1819 H Street, N.W., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Motors, generators, controllers, power transmission equipment and machinery, and parts and accessories thereof* from Lawrenceburg, Ky. to points in Arizona, California, Colorado, Connecticut, Massachusetts, Nevada, New Hampshire, New Jersey, New Mexico, New York, Oregon, Pennsylvania, Rhode Island, Texas, Utah, Vermont, and Washington.

NOTE.—Applicant holds contract carrier authority in MC-133106 and subs thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 139495 (Sub-No. 249), filed June 24, 1977. Applicant: NATIONAL CARRIERS, INC., 1501 East 8th Street, P.O. Box 1358, Liberal, Kans. 67901. Applicant's representative: Herbert Alan Dubin, Suite 1030, 1819 H Street NW., Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: steel wire and springs from Oxford, Mass. and Milldale, Conn. to points in California, Colorado, Illinois, Indiana, Kentucky, Michigan, Minnesota, Mississippi, Missouri, Nebraska, Nevada, Ohio, Oklahoma, Tennessee, Texas, and Wisconsin.

NOTE.—Applicant holds contract carrier authority in MC 133106 and subs thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 140000 (Sub-No. 3), filed June 30, 1977. Applicant: FIELD VIEW FARM TRANSPORTATION, INC., 707 Derby Avenue, Orange, Conn. 06477. Applicant's representative: William J. Meuser, 86 Cherry Street, P.O. Box 507, Milford, Conn. 06460. Authority sought to operate as a *contract carrier*, by motor vehicle, over *irregular routes*, transporting: Manufactured fertilizers, insecticides, weed killing compound, hand sprayers, birdseed and outdoor bird feeders, in mixed shipments, in bottles, bags or boxes, between Cranbury, N.J. on the one hand and on the other points in N.Y., Pa., Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut and Maryland, under a continuing contract or contracts with Chamberlin & Barclay, Inc.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either Hartford, Conn., or New York, N.Y.

No MC 140033 (Sub-No. 263, filed June 30, 1977. Applicant: COX REFRIGERATED EXPRESS, INC., 10606 Goodnight Lane, Dallas, Tex. 75220. Applicant's representative: Lawrence A. Winkle, Suite 1125 Exchange Park, P.O. Box 45538, Dallas, Tex. 75245. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Plastics and plastic products*, from Troup, Texas, to points in the United States (except Hawaii and Alaska); and (2)(a) *plastics, plastic products and rubber articles* (except *sponge, foam or cellular*); and (b) games and toys, from Jacksonville, Tex., to points in the United States (except Hawaii and Alaska).

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either Dallas, Tex., or Washington, D.C.

No. MC 140134 (Sub-No. 7) (amendment), filed September 2, 1976, published in the FEDERAL REGISTER issue of October 21, 1976, republished as amended this issue. Applicant: CALDARULO TRADING CO., a corporation, 2840 South Ashland, Chicago, Ill. 60608. Applicant's representative: Richard A. Kerwin, 180 North La Salle Street, Chicago, Ill. 60601. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting (1) *Toilet preparations, toilet articles, germicides, buffing and polishing compounds, cleaning, scouring, and washing compounds, drugs, janitorial supplies*, and *advertising materials*, from Chicago, Melrose Park, and Carol Stream, Ill.; Sparks, Nev.; Glendale, Calif; Piscataway, N.J.; Atlanta, Ga.; Dallas, Tex.; and Jacksonville, Fla., to points in the United States (except Alaska and Hawaii); (2) *Foodstuffs* (except frozen), in containers, from Chicago and Carol Stream, Ill.; Sparks, Nev., and Atlanta, Ga., to points in the United States (except Alaska and Hawaii); (3) *Acrosol products*, from Chicago, Ill.; Sparks, Nev.; Piscataway, N.J., and Atlanta, Ga., to points in the United States (except Alaska and Hawaii); (4) *Materials, equipment, and supplies* utilized in the manufacture, distribution and sale of the commodities described in (1), (2), and (3) above, and *returned shipments* of the commodities described in (1) and (2) above, from the above-named destination points, to the named origin points; restricted in (1), (2), (3), and (4) above to the transportation of shipments originating at or destined to the facilities of Masury Columbia Company, a subsidiary of Alberto-Culver Company, and (5) *Sweetening compounds*, from Morris Plain, N.J., to Sparks, Nev., Piscataway, N.J., and Atlanta, Ga.; restricted in (1), (2), (3), (4), and (5) above against the transportation of commodities in bulk and further restricted to a transportation service to be performed, under a continuing contract, or contracts, with Masury Columbia Company, a subsidiary of Alberto-Culver Company.

NOTE.—The purpose of this republication is to amend the request for authority by substituting Masury Columbia Company in lieu of Capitol Packaging Company. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 140469 (Sub-No. 9), filed June 27, 1977. Applicant: FUNCTIONAL MARKETING SYSTEM, INC., 147-02 Liberty Avenue, Jamaica, N.Y. 11435. Applicant's Attorney: Larsh B. Mewhinney, 235 Mamaroneck Avenue, White Plains, N.Y. 10605. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Books and educational materials, equipment and supplies*, between New York, N.Y., and points in New Jersey, on the one hand, and, on the other, points in Fairfield County, Conn.; New Castle County, Del.; Putnam County, N.Y., and Bucks, Chester, Delaware, Montgomery and Philadelphia Counties, Pa., under a continuing contract or contracts with Field Enterprises Educational Corporation located at Chicago, Ill.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 140829 (Sub-No. 49), filed June 17, 1977. Applicant: CARGO CONTRACT CARRIER CORP., P.O. Box 206, U.S. Highway 20, Sioux City, Iowa 51102. Applicant's representative: William J. Hanlon, 55 Madison Ave., Morristown,

N.J. 07960. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, meat by-products and articles distributed by meat packinghouses*, as described in Section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk), from the plantsite and storage facilities utilized by Royal Packing Company, located at or near National Stockyards, Ill., and St. Louis, Mo., to points in Connecticut, Massachusetts, Maryland, New Jersey, New York, Pennsylvania, Rhode Island, and Washington, D.C., restricted to the transportation of traffic originating at the named origins and destined to points in the above named destination states.

NOTE.—Applicant holds contract carrier authority in various subs under MC 136408, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 140829 (Sub-No. 52), filed June 21, 1977. Applicant: CARGO CONTRACT CARRIER CORP., P.O. Box 206, U.S. Highway 20, Sioux City, Iowa 51102. Applicant's representative: William J. Hanlon, 55 Madison Ave., Morristown, N.J. 07960. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, and meat by-products and articles distributed by meat packinghouses*, as described in Section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk), from the plantsite and storage facilities utilized by Krey Packing Company located at or near St. Louis, Mo., to points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Vermont, the District of Columbia, and Rhode Island, restricted to the transportation of traffic originating at the named origin and destined to points in the above named destination states.

NOTE.—Applicant holds contract carrier authority in various subs under MC-136408, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 140829 (Sub-No. 53) filed June 29, 1977. Applicant: CARGO CONTRACT CARRIER CORP., P.O. Box 206 U.S. Highway 20, Sioux City, Iowa 51102. Applicant's representative: William J. Hanlon, 55 Madison Ave., Morristown, N.J. 07960. No. MC 107638 (Sub-No. 3) (correction), filed April 29, 1977, published in the FEDERAL REGISTER issue of June 9, republished as corrected this issue. Applicant: EVERGREEN TRAILS, INC., 1936 Westlake Ave., Seattle, WA 98101. Applicant's representative: Elwood Arneson (same address as applicant). Authority sought to operate as a common carrier, by motor vehicle, over irregular routes, transporting passengers and their baggage, express, newspapers and mail in the same vehicle with passengers, in round-trip special or charter operations, between Seattle on the one hand, and on the other hand, Anacortes, Washington, for traffic moving to and from Victoria, B.C., Canada, via the Washington State International Ferry between Anacortes, Washington, and Sidney, B.C., Canada, crossing the International Boundary between the United States and Canada near Sidney, B.C.

(1) Between Seattle and Anacortes, Washington, via Mukilteo, Whidbey Island and Fidalgo Island, and (2) between Seattle and Anacortes via I-5 to Mt. Vernon, State Highway 536 to Anacortes (with no service at Mt. Vernon, Washington.

NOTE.—The purpose of this republication is to correct the territorial description in this proceeding. Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Seattle, Wash.

No. MC 134295 (Sub-No. 1), filed June 30, 1977. Applicant: CASCADE CHARTER SERVICE LTD., 44255 Yale Road West, R.R. 1, Sardis, B.C., Canada VOX 1YO. Applicant's representative: Henry Winters, 15 South Grady Way No. 235, Renton, Wash. 98055. Authority sought to operate as a *common carrier* by motor vehicle, over irregular routes, transporting *Passengers and their baggage*, in charter operations, beginning and ending at ports of entry on the International Boundary line between the United States and Canada located in Washington (except Blaine) and extending to points in Oregon, Montana, Wyoming, South Dakota, Utah, Colorado, Arizona, New Mexico, Texas, Arkansas, Tennessee, Mississippi, Alabama, Georgia, Louisiana, and Florida.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Seattle, Wash.

No. MC 143427, filed June 27, 1977. Applicant: WINSTON LIMOUSINE SERVICE, INC., Box 43. Stony Brook, N.Y. 11790. Applicant's representative: Sidney J. Leshin, 575 Madison Avenue, New York, N.Y. 10022. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in special operations, in non-scheduled door to door service, limited to the transportation of not more than eleven passengers in any one vehicle, between Nassau and Suffolk County, N.Y., on the one hand, and, on the other Atlantic City, N.J.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Hauppauge, N.Y., or New York, N.Y.

No. MC 143444, filed June 30, 1977. Applicant: BOB L. HUNDEN, doing business as WHEELS EXPRESS, P.O. Box 8202, Anaheim, Calif. 92802. Applicant's representative: R. Y. SCHUREMAN, 1545 Wilshire Boulevard, Los Angeles, California 90017. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting *passengers and their baggage*, in special operations, between Bishop, Mammoth Lakes and Lee Vining, California, on the one hand, and on the other, Hawthorne, Nevada, as follows: From Bishop, California over U.S. Highway 395 to junction California Highway 203; thence over California Highway 203 to Mammoth Lakes, California; thence over California Highway 203 to junction U.S. Highway 395; thence over U.S. Highway 395 to junction California Highway 167; thence over California Highway 167 and Nevada Highway 31 to Hawthorne, Nevada, and return over the same route.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Carson City, Nevada.

No. MC 143459 (Sub-No. 1), filed July 1, 1977. Applicant: ARROW-POCONO LINES, INC., 81-14 Baxter Ave., Elmhurst, N.Y. 11373. Applicant's representative: Thomas F. X. Foley, P.O. Box 1409, 167 Fairfield Rd., Fairfield, N.J. 07006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, in the transportation of *Passengers and their baggage*, and unaccompanied baggage in the same vehicle with passengers in special and charter operations, in vehicles having a seating capacity not exceeding 11 passengers, and not including the driver, between New York, N.Y. and its commercial zone, and points in Carbon, Lehigh, Luzerne, Monroe, Northampton and Pike Counties, Pa., and South Sterling, Pa.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either Newark, N.J. or New York, N.Y.

FREIGHT FORWARDERS

No. FF 459 (Sub-No. 1), filed June 28, 1977. Applicant: RICHARDSON FORWARDING COMPANY, a corporation, 992 East Artesia Boulevard, Long Beach, California 90805. Applicant's representative: Alan F. Wohlstetter, 1700 K Street, N.W., Washington, D.C. 20006. Authority sought to engage in operation, in interstate and foreign commerce, as a *freight forwarder*, through the use of the facilities of common carriers by rail, motor, water and express, in the transportation of (a) *Used household goods and unaccompanied baggage*, and (b) *used automobiles*, between points in the United States (including Hawaii but excluding Alaska). Restricted in (b) to the transportation of export-import traffic.

NOTE.—If a hearing is deemed necessary, applicant requests that it be held at Los Angeles, California. The purpose of this application is to remove the import-export restriction with respect to used household goods and unaccompanied baggage in applicant's present Permit No. FF 459. Common control may be involved.

No. FF 499, filed August 1, 1977. Applicant: CAROLINA-PUERTO RICO, INC., 11521 Granite Street, Charlotte, N.C. 28217. Applicant's representative: William Q. Keenan, 277 Park Avenue, New York, N.Y. 10017. Authority sought to engage in operation, in interstate commerce, as a *freight forwarder*, through use of the facilities of common carriers by railroad and motor vehicle, in the transportation of *general commodities* (except Classes A and B explosives, used household goods as defined by the Commission, commodities in bulk, unaccompanied baggage, motor vehicles and commodities requiring refrigeration), between points in North Carolina, points in South Carolina in and north of McCormick, Greenwood, Saluda, Lexington, Calhoun, Clarendon, Florence, Marion and Horry Counties, points in Tennessee in and east of Bradley, McMinn, Loudon, Anderson, Knox, Grainger, Hawkins and Hancock Counties, points in Virginia in and south of Lee, Wise, Russell, Smyth, Wythe, Pulaski, Montgomery, Roanoke, Bedford, Campbell and Halifax Counties, on the one hand, and, on the other, all ports along the East Coast of the United States between (and including) Baltimore, Md., and Miami, Fla.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Charlotte, N.C.

FINANCE APPLICATIONS

NOTICE

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control through ownership of stock, or rail carriers or motor carriers pursuant to Sections 5(2) or 210a(b) of the Interstate Commerce Act.

An original and two copies of protests against the granting of the requested authority must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protests shall comply with Special Rules 240(c) or 240(d) of the Commission's General Rules of Practice (49 CFR 1100.240) and shall include a concise statement of protestant's interest in the proceeding. A copy of the protest shall be served concurrently upon applicant's representative, or applicant, if no representative is named.

No. MC-F-13022 (Amendment) (ONEIDA MOTOR FREIGHT, INC.—Purchase (Portion) — EASTERN FREIGHT WAYS, INC.), published in the December 2, 1976 issue of the FEDERAL REGISTER. Prior publication inadvertently omitted part of the authority to be purchased, and should be modified to reflect the operating rights as follows: General commodities, with exceptions as a common carrier over regular routes between North Bennington, Vt., and Albany, N.Y., serving the intermediate point of Bennington, Vt., and intermediate and off-route points in New York within 25 miles of Albany, N.Y. Between New York, N.Y., on the one hand, and, on the other, Buffalo, N.Y., the intermediate points of Albany, Amsterdam, Fonda, Rochester, St. Johnsville, Schenectady, Scotia, Syracuse, and Utica, N.Y., and the off route points of Canajoharie, Fort Plain, Fultonville, Gloversville, and Johnstown, N.Y. Bewteen Albany, N.Y., on the one hand, and, on the other, Rochester, N.Y., the intermediate point of St. Johnsville, N.Y., and the off route point of Johnstown, N.Y. Between Waterford, N.Y., and the intermediate point of Cohoes, N.Y., on the one hand, and, on the other, New York, N.Y. From Niagara Falls, N.Y., and the off route point of Solvay (Onondaga County), N.Y., to New York, N.Y. From New York, N.Y., to Binghamton, N.Y. Between Schenectady, N.Y., and Troy, N.Y., serving all intermediate points. Between Rensselaer, N.Y., and Troy, N.Y., serving all intermediate points. Between Rensselaer, N.Y., and Cohoes, N.Y., serving all intermediate points. Between Watervliet, N.Y., and Troy, N.Y., serving all intermediate points. Between points in New York, serving all intermediate points; and the off route points of Clinton, Oriskany Falls, Waterville, Franklin Springs, Manlius, Solvay, Honeoye Falls, Munnsville, Hamilton, Leonardsville, Union Springs, Owasco, Ovid, Lodi, Willard, Cedarville, Delmar, and Glenmont, N.Y. Irregular routes: Passengers and their baggage in charter operations, beginning and ending at points in Ashland County, Ohio, and extending to points in Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Missouri, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia, Holland Industries, Inc., holds no authority from this Commission. However, it owns all of the outstanding stock of Buckeye Charter Corp. who is authorized to operate as a common carrier in Ohio. Holland Industries, Inc., also has temporary control of Short Way Lines, Inc. in conjunction with separately filed application for permanent control. Short Way Lines, Inc. is authorized to operate as a common carrier in Ohio, Michigan and Indiana. Application has been filed for temporary authority under Section 210a(b).

OPERATING RIGHTS APPLICATION(S) DIRECTLY RELATED TO FINANCE PROCEEDINGS

NOTICE

The following operating rights application(s) are filed in connection with pending finance applications under Section 5(2) of the Interstate Commerce Act, or seek tacking and/or gateway elimination in connection with transfer applications under Section 212(b) of the Interstate Commerce Act.

An original and two copies of protests to the granting of the authorities must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protests shall comply with Special Rules 247(d) of the Commission's General Rules of Practice (49 CFR 1100.247) and include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon applicant's representative, or applicant if no representative is named.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

No. MC 118816 (Sub-No. 8), filed August 2, 1977. Applicant: MATERIALS TRANSPORT SERVICE, INC., 693 Knox Road, Wayne, Pa. 19087. Applicant's representative: Christian V. Graf, Esquire, 407 North Front Street, Harrisburg, Pa. 17101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (A) *Cement, in bulk, in tank vehicles*, (1) from the plantsite of The Whitehall Cement Manufacturing Company at Cementon, Pa., to New York, N.Y., and points in Connecticut, Massachusetts, Rhode Island, Maine, Vermont and New Hampshire; (2) from the plantsite of Coplay Cement Manufacturing Company at or near the Borough of Coplay, Pa., to New York, N.Y., and points in Connecticut, Massachusetts, Rhode Island, Maine, Vermont and New Hampshire; (3) from the plantsite of Coplay Cement Manufacturing Company (formerly Giant Portland Cement Company) at Egypt, Pa., to points in Connecticut, Massachusetts, Rhode Island, Maine, Vermont and New Hampshire; (4) from the plantsite of the Keystone Portland Cement Company in East Allen Township, Northampton County, Pa., to points in Connecticut, Massachusetts, Rhode Island, Maine, Vermont and New Hampshire; (5) from the plantsite of Hercules Cement Comany at Stockertown, Pa., to points in Connecticut, Massachusetts, Rhode Island, Maine, Vermont and New Hampshire; (6) from the plantsites of Penn-Dixie Cement Corporation near Nazareth, Pa., at or near Penn Allen, Pa., and near Bath, Pa., to points in Connecticut, Massachusetts, Rhode Island, Maine, Vermont and New Hampshire; (7) from the plantsite of Coplay Cement Manufacturing Company (formerly Nazareth Cement Comany), Nazareth, Pa., to points in Connecticut, Massachusetts, Rhode Island, Maine, Vermont and New Hampshire; (8) from the plantsite of Dragon Cement Company Division of Martin Marietta Company, at Northampton, Pa., to points in Connecticut, Massachusetts, Rhode Island, Maine, Vermont and New Hampshire; and (B) *cement, in bags*, from the aforementioned plantsites to points in Connecticut, New York and Massachusetts within one hundred fifty (150) miles of Rosendale, N.Y.

NOTE.—The instant Application is directly related to the Application in No. MC–F–13297, seeking approval of the purchase by Applicant of Certificate No. MC 103490, Sub 36, Sheet 5, issued to Provan Transport Corp. The purpose of the instant Application is to eliminate Ulster County, N.Y., on part (A) of the Application and the Village of Rosendale, N.Y., and points within two (2) miles of Rosendale as to part (B) of the Application. This is a gateway elimination Application in connection with the combined operations of Applicant and Provan Transport Corp. and is to receive direct authorization from and to the points involved in connection therewith. If a hearing is deemed necessary, Applicant requests it be held at Harrisburg, Pa. Notice of the application filing in MC–F–13297 appears in a prior section of this Federal Register issue.

MOTOR CARRIER ALTERNATE ROUTES DEVIATIONS

NOTICE

The following letter-notices to operate over deviation routes for operating convenience only have been filed with the Commission under the Deviation Rules—Motor Carrier of Property (49 CFR 1042.4(c)(11)).

Protests against the use of any proposed deviation route herein described may be filed with the Commission in the manner and form provided in such rules at any time, but will not operate to stay commencement of the proposed operations unless filed within 30 days from the date of this FEDERAL REGISTER notice.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its request.

MOTOR CARRIERS OF PROPERTY

No. MC 2202 (Deviation No. 161), ROADWAY EXPRESS, INC., P.O. Box 471, 1077 Gorge Blvd., Akron, Ohio 44309, filed August 4, 1977. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Hillsboro, Ill., over Illinois Highway 127 to junction Illinois Highway 185, thence over Illinois Highway 185 to Vandalia, Ill., and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Hillsboro,

V42 N160 AUG 18 77 UM

Ill., over Illinois Highway 16 to junction U.S. Highway 45, thence over U.S. Highway 45 to junction U.S. Highway 40, thence over U.S. Highway 40 to Vandalia, Ill., and return over the same route.

No. MC 35628 (Deviation No. 30), INTERSTATE MOTOR FREIGHT SYSTEM, 134 Grandville Ave., S.W., Grand Rapids, Mich. 49502, filed December 13, 1976, as amended. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From E. St. Louis, Ill., over Interstate Highway 64 to junction Illinois Highway 1, thence over Illinois Highway 1 to junction U.S. Highway 460 (also designated as Illinois Highway 14) at Crossville, Ill., thence over U.S. Highway 460 to junction U.S. Highway 41, thence over U.S. Highway 41 to junction Kentucky Pennyrile Parkway, thence over Kentucky Pennyrile Parkway to junction Kentucky Audubon Parkway, thence over Kentucky Audubon Parkway to junction U.S. Highway By-Pass 60, thence over U.S. Highway By-Pass 60 to junction Kentucky Green River Parkway, thence over Kentucky Green River Parkway to junction U.S. Highway 231 near Bowling Green, Ky., thence over U.S. Highway 231 to junction U.S. Highway 31W at Bowling Green, Ky., and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From St. Louis, Mo-E. St. Louis, Ill., over U.S. Highway 50 to Vincennes, Ind., thence over U.S. Highway 150 to Louisville, Ky., thence over U.S. Highway 31W to Bowling Green, Ky., and return over the same route.

No. MC 35628 (Deviation No. 31), INTERSTATE MOTOR FREIGHT SYSTEM, 134 Grandville Ave., S.W., Grand Rapids, Mich. 49502, filed December 17, 1976, as amended. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over deviation routes as follows: (1) From E. St. Louis, Ill., over Interstate Highway 64 to junction Illinois Highway 1, thence over Illinois Highway 1 to junction U.S. Highway 460 (also designated as Illinois Highway 14) at Crossville, Ill., thence over U.S. Highway 460 to junction U.S. Highway 41, thence over U.S. Highway 41 to junction Kentucky Pennyrile Parkway, thence over Kentucky Pennyrile Parkway to junction U.S. Highway 41 near Hopkinsville, Ky., thence over U.S. Highway 41 to junction U.S. Highway 79, thence over U.S. Highway 79 to junction Interstate Highway 24, thence over Interstate Highway 24 to junction U.S. Highway 31 in Nashville, Tenn., and (2) From E. St. Louis, Ill., over the routes described in (1) above to junction Interstate Highway 24, thence over Interstate Highway 24 to junction Tennessee Highway 49, thence over Tennessee Highway 49 to junction U.S. Highway 41A, thence over U.S. Highway 41A to junction U.S. Highway 31 in Nashville, Tenn., and return over the same routes for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From St. Louis, Mo.-E. St. Louis, Ill., over U.S. Highway 50 to Vincennes, Ind., thence over U.S. Highway 150 to Louisville, Ky., thence over U.S. Highways 31E or 31W to Washville, Tenn., and return over the same route.

No. MC 35628 (Deviation No. 32), INTERSTATE MOTOR FREIGHT SYSTEM, 134 Grandville Ave., SW., Grand Rapids, Mich. 49502, filed January 11, 1977, as amended. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over deviation routes as follows: (1) From E. St. Louis, Ill., over Interstate Highway 64 to junction Interstate Highway 75, thence over Interstate Highway 75 to Knoxville, Tenn., (2) From E. St. Louis, Ill., over Interstate Highway 64 to junction ByPass Interstate Highway 264, thence over ByPass Interstate Highway 264 around Louisville, Ky., to junction Interstate Highway 64, thence over Interstate Highway 64 to junction Interstate Highway 75, thence over Interstate Highway 75 to Knoxville, Tenn., and (3) From Nashville, Tenn., over Interstate Highway 40 to Knoxville, Tenn., and return over the same routes for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over pertinent service routes as follows: (1) From St. Louis, Mo.-E. St. Louis, Ill., over U.S. Highway 50 to Vincennes, Ind., thence over U.S. Highway 150 to Louisville, Ky., thence over U.S. Highway 31E to Bardstown, Ky., thence over U.S. Highway 62 to Versailles, Ky., thence over U.S. Highway 60 to Lexington, Ky., thence over U.S. Highway 25 to Livingston, Ky., thence over Kentucky Highway 490 to junction U.S. Highway 25, thence over U.S. Highway 25 to Corbin, Ky., thence over U.S. Highway 25W to Knoxville, Tenn., and (2) From Nashville, Tenn., over U.S. Highway 41 to Chattanooga, Tenn., thence over U.S. Highway 11 to Knoxville, Tenn., and return over the same routes.

No. MC 76032 (Deviation No. 36), NAVAJO FREIGHT LINES, INC., 1205 S. Platte River Drive, Denver, Colo. 80223, filed July 26, 1977. Carrier proposes to operate as a *common carrier* by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Los Angeles, Calif., over U.S. Highway 101 to junction Interstate Highway 8, thence over Interstate Highway 8 to junction Interstate Highway 10, thence over Interstate Highway 10 to El Paso, Tex., and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities over a pertinent service route as follows: From Los Angeles, Calif., over U.S. Highway 60 to Wickenburg, Ariz., thence over U.S. Highway 89 to junction Alternate U.S. Highway 89, thence over Alternate U.S. Highway 89 to junction U.S. Highway 66 at Flagstaff, Ariz., thence over U.S. Highway 66 to junction U.S. Highway 84, thence over U.S. Highway 84 to Ft. Sumner, New Mexico, thence over New Mexico Highway 20 to junction U.S. Highway 285, thence over U.S. Highway 285 to Roswell, N. Mex., thence over U.S. Highway 70 to Tularosa, N. Mex., thence over U.S. Highway 54 to El Paso, Tex., and return over the same route.

By the Commission,

H. G. HOMME, JR.,
Acting Secretary.

1

[MA-24 amending M-43 8/12/77]

CIVIL AERONAUTICS BOARD.

Notice of deletion of item from August 16, 1977 meeting agenda; revised agenda.

TIME AND DATE: 10 a.m., August 16, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 20. Docket 28196, California-Alberta Route Proceeding, Order on Discretionary Review (Memo No. 7332, OGC, BE).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, The Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: Vice Chairman O'Melia and Member West have expressed an interest in item 20 on the August 16, 1977 meeting. However, these Members will not be able to attend this meeting. This item will be rescheduled at a time which permits the attendance of Vice Chairman O'Melia and Member West. The following Board Members have voted that agency business requires the deletion of item 20, Docket 28196, California-Alberta Route Proceeding, order on discretionary review, from the agenda of the August 16, 1977 meeting and that no earlier announcement of the deletion was possible.

Chairman Alfred E. Kahn
Vice Chairman Richard J. O'Melia
Member G. Joseph Minetti
Member Lee R. West

[S-1129-77 Filed 8-15-77;3:45 pm]

2

[MA-23 amending M-43 8/12/77]

CIVIL AERONAUTICS BOARD.

Notice of deletion of item from August 16, 1977 meeting agenda; revised agenda.

TIME AND DATE: 10 a.m., August 16, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 19. Docket 30182, Iowa Illinois-Atlanta Route Proceeding. Order on reconsideration and consolidation (Memo No. 6950-A, BLJ, OGC).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, The Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: At the August 11, 1977 Board Meeting the following Members voted that agency business requires the deletion of Item 19, Docket 30182, order on reconsideration and consolidation in the Iowa/Illinois-Atlanta Route Proceeding, from the August 16, 1977 Meeting agenda because one Member suggested substantial revisions to the draft order:

Chairman Alfred E. Kahn
Member G. Joseph Minetti
Member Elizabeth E. Bailey

STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Revision to Reference Method 1-8

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 754-5]

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Revision to Reference Methods 1–8

AGENCY: Environmental Protection Agency.

ACTION: Final Rule.

SUMMARY: This rule revises Reference Methods 1 through 8, the detailed requirements used to measure emissions from affected facilities to determine whether they are in compliance with a standard of performance. The methods were originally promulgated December 23, 1971, and since that time several revisions became apparent which would clarify, correct and improve the methods. These revisions make the methods easier to use, and improve their accuracy and reliability.

EFFECTIVE DATE: September 19, 1977.

ADDRESSES: Copies of the comment letters are available for public inspection and copying at the U.S. Environmental Protection Agency, Public Information Reference Unit (EPA Library), Room 2922, 401 M Street, S.W., Washington, D.C. 20460. A summary of the comments and EPA's responses may be obtained upon written request from the EPA Public Information Center (PM–215), 401 M Street, S.W., Washington, D.C. 20460 (specify "Public Comment Summary: Revisions to Reference Methods 1–8 in Appendix A of Standards of Performance for New Stationary Sources").

FOR FURTHER INFORMATION CONTACT:

Don R. Goodwin, Emission Standards and Engineering Division, Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone No. 919–541–5271.

SUPPLEMENTARY INFORMATION: The amendments were proposed on June 8, 1976 (40 FR 23060). A total of 55 comment letters were received during the comment period—34 from industry, 15 from governmental agencies, and 6 from other interested parties. They contained numerous suggestions which were incorporated in the final revisions.

Changes common to all eight of the reference methods are: (1) the clarification of procedures and equipment specifications resulting from the comments, (2) the addition of guidelines for alternative procedures and equipment to make prior approval of the Administrator unnecessary and (3) the addition of an introduction to each reference method discussing the general use of the method and delineating the procedure for using alternative methods and equipment.

Specific changes to the methods are:

METHOD 1

1. The provision for the use of more than two traverse diameters, when specified by the Administrator, has been deleted. If one traverse diameter is in a plane containing the greatest expected concentration variation, the intended purpose of the deleted paragraph will be fulfilled.

2. Based on recent data from Fluidyne (Particulate Sampling Strategies for Large Power Plants Including Nonuniform Flow, EPA–600/2–76–170, June 1976) and Entropy Environmentalists (Determination of the Optimum Number of Traverse Points: An Analysis of Method 1 Criteria (draft), Contract No. 68–01–3172), the number of traverse points for velocity measurements has been reduced and the 2:1 length to width ratio requirement for cross-sectional layout of rectangular ducts has been replaced by a "balanced matrix" scheme.

3. Guidelines for sampling in stacks containing cyclonic flow and stacks smaller than about 0.31 meter in diameter or 0.071 m^2 in cross-sectional area will be published at a later date.

4. Clarification has been made as to when a check for cyclonic flow is necessary; also, the suggested procedure for determination of unacceptable flow conditions has been revised.

METHOD 2

1. The calibration of certain pitot tubes has been made optional. Appropriate construction and application guidelines have been included.

2. A detailed calibration procedure for temperature gauges has been included.

3. A leak check procedure for pitot lines has been included.

METHOD 3

1. The applicability of the method has been confined to fossil-fuel combustion processes and to other processes where it has been determined that components other than O_2, CO_2, CO, and N_2 are not present in concentrations sufficient to affect the final results.

2. Based on recent research information (Particulate Sampling Strategies for Large Power Plants Including Nonuniform Flow, EPA–600/2–76–170, June 1976), the requirement for proportional sampling has been dropped and replaced with the requirement for constant rate sampling. Proportional and constant rate sampling have been found to give essentially the same result.

3. The "three consecutive" requirement has been replaced by "any three" for the determination of molecular weight, CO_2 and O_2.

4. The equation for excess air has been revised to account for the presence of CO.

5. A clearer distinction has been made between molecular weight determination and emission rate correction factor determination.

6. Single point, integrated sampling has been included.

METHOD 4

1. The sampling time of 1 hour has been changed to a total sampling time which will span the length of time the pollutant emission rate is being determined or such time as specified in an applicable subpart of the standards.

2. The requirement for proportional sampling has been dropped and replaced with the requirement for constant rate sampling.

3. The leak check before the test run has been made optional; the leak check after the run remains mandatory.

METHOD 5

1. The following alternatives have been included in the method:

a. The use of metal probe liners.

b. The use of other materials of construction for filter holders and probe liner parts.

c. The use of polyethylene wash bottles and sample storage containers.

d. The use of desiccants other than silica gel or calcium sulfate, when appropriate.

e. The use of stopcock grease other than silicone grease, when appropriate.

f. The drying of filters and probe-filter catches at elevated temperatures, when appropriate.

g. The combining of the filter and probe washes into one container.

2. The leak check prior to a test run has been made optional. The post-test leak check remains mandatory. A method for correcting sample volume for excessive leakage rates has been included.

3. Detailed leak check and calibration procedures for the metering system have been included.

METHOD 6

1. Possible interfering agents of the method have been delineated.

2. The options of: (a) using a Method 8 impinger system, or (b) determining SO_2 simultaneously with particulate matter, have been included in the method.

3. Based on recent research data, the requirement for proportional sampling has been dropped and replaced with the requirement for constant rate sampling.

4. Tests have shown that isopropanol obtained from commercial sources occasionally has peroxide impurities that will cause erroneously low SO_2 measurements. Therefore, a test for detecting peroxides in isopropanol has been included in the method.

5. The leak check before the test run has been made optional; the leak check after the run remains mandatory.

6. A detailed calibration procedure for the metering system has been included in the method.

METHOD 7

1. For variable wave length spectrophotometers, a scanning procedure for determining the point of maximum absorbance has been incorporated as an option.

METHOD 8

1. Known interfering compounds have been listed to avoid misapplication of the method.

2. The determination of filterable particulate matter (including acid mist) simultaneously with SO_2 and SO_3 has been allowed where applicable.

3. Since occassionally some commercially available quantities of isopropanol have peroxide impurities that will cause erroneously high sulfuric acid mist measurements, a test for peroxides in isopropanol has been included in the method.

4. The gravimetric technique for moisture content (rather than volumetric) has been specified because a mixture of isopropyl alcohol and water will have a volume less than the sum of the volumes of its content.

5. A closer correspondence has been made between similar parts of Methods 8 and 5.

MISCELLANEOUS

Several commenters questioned the meaning of the term "subject to the approval of the Administrator" in relation to using alternate test methods and procedures. As defined in § 60.2 of subpart A, the "Administrator" includes any authorized representative of the Administrator of the Environmental Protection Agency. Authorized representatives are EPA officials in EPA Regional Offices or State, local, and regional governmental officials who have been delegated the responsibility of enforcing regulations under 40 CFR 60. These officials in consultation with other staff members familiar with technical aspects of source testing will render decisions regarding acceptable alternate test procedures.

In accordance with section 117 of the Act, publication of these methods was preceded by consultation with appropriate advisory committees, independent experts, and Federal departments and agencies.

(Secs. 111, 114 and 301(a) of the Clean Air Act, sec. 4(a) of Pub. L. No. 91–604, 84 Stat. 1683; sec. 4(a) of Pub. L. No. 91–604, 84 Stat. 1687; sec. 2 of Pub. L. No. 90–148, 81 Stat. 504 [42 U.S.C. 1857c–6, 1857c–9, 1857g(a)].)

NOTE.—The Environmental Protection Agency has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Analysis under Executive Orders 11821 and 11949 and OMB Circular A–107.

Dated: August 10, 1977.

DOUGLAS M. COSTLE,
Administrator.

Part 60 of Chapter I of Title 40 of the Code of Federal Regulations is amended by revising Methods 1 through 8 of Appendix A—Reference Methods as follows:

APPENDIX A—REFERENCE METHODS

The reference methods in this appendix are referred to in § 60.8 (Performance Tests) and § 60.11 (Compliance With Standards and Maintenance Requirements) of 40 CFR Part 60, Subpart A (General Provisions). Specific uses of these reference methods are described in the standards of performance contained in the subparts, beginning with Subpart D.

Within each standard of performance, a section titled "Test Methods and Procedures" is provided to (1) identify the test methods applicable to the facility subject to the respective standard and (2) identify any special instructions or conditions to be followed when applying a method to the respective facility. Such instructions (for example, establish sampling rates, volumes, or temperatures) are to be used either in addition to, or as a substitute for procedures in a reference method. Similarly, for sources subject to emission monitoring requirements, specific instructions pertaining to any use of a reference method are provided in the subpart or in Appendix B.

Inclusion of methods in this appendix is not intended as an endorsement or denial of their applicability to sources that are not subject to standards of performance. The methods are potentially applicable to other sources; however, applicability should be confirmed by careful and appropriate evaluation of the conditions prevalent at such sources.

The approach followed in the formulation of the reference methods involves specifications for equipment, procedures, and performance. In concept, a performance specification approach would be preferable in all methods because this allows the greatest flexibility to the user. In practice, however, this approach is impractical in most cases because performance specifications cannot be established. Most of the methods described herein, therefore, involve specific equipment specifications and procedures, and only a few methods in this appendix specify performance criteria.

Changes to the reference methods should not necessarily affect the validity of the results and it is recognized that alternative and equivalent methods exist. Section 60.8 provides authority for the Administrator to specify or approve (1) equivalent methods, (2) alternative methods, and (3) minor changes in the methodology of the reference methods. It should be clearly understood that unless otherwise identified all such methods and changes must have prior approval of the Administrator. Anyone employing such methods or deviations from the reference methods without obtaining prior approval does so at the risk of subsequent disapproval and retesting with approved methods.

Within the reference methods, certain specific equipment or procedures are recognized as being acceptable or potentially acceptable and are specifically identified in the methods. The items identified as acceptable options may be used without approval but must be identified in the test report. The potentially approvable options are cited as "subject to the approval of the Administrator" or as "or equivalent." Such potentially approvable techniques or alternatives may be used at the discretion of the owner without prior approval. However, detailed descriptions for applying these potentially approvable techniques or alternatives are not provided in the reference methods. Also, the potentially approvable options are not necessarily acceptable in all applications. Therefore, an owner electing to use such potentially approvable techniques or alternatives is responsible for: (1) assuring that the techniques or alternatives are in fact applicable and are properly executed; (2) including a written description of the alternative method in the test report (the written method must be clear and must be capable of being performed without additional instruction, and the degree of detail should be similar to the detail contained in the reference methods; and (3) providing any rationale or supporting data necessary to show the validity of the alternative in the particular application. Failure to meet these requirements can result in the Administrator's disapproval of the alternative.

METHOD 1—SAMPLE AND VELOCITY TRAVERSES FOR STATIONARY SOURCES

1. *Principle and Applicability*

1.1 Principle. To aid in the representative measurement of pollutant emissions and/or total volumetric flow rate from a stationary source, a measurement site where the effluent stream is flowing in a known direction is selected, and the cross-section of the stack is divided into a number of equal areas. A traverse point is then located within each of these equal areas.

1.2 Applicability. This method is applicable to flowing gas streams in ducts, stacks, and flues. The method cannot be used when: (1) flow is cyclonic or swirling (see Section 2.4), (2) a stack is smaller than about 0.30 meter (12 in.) in diameter, or 0.071 m^2 (113 $in.^2$) in cross-sectional area, or (3) the measurement site is less than two stack or duct diameters downstream or less than a half diameter upstream from a flow disturbance.

The requirements of this method must be considered before construction of a new facility from which emissions will be measured; failure to do so may require subsequent alterations to the stack or deviation from the standard procedure. Cases involving variants are subject to approval by the Administrator, U.S. Environmental Protection Agency.

2. *Procedure*

2.1 Selection of Measurement Site. Sampling or velocity measurement is performed at a site located at least eight stack or duct diameters downstream and two diameters upstream from any flow disturbance such as a bend, expansion, or contraction in the stack, or from a visible flame. If necessary, an alternative location may be selected, at a position at least two stack or duct diameters downstream and a half diameter upstream from any flow disturbance. For a rectangular cross section, an equivalent diameter (D_e) shall be calculated from the following equation, to determine the upstream and downstream distances:

$$D_e = \frac{2LW}{L+W}$$

V 42 160 AUG 18 77 UM

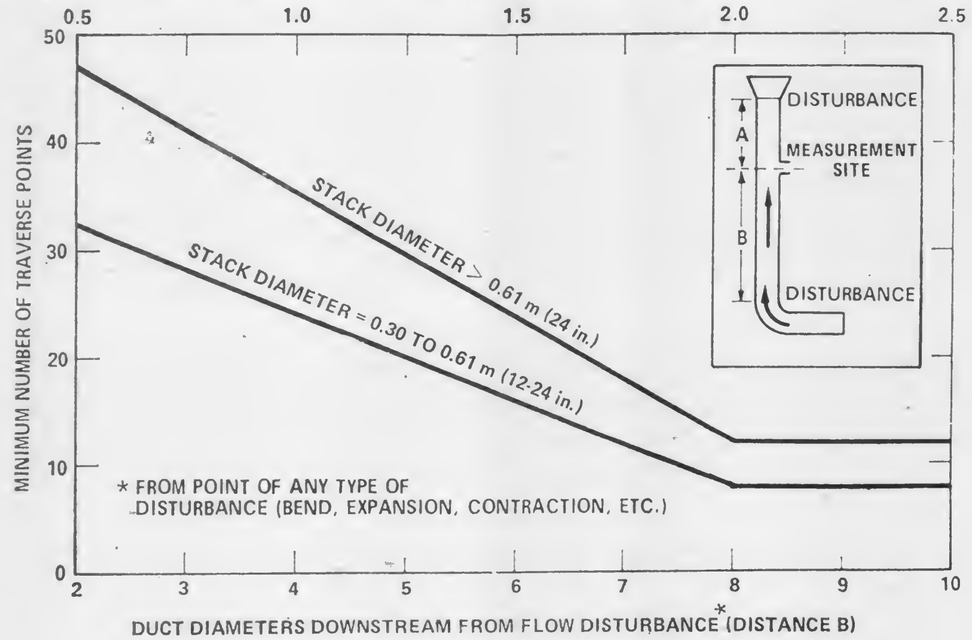

Figure 1-1. Minimum number of traverse points for particulate traverses.

where L=length and W=width.

2.2 Determining the Number of Traverse Points.

2.2.1 Particulate Traverses. When the eight- and two-diameter criterion can be met, the minimum number of traverse points shall be: (1) twelve, for circular or rectangular stacks with diameters (or equivalent diameters) greater than 0.61 meter (24 in.); (2) eight, for circular stacks with diameters between 0.30 and 0.61 meter (12-24 in.); (3) nine, for rectangular stacks with equivalent diameters between 0.30 and 0.61 meter (12-24 in.).

When the eight- and two-diameter criterion cannot be met, the minimum number of traverse points is determined from Figure 1-1. Before referring to the figure, however, determine the distances from the chosen measurement site to the nearest upstream and downstream disturbances, and divide each distance by the stack diameter or equivalent diameter, to determine the distance in terms of the number of duct diameters. Then, determine from Figure 1-1 the minimum number of traverse points that corresponds: (1) to the number of duct diameters upstream; and (2) to the number of diameters downstream. Select the higher of the two minimum numbers of traverse points, or a greater value, so that for circular stacks the number is a multiple of 4, and for rectangular stacks, the number is one of those shown in Table 1-1.

TABLE 1-1. *Cross-sectional layouts for rectangular stacks*

Number of traverse points	Matrix layout
12	3×4
16	4×4
20	5×4
25	5×5
30	6×5
35	6×6
42	7×6
49	7×7

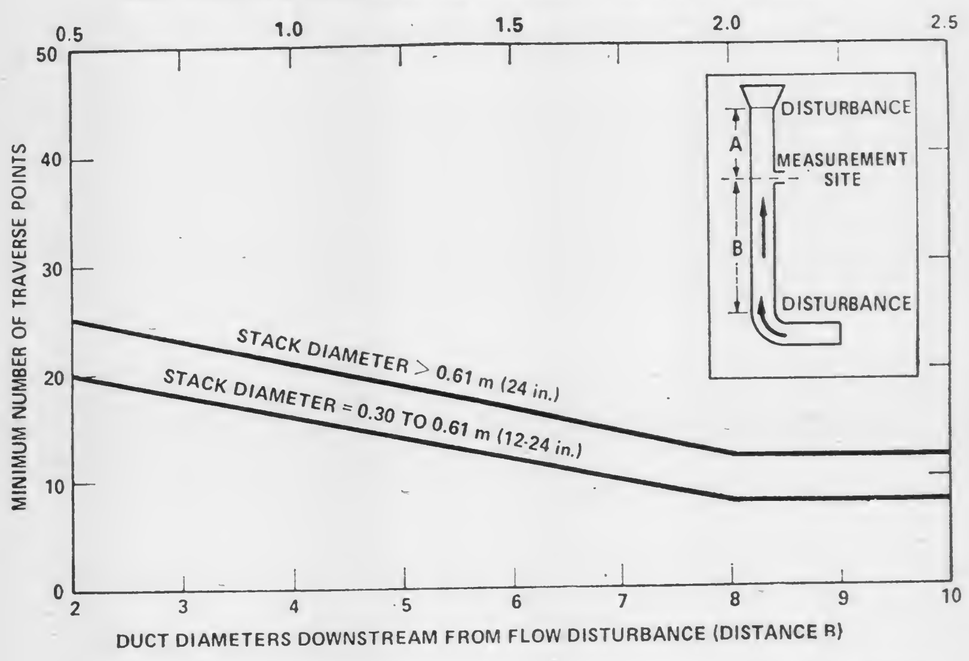

Figure 1-2. Minimum number of traverse points for velocity (nonparticulate) traverses.

2.2.2 Velocity (Non-Particulate) Traverses. When velocity or volumetric flow rate is to be determined (but not particulate matter), the same procedure as that for particulate traverses (Section 2.2.1) is followed, except that Figure 1-2 may be used instead of Figure 1-1.

2.3 Cross-Sectional Layout and Location of Traverse Points.

2.3.1 Circular Stacks. Locate the traverse points on two perpendicular diameters according to Table 1-2 and the example shown in Figure 1-3. Any equation (for examples, see Citations 2 and 3 in the Bibliography) that gives the same values as those in Table 1-2 may be used in lieu of Table 1-2.

For particulate traverses, one of the diameters must be in a plane containing the greatest expected concentration variation, e.g., after bends, one diameter shall be in the plane of the bend. This requirement becomes less critical as the distance from the disturbance increases; therefore, other diameter locations may be used, subject to approval of the Administrator.

In addition, for stacks having diameters greater than 0.61 m (24 in.) no traverse points shall be located within 2.5 centimeters (1.00 in.) of the stack walls; and for stack diameters equal to or less than 0.61 m (24 in.), no traverse points shall be located within 1.3 cm (0.50 in.) of the stack walls. To meet these criteria, observe the procedures given below.

2.3.1.1 Stacks With Diameters Greater Than 0.61 m (24 in.). When any of the traverse points as located in Section 2.3.1 fall within 2.5 cm (1.00 in.) of the stack walls, relocate them away from the stack walls to: (1) a distance of 2.5 cm (1.00 in.); or (2) a distance equal to the nozzle inside diameter, whichever is larger. These relocated traverse points (on each end of a diameter) shall be the "adjusted" traverse points.

Whenever two successive traverse points are combined to form a single adjusted traverse point, treat the adjusted point as two separate traverse points, both in the sampling (or velocity measurement) procedure, and in recording the data.

TRAVERSE POINT	DISTANCE, % of diameter
1	4.4
2	14.7
3	29.5
4	70.5
5	85.3
6	95.6

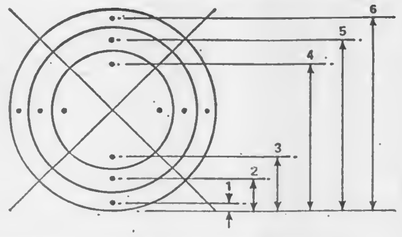

Figure 1-3. Example showing circular stack cross section divided into 12 equal areas, with location of traverse points indicated.

Table 1-2. LOCATION OF TRAVERSE POINTS IN CIRCULAR STACKS

20										98.7	94.0	89.5
21											96.5	92.1
22											98.9	94.5
23												96.8
24												98.9

2.3.1.2 Stacks With Diameters Equal to or Less Than 0.61 m (24 in.). Follow the procedure in Section 2.3.1.1, noting only that any "adjusted" points should be relocated away from the stack walls to: (1) a distance of 1.3 cm (0.50 in.); or (2) a distance equal to the nozzle inside diameter, whichever is larger.

2.3.2 Rectangular Stacks. Determine the number of traverse points as explained in Sections 2.1 and 2.2 of this method. From Table 1-1, determine the grid configuration. Divide the stack cross-section into as many equal rectangular elemental areas as traverse points, and then locate a traverse point at the centroid of each equal area according to the example in Figure 1-4.

The situation of traverse points being too close to the stack walls is not expected to arise with rectangular stacks. If this problem should ever arise, the Administrator must be contacted for resolution of the matter.

2.4 Verification of Absence of Cyclonic Flow. In most stationary sources, the direction of stack gas flow is essentially parallel to the stack walls. However, cyclonic flow may exist (1) after such devices as cyclones and inertial demisters following venturi scrubbers, or (2) in stacks having tangential inlets or other duct configurations which tend to induce swirling; in these instances, the presence or absence of cyclonic flow at the sampling location must be determined. The following techniques are acceptable for this determination.

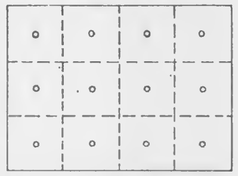

Figure 1-4. Example showing rectangular stack cross section divided into 12 equal areas, with a traverse point at centroid of each area.

Level and zero the manometer. Connect a Type S pitot tube to the manometer. Position the Type S pitot tube at each traverse point, in succession, so that the planes of the face openings of the pitot tube are perpendicular to the stack cross-sectional plane; when the Type S pitot tube is in this position, it is at "0° reference." Note the differential pressure (Δp) reading at each traverse point. If a null (zero) pitot reading is obtained at 0° reference at a given traverse point, an acceptable flow condition exists at that point. If the pitot reading is not zero at 0° reference, rotate the pitot tube (up to ±90° yaw angle), until a null reading is obtained. Carefully determine and record the value of the rotation angle (α) to the nearest degree. After the null technique has been applied at each traverse point, calculate the average of the absolute values of α; assign α values of 0° to those points for which no rotation was required, and include these in the overall average. If the average value of α is greater than 10°, the overall flow condition in the stack is unacceptable and alternative methodology, subject to the approval of the Administrator, must be used to perform accurate sample and velocity traverses.

METHOD 2—DETERMINATION OF STACK GAS VELOCITY AND VOLUMETRIC FLOW RATE (TYPE S PITOT TUBE)

1. *Principle and Applicability*

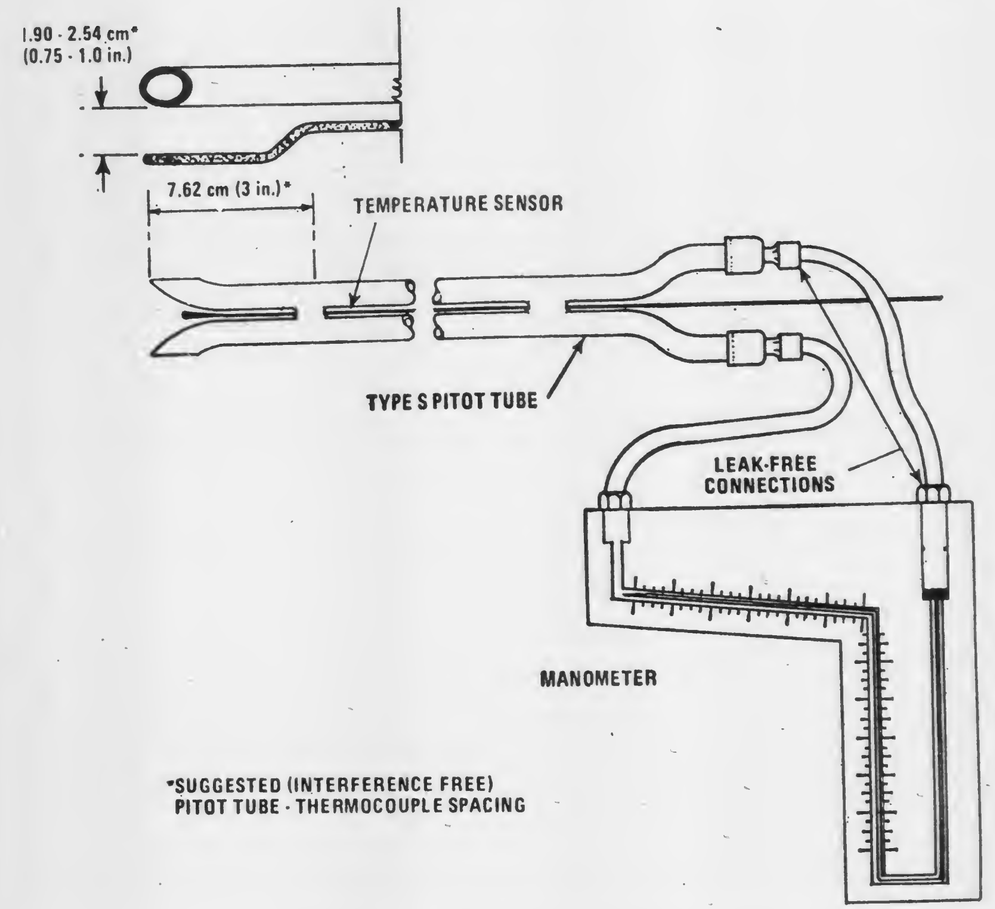
1.1 Principle. The average gas velocity in a stack is determined from the gas density and from measurement of the average velocity head with a Type S (Stausscheibe or reverse type) pitot tube.

1.2 Applicability. This method is applicable for measurement of the average velocity of a gas stream and for quantifying gas flow.

This procedure is not applicable at measurement sites which fail to meet the criteria of Method 1, Section 2.1. Also, the method cannot be used for direct measurement in cyclonic or swirling gas streams; Section 2.4 of Method 1 shows how to determine cyclonic or swirling flow conditions. When unacceptable conditions exist, alternative procedures, subject to the approval of the Administrator, U.S. Environmental Protection Agency, must be employed to make accurate flow rate determinations; examples of such alternative procedures are: (1) to install straightening vanes; (2) to calculate the total volumetric flow rate stoichiometrically, or (3) to move to another measurement site at which the flow is acceptable.

2. *Apparatus*

Specifications for the apparatus are given below. Any other apparatus that has been demonstrated (subject to approval of the Administrator) to be capable of meeting the specifications will be considered acceptable.



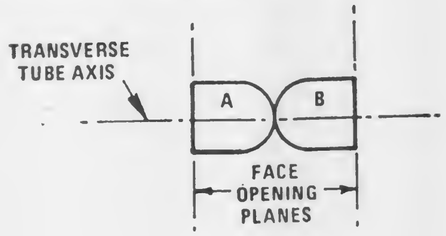


Figure 2-1. Type S pitot tube manometer assembly.

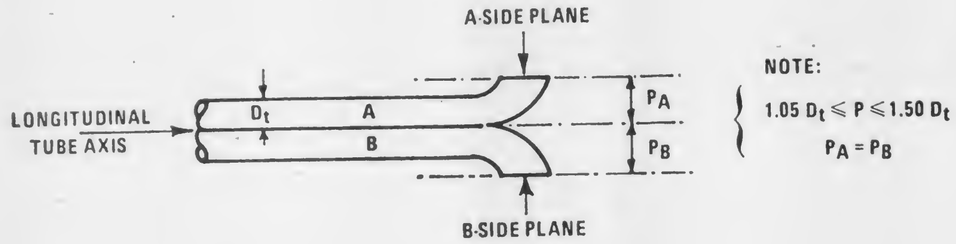

2.1 Type S Pitot Tube. The Type S pitot tube (Figure 2-1) shall be made of metal tubing (e.g., stainless steel). It is recommended that the external tubing diameter (dimension D_t, Figure 2-2b) be between 0.48 and 0.95 centimeters (3/16 and 3/8 inch). There shall be an equal distance from the base of each leg of the pitot tube to its face-opening plane (dimensions P_A and P_B, Figure 2-2b); it is recommended that this distance be between 1.05 and 1.50 times the external tubing diameter. The face openings of the pitot tube shall, preferably, be aligned as shown in Figure 2-2; however, slight misalignments of the openings are permissible (see Figure 2-3).

The Type S pitot tube shall have a known coefficient, determined as outlined in Section 4. An identification number shall be assigned to the pitot tube; this number shall be permanently marked or engraved on the body of the tube.

V 42 160 AUG 18 77 UM

(g)

Figure 2-3. Types of face-opening misalignment that can result from field use or improper construction of Type S pitot tubes. These will not affect the baseline value of $\bar{C}p(s)$ so long as α_1 and $\alpha_2 < 10^o$, β_1 and $\beta_2 < 5^o$. $z < 0.32$ cm (1/8 in.) and $w < 0.08$ cm (1/32 in.) (citation 11 in Section 6).

V42160 AUG 18 77 UM

A standard pitot tube may be used instead of a Type S, provided that it meets the specifications of Sections 2.7 and 4.2; note, however, that the static and impact pressure holes of standard pitot tubes are susceptible to plugging in particulate-laden gas streams. Therefore, whenever a standard pitot tube is used to perform a traverse, adequate proof must be furnished that the openings of the pitot tube have not plugged up during the traverse period; this can be done by taking a velocity head (Δp) reading at the final traverse point, cleaning out the impact and static holes of the standard pitot tube by "back-purging" with pressurized air, and then taking another Δp reading. If the Δp readings made before and after the air purge are the same (± 5 percent), the traverse is acceptable. Otherwise, reject the run. Note that if Δp at the final traverse point is unsuitably low, another point may be selected. If "back-purging" at regular intervals is part of the procedure, then comparative Δp readings shall be taken, as above, for the last two back purges at which suitably high Δp readings are observed.

2.2 Differential Pressure Gauge. An inclined manometer or equivalent device is used. Most sampling trains are equipped with a 10-in. (water column) inclined-vertical manometer, having 0.01-in. H_2O divisions on the 0- to 1-in. inclined scale, and 0.1-in. H_2O divisions on the 1- to 10-in. vertical scale. This type of manometer (or other gauge of equivalent sensitivity) is satisfactory for the measurement of Δp values as low as 1.3 mm (0.05 in.) H_2O. However, a differential pressure gauge of greater sensitivity shall be used (subject to the approval of the Administrator), if any of the following is found to be true: (1) the arithmetic average of all Δp readings at the traverse points in the stack is less than 1.3 mm (0.05 in.) H_2O; (2) for traverses of 12 or more points, more than 10 percent of the individual Δp readings are below 1.3 mm (0.05 in.) H_2O; (3) for traverses of fewer than 12 points, more than one Δp reading is below 1.3 mm (0.05 in.) H_2O. Citation 18 in Section 6 describes commercially available instrumentation for the measurement of low-range gas velocities.

As an alternative to criteria (1) through (3) above, the following calculation may be performed to determine the necessity of using a more sensitive differential pressure gauge:

$$T = \frac{\sum_{i=1}^{n} \sqrt{\Delta p_i + K}}{\sum_{i=1}^{n} \sqrt{\Delta p_i}}$$

where:

Δp_i = Individual velocity head reading at a traverse point, mm H_2O (in. H_2O).

n = Total number of traverse points.

K = 0.13 mm H_2O when metric units are used and 0.005 in H_2O when English units are used.

If T is greater than 1.05, the velocity head data are unacceptable and a more sensitive differential pressure gauge must be used.

NOTE.—If differential pressure gauges other than inclined manometers are used (e.g., magnehelic gauges), their calibration must be checked after each test series. To check the calibration of a differential pressure gauge, compare Δp readings of the gauge with those of a gauge-oil manometer at a minimum of three points, approximately representing the range of Δp values in the stack. If, at each point, the values of Δp as read by the differential pressure gauge and gauge-oil manometer agree to within 5 percent, the differential pressure gauge shall be considered to be in proper calibration. Otherwise, the test series shall either be voided, or procedures to adjust the measured Δp values and final results shall be used, subject to the approval of the Administrator.

2.3 Temperature Gauge. A thermocouple, liquid-filled bulb thermometer, bimetallic thermometer, mercury-in-glass thermometer, or other gauge capable of measuring temperature to within 1.5 percent of the minimum absolute stack temperature shall be used. The temperature gauge shall be attached to the pitot tube such that the sensor tip does not touch any metal; the gauge shall be in an interference-free arrangement with respect to the pitot tube face openings (see Figure 2-1 and also Figure 2-7 in Section 4). Alternate positions may be used if the pitot tube-temperature gauge system is calibrated according to the procedure of Section 4. Provided that a difference of not more than 1 percent in the average velocity measurement is introduced, the temperature gauge need not be attached to the pitot tube; this alternative is subject to the approval of the Administrator.

2.4 Pressure Probe and Gauge. A piezometer tube and mercury- or water-filled U-tube manometer capable of measuring stack pressure to within 2.5 mm (0.1 in.) Hg is used. The static tap of a standard type pitot tube or one leg of a Type X pitot tube with the face opening planes positioned parallel to the gas flow may also be used as the pressure probe.

2.5 Barometer. A mercury, aneroid, or other barometer capable of measuring atmospheric pressure to within 2.5 mm Hg (0.1 in. Hg) may be used. In many cases, the barometric reading may be obtained from a nearby national weather service station, in which case the station value (which is the absolute barometric pressure) shall be requested and an adjustment for elevation differences between the weather station and the sampling point shall be applied at a rate of minus 2.5 mm (0.1 in.) Hg per 30-meter (100 foot) elevation increase, or vice-versa for elevation decrease.

2.6 Gas Density Determination Equipment. Method 3 equipment, if needed (see Section 3.6), to determine the stack gas dry molecular weight, and Reference Method 4 or Method 5 equipment for moisture content determination; other methods may be used subject to approval of the Administrator.

2.7 Calibration Pitot Tube. When calibration of the Type S pitot tube is necessary (see Section 4), a standard pitot tube is used as a reference. The standard pitot tube shall, preferably, have a known coefficient, obtained either (1) directly from the National Bureau of Standards, Route 270, Quince Orchard Road, Gaithersburg, Maryland, or (2) by calibration against another standard pitot tube with an NBS-traceable coefficient. Alternatively, a standard pitot tube designed according to the criteria given in 2.7.1 through 2.7.5 below and illustrated in Figure 2-4 (see also Citations 7, 8, and 17 in Section 6) may be used. Pitot tubes designed according to these specifications will have baseline coefficients of about 0.99 ± 0.01.

2.7.1 Hemispherical (shown in Figure 2-4), ellipsoidal, or conical tip.

2.7.2 A minimum of six diameters straight run (based upon D, the external diameter of the tube) between the tip and the static pressure holes.

2.7.3 A minimum of eight diameters straight run between the static pressure holes and the centerline of the external tube, following the 90 degree bend.

2.7.4 Static pressure holes of equal size (approximately 0.1 D), equally spaced in a piezometer ring configuration.

2.7.5 Ninety degree bend, with curved or mitered junction.

2.8 Differential Pressure Gauge for Type S Pitot Tube Calibration. An inclined manometer or equivalent is used. If the single-velocity calibration technique is employed (see Section 4.1.2.3), the calibration differential pressure gauge shall be readable to the nearest 0.13 mm H_2O (0.005 in. H_2O). For multivelocity calibrations, the gauge shall be readable to the nearest 0.13 mm H_2O (0.005 in H_2O) for Δp values between 1.3 and 25 mm H_2O (0.05 and 1.0 in. H_2O), and to the nearest 1.3 mm H_2O (0.05 in. H_2O) for Δp values above 25 mm H_2O (1.0 in. H_2O). A special, more sensitive gauge will be required to read Δp values below 1.3 mm H_2O [0.05 in. H_2O] (see Citation 18 in Section 6).

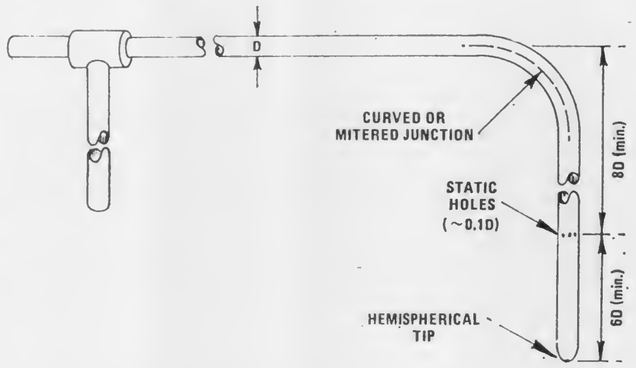

Figure 2-4. Standard pitot tube design specifications.

3. *Procedure*

3.1 Set up the apparatus as shown in Figure 2-1. Capillary tubing or surge tanks installed between the manometer and pitot tube may be used to dampen Δp fluctuations. It is recommended, but not required, that a pretest leak-check be conducted, as follows: (1) blow through the pitot impact opening until at least 7.6 cm (3 in.) H_2O velocity pressure registers on the manometer; then, close off the impact opening. The pressure shall remain stable for at least 15 seconds; (2) do the same for the static pressure side, except using suction to obtain the minimum of 7.6 cm (3 in.) H_2O. Other leak-check procedures, subject to the approval of the Administrator, may be used.

3.2 Level and zero the manometer. Because the manometer level and zero may drift due to vibrations and temperature changes, make periodic checks during the traverse. Record all necessary data as shown in the example data sheet (Figure 2-5).

3.3 Measure the velocity head and temperature at the traverse points specified by Method 1. Ensure that the proper differential pressure gauge is being used for the range of Δp values encountered (see Section 2.2). If it is necessary to change to a more sensitive gauge, do so, and remeasure the Δp and temperature readings at each traverse point. Conduct a post-test leak-check (mandatory), as described in Section 3.1 above, to validate the traverse run.

3.4 Measure the static pressure in the stack. One reading is usually adequate.

3.5 Determine the atmospheric pressure.

Figure 2-5. Velocity traverse data.

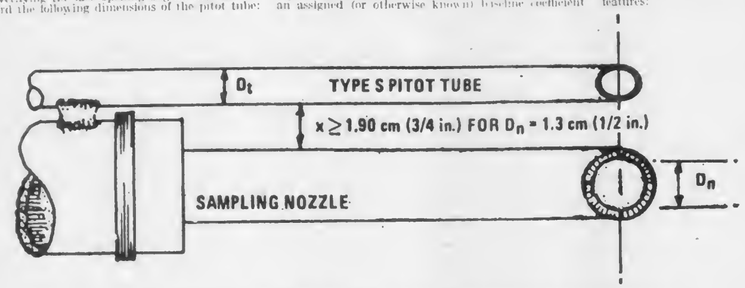
3.6 Determine the stack gas dry molecular weight. For combustion processes or processes that emit essentially CO_2, O_2, CO, and N_2, use Method 3. For processes emitting essentially air, an analysis need not be conducted; use a dry molecular weight of 29.0. For other processes, other methods, subject to the approval of the Administrator, must be used.

3.7 Obtain the moisture content from Reference Method 1 (or equivalent) or from Method 5.

3.8 Determine the cross-sectional area of the stack or duct at the sampling location. Whenever possible, physically measure the stack dimensions rather than use blueprints.

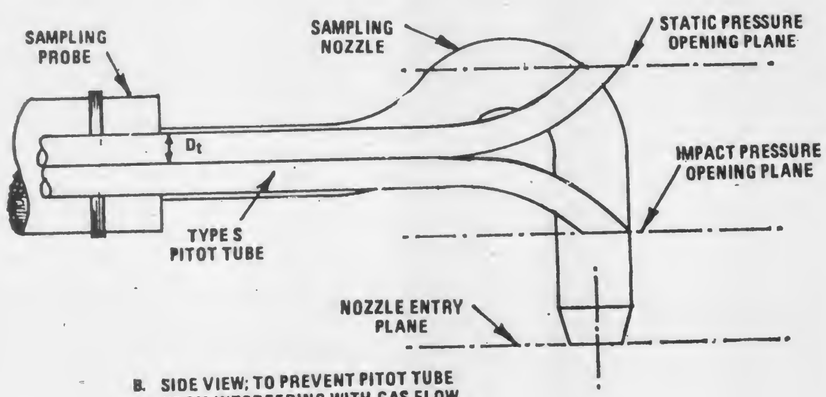
4. *Calibration*

4.1 Type S Pitot Tube. Before its initial use, carefully examine the Type S pitot tube in top, side, and end views to verify that the face openings of the tube are aligned within the specifications illustrated in Figure 2-2 or 2-3. The pitot tube shall not be used if it fails to meet these alignment specifications.



After verifying the face opening alignment, measure and record the following dimensions of the pitot tube: (a) the external tubing diameter (dimension D_t, Figure 2-2b); and (b) the base-to-opening plane distances (dimensions P_A and P_B, Figure 2-2b). If D_t is between 0.48 and 0.95 cm (3/16 and 3/8 in.) and if P_A and P_B are equal and between 1.05 and 1.50 D_t, there are two possible options: (1) the pitot tube may be calibrated according to the procedure outlined in Sections 4.1.2 through 4.1.5 below, or (2) a baseline (isolated tube) coefficient value of 0.81 may be assigned to the pitot tube. Note, however, that if the pitot tube is part of an assembly, calibration may still be required, despite knowledge of the baseline coefficient value (see Section 4.1.1).

If D_t, P_A, and P_B are outside the specified limits, the pitot tube must be calibrated as outlined in 4.1.2 through 4.1.5 below.



4.1.1 Type S Pitot Tube Assemblies. During sample and velocity traverses, the isolated Type S pitot tube is not always used; in many instances, the pitot tube is used in combination with other source-sampling components (thermocouple, sampling probe, nozzle) as part of an "assembly." The presence of other sampling components can sometimes affect the baseline value of the Type S pitot tube coefficient (Citation 9 in Section 6); therefore an assigned (or otherwise known) baseline coefficient value may or may not be valid for a given assembly. The baseline and assembly coefficient values will be identical only when the relative placement of the components in the assembly is such that aerodynamic interference effects are eliminated. Figures 2-6 through 2-8 illustrate interference-free component arrangements for Type S pitot tubes having external tubing diameters between 0.48 and 0.95 cm (3/16 and 3/8 in.). Type S pitot tube assemblies that fail to meet any or all of the specifications of Figures 2-6 through 2-8 shall be calibrated according to the procedure outlined in Sections 4.1.2 through 4.1.5 below, and prior to calibration, the values of the intercomponent spacings (pitot-nozzle, pitot-thermocouple, pitot-probe sheath) shall be measured and recorded.

NOTE.—Do not use any Type S pitot tube assembly which is constructed such that the impact pressure opening plane of the pitot tube is below the entry plane of the nozzle (see Figure 2-6b).

4.1.2 Calibration Setup. If the Type S pitot tube is to be calibrated, one leg of the tube shall be permanently marked A, and the other, B. Calibration shall be done in a flow system having the following essential design features:

A. BOTTOM VIEW; SHOWING MINIMUM PITOT-NOZZLE SEPARATION.

B. SIDE VIEW; TO PREVENT PITOT TUBE FROM INTERFERING WITH GAS FLOW STREAMLINES APPROACHING THE NOZZLE, THE IMPACT PRESSURE OPENING PLANE OF THE PITOT TUBE SHALL BE EVEN WITH OR ABOVE THE NOZZLE ENTRY PLANE.

Figure 2-6. Proper pitot tube - sampling nozzle configuration to prevent aerodynamic interference; buttonhook - type nozzle; centers of nozzle and pitot opening aligned; D_t between 0.48 and 0.95 cm (3/16 and 3/8 in.).

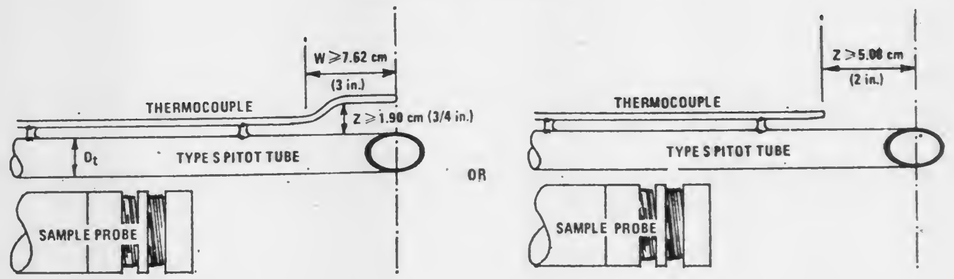


Figure 2-7. Proper thermocouple placement to prevent interference; D_t between 0.48 and 0.95 cm (3/16 and 3/8 in.).

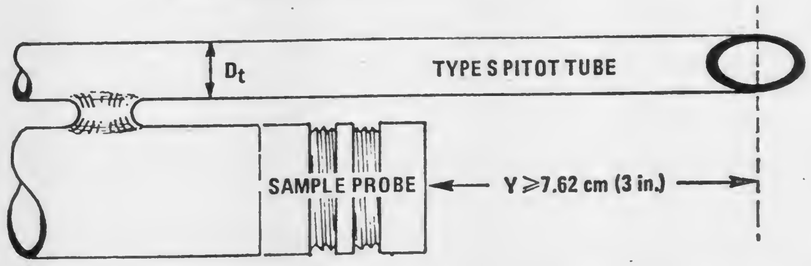

Figure 2-8. Minimum pitot-sample probe separation needed to prevent interference; D_t between 0.48 and 0.95 cm (3/16 and 3/8 in.).

4.1.2.1 The flowing gas stream must be confined to a duct of definite cross-sectional area, either circular or rectangular. For circular cross-sections, the minimum duct diameter shall be 30.5 cm (12 in.); for rectangular cross-sections, the width (shorter side) shall be at least 25.4 cm (10 in.).

4.1.2.2 The cross-sectional area of the calibration duct must be constant over a distance of 10 or more duct diameters. For a rectangular cross-section, use an equivalent diameter, calculated from the following equation, to determine the number of duct diameters:

$$D_e = \frac{2LW}{(L+W)} \qquad \text{Equation 2-1}$$

where:
D_e = Equivalent diameter
L = Length
W = Width

To ensure the presence of stable, fully developed flow patterns at the calibration site, or "test section," the site must be located at least eight diameters downstream and two diameters upstream from the nearest disturbances.

NOTE.—The eight- and two-diameter criteria are not absolute; other test section locations may be used (subject to approval of the Administrator), provided that the flow at the test site is stable and demonstrably parallel to the duct axis.

4.1.2.3 The flow system shall have the capacity to generate a test-section velocity around 915 m/min (3,000 ft/min). This velocity must be constant with time to guarantee steady flow during calibration. Note that Type S pitot tube coefficients obtained by single-velocity calibration at 915 m/min (3,000 ft/min) will generally be valid to within ±3 percent for the measurement of velocities above 305 m/min (1,000 ft/min) and to within ±5 to 6 percent for the measurement of velocities between 180 and 305 m/min (600 and 1,000 ft/min). If a more precise correlation between C_p and velocity is desired, the flow system shall have the capacity to generate at least four distinct, time-invariant test-section velocities covering the velocity range from 180 to 1,525 m/min (600 to 5,000 ft/min), and calibration data shall be taken at regular velocity intervals over this range (see Citations 9 and 14 in Section 6 for details).

4.1.2.4 Two entry ports, one each for the standard and Type S pitot tubes, shall be cut in the test section; the standard pitot entry port shall be located slightly downstream of the Type S port, so that the standard and Type S impact openings will lie in the same cross-sectional plane during calibration. To facilitate alignment of the pitot tubes during calibration, it is advisable that the test section be constructed of plexiglas or some other transparent material.

4.1.3 Calibration Procedure. Note that this procedure is a general one and must not be used without first referring to the special considerations presented in Section 4.1.5. Note also that this procedure applies only to single-velocity calibration. To obtain calibration data for the A and B sides of the Type S pitot tube, proceed as follows:

4.1.3.1 Make sure that the manometer is properly filled and that the oil is free from contamination and is of the proper density. Inspect and leak-check all pitot lines; repair or replace if necessary.

4.1.3.2 Level and zero the manometer. Turn on the fan and allow the flow to stabilize. Seal the Type S entry port.

4.1.3.3 Ensure that the manometer is level and zeroed. Position the standard pitot tube at the calibration point (determined as outlined in Section 4.1.5.4), and align the tube so that its tip is pointed directly into the flow. Particular care should be taken in aligning the tube to avoid yaw and pitch angles. Make sure that the entry port surrounding the tube is properly sealed.

4.1.3.4 Read Δp_{std} and record its value in a data table similar to the one shown in Figure 2-9. Remove the standard pitot tube from the duct and disconnect it from the manometer. Seal the standard entry port.

4.1.3.5 Connect the Type S pitot tube to the manometer. Open the Type S entry port. Check the manometer level and zero. Insert and align the Type S pitot tube so that its A side impact opening is at the same point as was the standard pitot tube and is pointed directly into the flow. Make sure that the entry port surrounding the tube is properly sealed.

4.1.3.6 Read Δp_A and enter its value in the data table. Remove the Type S pitot tube from the duct and disconnect it from the manometer.

4.1.3.7 Repeat steps 4.1.3.3 through 4.1.3.6 above until three pairs of Δp readings have been obtained.

4.1.3.8 Repeat steps 4.1.3.3 through 4.1.3.7 above for the B side of the Type S pitot tube.

4.1.3.9 Perform calculations, as described in Section 4.1.4 below.

4.1.4 Calculations.

4.1.4.1 For each of the six pairs of Δp readings (i.e., three from side A and three from side B) obtained in Section 4.1.3 above, calculate the value of the Type S pitot tube coefficient as follows:

V 42 160 AUG 18 77 UM V

PITOT TUBE IDENTIFICATION NUMBER: _____ DATE: _____

CALIBRATED BY: _____

	"A" SIDE CALIBRATION			
RUN NO.	Δp_{std} cm H_2O (in. H_2O)	$\Delta p_{(s)}$ cm H_2O (in. H_2O)	$C_{p(s)}$	DEVIATION $C_{p(s)} - \bar{C}_p$(A)
1				
2				
3				
		$\bar{C}_p$ (SIDE A)		

	"B" SIDE CALIBRATION			
RUN NO.	Δp_{std} cm H_2O (in. H_2O)	$\Delta p_{(s)}$ cm H_2O (in. H_2O)	$C_{p(s)}$	DEVIATION $C_{p(s)} - \bar{C}_p$(B)
1				
2				
3				
		$\bar{C}_p$ (SIDE B)		

$$\text{AVERAGE DEVIATION} = \sigma\,(\text{A OR B}) = \frac{\sum_{1}^{3} \left| C_{p(s)} - \bar{C}_p(\text{A OR B}) \right|}{3} \longleftarrow \text{MUST BE} \leq 0.01$$

$$\left| \bar{C}_p\,(\text{SIDE A}) - \bar{C}_p\,(\text{SIDE B}) \right| \longleftarrow \text{MUST BE} \leq 0.01$$

Figure 2-9. Pitot tube calibration data.

$$C_{p(s)} = C_{p(std)} \sqrt{\frac{\Delta p_{std}}{\Delta p_s}}$$

Equation 2-2

where:

$C_{p(s)}$ = Type S pitot tube coefficient

$C_{p(std)}$ = Standard pitot tube coefficient; use 0.99 if the coefficient is unknown and the tube is designed according to the criteria of Sections 2.7.1 to 2.7.5 of this method.

Δp_{std} = Velocity head measured by the standard pitot tube, cm H_2O (in. H_2O)

Δp_s = Velocity head measured by the Type S pitot tube, cm H_2O (in. H_2O)

4.1.4.2 Calculate $\bar{C}_p$ (side A), the mean A-side coefficient, and $\bar{C}_p$ (side B), the mean B-side coefficient; calculate the difference between these two average values.

4.1.4.3 Calculate the deviation of each of the three A-side values of $C_{p(s)}$ from $\bar{C}_p$ (side A), and the deviation of each B-side value of $C_{p(s)}$ from $\bar{C}_p$ (side B). Use the following equation:

$$\text{Deviation} = C_{p(s)} - \bar{C}_p(\text{A or B})$$

Equation 2-3

4.1.4.4 Calculate σ, the average deviation from the mean, for both the A and B sides of the pitot tube. Use the following equation:

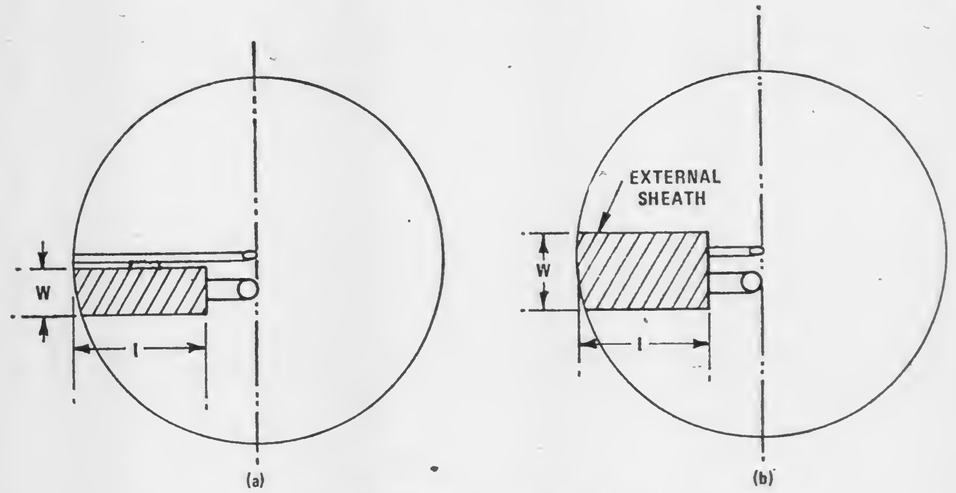
$$\sigma\,(\text{side A or B}) = \frac{\sum_{1}^{3} \left| C_{p(s)} - \bar{C}_p(A \text{ or } B) \right|}{3}$$

Equation 2-4

4.1.4.5 Use the Type S pitot tube only if the values of σ (side A) and σ (side B) are less than or equal to 0.01 and if the absolute value of the difference between $\bar{C}_p$ (A) and $\bar{C}_p$ (B) is 0.01 or less.

4.1.5 Special considerations.

4.1.5.1 Selection of calibration point.



4.1.5.1.1 When an isolated Type S pitot tube is calibrated, select a calibration point at or near the center of the duct, and follow the procedures outlined in Sections 4.1.3 and 4.1.4 above. The Type S pitot coefficients so obtained, i.e., $\bar{C}_p$ (side A) and $\bar{C}_p$ (side B), will be valid, so long as either: (1) the isolated pitot tube is used; or (2) the pitot tube is used with other components (nozzle, thermocouple, sample probe) in an arrangement that is free from aerodynamic interference effects (see Figures 2-6 through 2-8).

4.1.5.1.2 For Type S pitot tube-thermocouple combinations (without sample probe), select a calibration point at or near the center of the duct, and follow the procedures outlined in Sections 4.1.3 and 4.1.4 above. The coefficients so obtained will be valid so long as the pitot tube-thermocouple combination is used by itself or with other components in an interference-free arrangement (Figures 2-6 and 2-8).

4.1.5.1.3 For assemblies with sample probes, the calibration point should be located at or near the center of the duct; however, insertion of a probe sheath into a small duct may cause significant cross-sectional area blockage and yield incorrect coefficient values (Citation 9 in Section 6). Therefore, to minimize the blockage effect, the calibration point may be a few inches off-center if necessary. The actual blockage effect will be negligible when the theoretical blockage, as determined by a projected-area model of the probe sheath, is 2 percent or less of the duct cross-sectional area for assemblies without external sheaths (Figure 2-10a); and 3 percent or less for assemblies with external sheaths (Figure 2-10b).

4.1.5.2 For those probe assemblies in which pitot tube-nozzle interference is a factor (i.e., those in which the pitot-nozzel separation distance fails to meet the specification illustrated in Figure 2-6a), the value of $C_{p(s)}$ depends upon the amount of free-space between the tube and nozzle, and therefore is a function of nozzle size. In these instances, separate calibrations shall be performed with each of the commonly used nozzle sizes in place. Note that the single-velocity calibration technique is acceptable for this purpose, even though the larger nozzle sizes (>0.635 cm or ¼ in.) are not ordinarily used for isokinetic sampling at velocities around 915 m/min (3,000 ft/min), which is the calibration velocity; note also that it is not necessary to draw an isokinetic sample during calibration (see Citation 19 in Section 6).

4.1.5.3 For a probe assembly constructed such that its pitot tube is always used in the same orientation, only one side of the pitot tube need be calibrated (the side which will face the flow). The pitot tube must still meet the alignment specifications of Figure 2-2 or 2-3, however, and must have an average deviation (σ) value of 0.01 or less (see Section 4.1.4.4).

$$\text{ESTIMATED SHEATH BLOCKAGE (\%)} = \left[\frac{l \times W}{\text{DUCT AREA}}\right] \times 100$$

Figure 2-10. Projected-area models for typical pitot tube assemblies.

4.1.6 Field Use and Recalibration.

4.1.6.1 Field Use.

4.1.6.1.1 When a Type S pitot tube (isolated tube or assembly) is used in the field, the appropriate coefficient value (whether assigned or obtained by calibration) shall be used to perform velocity calculations. For calibrated Type S pitot tubes, the A side coefficient shall be used when the A side of the tube faces the flow, and the B side coefficient shall be used when the B side faces the flow; alternatively, the arithmetic average of the A and B side coefficient values may be used, irrespective of which side faces the flow.

4.1.6.1.2 When a probe assembly is used to sample a small duct (12 to 36 in. in diameter), the probe sheath sometimes blocks a significant part of the duct cross-section, causing a reduction in the effective value of $\bar{C}_{p(s)}$. Consult Citation 9 in Section 6 for details. Conventional pitot-sampling probe assemblies are not recommended for use in ducts having inside diameters smaller than 12 inches (Citation 16 in Section 6).

4.1.6.2 Recalibration.

4.1.6.2.1 Isolated Pitot Tubes. After each field use, the pitot tube shall be carefully reexamined in top, side, and end views. If the pitot face openings are still aligned within the specifications illustrated in Figure 2-2 or 2-3, it can be assumed that the baseline coefficient of the pitot tube has not changed. If, however, the tube has been damaged to the extent that it no longer meets the specifications of Figure 2-2 or 2-3, the damage shall either be repaired to restore proper alignment of the face openings or the tube shall be discarded.

4.1.6.2.2 Pitot Tube Assemblies. After each field use, check the face opening alignment of the pitot tube, as in Section 4.1.6.2.1; also, remeasure the intercomponent spacings of the assembly. If the intercomponent spacings have not changed and the face opening alignment is acceptable, it can be assumed that the coefficient of the assembly has not changed. If the face opening alignment is no longer within the specifications of Figures 2-2 or 2-3, either repair the damage or replace the pitot tube (calibrating the new assembly, if necessary). If the intercomponent spacings have changed, restore the original spacings or recalibrate the assembly.

4.2 Standard pitot tube (if applicable). If a standard pitot tube is used for the velocity traverse, the tube shall be constructed according to the criteria of Section 2.7 and shall be assigned a baseline coefficient value of 0.99. If the standard pitot tube is used as part of an assembly, the tube shall be in an interference-free arrangement (subject to the approval of the Administrator).

4.3 Temperature Gauges. After each field use, calibrate dial thermometers, liquid-filled bulb thermometers, thermocouple-potentiometer systems, and other gauges at a temperature within 10 percent of the average absolute stack temperature. For temperatures up to 405° C (761° F), use an ASTM mercury-in-glass reference thermometer, or equivalent, as a reference; alternatively, either a reference thermocouple and potentiometer (calibrated by NBS) or thermometric (two points, e.g., ice bath and boiling water corrected for barometric pressure) may be used. For temperatures above 405° C (761° F), use an NBS-calibrated reference thermocouple-potentiometer system or an alternate reference, subject to the approval of the Administrator.

If, during calibration, the absolute temperatures measured with the gauge being calibrated and the reference gauge agree within 1.5 percent, the temperature data taken in the field shall be considered valid. Otherwise, the pollutant emission test shall either be considered invalid or adjustments (if appropriate) of the test results shall be made, subject to the approval of the Administrator.

4.4 Barometer. Calibrate the barometer used against a mercury barometer.

5. Calculations

Carry out calculations, retaining at least one extra decimal figure beyond that of the acquired data. Round off figures after final calculation.

5.1 Nomenclature.

A = Cross-sectional area of stack, m^2 (ft^2).

B_{ws} = Water vapor in the gas stream (from Method 5 or Reference Method 4), proportion by volume.

C_p = Pitot tube coefficient, dimensionless.

K_p = Pitot tube constant,

$$34.97 \frac{\text{m}}{\text{sec}} \left[\frac{(g/g\text{-mole})(\text{mm Hg})}{(°\text{K})(\text{mm } H_2O)}\right]^{1/2}$$

for the metric system and

$$85.49 \frac{\text{ft}}{\text{sec}} \left[\frac{(\text{lb/lb-mole})(\text{in. Hg})}{(°\text{R})(\text{in. } H_2O)}\right]^{1/2}$$

for the English system.

M_d = Molecular weight of stack gas, dry basis (see Section 3.6) g/g-mole (lb/lb-mole).

M_s = Molecular weight of stack gas, wet basis, g/g-mole (lb/lb-mole).

$$= M_d(1 - B_{ws}) + 18.0\,B_{ws} \qquad \text{Equation 2-5}$$

P_{bar} = Barometric pressure at measurement site, mm Hg (in. Hg).

P_g = Stack static pressure, mm Hg (in. Hg).

P_s = Absolute stack gas pressure, mm Hg (in. Hg).

$$= P_{bar} + P_g \qquad \text{Equation 2-6}$$

P_{std} = Standard absolute pressure, 760 mm Hg (29.92 in. Hg).

Q_{sd} = Dry volumetric stack gas flow rate corrected to standard conditions, dscm/hr (dscf/hr).

t_s = Stack temperature, °C (°F).

T_s = Absolute stack temperature, °K (°R).

$$= 273 + t_s \text{ for metric} \qquad \text{Equation 2-7}$$

$$= 460 + t_s \text{ for English} \qquad \text{Equation 2-8}$$

T_{std} = Standard absolute temperature, 293°K (528° R).

v_s = Average stack gas velocity, m/sec (ft/sec).

Δp = Velocity head of stack gas, mm H_2O (in. H_2O).

3,600 = Conversion factor, sec/hr.

18.0 = Molecular weight of water, g/g-mole (lb-lb-mole).

5.2 Average stack gas velocity.

$$v_s = K_p C_p (\sqrt{\Delta p})_{ave} \sqrt{\frac{T_{s(ave)}}{P_s M_s}}$$

Equation 2-9

5.3 Average stack gas dry volumetric flow rate.

$$Q_{sd} = 3{,}600(1 - B_{ws}) v_s A \left(\frac{T_{std}}{T_{s(ave)}}\right)\left(\frac{P_s}{P_{std}}\right)$$

Equation 2-10

METHOD 3—GAS ANALYSIS FOR CARBON DIOXIDE, OXYGEN, EXCESS AIR, AND DRY MOLECULAR WEIGHT

1 *Principle and Applicability*

1.1 Principle. A gas sample is extracted from a stack, by one of the following methods: (1) single-point, grab sampling; (2) single-point, integrated sampling; or (3) multi-point, integrated sampling. The gas sample is analyzed for percent carbon dioxide (CO_2), percent oxygen (O_2), and, if necessary, percent carbon monoxide (CO). If a dry molecular weight determination is to be made, either an Orsat or a Fyrite [1] analyzer may be used for the analysis; for excess air or emission rate correction factor determination, an Orsat analyzer must be used.

1.2 Applicability. This method is applicable for determining CO_2 and O_2 concentrations, excess air, and dry molecular weight of a sample from a gas stream of a fossil-fuel combustion process. The method may also be applicable to other processes where it has been determined that compounds other than CO_2, O_2, CO, and nitrogen (N_2) are not present in concentrations sufficient to affect the results.

Other methods, as well as modifications to the procedure described herein, are also applicable for some or all of the above determinations. Examples of specific methods and modifications include: (1) a multi-point sampling method using an Orsat analyzer to analyze individual grab samples obtained at each point; (2) a method using CO or O_2 and stoichiometric calculations to determine dry molecular weight and excess air; (3) assigning a value of 30.0 for dry molecular weight, in lieu of actual measurements, for processes burning natural gas, coal, or oil. These methods and modifications may be used, but are subject to the approval of the Administrator.

2 *Apparatus*

As an alternative to the sampling apparatus and systems described herein, other sampling systems (e.g., liquid displacement) may be used provided such systems are capable of obtaining a representative sample and maintaining a constant sampling rate, and are otherwise capable of yielding acceptable results. Use of such systems is subject to the approval of the Administrator.

2.1 Grab Sampling (Figure 3-1).

2.1.1 Probe. The probe should be made of stainless steel or borosilicate glass tubing and should be equipped with an in-stack or out-stack filter to remove particulate matter (a plug of glass wool is satisfactory for this purpose). Any other material inert to O_2, CO_2, CO, and N_2 and resistant to temperature at sampling conditions may be used for the probe; examples of such material are aluminum, copper, quartz glass and Teflon.

2.1.2 Pump. A one-way squeeze bulb, or equivalent, is used to transport the gas sample to the analyzer.

2.2 Integrated Sampling (Figure 3-2).

2.2.1 Probe. A probe such as that described in Section 2.1.1 is suitable.

[1] Mention of trade names or specific products does not constitute endorsement by the Environmental Protection Agency.

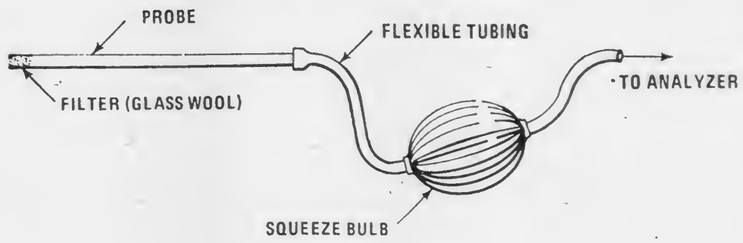

Figure 3-1. Grab sampling train.

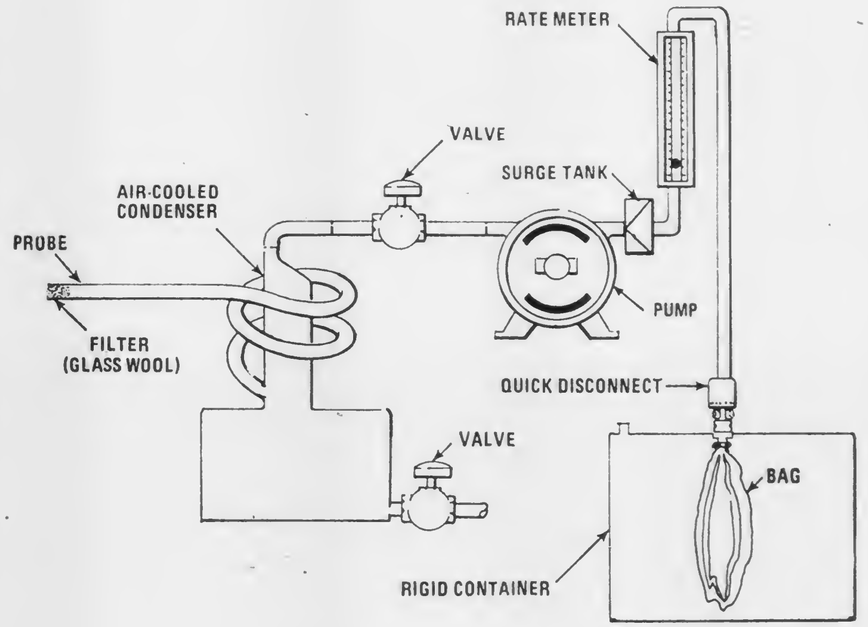

Figure 3-2. Integrated gas sampling train.

V 42 160 AUG 18 77 UM

2.2.2 Condenser. An air-cooled or water-cooled condenser, or other condenser that will not remove O_2, CO_2, CO, and N_2, may be used to remove excess moisture which would interfere with the operation of the pump and flow meter.

2.2.3 Valve. A needle valve is used to adjust sample gas flow rate.

2.2.4 Pump. A leak-free, diaphragm-type pump, or equivalent, is used to transport sample gas to the flexible bag. Install a small surge tank between the pump and rate meter to eliminate the pulsation effect of the diaphragm pump on the rotameter.

2.2.5 Rate Meter. The rotameter, or equivalent rate meter, used should be capable of measuring flow rate to within ±2 percent of the selected flow rate. A flow rate range of 500 to 1000 cm³/min is suggested.

2.2.6 Flexible Bag. Any leak-free plastic (e.g., Tedlar, Mylar, Teflon) or plastic-coated aluminum (e.g., aluminized Mylar) bag, or equivalent, having a capacity consistent with the selected flow rate and time length of the test run, may be used. A capacity in the range of 25 to 50 liters is suggested.

To leak-check the bag, connect it to a water manometer and pressurize the bag to 5 to 10 cm (H_2O) (2 to 4 in. H_2O). Allow to stand for 10 minutes. Any displacement in the water manometer indicates a leak. An alternative leak-check method is to pressurize the bag to 5 to 10 cm (H_2O) (2 to 4 in. H_2O) and allow to stand overnight. A deflated bag indicates a leak.

2.2.7 Pressure Gauge. A water-filled U-tube manometer, or equivalent, of about 28 cm (12 in.) is used for the flexible bag leak-check.

2.2.8 Vacuum Gauge. A mercury manometer, or equivalent, of at least 760 mm Hg (30 in. Hg) is used for the sampling train leak-check.

2.3 Analysis. For Orsat and Fyrite analyzer maintenance and operation procedures, follow the instructions recommended by the manufacturer, unless otherwise specified herein.

2.3.1 Dry Molecular Weight Determination. An Orsat analyzer or Fyrite type combustion gas analyzer may be used.

2.3.2 Emission Rate Correction Factor or Excess Air Determination. An Orsat analyzer must be used. For low CO_2 (less than 4.0 percent) or high O_2 (greater than 15.0 percent) concentrations, the measuring burette of the Orsat must have at least 0.1 percent subdivisions.

3. Dry Molecular Weight Determination.

Any of the three sampling and analytical procedures described below may be used for determining the dry molecular weight.

3.1 Single-Point, Grab Sampling and Analytical Procedure.

3.1.1 The sampling point in the duct shall either be at the centroid of the cross-section or at a point no closer to the walls than 1.00 m (3.3 ft), unless otherwise specified by the Administrator.

3.1.2 Set up the equipment as shown in Figure 3-1, making sure all connections ahead of the analyzer are tight and leak-free. If an Orsat analyzer is used, it is recommended that the analyzer be leaked-checked by following the procedure in Section 5; however, the leak-check is optional.

3.1.3 Place the probe in the stack, with the tip of the probe positioned at the sampling point; purge the sampling line. Draw a sample into the analyzer and immediately analyze it for percent CO_2 and percent O_2. Determine the percentage of the gas that is N_2 and CO by subtracting the sum of the percent CO_2 and percent O_2 from 100 percent. Calculate the dry molecular weight as indicated in Section 6.3.

3.1.4 Repeat the sampling, analysis, and calculation procedures, until the dry molecular weights of any three grab samples differ from their mean by no more than 0.3 g/g-mole (0.3 lb/lb-mole). Average these three molecular weights, and report the results to the nearest 0.1 g/g-mole (lb/lb-mole).

3.2 Single-Point, Integrated Sampling and Analytical Procedure.

3.2.1 The sampling point in the duct shall be located as specified in Section 3.1.1.

3.2.2 Leak-check (optional) the flexible bag as in Section 2.2.6. Set up the equipment as shown in Figure 3-2. Just prior to sampling, leak-check (optional) the train by placing a vacuum gauge at the condenser inlet, pulling a vacuum of at least 250 mm Hg (10 in. Hg), plugging the outlet at the quick disconnect, and then turning off the pump. The vacuum should remain stable for at least 0.5 minute. Evacuate the flexible bag. Connect the probe and place it in the stack, with the tip of the probe positioned at the sampling point; purge the sampling line. Next, connect the bag and make sure that all connections are tight and leak free.

3.2.3 Sample at a constant rate. The sampling run should be simultaneous with, and for the same total length of time as, the pollutant emission rate determination. Collection of at least 30 liters (1.00 ft³) of sample gas is recommended, however, smaller volumes may be collected, if desired.

3.2.4 Obtain one integrated flue gas sample during each pollutant emission rate determination. Within 8 hours after the sample is taken, analyze it for percent CO_2 and percent O_2 using either an Orsat analyzer or a Fyrite-type combustion gas analyzer. If an Orsat analyzer is used, it is recommended that the Orsat leak-check described in Section 5 be performed before this determination; however, the check is optional. Determine the percentage of the gas that is N_2 and CO by subtracting the sum of the percent CO and percent O_2 from 100 percent. Calculate the dry molecular weight as indicated in Section 6.3.

3.2.5 Repeat the analysis and calculation procedures until the individual dry molecular weights for any three analyses differ from their mean by no more than 0.3 g/g-mole (0.3 lb/lb-mole). Average these three molecular weights, and report the results to the nearest 0.1 g-mole (0.1 lb/lb-mole).

3.3 Multi-Point, Integrated Sampling and Analytical Procedure.

3.3.1 Unless otherwise specified by the Administrator, a minimum of eight traverse points shall be used for circular stacks having diameters less than 0.61 m (24 in.), a minimum of nine shall be used for rectangular stacks having equivalent diameters less than 0.61 m (24 in.), and a minimum of twelve traverse points shall be used for all other cases. The traverse points shall be located according to Method 1. The use of fewer points is subject to approval of the Administrator.

3.3.2 Follow the procedures outlined in Sections 3.2.2 through 3.2.5, except for the following: traverse all sampling points and sample at each point for an equal length of time. Record sampling data as shown in Figure 3-3.

TIME	TRAVERSE PT.	Q 1pm	% DEV.[a]
		AVERAGE	

[a] % DEV = $\left(\frac{Q - Q\ avg}{Q\ avg}\right) 100$ (MUST BE ≤10%)

Figure 3-3. Sampling rate data.

4. Emission Rate Correction Factor or Excess Air Determination

NOTE.—A Fyrite-type combustion gas analyzer is not acceptable for excess air or emission rate correction factor determination, unless approved by the Administrator. If both percent CO_2 and percent O_2 are measured, the analytical results of any of the three procedures given below may also be used for calculating the dry molecular weight.

Each of the three procedures below shall be used only when specified in an applicable subpart of the standards. The use of these procedures for other purposes must have specific prior approval of the Administrator.

4.1 Single-Point, Grab Sampling and Analytical Procedure.

4.1.1 The sampling point in the duct shall either be at the centroid of the cross-section or at a point no closer to the walls than 1.00 m (3.3 ft), unless otherwise specified by the Administrator.

4.1.2 Set up the equipment as shown in Figure 3-1, making sure all connections ahead of the analyzer are tight and leak-free. Leak-check the Orsat analyzer according to the procedure described in Section 5. This leak-check is mandatory.

4.1.3 Place the probe in the stack, with the tip of the probe positioned at the sampling point; purge the sampling line. Draw a sample into the analyzer. For emission rate correction factor determination, immediately analyze the sample, as outlined in Sections 4.1.4 and 4.1.5, for percent CO_2, O_2, and CO; (2) determine the percentage of the gas that is N_2 by subtracting the sum of the percent CO_2, percent O_2, and percent CO from 100 percent; and (3) calculate percent excess air as outlined in Section 6.2.

4.1.4 To ensure complete absorption of the CO_2, O_2, or if applicable, CO, make repeated passes through each absorbing solution until two consecutive readings are the same. Several passes (three or four) should be made between readings. (If constant readings cannot be obtained after three consecutive readings, replace the absorbing solution.)

4.1.5 After the analysis is completed, leak-check (mandatory) the Orsat analyzer once again, as described in Section 5. For the results of the analysis to be valid, the Orsat analyzer must pass this leak test before and after the analysis. NOTE.—Since this single-point, grab sampling and analytical procedure is normally conducted in conjunction with a single-point, grab sampling and analytical procedure for a pollutant, only one analysis is ordinarily conducted. Therefore, great care must be taken to obtain a valid sample and analysis. Although in most cases only CO_2 or O_2 is required, it is recommended that both CO_2 and O_2 be measured, and that Citation 5 in the Bibliography be used to validate the analytical data.

4.2 Single-Point, Integrated Sampling and Analytical Procedure.

4.2.1 The sampling point in the duct shall be located as specified in Section 4.1.1.

4.2.2 Leak-check (mandatory) the flexible bag as in Section 2.2.6. Set up the equipment as shown in Figure 3-2. Just prior to sampling, leak-check (mandatory) the train by placing a vacuum gauge at the condenser inlet, pulling a vacuum of at least 250 mm Hg (10 in. Hg), plugging the outlet at the quick disconnect, and then turning off the pump. The vacuum shall remain stable for at least 0.5 minute. Evacuate the flexible bag. Connect the probe and place it in the stack, with the tip of the probe positioned at the sampling point; purge the sampling line. Next, connect the bag and make sure that all connections are tight and leak free.

4.2.3 Sample at a constant rate, or as specified by the Administrator. The sampling run must be simultaneous with, and for the same total length of time as, the pollutant emission rate determination. Collect at least 30 liters (1.00 ft³) of sample gas. Smaller volumes may be collected, subject to approval of the Administrator.

4.2.4 Obtain one integrated flue gas sample during each pollutant emission rate determination. For emission rate correction factor determination, analyze the sample within 4 hours after it is taken for percent CO_2 or percent O_2 (as outlined in Sections 4.2.5 through 4.2.7). The Orsat analyzer must be leak-checked (see Section 5) before the analysis. If excess air is desired, proceed as follows: (1) within 4 hours after the sample is taken, analyze it (as in Sections 4.2.5 through 4.2.7) for percent CO_2, O_2, and CO; (2) determine the percentage of the gas that is N_2 by subtracting the sum of the percent CO_2, percent O_2, and percent CO from 100 percent; and (3) calculate percent excess air, as outlined in Section 6.2.

4.2.5 To ensure complete absorption of the CO_2, O_2, or if applicable, CO, make repeated passes through each absorbing solution until two consecutive readings are the same. Several passes (three or four) should be made between readings. (If constant readings cannot be obtained after three consecutive readings, replace the absorbing solution.)

4.2.6 Repeat the analysis until the following criteria are met:

4.2.6.1 For percent CO_2, repeat the analytical procedure until the results of any three analyses differ by no more than (a) 0.3 percent by volume when CO_2 is greater than 4.0 percent or (b) 0.2 percent by volume when CO_2 is less than or equal to 4.0 percent. Average the three acceptable values of percent CO_2 and report the results to the nearest 0.1 percent.

4.2.6.2 For percent O_2, repeat the analytical procedure until the results of any three analyses differ by no more than (a) 0.3 percent by volume when O_2 is less than 15.0 percent or (b) 0.2 percent by volume when O_2 is greater than 15.0 percent. Average the three acceptable values of percent O_2 and report the results to the nearest 0.1 percent.

4.2.6.3 For percent CO, repeat the analytical procedure until the results of any three analyses differ by no more than 0.3 percent. Average the three acceptable values of percent CO and report the results to the nearest 0.1 percent.

4.2.7 After the analysis is completed, leak-check (mandatory) the Orsat analyzer once again, as described in Section 5. For the results of the analysis to be valid, the Orsat analyzer must pass this leak test before and after the analysis. Note: Although in most instances only CO_2 or O_2 is required, it is recommended that both CO_2 and O_2 be measured, and that Citation 5 in the Bibliography be used to validate the analytical data.

4.3 Multi-Point, Integrated Sampling and Analytical Procedure.

4.3.1 Both the minimum number of sampling points and the sampling point location shall be as specified in Section 3.3.1 of this method. The use of fewer points than specified is subject to the approval of the Administrator.

4.3.2 Follow the procedures outlined in Sections 4.2.2 through 4.2.7, except for the following: Traverse all sampling points and sample at each point for an equal length of time. Record sampling data as shown in Figure 3-3.

5. Leak-Check Procedure for Orsat Analyzers

Moving an Orsat analyzer frequently causes it to leak. Therefore, an Orsat analyzer should be thoroughly leak-checked on site before the flue gas sample is introduced into it. The procedure for leak-checking an Orsat analyzer is:

5.1.1 Bring the liquid level in each pipette up to the reference mark on the capillary tubing and then close the pipette stopcock.

5.1.2 Raise the leveling bulb sufficiently to bring the confining liquid meniscus onto the graduated portion of the burette and then close the manifold stopcock.

5.1.3 Record the meniscus position.

5.1.4 Observe the meniscus in the burette and the liquid level in the pipette for movement over the next 4 minutes.

5.1.5 For the Orsat analyzer to pass the leak-check, two conditions must be met.

5.1.5.1 The liquid level in each pipette must not fall below the bottom of the capillary tubing during this 4-minute interval.

5.1.5.2 The meniscus in the burette must not change by more than 0.2 ml during this 4-minute interval.

5.1.6 If the analyzer fails the leak-check procedure, all rubber connections and stopcocks should be checked until the cause of the leak is identified. Leaking stopcocks must be disassembled, cleaned, and regreased. Leaking rubber connections must be replaced. After the analyzer is reassembled, the leak-check procedure must be repeated.

6. Calculations

6.1 Nomenclature.

M_d = Dry molecular weight, g-mole/lb-mole).
%EA = Percent excess air.
$\%CO_2$ = Percent CO_2 by volume (dry basis).
$\%O_2$ = Percent O_2 by volume (dry basis).
%CO = Percent CO by volume (dry basis).
$\%N_2$ = Percent N_2 by volume (dry basis).
0.264 = Ratio of O_2 to N_2 in air, v/v.
0.280 = Molecular weight of N_2 or CO, divided by 100.
0.320 = Molecular weight of O_2 divided by 100.
0.440 = Molecular weight of CO_2 divided by 100.

6.2 Percent Excess Air. Calculate the percent excess air (if applicable), by substituting the appropriate values of percent O_2, CO, and N_2 obtained from Section 4.1.3 or 4.2.4 into Equation 3-1.

$$\%EA = \left[\frac{\%O_2 - 0.5\%CO}{0.264\%N_2 - \%O_2 - 0.5\%CO}\right] 100$$

Equation 3-1

NOTE.—The equation above assumes that ambient air is used as the source of O_2 and that the fuel does not contain appreciable amounts of N_2 (as do coke oven or blast furnace gases). For those cases when appreciable amounts of N_2 are present (coal, oil, and natural gas do not contain appreciable amounts of N_2) or when oxygen enrichment is used, alternate methods, subject to approval of the Administrator, are required.

6.3 Dry Molecular Weight. Use Equation 3-2 to calculate the dry molecular weight of the stack gas.

$$M_d = 0.440(\%CO_2) + 0.320(\%O_2) + 0.280(\%N_2 + \%CO)$$

Equation 3-2

NOTE.—The above equation does not consider argon in air (about 0.9 percent, molecular weight of 37.7). A negative error of about 0.4 percent is introduced. The tester may opt to include argon in the analysis using procedures subject to approval of the Administrator.

METHOD 4—DETERMINATION OF MOISTURE CONTENT IN STACK GASES

1. Principle and Applicability

1.1 Principle. A gas sample is extracted at a constant rate from the source; moisture is removed from the sample stream and determined either volumetrically or gravimetrically.

1.2 Applicability. This method is applicable for determining the moisture content of stack gas.

Two procedures are given. The first is a reference method, for accurate determinations of moisture content (such as are needed to calculate emission data). The second is an approximation method, which provides estimates of percent moisture to aid in setting isokinetic sampling rates prior to a pollutant emission measurement run. The approximation method described herein is only a suggested approach; alternative means for approximating the moisture content, (e.g., drying tubes, wet bulb-dry bulb techniques, condensation techniques, stoichiometric calculations, previous experience, etc.), are also acceptable.

The reference method is often conducted simultaneously with a pollutant emission measurement run, when it is, calculation of percent isokinetic, pollutant emission rate, etc., for the run shall be based upon the results of the reference method or its equivalent; these calculations shall not be based upon the results of the approximation method, unless the approximation method is shown, to the satisfaction of the Administrator, U.S. Environmental Protection Agency, to be capable of yielding results within 1 percent H₂O of the reference method.

NOTE.—The reference method may yield questionable results when applied to saturated gas streams or to streams that contain water droplets. Therefore, when these conditions exist or are suspected, a second determination of the moisture content shall be made simultaneously with the reference method, as follows: Assume that the gas stream is saturated. Attach a temperature sensor (capable of measuring to ±1° C (2° F)) to the reference method probe. Measure the stack gas temperature at each traverse point (see Section 2.2.1) during the reference method traverse; calculate the average stack gas temperature. Next, determine the moisture percentage, either by: (1) using a psychrometric chart and making appropriate corrections if stack pressure is different from that of the chart, or (2) using saturation vapor pressure tables. In cases where the psychrometric chart or the saturation vapor pressure tables are not applicable (based on evaluation of the process), alternate methods, subject to the approval of the Administrator, shall be used.

2. Reference Method

The procedure described in Method 5 for determining moisture content is acceptable as a reference method.

2.1 Apparatus. A schematic of the sampling train used in this reference method is shown in Figure 4-1. All components shall be maintained and calibrated according to the procedure outlined in Method 5.

V 42 160 AUG 18 77 UM

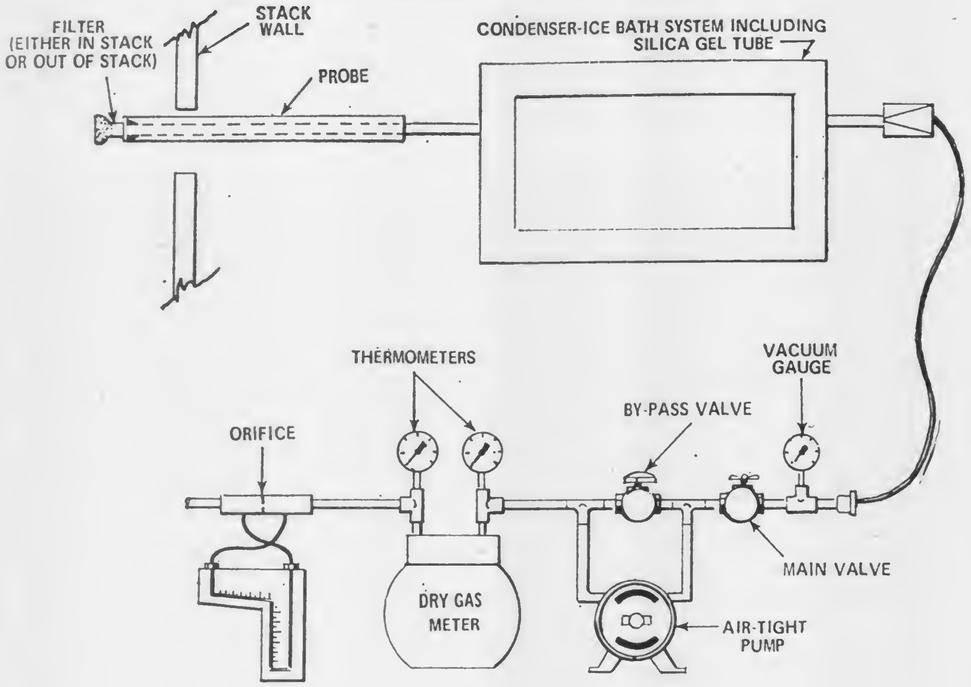

Figure 4-1. Moisture sampling train-reference method.

2.1.1 Probe. The probe is constructed of stainless steel or glass tubing, sufficiently heated to prevent water condensation, and is equipped with a filter, either in-stack (e.g., a plug of glass wool inserted into the end of the probe) or heated out-stack (e.g., as described in Method 5), to remove particulate matter.

When stack conditions permit, other metals or plastic tubing may be used for the probe, subject to the approval of the Administrator.

2.1.2 Condenser. The condenser consists of four impingers connected in series with ground glass, leak-free fittings or any similarly leak-free non-contaminating fittings. The first, third, and fourth impingers shall be of the Greenburg-Smith design, modified by replacing the tip with a 1.3 centimeter (½ inch) ID glass tube extending to about 1.3 cm (½ in.) from the bottom of the flask. The second impinger shall be of the Greenburg-Smith design with the standard tip. Modifications (e.g., using flexible connections between the impingers, using materials other than glass, or using flexible vacuum lines to connect the filter holder to the condenser) may be used, subject to the approval of the Administrator.

The first two impingers shall contain known volumes of water, the third shall be empty, and the fourth shall contain a known weight of 6- to 16-mesh indicating type silica gel, or equivalent desiccant. If the silica gel has been previously used, dry at 175° C (350° F) for 2 hours. New silica gel may be used as received. A thermometer, capable of measuring temperature to within 1° C (2° F), shall be placed at the outlet of the fourth impinger, for monitoring purposes.

Alternatively, any system may be used (subject to the approval of the Administrator) that cools the sample gas stream and allows measurement of both the water that has been condensed and the moisture leaving the condenser, each to within 1 ml or 1 g. Acceptable means are to measure the condensed water, either gravimetrically or volumetrically, and to measure the moisture leaving the condenser by: (1) monitoring the temperature and pressure at the exit of the condenser and using Dalton's law of partial pressures, or (2) passing the sample gas stream through a tared silica gel (or equivalent desiccant) trap, with exit gases kept below 20° C (68° F), and determining the weight gain.

If means other than silica gel are used to determine the amount of moisture leaving the condenser, it is recommended that silica gel (or equivalent) still be used between the condenser system and pump, to prevent moisture condensation in the pump and metering devices and to avoid the need to make corrections for moisture in the metered volume.

2.1.3 Cooling System. An ice bath container and crushed ice (or equivalent) are used to aid in condensing moisture.

2.1.4 Metering System. This system includes a vacuum gauge, leak-free pump, thermometers capable of measuring temperature to within 3° C (5.4° F), dry gas meter capable of measuring volume to within 2 percent, and related equipment as shown in Figure 4-1. Other metering systems, capable of maintaining a constant sampling rate and determining sample gas volume, may be used, subject to the approval of the Administrator.

2.1.5 Barometer. Mercury, aneroid, or other barometer capable of measuring atmospheric pressure to within 2.5 mm Hg (0.1 in. Hg) may be used. In many cases, the barometric reading may be obtained from a nearby national weather service station, in which case the station value (which is the absolute barometric pressure) shall be requested and an adjustment for elevation differences between the weather station and the sampling point shall be applied at a rate of minus 2.5 mm Hg (0.1 in. Hg) per 30 m (100 ft) elevation increase or vice versa for elevation decrease.

2.1.6 Graduated Cylinder and/or Balance. These items are used to measure condensed water and moisture caught in the silica gel to within 1 ml or 0.5 g. Graduated cylinders shall have subdivisions no greater than 2 ml. Most laboratory balances are capable of weighing to the nearest 0.5 g or less. These balances are suitable for use here.

2.2 Procedure. The following procedure is written for a condenser system (such as the impinger system described in Section 2.1.2) incorporating volumetric analysis to measure the condensed moisture, and silica gel and gravimetric analysis to measure the moisture leaving the condenser.

2.2.1 Unless otherwise specified by the Administrator, a minimum of eight traverse points shall be used for circular stacks having diameters less than 0.61 m (24 in.), a minimum of nine points shall be used for rectangular stacks having equivalent diameters less than 0.61 m (24 in.), and a minimum of twelve travers points shall be used in all other cases. The traverse points shall be located according to Method 1. The use of fewer points is subject to the approval of the Administrator. Select a suitable probe and probe length such that all traverse points can be sampled. Consider sampling from opposite sides of the stack (four total sampling ports) for large stacks, to permit use of shorter probe lengths. Mark the probe with heat resistant tape or by some other method to denote the proper distance into the stack or duct for each sampling point. Place known volumes of water in the first two impingers. Weigh and record the weight of the silica gel to the nearest 0.5 g, and transfer the silica gel to the fourth impinger; alternatively, the silica gel may first be transferred to the impinger, and the weight of the silica gel plus impinger recorded.

2.2.2 Select a total sampling time such that a minimum total gas volume of 0.60 scm (21 scf) will be collected, at a rate no greater than 0.021 m³/min (0.75 cfm). When both moisture content and pollutant emission rate are to be determined, the moisture determination shall be simultaneous with, and for the same total length of time as, the pollutant emission rate run, unless otherwise specified in an applicable subpart of the standards.

2.2.3 Set up the sampling train as shown in Figure 4-1. Turn on the probe heater and (if applicable) the filter heating system to temperatures of about 120° C (248° F), to prevent water condensation ahead of the condenser; allow time for the temperatures to stabilize. Place crushed ice in the ice bath container. It is recommended, but not required, that a leak check be done, as follows: Disconnect the probe from the first impinger or (if applicable) from the filter holder. Plug the inlet to the first impinger (or filter holder) and pull a 380 mm (15 in.) Hg vacuum; a lower vacuum may be used, provided that it is not exceeded during the test. A leakage rate in excess of 4 percent of the average sampling rate or 0.00057 m³/min (0.02 cfm), whichever is less, is unacceptable. Following the leak check, reconnect the probe to the sampling train.

2.2.4 During the sampling run, maintain a sampling rate within 10 percent of constant rate, or as specified by the Administrator. For each run, record the data required on the example data sheet shown in Figure 4-2. Be sure to record the dry gas meter reading at the beginning and end of each sampling time increment and whenever sampling is halted. Take other appropriate readings at each sample point, at least once during each time increment.

2.2.5 To begin sampling, position the probe tip at the first traverse point. Immediately start the pump and adjust the flow to the desired rate. Traverse the cross section, sampling at each traverse point for an equal length of time. Add more ice and, if necessary, salt to maintain a temperature of less than 20° C (68° F) at the silica gel outlet.

2.2.6 After collecting the sample, disconnect the probe from the filter holder (or from the first impinger) and conduct a leak check (mandatory) as described in Section

2.2.3 Record the leak rate. If the leakage rate exceeds the allowable rate, the tester shall either reject the test results or shall correct the sample volume as in Section 6.3 of Method 5. Next, measure the volume of the moisture condensed to the nearest ml. Determine the increase in weight of the silica gel (or silica gel plus impinger) to the nearest 0.5 g. Record this information (see example data sheet, Figure 4-3) and calculate the moisture percentage, as described in 2.3 below.

2.3 Calculations. Carry out the following calculations, retaining at least one extra decimal figure beyond that of the acquired data. Round off figures after final calculation

2.3.1 Nomenclature.

B_{ws} = Proportion of water vapor, by volume, in the gas stream.
M_w = Molecular weight of water, 18.0 g/g-mole (18.0 lb/lb-mole).
P_m = Absolute pressure (for this method, same as barometric pressure) at the dry gas meter, mm Hg (in. Hg).
P_{std} = Standard absolute pressure, 760 mm Hg (29.92 in. Hg).
R = Ideal gas constant, 0.06236 (mm Hg) (m³)/(g-mole) (°K) for metric units and 21.85 (in. Hg) (ft³)/(lb-mole) (°R) for English units.
T_m = Absolute temperature at meter, °K (°R).
T_{std} = Standard absolute temperature, 293° K (528° R).
V_m = Dry gas volume measured by dry gas meter, dcm (dcf).
ΔV_m = Incremental dry gas volume measured by dry gas meter at each traverse point, dcm (dcf).
$V_{m(std)}$ = Dry gas volume measured by the dry gas meter, corrected to standard conditions, dscm (dscf).
$V_{w(std)}$ = Volume of water vapor condensed corrected to standard conditions, scm (scf).
$V_{w(soln)}$ = Volume of water vapor collected in silica gel corrected to standard conditions, scm (scf).
V_f = Final volume of condenser water, ml.
V_i = Initial volume, if any, of condenser water, ml.
W_f = Final weight of silica gel or silica gel plus impinger, g.
W_i = Initial weight of silica gel or silica gel plus impinger, g.
Y = Dry gas meter calibration factor.
ρ_w = Density of water, 0.9982 g/ml (0.002201 lb/ml).

2.3.2 Volume of water vapor condensed

$$V_{w(std)} = \frac{(V_f - V_i)\rho_w R T_{std}}{P_{std} M_w} = K_1 (V_f - V_i)$$

Equation 4-1

where:
K_1 = 0.001333 m³/ml for metric units
= 0.04707 ft³/ml for English units

2.3.3 Volume of water vapor collected in silica gel

$$V_{w(soln)} = \frac{(W_f - W_i) R T_{std}}{P_{std} M_w} = K_2 (W_f - W_i)$$

Equation 4-2

where:
K_2 = 0.001335 m³/g for metric units
= 0.04715 ft³/g for English units

2.3.4 Sample gas volume.

$$V_{m(std)} = V_m \frac{(P_m)(T_{std})}{(P_{std})(T_m)} = K_1 Y \frac{V_m P_m}{T_m}$$

Equation 4-3

where:
K_1 = 0.3858 °K/mm Hg for metric units
= 17.64 °R/in. Hg for English units

NOTE: If the post-test leak rate (section 2.3.4) exceeds the allowable rate, correct the value of V_m in Equation 4-3, as described in section 6.3 of Method 5.

2.3.5 Moisture Content.

$$B_{ws} = \frac{V_{w(std)} + V_{w(soln)}}{V_{w(std)} + V_{w(soln)} + V_{m(std)}}$$

Equation 4-4

NOTE: In saturated or moisture droplet-laden gas streams, two calculations of the moisture content of the stack gas shall be made, one using a value based upon the saturated conditions (see Section 1.2), and another based upon the results of the impinger analysis. The lower of these two values of B_{ws} shall be considered correct.

2.4 Verification of constant sampling rate. For each time increment, determine the ΔV_m. Calculate the average. If the value for any time increment differs from the average by more than 10 percent, reject the results and repeat the run.

3. *Approximation Method*

The approximation method described below is presented only as a suggested method (see Section 1.2).

3.1 Apparatus.

3.1.1 Probe. Stainless steel or glass tubing, sufficiently heated to prevent water condensation and equipped with a filter (either in-stack or heated out-stack) to remove particulate matter. A plug of glass wool, inserted into the end of the probe, is a satisfactory filter.

3.1.2 Impingers. Two midget impingers, each with 30 ml capacity, or equivalent.

3.1.3 Ice Bath. Container and ice, to aid in condensing moisture in impingers.

3.1.4 Drying Tube. Tube packed with new or regenerated 6- to 16-mesh indicating-type silica gel (or equivalent desiccant), to dry the sample gas and to protect the meter and pump.

3.1.5 Valve. Needle valve, to regulate the sample gas flow rate.

3.1.6 Pump. Leak-free, diaphragm type, or equivalent, to pull the gas sample through the train.

3.1.7 Volume meter. Dry gas meter, sufficiently accurate to measure the sample volume within 2%, and calibrated over the range of flow rates and conditions actually encountered during sampling.

3.1.8 Rate Meter. Rotameter, to measure the flow range from 0 to 3 l/min (0 to 0.11 cfm).

3.1.9 Graduated Cylinder. 25 ml.

3.1.10 Barometer. Mercury, aneroid, or other barometer, as described in Section 2.1.5 above.

3.1.11 Vacuum Gauge. At least 760 mm Hg (30 in. Hg) gauge, to be used for the sampling leak check.

3.2 Procedure.

3.2.1 Place exactly 5 ml distilled water in each impinger. Assemble the apparatus without the probe as shown in Figure 4-4. Leak check the train by placing a vacuum gauge at the inlet to the first impinger and drawing a vacuum of at least 250 mm Hg (10 in. Hg), plugging the outlet of the rotameter, and then turning off the pump. The vacuum shall remain constant for at least one minute. Carefully release the vacuum gauge before unplugging the rotameter end.

V 42 160 AUG 18 77 UM V

3.2.2 Connect the probe, insert it into the stack, and sample at a constant rate of 2 lpm (0.071 cfm). Continue sampling until the dry gas meter registers about 30 liters (1.1 ft³) or until visible liquid droplets are carried over from the first impinger to the second. Record temperature, pressure, and dry gas meter readings as required by Figure 4-5.

3.2.3 After collecting the sample, combine the contents of the two impingers and measure the volume to the nearest 0.5 ml.

3.3 Calculations. The calculation method presented is designed to estimate the moisture in the stack gas; therefore, other data, which are only necessary for accurate moisture determinations, are not collected. The following equations adequately estimate the moisture content, for the purpose of determining isokinetic sampling rate settings.

3.3.1 Nomenclature.

B_{ws} = Approximate proportion, by volume, of water vapor in the gas stream leaving the second impinger, 0.025.

B_{wa} = Water vapor in the gas stream, proportion by volume.

M_w = Molecular weight of water, 18.0 g/g-mole (18.0 lb/lb-mole)

P_m = Absolute pressure (for this method, same as barometric pressure) at the dry gas meter.

P_{std} = Standard absolute pressure, 760 mm Hg (29.92 in. Hg).

R = Ideal gas constant, 0.06236 (mm Hg) (m³)/(g-mole) (°K) for metric units and 21.85 (in. Hg) (ft³)/lb-mole) (°R) for English units.

T_m = Absolute temperature at meter, °K (°R)

T_{std} = Standard absolute temperature, 293° K (528° R)

V_f = Final volume of impinger contents, ml.

V_i = Initial volume of impinger contents, ml.

V_m = Dry gas volume measured by dry gas meter, dcm (dcf).

$V_{m(std)}$ = Dry gas volume measured by dry gas meter, corrected to standard conditions, dscm (dscf).

$V_{wc(std)}$ = Volume of water vapor condensed, corrected to standard conditions, scm (scf).

ρ_w = Density of water, 0.9982 g/ml (0.002201 lb/ml).

3.3.2 Volume of water vapor collected.

$$V_{wc} = \frac{(V_f - V_i)\rho_w RT_{std}}{P_{std} M_w} = K_1 (V_f - V_i)$$

Equation 4-5

where:

K_1 = 0.001333 m³/ml for metric units
= 0.04707 ft³/ml for English units.

3.3.3 Gas volume.

$$V_{m(std)} = V_m \left(\frac{P_m}{P_{std}}\right)\left(\frac{T_{std}}{T_m}\right) = K_2 \frac{V_m P_m}{T_m}$$

Equation 4-6

where:

K_2 = 0.3858 °K/mm Hg for metric units
= 17.64 °R/in. Hg for English units

3.3.4 Approximate moisture content.

$$B_{ws} = \frac{V_{wc}}{V_{wc} + V_{m(std)}} + B_{wm} = \frac{V_{wc}}{V_{wc} + V_{m(std)}} + (0.025)$$

Equation 4-7

Calibration

4.1 For the reference method, calibrate equipment as specified in the following sections of Method 5: Section 5.3 (metering system); Section 5.5 (temperature gauges); and Section 5.7 (barometer). The recommended leak check of the metering system (Section 5.6 of Method 5) also applies to the reference method. For the approximation method, use the procedures outlined in Section 5.1.1 of Method 6 to calibrate the metering system, and the procedure of Method 5, Section 5.7 to calibrate the barometer.

METHOD 5—DETERMINATION OF PARTICULATE EMISSIONS FROM STATIONARY SOURCES

1. Principle and Applicability

1.1 Principle. Particulate matter is withdrawn isokinetically from the source and collected on a glass fiber filter maintained at a temperature in the range of 120±14° C (248±25° F) or such other temperature as specified by an applicable subpart of the standards or approved by the Administrator, U.S. Environmental Protection Agency, for a particular application. The particulate mass, which includes any material that condenses at or above the filtration temperature, is determined gravimetrically after removal of uncombined water.

1.2 Applicability. This method is applicable for the determination of particulate emissions from stationary sources.

2. Apparatus

2.1 Sampling Train. A schematic of the sampling train used in this method is shown in Figure 5-1. Complete construction details are given in APTD-0581 (Citation 2 in Section 7); commercial models of this train are also available. For changes from APTD-0581 and for allowable modifications of the train shown in Figure 5-1, see the following subsections.

The operating and maintenance procedures for the sampling train are described in APTD-0576 (Citation 3 in Section 7). Since correct usage is important in obtaining valid results, all users should read APTD-0576 and adopt the operating and maintenance procedures outlined in it, unless otherwise specified herein. The sampling train consists of the following components:

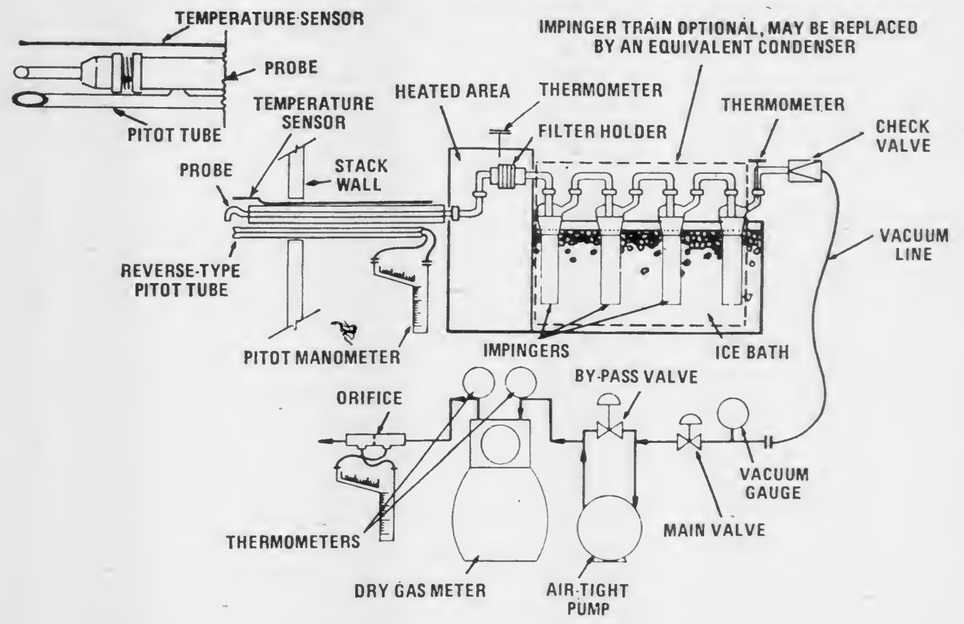

Figure 5 1. Particulate sampling train.

2.1.1 Probe Nozzle, Stainless steel (316) or glass with sharp, tapered leading edge. The angle of taper shall be ≤30° and the taper shall be on the outside to preserve a constant internal diameter. The probe nozzle shall be of the button-hook or elbow design, unless otherwise specified by the Administrator. If made of stainless steel, the nozzle shall be constructed from seamless tubing; other materials of construction may be used, subject to the approval of the Administrator.

A range of nozzle sizes suitable for isokinetic sampling should be available, e.g., 0.32 to 1.27 cm (⅛ to ½ in.)—or larger if higher volume sampling trains are used—inside diameter (ID) nozzles in increments of 0.16 cm (1/16 in.). Each nozzle shall be calibrated according to the procedures outlined in Section 5.

2.1.2 Probe Liner. Borosilicate or quartz glass tubing with a heating system capable of maintaining a gas temperature at the exit end during sampling of 120±14° C (248±25° F), or such other temperature as specified by an applicable subpart of the standards or approved by the Administrator for a particular application. (The tester may opt to operate the equipment at a temperature lower than that specified.) Since the actual temperature at the outlet of the probe is not usually monitored during sampling, probes constructed according to APTD-0581 and utilizing the calibration curves of APTD-0576 (or calibrated according to the procedure outlined in APTD-0576) will be considered acceptable.

Either borosilicate or quartz glass probe liners may be used for stack temperatures up to about 480° C (900° F); quartz liners shall be used for temperatures between 480 and 900° C (900 and 1,650° F). Both types of liners may be used at higher temperatures than specified for short periods of time, subject to the approval of the Administrator. The softening temperature for borosilicate is 820° C (1,508° F), and for quartz it is 1,500° C (2,732° F).

Whenever practical, every effort should be made to use borosilicate or quartz glass probe liners. Alternatively, metal liners (e.g., 316 stainless steel, Incoloy 825,[2] or other corrosion resistant metals) made of seamless tubing may be used, subject to the approval of the Administrator.

2.1.3 Pitot Tube, Type S, as described in Section 2.1 of Method 2, or other device approved by the Administrator. The pitot tube shall be attached to the probe (as shown in Figure 5-1) to allow constant monitoring of the stack gas velocity. The impact (high pressure) opening plane of the pitot tube shall be even with or above the nozzle entry plane (see Method 2, Figure 2-6b) during sampling. The Type S pitot tube assembly shall have a known coefficient, determined as outlined in Section 4 of Method 2.

2.1.4 Differential Pressure Gauge. Inclined manometer or equivalent device (two), as described in Section 2.2 of Method 2. One manometer shall be used for velocity head (Δp) readings, and the other, for orifice differential pressure readings.

2.1.5 Filter Holder. Borosilicate glass, with a glass frit filter support and a silicone rubber gasket. Other materials of construction (e.g., stainless steel, Teflon, Viton) may be used, subject to approval of the Administrator. The holder design shall provide a positive seal against leakage from the outside or around the filter. The holder shall be attached immediately at the outlet of the probe (or cyclone, if used).

2.1.6 Filter Heating System. Any heating system capable of maintaining a temperature around the filter holder during sampling of 120±14° C (248±25° F), or such other temperature as specified by an applicable subpart of the standards or approved by the Administrator for a particular application. Alternatively, the tester may opt to operate the equipment at a temperature lower than that specified. A temperature gauge capable of measuring temperature to within 3° C (5.4° F) shall be installed so that the temperature around the filter holder can be regulated and monitored during sampling. Heating systems other than the one shown in APTD-0581 may be used.

2.1.7 Condenser. The following system shall be used to determine the stack gas moisture content: Four impingers connected in series with leak-free ground glass fittings or any similar leak-free non-contaminating fittings. The first, third, and fourth impingers shall be of the Greenburg-Smith design, modified by replacing the tip with 1.3 cm (½ in.) ID glass tube extending to about 1.3 cm (½ in.) from the bottom of the flask. The second impinger shall be of the Greenburg-Smith design with the standard tip. Modifications (e.g., using flexible connections between the impingers, using materials other than glass, or using flexible vacuum lines to connect the filter holder to the condenser) may be used, subject to the approval of the Administrator. The first and second impingers shall contain known quantities of water (Section 4.1.3), the third shall be empty, and the fourth shall contain a known weight of silica gel, or equivalent desiccant. A thermometer, capable of measuring temperature to within 1° C (2° F) shall be placed at the outlet of the fourth impinger for monitoring purposes.

Alternatively, any system that cools the sample gas stream and allows measurement of the water condensed and moisture leaving the condenser, each to within 1 ml or 1 g may be used, subject to the approval of the Administrator. Acceptable means are to measure the condensed water either gravimetrically or volumetrically and to measure the moisture leaving the condenser by: (1) monitoring the temperature and pressure at the exit of the condenser and using Dalton's law of partial pressures; or (2) passing the sample gas stream through a tared silica gel (or equivalent desiccant) trap with exit gases kept below 20° C (68° F) and determining the weight gain.

If means other than silica gel are used to determine the amount of moisture leaving the condenser, it is recommended that silica gel (or equivalent) still be used between the condenser system and pump to prevent moisture condensation in the pump and metering devices and to avoid the need to make corrections for moisture in the metered volume.

NOTE.—If a determination of the particulate matter collected in the impingers is desired in addition to moisture content, the impinger system described above shall be used, without modification. Individual States or control agencies requiring this information shall be contacted as to the sample recovery and analysis of the impinger contents.

2.1.8 Metering System. Vacuum gauge, leak-free pump, thermometers capable of measuring temperature to within 3° C (5.4° F), dry gas meter capable of measuring volume to within 2 percent, and related equipment, as shown in Figure 5-1. Other metering systems capable of maintaining sampling rates within 10 percent of isokinetic and of determining sample volumes to within 2 percent may be used, subject to the approval of the Administrator. When the metering system is used in conjunction with a pitot tube, the system shall enable checks of isokinetic rates.

Sampling trains utilizing metering systems designed for higher flow rates than that described in APTD-0581 or APTD-0576 may be used provided that the specifications of this method are met.

2.1.9 Barometer. Mercury, aneroid, or other barometer capable of measuring atmospheric pressure to within 2.5 mm Hg (0.1 in. Hg). In many cases, the barometric reading may be obtained from a nearby national weather service station, in which case the station value (which is

[2] Mention of trade names or specific products does not constitute endorsement by the Environmental Protection Agency.

the absolute barometric pressure) shall be requested and no adjustment for elevation differences between the weather station and sampling point shall be applied at a rate of minus 2.5 mm Hg (0.1 in. Hg) per 30 m (100 ft) elevation increase or vice versa for elevation decrease.

2.4.10 Gas Density Determination Equipment. Temperature sensor and pressure gauge, as described in Sections 2.3 and 2.4 of Method 2, and gas analyzer, if necessary, as described in Method 3. The temperature sensor shall, preferably, be permanently attached to the pitot tube or sampling probe in a fixed configuration, such that the tip of the sensor extends beyond the leading edge of the probe sheath and does not touch any metal. Alternatively, the sensor may be attached just prior to use in the field. Note, however, that if the temperature sensor is attached in the field, the sensor must be placed in an interference-free arrangement with respect to the Type S pitot tube openings (see Method 2, Figure 2-7). As a second alternative, if a difference of not more than 1 percent in the average velocity measurement is to be introduced, the temperature gauge need not be attached to the probe or pitot tube. (This alternative is subject to the approval of the Administrator.)

2.5 Sample Recovery. The following items are needed.

2.5.1 Probe-Liner and Probe-Nozzle Brushes. Nylon bristle brushes with stainless steel wire handles. The probe brush shall have extensions (at least as long as the probe) of stainless steel, Nylon, Teflon, or similarly inert material. The brushes shall be properly sized and shaped to brush out the probe liner and nozzle.

2.5.2 Wash Bottles—Two. Glass wash bottles are recommended; polyethylene wash bottles may be used at the option of the tester. It is recommended that acetone not be stored in polyethylene bottles for longer than a month.

2.5.3 Glass Sample Storage Containers. Chemically resistant, borosilicate glass bottles, for acetone washes, 500 ml or 1000 ml. Screw cap liners shall either be rubber-backed Teflon or shall be constructed so as to be leak-free and resistant to chemical attack by acetone. (Narrow mouth glass bottles have been found to be less prone to leakage.) Alternatively, polyethylene bottles may be used.

2.5.4 Petri Dishes. For filter samples, glass or polyethylene, unless otherwise specified by the Administrator.

2.5.5 Graduated Cylinder and/or Balance. To measure condensed water to within 1 ml or 1 g. Graduated cylinders shall have subdivisions no greater than 2 ml. Most laboratory balances are capable of weighing to the nearest 0.5 g or less. Any of these balances is suitable for use here and in Section 2.3.4.

2.5.6 Plastic Storage Containers. Air-tight containers to store silica gel.

2.5.7 Funnel and Rubber Policeman. To aid in transfer of silica gel to container; not necessary if silica gel is weighed in the field.

2.5.8 Funnel. Glass or polyethylene, to aid in sample recovery.

2.6 Analysis. For analysis, the following equipment is needed.

2.6.1 Glass Weighing Dishes.

2.6.2 Desiccator.

2.6.3 Analytical Balance. To measure to within 0.1 mg.

2.6.4 Balance. To measure to within 0.5 g.

2.6.5 Beakers. 250 ml.

2.6.6 Hygrometer. To measure the relative humidity of the laboratory environment.

2.6.7 Temperature Gauge. To measure the temperature of the laboratory environment.

3. *Reagents*

3.1 Sampling. The reagents used in sampling are as follows:

3.1.1 Filters. Glass fiber filters, without organic binder, exhibiting at least 99.95 percent efficiency (≤0.05 percent penetration) on 0.3-micron dioctyl phthalate smoke particles. The filter efficiency test shall be conducted in accordance with ASTM standard method D 2986-71. Test data from the supplier's quality control program are sufficient for this purpose.

3.1.2 Silica Gel. Indicating type, 6 to 16 mesh. If previously used, dry at 175° C (350° F) for 2 hours. New silica gel may be used as received. Alternatively, other types of desiccants (equivalent or better) may be used, subject to the approval of the Administrator.

3.1.3 Water. When analysis of the material caught in the impingers is required, distilled water shall be used. Run blanks prior to field use to eliminate a high blank on test samples.

3.1.4 Crushed Ice.

3.1.5 Stopcock Grease. Acetone-insoluble, heat-stable silicone grease. This is not necessary if screw-on connectors with Teflon sleeves, or similar, are used. Alternatively, other types of stopcock grease may be used, subject to the approval of the Administrator.

3.2 Sample Recovery. Acetone—reagent grade, ≤0.001 percent residue, in glass bottles—is required. Acetone from metal containers generally has a high residue blank and should not be used. Sometimes, suppliers transfer acetone to glass bottles from metal containers; thus, acetone blanks shall be run prior to field use and only acetone with low blank values (≤0.001 percent) shall be used. In no case shall a blank value of greater than 0.001 percent of the weight of acetone used be subtracted from the sample weight.

3.3 Analysis. Two reagents are required for the analysis:

3.3.1 Acetone. Same as 3.2.

3.3.2 Desiccant. Anhydrous calcium sulfate, indicating type. Alternatively, other types of desiccants may be used, subject to the approval of the Administrator.

4. *Procedure*

4.1 Sampling. The complexity of this method is such that, in order to obtain reliable results, testers should be trained and experienced with the test procedures.

4.1.1 Pretest Preparation. All the components shall be maintained and calibrated according to the procedure described in APTD-0576, unless otherwise specified herein.

Weigh several 200 to 300 g portions of silica gel in air-tight containers to the nearest 0.5 g. Record the total weight of the silica gel plus container, on each container. As an alternative, the silica gel need not be preweighed, but may be weighed directly in its impinger or sampling holder just prior to train assembly.

Check filters visually against light for irregularities and flaws or pinhole leaks. Label filters of the proper diameter on the back side near the edge using numbering machine ink. As an alternative, label the shipping containers (glass or plastic petri dishes) and keep the filters in these containers at all times except during sampling and weighing.

Desiccate the filters at 20±5.6° C (68±10° F) and ambient pressure for at least 24 hours and weigh at intervals of at least 6 hours to a constant weight, i.e., <0.5 mg change from previous weighing; record results to the nearest 0.1 mg. During each weighing the filter must not be exposed to the laboratory atmosphere for a period greater than 2 minutes and a relative humidity above 50 percent. Alternatively (unless otherwise specified by the Administrator), the filters may be oven dried at 105° C (220° F) for 2 to 3 hours, desiccated for 2 hours, and weighed. Procedures other than those described, which account for relative humidity effects, may be used, subject to the approval of the Administrator.

4.1.2 Preliminary Determinations. Select the sampling site and the minimum number of sampling points according to Method 1 or as specified by the Administrator. Determine the stack pressure, temperature, and the range of velocity heads using Method 2; it is recommended that a leak-check of the pitot lines (see Method 2, Section 3.1) be performed. Determine the moisture content using Approximation Method 4 or its alternatives for the purpose of making isokinetic sampling rate settings. Determine the stack gas dry molecular weight, as described in Method 2, Section 3.6; if integrated Method 3 sampling is used for molecular weight determination, the integrated bag sample shall be taken simultaneously with, and for the same total length of time as, the particulate sample run.

Select a nozzle size based on the range of velocity heads, such that it is not necessary to change the nozzle size in order to maintain isokinetic sampling rates. During the run, do not change the nozzle size. Ensure that the proper differential pressure gauge is chosen for the range of velocity heads encountered (see Section 2.2 of Method 2).

Select a suitable probe liner and probe length such that all traverse points can be sampled. For large stacks, consider sampling from opposite sides of the stack to reduce the length of probes.

Select a total sampling time greater than or equal to the minimum total sampling time specified in the test procedures for the specific industry such that (1) the sampling time per point is not less than 2 min (or some greater time interval as specified by the Administrator), and (2) the sample volume taken (corrected to standard conditions) will exceed the required minimum total gas sample volume. The latter is based on an approximate average sampling rate.

It is recommended that the number of minutes sampled at each point be an integer or an integer plus one-half minute, in order to avoid timekeeping errors.

In some circumstances, e.g., batch cycles, it may be necessary to sample for shorter times at the traverse points and to obtain smaller gas sample volumes. In these cases, the Administrator's approval must first be obtained.

4.1.3 Preparation of Collection Train. During preparation and assembly of the sampling train, keep all openings where contamination can occur covered until just prior to assembly or until sampling is about to begin.

Place 100 ml of water in each of the first two impingers, leave the third impinger empty, and transfer approximately 200 to 300 g of preweighed silica gel from its container to the fourth impinger. More silica gel may be used, but care should be taken to ensure that it is not entrained and carried out from the impinger during sampling. Place the container in a clean place for later use in the sample recovery. Alternatively, the weight of the silica gel plus impinger may be determined to the nearest 0.5 g and recorded.

Using a tweezer or clean disposable surgical gloves, place a labeled (identified) and weighed filter in the filter holder. Be sure that the filter is properly centered and the gasket properly placed so as to prevent the sample gas stream from circumventing the filter. Check the filter for tears after assembly is completed.

When glass liners are used, install the selected nozzle using a Viton A O-ring when stack temperatures are less than 260° C (500° F) and an asbestos string gasket when temperatures are higher. See APTD-0576 for details. Other connecting systems using either 316 stainless steel or Teflon ferrules may be used. When metal liners are used, install the nozzle as above or by a leak-free direct mechanical connection. Mark the probe with heat resistant tape or by some other method to denote the proper distance into the stack or duct for each sampling point.

Set up the train as in Figure 5-1, using (if necessary) a very light coat of silicone grease on all ground glass joints, greasing only the outer portion (see APTD-0576) to avoid possibility of contamination by the silicone grease. Subject to the approval of the Administrator, a glass cyclone may be used between the probe and filter holder when the total particulate catch is expected to exceed 100 mg or when water droplets are present in the stack gas.

Place crushed ice around the impingers.

4.1.4 Leak-Check Procedures.

4.1.4.1 Pretest Leak-Check. A pretest leak-check is recommended, but not required. If the tester opts to conduct the pretest leak-check, the following procedure shall be used.

After the sampling train has been assembled, turn on and set the filter and probe heating systems at the desired operating temperatures. Allow time for the temperatures to stabilize. If a Viton A O-ring or other leak-free connection is used in assembling the probe nozzle to the probe liner, leak-check the train at the sampling site by plugging the nozzle and pulling a 380 mm Hg (15 in. Hg) vacuum.

NOTE.—A lower vacuum may be used, provided that it is not exceeded during the test.

If an asbestos string is used, do not connect the probe to the train during the leak-check. Instead, leak-check the train by first plugging the inlet to the filter holder (cyclone, if applicable) and pulling a 380 mm Hg (15 in. Hg) vacuum (see Note immediately above). Then connect the probe to the train and leak-check at about 25 mm Hg (1 in. Hg) vacuum; alternatively, the probe may be leak-checked with the rest of the sampling train, in one step, at 380 mm Hg (15 in. Hg) vacuum. Leakage rates in excess of 4 percent of the average sampling rate or 0.00057 m³/min (0.02 cfm), whichever is less, are unacceptable.

The following leak-check instructions for the sampling train described in APTD-0576 and APTD-0581 may be helpful. Start the pump with bypass valve fully open and coarse adjust valve completely closed. Partially open the coarse adjust valve and slowly close the bypass valve until the desired vacuum is reached. Do not reverse direction of bypass valve; this will cause water to back up into the filter holder. If the desired vacuum is exceeded, either leak-check at this higher vacuum or end the leak check as shown below and start over.

When the leak-check is completed, first slowly remove the plug from the inlet to the probe, filter holder, or cyclone (if applicable) and immediately turn off the vacuum pump. This prevents the water in the impingers from being forced backward into the filter holder and silica gel from being entrained backward into the third impinger.

4.1.4.2 Leak-Checks During Sample Run. If, during the sampling run, a component (e.g., filter assembly or impinger) change becomes necessary, a leak-check shall be conducted immediately before the change is made. The leak-check shall be done according to the procedure outlined in Section 4.1.4.1 above, except that it shall be done at a vacuum equal to or greater than the maximum value recorded up to that point in the test. If the leakage rate is found to be no greater than 0.00057 m³/min (0.02 cfm) or 4 percent of the average sampling rate (whichever is less), the results are acceptable, and no correction will need to be applied to the total volume of dry gas metered; if, however, a higher leakage rate is obtained, the tester shall either record the leakage rate and plan to correct the sample volume as shown in Section 6.3 of this method, or shall void the sampling run.

Immediately after component changes, leak-checks are optional; if such leak-checks are done, the procedure outlined in Section 4.1.4.1 above shall be used.

4.1.4.3 Post-test Leak-Check. A leak-check is mandatory at the conclusion of each sampling run. The leak-check shall be done in accordance with the procedures outlined in Section 4.1.4.1, except that it shall be conducted at a vacuum equal to or greater than the maximum value reached during the sampling run. If the leakage rate is found to be no greater than 0.00057 m³/min (0.02 cfm) or 4 percent of the average sampling rate (whichever is less), the results are acceptable, and no correction need be applied to the total volume of dry gas metered. If, however, a higher leakage rate is obtained, the tester shall either record the leakage rate and correct the sample volume as shown in Section 6.3 of this method, or shall void the sampling run.

4.1.5 Particulate Train Operation. During the sampling run, maintain an isokinetic sampling rate (within 10 percent of true isokinetic unless otherwise specified by the Administrator) and a temperature around the filter of 120±14° C (248±25° F), or such other temperature as specified by an applicable subpart of the standards or approved by the Administrator.

For each run, record the data required on a data sheet such as the one shown in Figure 5-2. Be sure to record the initial dry gas meter reading. Record the dry gas meter readings at the beginning and end of each sampling time increment, when changes in flow rates are made, before and after each leak check, and when sampling is halted.

Take other readings required by Figure 5-2 at least once at each sample point during each time increment and additional readings when significant changes (20 percent variation in velocity head readings) necessitate additional adjustments in flow rate. Level and zero the manometer. Because the manometer level and zero may drift due to vibrations and temperature changes, make periodic checks during the traverse.

Clean the portholes prior to the test run to minimize the chance of sampling deposited material. To begin sampling, remove the nozzle cap, verify that the filter and probe heating systems are up to temperature, and that the pitot tube and probe are properly positioned. Position the nozzle at the first traverse point with the tip pointing directly into the gas stream. Immediately start the pump and adjust the flow to isokinetic conditions. Nomographs are available, which aid in the rapid adjustment of the isokinetic sampling rate without excessive computations. These nomographs are designed for use when the Type S pitot tube coefficient is 0.85±0.02, and the stack gas equivalent density (dry molecular weight) is equal to 29±4. APTD-0576 details the procedure for using the nomographs. If C_p and M_d are outside the above stated ranges do not use the nomographs unless appropriate steps (see Citation 7 in Section 7) are taken to compensate for the deviations.

Figure 5-2. Particulate field data.

When the stack is under significant negative pressure (height of impinger stem), take care to close the coarse adjust valve before inserting the probe into the stack to prevent water from backing into the filter holder. If necessary, the pump may be turned on with the coarse adjust valve closed.

When the probe is in position, block off the openings around the probe and porthole to prevent unrepresentative dilution of the gas stream.

Traverse the stack cross-section, as required by Method 1 or as specified by the Administrator, being careful not to bump the probe nozzle into the stack walls when sampling near the walls or when removing or inserting the probe through the portholes; this minimizes the chance of extracting deposited material.

During the test run, make periodic adjustments to keep the temperature around the filter holder at the proper level; add more ice and, if necessary, salt to maintain a temperature of less than 20° C (68° F) at the condenser/silica gel outlet. Also, periodically check the level and zero of the manometer.

If the pressure drop across the filter becomes too high, making isokinetic sampling difficult to maintain, the filter may be replaced in the midst of a sample run. It is recommended that another complete filter assembly be used rather than attempting to change the filter itself. Before a new filter assembly is installed, conduct a leak-check (see Section 4.1.4.2). The total particulate weight shall include the summation of all filter assembly catches.

A single train shall be used for the entire sample run, except in cases where simultaneous sampling is required in two or more separate ducts or at two or more different locations within the same duct, or, in cases where equipment failure necessitates a change of trains. In all other situations, the use of two or more trains will be subject to the approval of the Administrator.

Note that when two or more trains are used, separate analyses of the front-half and (if applicable) impinger catches from each train shall be performed, unless identical nozzle sizes were used on all trains, in which case, the front-half catches from the individual trains may be combined (as may the impinger catches) and one analysis of front-half catch and one analysis of impinger catch may be performed. Consult with the Administrator for details concerning the calculation of results when two or more trains are used.

At the end of the sample run, turn off the coarse adjust valve, remove the probe and nozzle from the stack, turn off the pump, record the final dry gas meter reading, and conduct a post-test leak-check, as outlined in Section 4.1.4.3. Also, leak-check the pitot lines as described in Method 2, Section 3.1; the lines must pass this leak-check, in order to validate the velocity head data.

4.1.6 Calculation of Percent Isokinetic. Calculate percent isokinetic (see Calculations, Section 6) to determine whether the run was valid or another test run should be made. If there was difficulty in maintaining isokinetic rates due to source conditions, consult with the Administrator for possible variance on the isokinetic rates.

4.2 Sample Recovery. Proper cleanup procedure begins as soon as the probe is removed from the stack at the end of the sampling period. Allow the probe to cool.

When the probe can be safely handled, wipe off all external particulate matter near the tip of the probe nozzle and place a cap over it to prevent losing or gaining particulate matter. Do not cap off the probe tip tightly while the sampling train is cooling down as this would create a vacuum in the filter holder, thus drawing water from the impingers into the filter holder.

Before moving the sample train to the cleanup site, remove the probe from the sample train. Wipe off the silicone grease, and cap the open outlet of the probe. Be careful not to lose any condensate that might be present. Wipe off the silicone grease from the filter inlet where the probe was fastened and cap it. Remove the umbilical cord from the last impinger and cap the impinger. If a flexible line is used between the first impinger or condenser and the filter holder, disconnect the line at the filter holder and let any condensed water or liquid drain into the impingers or condenser. After wiping off the silicone grease, cap off the filter holder outlet and impinger inlet. Either ground-glass stoppers, plastic caps, or serum caps may be used to close these openings.

Transfer the probe and filter-impinger assembly to the cleanup area. This area should be clean and protected from the wind so that the chances of contaminating or losing the sample will be minimized.

Save a portion of the acetone used for cleanup as a blank. Take about 200 ml of this acetone directly from the wash bottle being used and place it in a glass sample container labeled "acetone blank."

Inspect the train prior to and during disassembly and note any abnormal conditions. Treat the samples as follows:

Container No. 1. Carefully remove the filter from the filter holder and place it in its identified petri dish container. Use a pair of tweezers and/or clean disposable surgical gloves to handle the filter. If it is necessary to fold the filter, do so such that the particulate cake is inside the fold. Carefully transfer to the petri dish any particulate matter and/or filter fibers which adhere to the filter holder gasket, by using a dry nylon bristle brush and/or a sharp-edged blade. Seal the container.

Container No. 2. Taking care to see that dust on the outside of the probe or other exterior surfaces does not get into the sample, quantitatively recover particulate matter or any condensate from the probe nozzle, probe

V 4216 0 AUG 18 77 UM V

fitting, probe liner, and front half of the filter holder by washing these components with acetone and placing the wash in a glass container. Distilled water may be used instead of acetone when approved by the Administrator and shall be used when specified by the Administrator; in these cases, save a water blank and follow the Administrator's directions on analysis. Perform the acetone rinses as follows:

Carefully remove the probe nozzle and clean the inside surface by rinsing with acetone from a wash bottle and brushing with a nylon bristle brush. Brush until the acetone rinse shows no visible particles, after which make a final rinse of the inside surface with acetone.

Brush and rinse the inside parts of the Swagelok fitting with acetone in a similar way until no visible particles remain.

Rinse the probe liner with acetone by tilting and rotating the probe while squirting acetone into its upper end so that all inside surfaces will be wetted with acetone. Let the acetone drain from the lower end into the sample container. A funnel (glass or polyethylene) may be used to aid in transferring liquid washes to the container. Follow the acetone rinse with a probe brush. Hold the probe in an inclined position, squirt acetone into the upper end as the probe brush is being pushed with a twisting action through the probe; hold a sample container underneath the lower end of the probe, and catch any acetone and particulate matter which is brushed from the probe. Run the brush through the probe three times or more until no visible particulate matter is carried out with the acetone or until none remains in the probe liner on visual inspection. With stainless steel or other metal probes, run the brush through in the above prescribed manner at least six times since metal probes have small crevices in which particulate matter can be entrapped. Rinse the brush with acetone, and quantitatively collect these washings in the sample container. After the brushing, make a final acetone rinse of the probe as described above.

It is recommended that two people be used to clean the probe to minimize sample losses. Between sampling runs, keep brushes clean and protected from contamination.

After ensuring that all joints have been wiped clean of silicone grease, clean the inside of the front half of the filter holder by rubbing the surfaces with a nylon bristle brush and rinsing with acetone. Rinse each surface three times or more if needed to remove visible particulate. Make a final rinse of the brush and filter holder. Carefully rinse out the glass cyclone, also (if applicable). After all acetone washings and particulate matter have been collected in the sample container, tighten the lid on the sample container so that acetone will not leak out when it is shipped to the laboratory. Mark the height of the fluid level to determine whether or not leakage occurred during transport. Label the container to clearly identify its contents.

Container No. 2. Note the color of the indicating silica gel to determine if it has been completely spent and make a notation of its condition. Transfer the silica gel from the fourth impinger to its original container and seal. A funnel may make it easier to pour the silica gel without spilling. A rubber policeman may be used as an aid in removing the silica gel from the impinger. It is not necessary to remove the small amount of dust particles that may adhere to the impinger wall and are difficult to remove. Since the gain in weight is to be used for moisture calculations, do not use any water or other liquids to transfer the silica gel. If a balance is available in the field, follow the procedure for container No. 3 in Section 4.3.

Impinger Water. Treat the impingers as follows: Make a notation of any color or film in the liquid catch. Measure the liquid which is in the first three impingers to within ±1 ml by using a graduated cylinder or by weighing it to within ±0.5 g by using a balance (if one is available). Record the volume or weight of liquid present. This information is required to calculate the moisture content of the effluent gas.

Discard the liquid after measuring and recording the volume or weight, unless analysis of the impinger catch is required (see Note, Section 2.1.7).

If a different type of condenser is used, measure the amount of moisture condensed either volumetrically or gravimetrically.

Whenever possible, containers should be shipped in such a way that they remain upright at all times.

4.3 Analysis. Record the data required on a sheet such as the one shown in Figure 5-3. Handle each sample container as follows:

Container No. 1. Leave the contents in the shipping container or transfer the filter and any loose particulate from the sample container to a tared glass weighing dish. Desiccate for 24 hours in a desiccator containing anhydrous calcium sulfate. Weigh to a constant weight and report the results to the nearest 0.1 mg. For purposes of this Section, 4.3, the term "constant weight" means a difference of no more than 0.5 mg or 1 percent of total weight less tare weight, whichever is greater, between two consecutive weighings, with no less than 6 hours of desiccation time between weighings.

TOTAL VOLUME COLLECTED		g* ml

* CONVERT WEIGHT OF WATER TO VOLUME BY DIVIDING TOTAL WEIGHT INCREASE BY DENSITY OF WATER (1g/ml):

$$\frac{\text{INCREASE, g}}{\text{1 g/ml}} = \text{VOLUME WATER, ml}$$

Figure 5-3. Analytical data.

Alternatively, the sample may be oven dried at 105° C (220° F) for 2 to 3 hours, cooled in the desiccator, and weighed to a constant weight, unless otherwise specified by the Administrator. The tester may also opt to oven dry the sample at 105° C (220° F) for 2 to 3 hours, weigh the sample, and use this weight as a final weight.

Container No. 3. Note the level of liquid in the container and confirm on the analysis sheet whether or not leakage occurred during transport. If a noticeable amount of leakage has occurred, either void the sample or use methods, subject to the approval of the Administrator, to correct the final results. Measure the liquid in this container either volumetrically to ±1 ml or gravimetrically to ±0.5 g. Transfer the contents to a tared 250-ml beaker and evaporate to dryness at ambient temperature and pressure. Desiccate for 24 hours and weigh to a constant weight. Report the results to the nearest 0.1 mg.

Container No. 4. Weigh the spent silica gel (or silica gel plus impinger) to the nearest 0.5 g using a balance. This step may be conducted in the field.

"Acetone Blank" Container. Measure acetone in this container either volumetrically or gravimetrically. Transfer the acetone to a tared 250-ml beaker and evaporate to dryness at ambient temperature and pressure. Desiccate for 24 hours and weigh to a constant weight. Report the results to the nearest 0.1 mg.

NOTE.—At the option of the tester, the contents of Container No. 2 as well as the acetone blank container may be evaporated at temperatures higher than ambient. If evaporation is done at an elevated temperature, the temperature must be below the boiling point of the solvent; also, to prevent "bumping," the evaporation process must be closely supervised, and the contents of the beaker must be swirled occasionally to maintain an even temperature. Use extreme care, as acetone is highly flammable and has a low flash point.

5. Calibration

Maintain a laboratory log of all calibrations.

5.1 Probe Nozzle. Probe nozzles shall be calibrated before their initial use in the field. Using a micrometer, measure the inside diameter of the nozzle to the nearest 0.025 mm (0.001 in.). Make three separate measurements using different diameters each time, and obtain the average of the measurements. The difference between the high and low numbers shall not exceed 0.1 mm (0.004 in.). When nozzles become nicked, dented, or corroded, they shall be reshaped, sharpened, and recalibrated before use. Each nozzle shall be permanently and uniquely identified.

5.2 Pitot Tube. The Type S pitot tube assembly shall be calibrated according to the procedure outlined in Section 4 of Method 2.

5.3 Metering System. Before its initial use in the field, the metering system shall be calibrated according to the procedure outlined in APTD-0576. Instead of physically adjusting the dry gas meter dial readings to correspond to the wet test meter readings, calibration factors may be used to mathematically correct the gas meter dial readings to the proper values. Before calibrating the metering system, it is suggested that a leak-check be conducted. For metering systems having diaphragm pumps, the normal leak-check procedure will not detect leakages within the pump. For these cases the following leak-check procedure is suggested: make a 10-minute calibration run at 0.00057 m³/min (0.02 cfm); at the end of the run, take the difference of the measured wet test meter and dry gas meter volumes, divide the difference by 10, to get the leak rate. The leak rate should not exceed 0.00057 m³/min (0.02 cfm).

After each field use, the calibration of the metering system shall be checked by performing three calibration runs at a single, intermediate orifice setting (based on the previous field test), with the vacuum set at the maximum value reached during the test series. To adjust the vacuum, insert a valve between the wet test meter and the inlet of the metering system. Calculate the average value of the calibration factor. If the calibration has changed by more than 5 percent, recalibrate the meter over the full range of orifice settings, as outlined in APTD-0576.

Alternative procedures, e.g., using the orifice meter coefficients, may be used, subject to the approval of the Administrator.

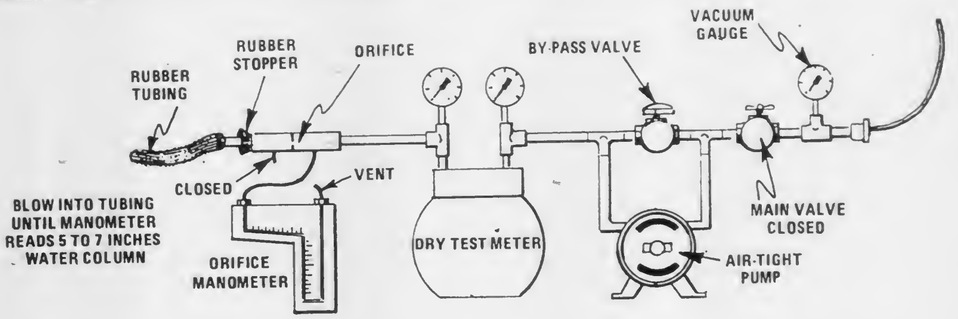

Figure 5-4. Leak check of meter box.

NOTE.—If the dry gas meter coefficient values obtained before and after a test series differ by more than 5 percent, the test series shall either be voided, or calculations for the test series shall be performed using whichever meter coefficient value (i.e., before or after) gives the lower value of total sample volume.

5.4 Probe Heater Calibration. The probe heating system shall be calibrated before its initial use in the field according to the procedure outlined in APTD-0576. Probes constructed according to APTD-0581 need not be calibrated if the calibration curves in APTD-0576 are used.

5.5 Temperature Gauges. Use the procedure in Section 4.3 of Method 2 to calibrate in-stack temperature gauges. Dial thermometers, such as are used for the dry gas meter and condenser outlet, shall be calibrated against mercury-in-glass thermometers.

5.6 Leak Check of Metering System Shown in Figure 5-4. That portion of the sampling train from the pump to the orifice meter should be leak checked prior to initial use and after each shipment. Leakage after the pump will result in less volume being recorded than is actually sampled. The following procedure is suggested (see Figure 5-4): Close the main valve on the meter box. Insert a one-hole rubber stopper with rubber tubing attached into the orifice exhaust pipe. Disconnect and vent the low side of the orifice manometer. Close off the low side orifice tap. Pressurize the system to 13 to 18 cm (5 to 7 in.) water column by blowing into the rubber tubing. Pinch off the tubing and observe the manometer for one minute. A loss of pressure on the manometer indicates a leak in the meter box; leaks, if present, must be corrected.

5.7 Barometer. Calibrate against a mercury barometer.

6. Calculations

Carry out calculations, retaining at least one extra decimal figure beyond that of the acquired data. Round off figures after the final calculation. Other forms of the equations may be used as long as they give equivalent results.

6.1 Nomenclature

A_n = Cross-sectional area of nozzle, m² (ft²).
B_{ws} = Water vapor in the gas stream, proportion by volume.
C_a = Acetone blank residue concentration, mg/g.
c_s = Concentration of particulate matter in stack gas, dry basis, corrected to standard conditions, g/dscm (g/dscf).
I = Percent of isokinetic sampling.
L_a = Maximum acceptable leakage rate for either a pretest leak check or for a leak check following a component change; equal to 0.00057 m³/min (0.02 cfm) or 4 percent of the average sampling rate, whichever is less.
L_i = Individual leakage rate observed during the leak check conducted prior to the "i^{th}" component change (i=1, 2, 3 . . . . n), m³/min (cfm).
L_p = Leakage rate observed during the post-test leak check, m³/min (cfm).
m_a = Total amount of particulate matter collected, mg.
M_w = Molecular weight of water, 18.0 g/g-mole (18.0 lb/lb-mole).
m_a = Mass of residue of acetone after evaporation, mg.
P_{bar} = Barometric pressure at the sampling site, mm Hg (in. Hg).
P_s = Absolute stack gas pressure, mm Hg (in. Hg).
P_{std} = Standard absolute pressure, 760 mm Hg (29.92 in. Hg).
R = Ideal gas constant, 0.06236 mm Hg-m³/°K-g-mole (21.85 in. Hg-ft³/°R-lb-mole).
T_m = Absolute average dry gas meter temperature (see Figure 5-2), °K (°R).
T_s = Absolute average stack gas temperature (see Figure 5-2), °K (°R).
T_{std} = Standard absolute temperature, 293° K (528° R).
V_a = Volume of acetone blank, ml.
V_{aw} = Volume of acetone used in wash, ml.
V_{lc} = Total volume of liquid collected in impingers and silica gel (see Figure 5-3), ml.
V_m = Volume of gas sample as measured by dry gas meter, dcm (dcf).
$V_{m(std)}$ = Volume of gas sample measured by the dry gas meter, corrected to standard conditions, dscm (dscf).
$V_{w(std)}$ = Volume of water vapor in the gas sample, corrected to standard conditions, scm (scf).
V_s = Stack gas velocity, calculated by Method 2, Equation 2-9, using data obtained from Method 5, m/sec (ft/sec).
W_a = Weight of residue in acetone wash, mg.
Y = Dry gas meter calibration factor.
ΔH = Average pressure differential across the orifice meter (see Figure 5-2), mm H_2O (in. H_2O).
ρ_a = Density of acetone, mg/ml (see label on bottle).
ρ_w = Density of water, 0.9982 g/ml (0.002201 lb/ml).
θ = Total sampling time, min.
θ_i = Sampling time interval, from the beginning of a run until the first component change, min.
θ_i = Sampling time interval, between two successive component changes, beginning with the interval between the first and second changes, min.
θ_p = Sampling time interval, from the final (n^{th}) component change until the end of the sampling run, min.
13.6 = Specific gravity of mercury.
60 = Sec/min.
100 = Conversion to percent.

6.2 Average dry gas meter temperature and average orifice pressure drop. See data sheet (Figure 5-2).

6.3 Dry Gas Volume. Correct the sample volume measured by the dry gas meter to standard conditions (20° C, 760 mm Hg or 68° F, 29.92 in. Hg) by using Equation 5-1.

$$V_{m(std)} = V_m Y \left(\frac{T_{std}}{T_m}\right)\left[\frac{P_{bar} + \frac{\Delta H}{13.6}}{P_{std}}\right]$$

$$= K_1 V_m Y \frac{P_{bar} + (\Delta H/13.6)}{T_m}$$

Equation 5-1

V42160 AUG 18 77 UM

where:
m_1=0.3858 °K mm Hg for metric units
=17.64 °R/in. Hg for English units

NOTE.—Equation 5-1 can be used as written unless the leakage rate observed during any of the mandatory leak checks (i.e., the post-test leak check or leak checks conducted prior to component changes) exceeds L_a. If L_p or L_i exceeds L_a, Equation 5-1 must be modified as follows:

(a) Case I. No component changes made during sampling run. In this case, replace V_m in Equation 5-1 with the expression:

$$V_m-(L_p-L_a)\theta]$$

(b) Case II. One or more component changes made during the sampling run. In this case, replace V_m in Equation 5-1 by the expression:

$$\left[V_m-(L_i-L_a)\theta_1 - \sum_{i=2}^{n}(L_i-L_a)\theta_i-(L_p-L_a)\theta_p\right]$$

and substitute only for those leakage rates (L_i or L_p) which exceed L_a.

6.4 Volume of water vapor.

$$V_{w(std)}=V_{lc}\left(\frac{\rho_w}{M_w}\right)\left(\frac{RT_{std}}{P_{std}}\right)=K_2V_{lc} \qquad \text{Equation 5-2}$$

where:
K_2=0.001333 m³/ml for metric units
=0.04707 ft³/ml for English units.

6.5 Moisture Content.

$$B_{ws}=\frac{V_{w(std)}}{V_{m(std)}+V_{w(std)}} \qquad \text{Equation 5-3}$$

6.11.2 Calculation From Intermediate Values.

$$I=\frac{T_sV_{m(std)}P_{std}100}{T_{std}\theta A_nP_s60(1-B_{ws})}$$

$$K_4=\frac{T_sV_{m(std)}}{P_sV_sA_n\theta(1-B_{ws})} \qquad \text{Equation 5-8}$$

where:
K_4=4.320 for metric units
=0.09450 for English units.

6.12 Acceptable Results. If 90 percent $\leq I \leq$110 percent, the results are acceptable. If the results are low in comparison to the standard and I is beyond the acceptable range, or, if I is less than 90 percent, the Administrator may opt to accept the results. Use Citation 4 to make judgments. Otherwise, reject the results and repeat the test.

NOTE.—In saturated or water droplet-laden gas streams, two calculations of the moisture content of the stack gas shall be made, one from the impinger analysis (Equation 5-3), and a second from the assumption of saturated conditions. The lower of the two values of B_{ws} shall be considered correct. The procedure for determining the moisture content based upon assumption of saturated conditions is given in the Note of Section 1.2 of Method 4. For the purposes of this method, the average stack gas temperature from Figure 5-2 may be used to make this determination, provided that the accuracy of the in-stack temperature sensor is ± 1° C (2° F).

METHOD 6—DETERMINATION OF SULFUR DIOXIDE EMISSIONS FROM STATIONARY SOURCES

1. *Principle and Applicability*

1.1 Principle. A gas sample is extracted from the sampling point in the stack. The sulfuric acid mist (including sulfur trioxide) and the sulfur dioxide are separated. The sulfur dioxide fraction is measured by the barium-thorin titration method.

1.2 Applicability. This method is applicable for the determination of sulfur dioxide emissions from stationary sources. The minimum detectable limit of the method has been determined to be 3.4 milligrams (mg) of SO_2/m³ (2.12×10⁻⁷ lb/ft³). Although no upper limit has been established, tests have shown that concentrations as high as 50,000 mg/m³ of SO_2 can be collected efficiently in two midget impingers, each containing 15 milliliters of 3 percent hydrogen peroxide, at a rate of 1.0 lpm for 20 minutes. Based on theoretical calculations, the upper concentration limit in a 20-liter sample is about 94,390 mg/m³.

Possible interferents are free ammonia, water-soluble cations, and fluorides. The cations and fluorides are removed by glass wool filters and an isopropanol bubbler, and hence do not affect the SO_2 analysis. When samples are being taken from a gas stream with high concentrations of very fine metallic fumes (such as in inlets to control devices), a high-efficiency glass fiber filter must be used in place of the glass wool plug (i.e., the one in the probe) to remove the cation interferents.

Free ammonia interferes by reacting with SO_2 to form particulate sulfite and by reacting with the indicator. If free ammonia is present (this can be determined by knowledge of the process and noticing white particulate matter in the probe and isopropanol bubbler), alternative methods, subject to the approval of the Administrator, U.S. Environmental Protection Agency, are required.

2. *Apparatus*

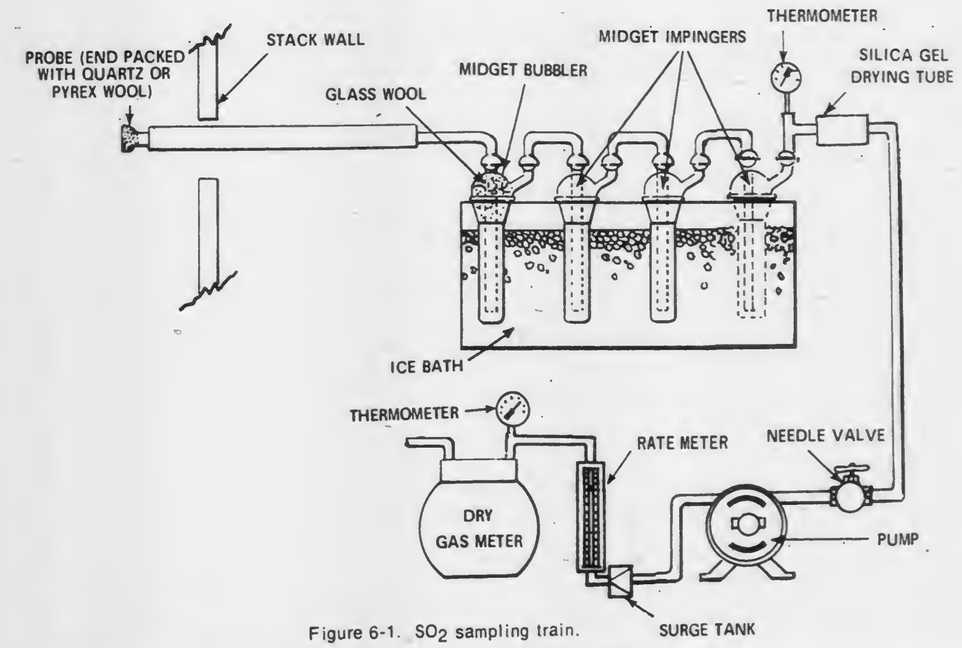

Figure 6-1. SO_2 sampling train.

2.1 Sampling. The sampling train is shown in Figure 6-1, and component parts are discussed below. The tester has the option of substituting sampling equipment described in Method 8 in place of the midget impinger equipment of Method 6. However, the Method 8 train must be modified to include a heated filter between the probe and isopropanol impinger, and the operation of the sampling train and sample analysis must be at the flow rates and solution volumes defined in Method 8. The tester also has the option of determining SO_2 simultaneously with particulate matter and moisture determinations by (1) replacing the water in a Method 5 impinger system with 3 percent perioxide solution, or (2) by replacing the Method 5 water impinger system with a Method 8 isopropanol-filter-peroxide system. The analysis for SO_2 must be consistent with the procedure in Method 8.

2.1.1 Probe. Borosilicate glass, or stainless steel (other materials of construction may be used, subject to the approval of the Administrator), approximately 6-mm inside diameter, with a heating system to prevent water condensation and a filter (either in-stack or heated out-stack) to remove particulate matter, including sulfuric acid mist. A plug of glass wool is a satisfactory filter.

2.1.2 Bubbler and Impingers. One midget bubbler, with medium-coarse glass frit and borosilicate or quartz glass wool packed in top (see Figure 6-1) to prevent sulfuric acid mist carryover, and three 30-ml midget impingers. The bubbler and midget impingers must be connected in series with leak-free glass connectors. Silicone grease may be used, if necessary, to prevent leakage. At the option of the tester, a midget impinger may be used in place of the midget bubbler.

Other collection absorbers and flow rates may be used, but are subject to the approval of the Administrator. Also, collection efficiency must be shown to be at least 99 percent for each test run and must be documented in the report. If the efficiency is found to be acceptable after a series of three tests, further documentation is not required. To conduct the efficiency test, an extra absorber must be added and analyzed separately. This extra absorber must not contain more than 1 percent of the total SO_2.

2.1.3 Glass Wool. Borosilicate or quartz.

2.1.4 Stopcock Grease. Acetone-insoluble, heat-stable silicone grease may be used, if necessary.

2.1.5 Temperature Gauge. Dial thermometer, or equivalent, to measure temperature of gas leaving impinger train to within 1° C (2° F.)

2.1.6 Drying Tube. Tube packed with 6- to 16-mesh indicating type silica gel, or equivalent, to dry the gas sample and to protect the meter and pump. If the silica gel has been used previously, dry at 175° C (350° F) for 2 hours. New silica gel may be used as received. Alternatively, other types of desiccants (equivalent or better) may be used, subject to approval of the Administrator.

2.1.7 Valve. Needle valve, to regulate sample gas flow rate.

2.1.8 Pump. Leak-free disphragm pump, or equivalent, to pull gas through the train. Install a small tank between the pump and rate meter to eliminate the pulsation effect of the diaphragm pump on the rotameter.

2.1.9 Rate Meter. Rotameter, or equivalent, capable of measuring flow rate to within 2 percent of the selected flow rate of about 1000 cc/min.

2.1.10 Volume Meter. Dry gas meter, sufficiently accurate to measure the sample volume within 2 percent, calibrated at the selected flow rate and conditions actually encountered during sampling, and equipped with a temperature gauge (dial thermometer, or equivalent) capable of measuring temperature to within 3°C (5.4°F).

2.1.11 Barometer. Mercury, aneroid, or other barometer capable of measuring atmospheric pressure to within 2.5 mm Hg (0.1 in. Hg). In many cases, the barometric reading may be obtained from a nearby national weather service station, in which case the station value (which is the absolute barometric pressure) shall be requested and an adjustment for elevation differences between the weather station and sampling point shall be applied at a rate of minus 2.5 mm Hg (0.1 in. Hg) per 30 m (100 ft) elevation increase or vice versa for elevation decrease.

2.1.12 Vacuum Gauge. At least 760 mm Hg (30 in. Hg) gauge, to be used for leak check of the sampling train.

2.2 Sample Recovery.

2.2.1 Wash bottles. Polyethylene or glass, 500 ml, two.

2.2.2 Storage Bottles. Polyethylene, 100 ml, to store impinger samples (one per sample).

2.3 Analysis.

2.3.1 Pipettes. Volumetric type, 5-ml, 20-ml (one per sample), and 25-ml sizes.

2.3.2 Volumetric Flasks. 100-ml size (one per sample) and 100-ml size.

2.3.3 Burettes. 5- and 50-ml sizes.

2.3.4 Erlenmeyer Flasks. 250 ml-size (one for each sample, blank, and standard).

2.3.5 Dropping Bottle. 125-ml size, to add indicator.

2.3.6 Graduated Cylinder. 100-ml size.

2.3.7 Spectrophotometer. To measure absorbance at 352 nanometers.

3. *Reagents*

Unless otherwise indicated, all reagents must conform to the specifications established by the Committee on Analytical Reagents of the American Chemical Society. Where such specifications are not available, use the best available grade.

3.1 Sampling.

3.1.1 Water. Deionized, distilled to conform to ASTM specification D1193-74, Type 3. At the option of the analyst, the $KMnO_4$ test for oxidizable organic matter may be omitted when high concentrations of organic matter are not expected to be present.

3.1.2 Isopropanol, 80 Percent. Mix 80 ml of isopropanol with 20 ml of deionized, distilled water. Check each lot of isopropanol for peroxide impurities as follows: shake 10 ml of isopropanol with 10 ml of freshly prepared 10 percent potassium iodide solution. Prepare a blank by similarly treating 10 ml of distilled water. After 1 minute, read the absorbance at 352 nanometers on a spectrophotometer. If absorbance exceeds 0.1, reject alcohol for use.

Peroxides may be removed from isopropanol by redistilling or by passage through a column of activated alumina; however, reagent grade isopropanol with suitably low peroxide levels may be obtained from commercial sources. Rejection of contaminated lots may, therefore, be a more efficient procedure.

3.1.3 Hydrogen Peroxide, 3 Percent. Dilute 30 percent hydrogen peroxide 1:9 (v/v) with deionized, distilled water (30 ml is needed per sample). Prepare fresh daily.

3.1.4 Potassium Iodide Solution, 10 Percent. Dissolve 10.0 grams KI in deionized, distilled water and dilute to 100 ml. Prepare when needed.

3.2 Sample Recovery.

3.2.1 Water. Deionized, distilled, as in 3.1.1.

3.2.2 Isopropanol, 80 Percent. Mix 80 ml of isopropanol with 20 ml of deionized, distilled water.

3.3 Analysis.

3.3.1 Water. Deionized, distilled, as in 3.1.1.

3.3.2 Isopropanol, 100 percent.

3.3.3 Thorin Indicator. 1-(o-arsonophenylazo)-2-naphthol-3,6-disulfonic acid, disodium salt, or equivalent. Dissolve 0.20 g in 100 ml of deionized, distilled water.

3.3.4 Barium Perchlorate Solution, 0.0100 N. Dissolve 1.95 g of barium perchlorate trihydrate [$Ba(ClO_4)_2$·$3H_2O$] in 200 ml distilled water and dilute to 1 liter with isopropanol. Alternatively, 1.22 g of [$BaCl_2$·$2H_2O$] may be used instead of the perchlorate. Standardize as in Section 5.5.

V 42 160 AUG 18 77 UMI

3.3.5 Sulfuric Acid Standard, 0.0100 N. Purchase or standardize to ±0.0002 N against 0.0100 N NaOH which has previously been standardized against potassium acid phthalate (primary standard grade).

4. *Procedure.*

4.1 Sampling.

4.1.1 Preparation of collection train. Measure 15 ml of 80 percent isopropanol into the midget bubbler and 15 ml of 3 percent hydrogen peroxide into each of the first two midget impingers. Leave the final midget impinger dry. Assemble the train as shown in Figure 6-1. Adjust probe heater to a temperature sufficient to prevent water condensation. Place crushed ice and water around the impingers.

4.1.2 Leak-check procedure. A leak check prior to the sampling run is optional; however, a leak check after the sampling run is mandatory. The leak-check procedure is as follows:

With the probe disconnected, place a vacuum gauge at the inlet to the bubbler and pull a vacuum of 250 mm (10 in.) Hg; plug or pinch off the outlet of the flow meter, and then turn off the pump. The vacuum shall remain stable for at least 30 seconds. Carefully release the vacuum gauge before releasing the flow meter end to prevent back flow of the impinger fluid.

Other leak check procedures may be used, subject to the approval of the Administrator, U.S. Environmental Protection Agency. The procedure used in Method 5 is not suitable for diaphragm pumps.

4.1.3 Sample collection. Record the initial dry gas meter reading and barometric pressure. To begin sampling, position the tip of the probe at the sampling point, connect the probe to the bubbler, and start the pump. Adjust the sample flow to a constant rate of approximately 1.0 liter/min as indicated by the rotameter. Maintain this constant rate (±10 percent) during the entire sampling run. Take readings (dry gas meter, temperatures at dry gas meter and at impinger outlet and rate meter) at least every 5 minutes. Add more ice during the run to keep the temperature of the gases leaving the last impinger at 20° C (68° F) or less. At the conclusion of each run, turn off the pump, remove probe from the stack, and record the final readings. Conduct a leak check as in Section 4.1.2. (This leak check is mandatory.) If a leak is found, void the test run. Drain the ice bath, and purge the remaining part of the train by drawing clean ambient air through the system for 15 minutes at the sampling rate.

Clean ambient air can be provided by passing air through a charcoal filter or through an extra midget impinger with 15 ml of 3 percent H_2O_2. The tester may opt to simply use ambient air, without purification.

4.2 Sample Recovery. Disconnect the impingers after purging. Discard the contents of the midget bubbler. Pour the contents of the midget impingers into a leak-free polyethylene bottle for shipment. Rinse the three midget impingers and the connecting tubes with deionized, distilled water, and add the washings to the same storage container. Mark the fluid level. Seal and identify the sample container.

4.3 Sample Analysis. Note level of liquid in container, and confirm whether any sample was lost during shipment; note this on analytical data sheet. If a noticeable amount of leakage has occurred, either void the sample or use methods, subject to the approval of the Administrator, to correct the final results.

Transfer the contents of the storage container to a 100-ml volumetric flask and dilute to exactly 100 ml with deionized, distilled water. Pipette a 20-ml aliquot of this solution into a 250-ml Erlenmeyer flask, add 80 ml of 100 percent isopropanol and two to four drops of thorin indicator, and titrate to a pink endpoint using 0.0100 N barium perchlorate. Repeat and average the titration volumes. Run a blank with each series of samples. Replicate titrations must agree within 1 percent or 0.2 ml, whichever is larger.

(NOTE.—Protect the 0.0100 N barium perchlorate solution from evaporation at all times.)

5. *Calibration*

5.1 Metering System.

5.1.1 Initial Calibration. Before its initial use in the field, first leak check the metering system (drying tube, needle valve, pump, rotameter, and dry gas meter) as follows: place a vacuum gauge at the inlet to the drying tube and pull a vacuum of 250 mm (10 in.) Hg; plug or pinch off the outlet or the flow meter, and then turn off the pump. The vacuum shall remain stable for at least 30 seconds. Carefully release the vacuum gauge before releasing the flow meter end.

Next, calibrate the metering system (at the sampling flow rate specified by the method) as follows: connect an appropriately sized wet test meter (e.g., 1 liter per revolution) to the inlet of the drying tube. Make three independent calibration runs, using at least five revolutions of the dry gas meter per run. Calculate the calibration factor, Y (wet test meter calibration volume divided by the dry gas meter volume, both volumes adjusted to the same reference temperature and pressure), for each run, and average the results. If any Y value deviates by more than 2 percent from the average, the metering system is unacceptable for use. Otherwise, use the average as the calibration factor for subsequent test runs.

5.1.2 Post-Test Calibration Check. After each field test series, conduct a calibration check as in Section 5.1.1 above, except for the following variations: (a) the leak check is not to be conducted, (b) three, or more revolutions of the dry gas meter may be used, and (c) only two independent runs need be made. If the calibration factor does not deviate by more than 5 percent from the initial calibration factor (determined in Section 5.1.1), then the dry gas meter volumes obtained during the test series are acceptable. If the calibration factor deviates by more than 5 percent, recalibrate the metering system as in Section 5.1.1, and for the calculations, use the calibration factor (initial or recalibration) that yields the lower gas volume for each test run.

5.2 Thermometers. Calibrate against mercury-in-glass thermometers.

5.3 Rotameter. The rotameter need not be calibrated but should be cleaned and maintained according to the manufacturer's instruction.

5.4 Barometer. Calibrate against a mercury barometer.

5.5 Barium Perchlorate Solution. Standardize the barium perchlorate solution against 25 ml of standard sulfuric acid to which 100 ml of 100 percent isopropanol has been added.

6. *Calculations*

Carry out calculations, retaining at least one extra decimal figure beyond that of the acquired data. Round off figures after final calculation.

6.1 Nomenclature.

C_{so_2} = Concentration of sulfur dioxide, dry basis corrected to standard conditions, mg/dscm

N = Normality of barium perchlorate titrant, milliequivalents/ml.

P_{bar} = Barometric pressure at the exit orifice of the dry gas meter, mm Hg (in. Hg).

P_{std} = Standard absolute pressure, 760 mm Hg (29.92 in. Hg).

T_m = Average dry gas meter absolute temperature, °K (°R).

T_{std} = Standard absolute temperature, 293° K (528° R).

V_a = Volume of sample aliquot titrated, ml.

V_m = Dry gas volume as measured by the dry gas meter, dcm (dcf).

$V_{m(std)}$ = Dry gas volume measured by the dry gas meter, corrected to standard conditions, dscm (dscf).

V_{soln} = Total volume of solution in which the sulfur dioxide sample is contained, 100 ml.

V_t = Volume of barium perchlorate titrant used for the sample, ml (average of replicate titrations).

V_{tb} = Volume of barium perchlorate titrant used for the blank, ml.

Y = Dry gas meter calibration factor.

32.03 = Equivalent weight of sulfur dioxide.

6.2 Dry sample gas volume, corrected to standard conditions.

$$V_{m(std)} = V_m Y \left(\frac{T_{std}}{T_m}\right)\left(\frac{P_{bar}}{P_{std}}\right) = K_1 Y \frac{V_m P_{bar}}{T_m}$$

Equation 6-1

where:

K_1 = 0.3858 °K/mm Hg for metric units.
= 17.64 °R/in. Hg for English units.

6.3 Sulfur dioxide concentration.

$$C_{SO_2} = K_2 \frac{(V_t - V_{tb})\, N \left(\frac{V_{soln}}{V_a}\right)}{V_{m(std)}}$$

Equation 6-2

where:

K_2 = 32.03 mg/meq. for metric units.
= 7.061 × 10^{-2} lb/meq. for English units.

METHOD 7—DETERMINATION OF NITROGEN OXIDE EMISSIONS FROM STATIONARY SOURCES

1. *Principle and Applicability*

1.1 Principle. A grab sample is collected in an evacuated flask containing a dilute sulfuric acid-hydrogen peroxide absorbing solution, and the nitrogen oxides, except nitrous oxide, are measured colorimetrically using the phenoldisulfonic acid (PDS) procedure.

1.2 Applicability. This method is applicable to the measurement of nitrogen oxides emitted from stationary sources. The range of the method has been determined to be 2 to 400 milligrams NO_x (as NO_2) per dry standard cubic meter, without having to dilute the sample.

2. *Apparatus*

2.1 Sampling (see Figure 7-1). Other grab sampling systems or equipment, capable of measuring sample volume to within ±2.0 percent and collecting a sufficient sample volume to allow analytical reproducibility to within ±5 percent, will be considered acceptable alternatives, subject to approval of the Administrator, U.S. Environmental Protection Agency. The following equipment is used in sampling:

2.1.1 Probe. Borosilicate glass tubing, sufficiently heated to prevent water condensation and equipped with an in-stack or out-stack filter to remove particulate matter (a plug of glass wool is satisfactory for this purpose). Stainless steel or Teflon [3] tubing may also be used for the probe. Heating is not necessary if the probe remains dry during the purging period.

[3] Mention of trade names or specific products does not constitute endorsement by the Environmental Protection Agency.

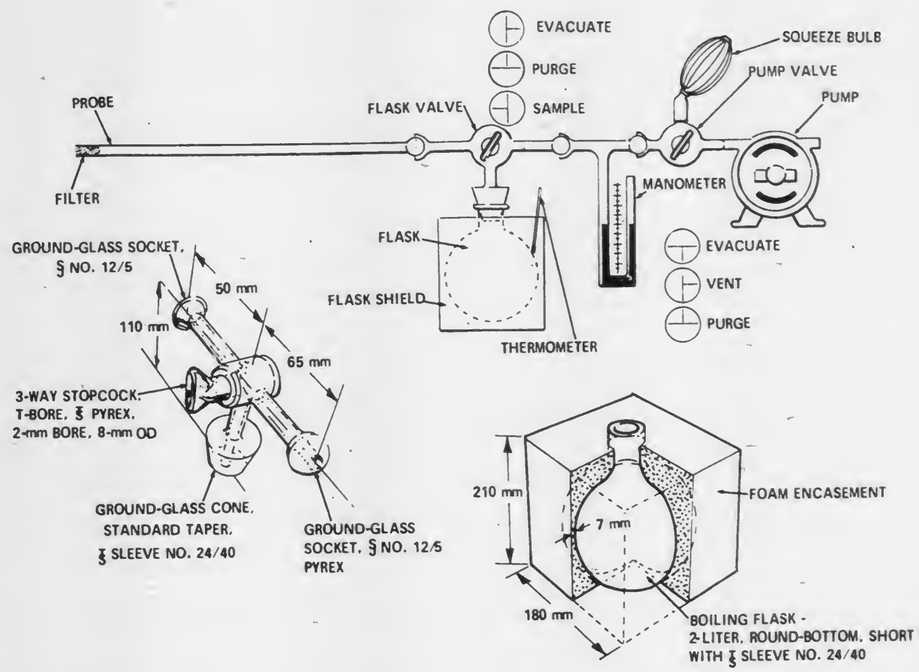

Figure 7-1. Sampling train, flask valve, and flask.

2.1.2 Collection Flask. Two-liter borosilicate, round bottom flask, with short neck and 24/40 standard taper opening, protected against implosion or breakage.

2.1.3 Flask Valve. T-bore stopcock connected to a 24/40 standard taper joint.

2.1.4 Temperature Gauge. Dial-type thermometer, or other temperature gauge, capable of measuring 1° C. (2° F) intervals from −5 to 50° C (25 to 125° F).

2.1.5 Vacuum Line. Tubing capable of withstanding a vacuum of 75 mm Hg (3 in. Hg) absolute pressure, with "T" connection and T-bore stopcock.

2.1.6 Vacuum Gauge. U-tube manometer, 1 meter (36 in.), with 1-mm (0.1-in.) divisions, or other gauge capable of measuring pressure to within ±2.5 mm Hg (0.10 in. Hg).

2.1.7 Pump. Capable of evacuating the collection flask to a pressure equal to or less than 75 mm Hg (3 in. Hg) absolute.

2.1.8 Squeeze Bulb. One-way.

2.1.9 Volumetric Pipette. 25 ml.

2.1.10 Stopcock and Ground Joint Grease. A high-vacuum, high-temperature chlorofluorocarbon grease is required. Halocarbon 25-5S has been found to be effective.

2.1.11 Barometer. Mercury, aneroid, or other barometer capable of measuring atmospheric pressure to within 2.5 mm Hg (0.1 in. Hg). In many cases, the barometric reading may be obtained from a nearby national weather service station, in which case the station value (which is the absolute barometric pressure) shall be requested and an adjustment for elevation differences between the weather station and sampling point shall be applied at a rate of minus 2.5 mm Hg (0.1 in. Hg) per 30 m (100 ft) elevation increase, or vice versa for elevation decrease.

2.2 Sample Recovery. The following equipment is required for sample recovery:

2.2.1 Graduated Cylinder. 50 ml with 1-ml divisions.

2.2.2 Storage Containers. Leak-free polyethylene bottles.

2.2.3 Wash Bottle. Polyethylene or glass.

2.2.4 Glass Stirring Rod.

2.2.5 Test Paper for Indicating pH. To cover the pH range of 7 to 14.

2.3 Analysis. For the analysis, the following equipment is needed:

2.3.1 Volumetric Pipettes. Two 1 ml, two 2 ml, one 3 ml, one 4 ml, two 10 ml, and one 25 ml for each sample and standard.

2.3.2 Porcelain Evaporating Dishes. 175- to 250-ml capacity with lip for pouring, one for each sample and each standard. The Coors No. 45006 (shallow-form, 195 ml) has been found to be satisfactory. Alternatively, polymethyl pentene beakers (Nalge No. 1203, 150 ml), or glass beakers (150 ml) may be used. When glass beakers are used, etching of the beakers may cause solid matter to be present in the analytical step, the solids should be removed by filtration (see Section 4.3).

2.3.3 Steam Bath. Low-temperature ovens or thermostatically controlled hot plates kept below 70° C (160° F) are acceptable alternatives.

2.3.4 Dropping Pipette or Dropper. Three required.

2.3.5 Polyethylene Policeman. One for each sample and each standard.

2.3.6 Graduated Cylinder. 100 ml with 1-ml divisions.

2.3.7 Volumetric Flasks. 50 ml (one for each sample), 100 ml (one for each sample and each standard, and one for the working standard KNO_3 solution), and 1000 ml (one).

2.3.8 Spectrophotometer. To measure absorbance at 410 nm.

2.3.9 Graduated Pipette. 10 ml with 0.1-ml divisions.

2.3.10 Test Paper for Indicating pH. To cover the pH range of 7 to 14.

2.3.11 Analytical Balance. To measure to within 0.1 mg.

3. *Reagents*

Unless otherwise indicated, it is intended that all reagents conform to the specifications established by the Committee on Analytical Reagents of the American Chemical Society, where such specifications are available; otherwise, use the best available grade.

3.1 Sampling. To prepare the absorbing solution, cautiously add 2.8 ml concentrated H_2SO_4 to 1 liter of deionized, distilled water. Mix well and add 6 ml of 3 percent hydrogen peroxide, freshly prepared from 30 percent hydrogen peroxide solution. The absorbing solution should be used within 1 week of its preparation. Do not expose to extreme heat or direct sunlight.

3.2 Sample Recovery. Two reagents are required for sample recovery:

3.2.1 Sodium Hydroxide (1N). Dissolve 40 g NaOH in deionized, distilled water and dilute to 1 liter.

3.2.2 Water. Deionized, distilled to conform to ASTM specification D1193-74, Type 3. At the option of the analyst, the $KMnO_4$ test for oxidizable organic matter may be omitted when high concentrations of organic matter are not expected to be present.

3.3 Analysis. For the analysis, the following reagents are required:

3.3.1 Fuming Sulfuric Acid. 15 to 18 percent by weight free sulfur trioxide. HANDLE WITH CAUTION.

3.3.2 Phenol. White solid.

3.3.3 Sulfuric Acid. Concentrated, 95 percent minimum assay. HANDLE WITH CAUTION.

3.3.4 Potassium Nitrate. Dried at 105 to 110° C (220 to 230° F) for a minimum of 2 hours just prior to preparation of standard solution.

3.3.5 Standard KNO_3 Solution. Dissolve exactly 2.198 g of dried potassium nitrate (KNO_3) in deionized, distilled water and dilute to 1 liter with deionized, distilled water in a 1,000-ml volumetric flask.

3.3.6 Working Standard KNO_3 Solution. Dilute 10 ml of the standard solution to 100 ml with deionized distilled water. One milliliter of the working standard solution is equivalent to 100 µg nitrogen dioxide (NO_2).

3.3.7 Water. Deionized, distilled as in Section 3.2.2.

3.3.8 Phenoldisulfonic Acid Solution. Dissolve 25 g of pure white phenol in 150 ml concentrated sulfuric acid on a steam bath. Cool, add 75 ml fuming sulfuric acid, and heat at 100° C (212° F) for 2 hours. Store in a dark, stoppered bottle.

4. *Procedure*

4.1 Sampling.

4.1.1 Pipette 25 ml of absorbing solution into a sample flask, retaining a sufficient quantity for use in preparing the calibration standards. Insert the flask valve stopper into the flask with the valve in the "purge" position. Assemble the sampling train as shown in Figure 7-1 and place the probe at the sampling point. Make sure that all fittings are tight and leak-free, and that all ground glass joints have been properly greased with a high-vacuum, high-temperature chlorofluorocarbon-based stopcock grease. Turn the flask valve and the pump valve to their "evacuate" positions. Evacuate the flask to 75 mm Hg (3 in. Hg) absolute pressure, or less. Evacuation to a pressure approaching the vapor pressure of water at the existing temperature is desirable. Turn the pump valve to its "vent" position and turn off the pump. Check for leakage by observing the manometer for any pressure fluctuation. (Any variation

greater than 10 mm Hg (0.4 in. Hg) over a period of 1 minute is not acceptable, and the flask is not to be used until the leakage problem is corrected. Pressure in the flask is not to exceed 75 mm Hg (3 in. Hg) absolute at the time sampling is commenced.) Record the volume of the flask and valve (V_f), the flask temperature (T_f), and the barometric pressure. Turn the flask valve counterclockwise to its "purge" position and do the same with the pump valve. Purge the probe and the vacuum tube using the squeeze bulb. If condensation occurs in the probe and the flask valve area, heat the probe and purge until the condensation disappears. Next, turn the pump valve to its "vent" position. Turn the flask valve clockwise to its "evacuate" position and record the difference in the mercury levels in the manometer. The absolute internal pressure in the flask (P_f) is equal to the barometric pressure less the manometer reading. Immediately turn the flask valve to the "sample" position and permit the gas to enter the flask until pressures in the flask and sample line (i.e., duct, stack) are equal. This will usually require about 15 seconds; a longer period indicates a "plug" in the probe, which must be corrected before sampling is continued. After collecting the sample, turn the flask valve to its "purge" position and disconnect the flask from the sampling train. Shake the flask for at least 5 minutes.

4.1.2 If the gas being sampled contains insufficient oxygen for the conversion of NO to NO_2 (e.g., an applicable subpart of the standard may require taking a sample of a calibration gas mixture of NO in N_2), then oxygen shall be introduced into the flask to permit this conversion. Oxygen may be introduced into the flask by one of three methods: (1) Before evacuating the sampling flask, flush with pure cylinder oxygen, then evacuate flask to 75 mm Hg (3 in. Hg) absolute pressure or less; or (2) inject oxygen into the flask after sampling; or (3) terminate sampling with a minimum of 50 mm Hg (2 in. Hg) vacuum remaining in the flask, record this final pressure, and then vent the flask to the atmosphere until the flask pressure is almost equal to atmospheric pressure.

4.2 Sample Recovery. Let the flask set for a minimum of 16 hours and then shake the contents for 2 minutes. Connect the flask to a mercury filled U-tube manometer. Open the valve from the flask to the manometer and record the flask temperature (T_f), the barometric pressure, and the difference between the mercury levels in the manometer. The absolute internal pressure in the flask (P_f) is the barometric pressure less the manometer reading. Transfer the contents of the flask to a leak-free polyethylene bottle. Rinse the flask twice with 5-ml portions of deionized, distilled water and add the rinse water to the bottle. Adjust the pH to between 9 and 12 by adding sodium hydroxide (1 N), dropwise (about 25 to 35 drops). Check the pH by dipping a stirring rod into the solution and then touching the rod to the pH test paper. Remove as little material as possible during this step. Mark the height of the liquid level so that the container can be checked for leakage after transport. Label the container to clearly identify its contents. Seal the container for shipping.

4.3 Analysis. Note the level of the liquid in container and confirm whether or not any sample was lost during shipment; note this on the analytical data sheet. If a noticeable amount of leakage has occurred, either void the sample or use methods, subject to the approval of the Administrator, to correct the final results. Immediately prior to analysis, transfer the contents of the shipping container to a 50-ml volumetric flask, and rinse the container twice with 5-ml portions of deionized, distilled water. Add the rinse water to the flask and dilute to the mark with deionized, distilled water; mix thoroughly. Pipette a 25-ml aliquot into the porcelain evaporating dish. Return any unused portion of the sample to the polyethylene storage bottle. Evaporate the 25-ml aliquot to dryness on a steam bath and allow to cool. Add 2 ml phenoldisulfonic acid solution to the dried residue and triturate thoroughly with a polyethylene policeman. Make sure the solution contacts all the residue. Add 1 ml deionized, distilled water and four drops of concentrated sulfuric acid. Heat the solution on a steam bath for 3 minutes with occasional stirring. Allow the solution to cool, add 20 ml deionized, distilled water, mix well by stirring, and add concentrated ammonium hydroxide, dropwise, with constant stirring, until the pH is 10 (as determined by pH paper). If the sample contains solids, these must be removed by filtration (centrifugation is an acceptable alternative, subject to the approval of the Administrator), as follows: filter through Whatman No. 41 filter paper into a 100-ml volumetric flask; rinse the evaporating dish with three 5-ml portions of deionized, distilled water; filter these three rinses. Wash the filter with at least three 15-ml portions of deionized, distilled water. Add the filter washings to the contents of the volumetric flask and dilute to the mark with deionized, distilled water. If solids are absent, the solution can be transferred directly to the 100-ml volumetric flask and diluted to the mark with deionized, distilled water. Mix the contents of the flask thoroughly and measure the absorbance at the optimum wavelength used for the standards (Section 5.2.1), using the blank solution as a zero reference. Dilute the sample and the blank with equal volumes of deionized, distilled water if the absorbance exceeds A_4, the absorbance of the 400-μg NO_2 standard (see Section 5.2.2).

5 Calibration

5.1 Flask Volume. The volume of the collection flask-flask valve combination must be known prior to sampling. Assemble the flask and flask valve and fill with water, to the stopcock. Measure the volume of water to ±10 ml. Record this volume on the flask.

5.2 Spectrophotometer Calibration.

5.2.1 Optimum Wavelength Determination. For both fixed and variable wavelength spectrophotometers, calibrate against standard certified wavelength of 410 nm, every 6 months. Alternatively, for variable wavelength spectrophotometers, scan the spectrum between 400 and 415 nm using a 200-μg NO_2 standard solution (see Section 5.2.2). If a peak does not occur, the spectrophotometer is probably malfunctioning, and should be repaired. When a peak is obtained within the 400 to 415 nm range, the wavelength at which this peak occurs shall be the optimum wavelength for the measurement of absorbance for both the standards and samples.

5.2.2 Determination of Spectrophotometer Calibration Factor K_c. Add 0.0, 1.0, 2.0, 3.0, and 4.0 ml of the KNO_3 working standard solution (1 ml=100 μg NO_2) to a series of five porcelain evaporating dishes. To each, add 25 ml of absorbing solution, 10 ml deionized, distilled water, and sodium hydroxide (1N), dropwise, until the pH is between 9 and 12 (about 25 to 35 drops each). Beginning with the evaporation step, follow the analysis procedure of Section 4.3, until the solution has been transferred to the 100 ml volumetric flask and diluted to the mark. Measure the absorbance of each solution, at the optimum wavelength, as determined in Section 5.2.1. This calibration procedure must be repeated on each day that samples are analyzed. Calculate the spectrophotometer calibration factor as follows:

$$K_c = 100\,\frac{A_1 + 2A_2 + 3A_3 + 4A_4}{A_1^2 + A_2^2 + A_3^2 + A_4^2}$$

Equation 7–1

where:

K_c = Calibration factor
A_1 = Absorbance of the 100-μg NO_2 standard
A_2 = Absorbance of the 200-μg NO_2 standard
A_3 = Absorbance of the 300-μg NO_2 standard
A_4 = Absorbance of the 400-μg NO_2 standard

5.3 Barometer. Calibrate against a mercury barometer.

5.4 Temperature Gauge. Calibrate dial thermometers against mercury-in-glass thermometers.

5.5 Vacuum Gauge. Calibrate mechanical gauges, if used, against a mercury manometer such as that specified in 2.1.6.

5.6 Analytical Balance. Calibrate against standard weights.

6. Calculations

Carry out the calculations, retaining at least one extra decimal figure beyond that of the acquired data. Round off figures after final calculations.

6.1 Nomenclature.

A = Absorbance of sample.
C = Concentration of NO_x as NO_2, dry basis, corrected to standard conditions, mg/dscm (lb/dscf).
F = Dilution factor (i.e., 25/5, 25/10, etc., required only if sample dilution was needed to reduce the absorbance into the range of calibration).
K_c = Spectrophotometer calibration factor.
m = Mass of NO_x as NO_2 in gas sample, μg.
P_f = Final absolute pressure of flask, mm Hg (in. Hg).
P_i = Initial absolute pressure of flask, mm Hg (in. Hg).
P_{std} = Standard absolute pressure, 760 mm Hg (29.92 in. Hg).
T_f = Final absolute temperature of flask, °K (°R).
T_i = Initial absolute temperature of flask, °K (°R).
T_{std} = Standard absolute temperature, 293° K (528° R).
V_{sc} = Sample volume at standard conditions (dry basis), ml.
V_f = Volume of flask and valve, ml.
V_a = Volume of absorbing solution, 25 ml.
25/5, 25/10, etc., the aliquot factor. (If other than a 25-ml aliquot was used for analysis, the corresponding factor must be substituted).

6.2 Sample volume, dry basis, corrected to standard conditions.

$$V_{sc} = \frac{T_{std}}{P_{std}}\,(V_f - V_a)\left[\frac{P_f}{T_f} - \frac{P_i}{T_i}\right]$$

$$= K_1 (V_f - 25\text{ ml})\left[\frac{P_f}{T_f} - \frac{P_i}{T_i}\right]$$

Equation 7–2

where:

$$K_1 = 0.3858\ \frac{°\text{K}}{\text{mm Hg}}\ \text{for metric units}$$

$$= 17.64\ \frac{°\text{R}}{\text{in. Hg}}\ \text{for English units}$$

6.3 Total μg NO_2 per sample.

$$m = 2\,K_c A f$$

Equation 7–3

NOTE.—If other than a 25-ml aliquot is used for analysis, the factor 2 must be replaced by a corresponding factor.

6.4 Sample concentration, dry basis, corrected to standard conditions.

$$C = K_2\,\frac{m}{V_{sc}}$$

Equation 7–4

where:

$K_2 = 10^3\ \frac{\text{mg/m}^3}{\mu\text{g/ml}}$ for metric units

$= 6.243 \times 10^{-5}\ \frac{\text{lb/scf}}{\mu\text{g/ml}}$ for English units

METHOD 8—DETERMINATION OF SULFURIC ACID MIST AND SULFUR DIOXIDE EMISSIONS FROM STATIONARY SOURCES

1. Principle and Applicability

1.1 Principle. A gas sample is extracted isokinetically from the stack. The sulfuric acid mist (including sulfur trioxide) and the sulfur dioxide are separated, and both fractions are measured separately by the barium-thorin titration method.

1.2 Applicability. This method is applicable for the determination of sulfuric acid mist (including sulfur trioxide, and in the absence of other particulate matter) and sulfur dioxide emissions from stationary sources. Collaborative tests have shown that the minimum detectable limits of the method are 0.05 milligrams/cubic meter (0.03×10⁻⁷ pounds/cubic foot) for sulfur trioxide and 1.2 mg/m³ (0.74 10⁻⁷ lb/ft³) for sulfur dioxide. No upper limits have been established. Based on theoretical calculations for 200 milliliters of 3 percent hydrogen peroxide solution, the upper concentration limit for sulfur dioxide in a 1.0 m³ (35.3 ft³) gas sample is about 12,500 mg/m³ (7.7×10⁻⁴ lb/ft³). The upper limit can be extended by increasing the quantity of peroxide solution in the impingers.

Possible interfering agents of this method are fluorides, free ammonia, and dimethyl aniline. If any of these interfering agents are present (this can be determined by knowledge of the process), alternative methods, subject to the approval of the Administrator, are required.

Filterable particulate matter may be determined along with SO_3 and SO_2 (subject to the approval of the Administrator); however, the procedure used for particulate matter must be consistent with the specifications and procedures given in Method 5.

2. Apparatus

2.1 Sampling. A schematic of the sampling train used in this method is shown in Figure 8-1; it is similar to the Method 5 train except that the filter position is different and the filter holder does not have to be heated. Commercial models of this train are available. For those who desire to build their own, however, complete construction details are described in APTD-0581. Changes from the APTD-0581 document and allowable modifications to Figure 8-1 are discussed in the following subsections.

The operating and maintenance procedures for the sampling train are described in APTD-0576. Since correct usage is important in obtaining valid results, all users should read the APTD-0576 document and adopt the operating and maintenance procedures outlined in it, unless otherwise specified herein. Further details and guidelines on operation and maintenance are given in Method 5 and should be read and followed whenever they are applicable.

2.1.1 Probe Nozzle. Same as Method 5, Section 2.1.1.

2.1.2 Probe Liner. Borosilicate or quartz glass, with a heating system to prevent visible condensation during sampling. Do not use metal probe liners.

2.1.3 Pitot Tube. Same as Method 5, Section 2.1.3.

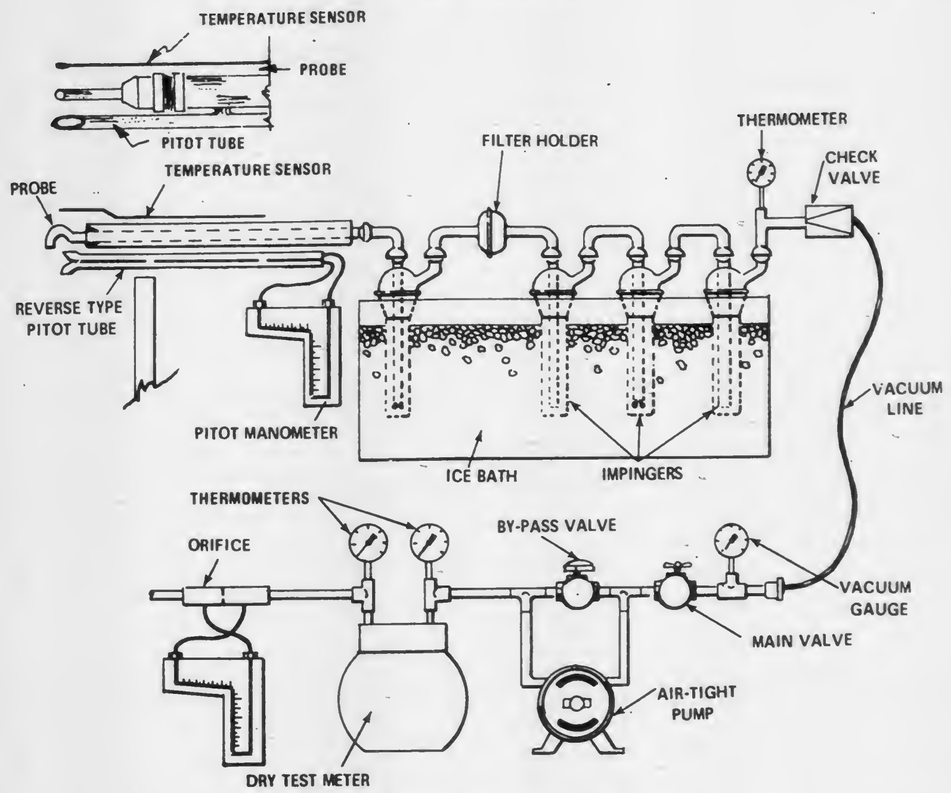

Figure 8-1. Sulfuric acid mist sampling train.

2.1.4 Differential Pressure Gauge. Same as Method 5, Section 2.1.4.

2.1.5 Filter Holder. Borosilicate glass, with a glass frit filter support and a silicone rubber gasket. Other gasket materials, e.g., Teflon or Viton, may be used subject to the approval of the Administrator. The holder design shall provide a positive seal against leakage from the outside or around the filter. The filter holder shall be placed between the first and second impingers. Note: Do not heat the filter holder.

2.1.6 Impingers—Four, as shown in Figure 8-1. The first and third shall be of the Greenburg-Smith design with standard tips. The second and fourth shall be of the Greenburg-Smith design, modified by replacing the insert with an approximately 13 millimeter (0.5 in.) ID glass tube, having an unconstricted tip located 13 mm (0.5 in.) from the bottom of the flask. Similar collection systems, which have been approved by the Administrator, may be used.

2.1.7 Metering System. Same as Method 5, Section 2.1.8.

2.1.8 Barometer. Same as Method 5, Section 2.1.9.

2.1.9 Gas Density Determination Equipment. Same as Method 5, Section 2.1.10.

2.1.10 Temperature Gauge. Thermometer, or equivalent, to measure the temperature of the gas leaving the impinger train to within 1° C (2° F).

2.2 Sample Recovery.

2.2.1 Wash Bottles. Polyethylene or glass, 500 ml. (two).

2.2.2 Graduated Cylinders. 250 ml, 1 liter. (Volumetric flasks may also be used.)

2.2.3 Storage Bottles. Leak-free polyethylene bottles, 1000 ml size (two for each sampling run).

2.2.4 Trip Balance. 500-gram capacity, to measure to ±0.5 g (necessary only if a moisture content analysis is to be done).

2.3 Analysis.

2.3.1 Pipettes. Volumetric 25 ml, 100 ml.

2.3.2 Burrette. 50 ml.

2.3.3 Erlenmeyer Flask. 250 ml. (one for each sample blank and standard).

2.3.4 Graduated Cylinder. 100 ml.

2.3.5 Trip Balance. 500 g capacity, to measure to ±0.5 g.

2.3.6 Dropping Bottle. To add indicator solution, 125-ml size.

3. Reagents

Unless otherwise indicated, all reagents are to conform to the specifications established by the Committee on Analytical Reagents of the American Chemical Society, where such specifications are available. Otherwise, use the best available grade.

3.1 Sampling.

3.1.1 Filters. Same as Method 5, Section 3.1.1.

3.1.2 Silica Gel. Same as Method 5, Section 3.1.2.

3.1.3 Water. Deionized, distilled to conform to ASTM specification D1193-74, Type 3. At the option of the analyst, the $KMnO_4$ test for oxidizable organic matter may be omitted when high concentrations of organic matter are not expected to be present.

3.1.4 Isopropanol. 80 Percent. Mix 800 ml of isopropanol with 200 ml of deionized, distilled water.

NOTE.—Experience has shown that only A.C.S. grade isopropanol is satisfactory. Tests have shown that isopropanol obtained from commercial sources occasionally has peroxide impurities that will cause erroneously high sulfuric acid mist measurement. Use the following test for detecting peroxides in each lot of isopropanol: Shake 10 ml of the isopropanol with 10 ml of freshly prepared 10 percent potassium iodide solution. Prepare a blank by similarly treating 10 ml of distilled water. After 1 minute, read the absorbance on a spectrophotometer at 352 nanometers. If the absorbance exceeds 0.1, the isopropanol shall not be used. Peroxides may be removed from isopropanol by redistilling, or by passage through a column of activated alumina. However, reagent-grade isopropanol with suitably low peroxide levels is readily available from commercial sources; therefore, rejection of contaminated lots may be more efficient than following the peroxide removal procedure.

3.1.5 Hydrogen Peroxide, 3 Percent. Dilute 100 ml of 30 percent hydrogen peroxide to 1 liter with deionized, distilled water. Prepare fresh daily.

3.1.6 Crushed Ice.

3.2 Sample Recovery.

3.2.1 Water. Same as 3.1.3.

3.2.2 Isopropanol, 80 Percent. Same as 3.1.4.

3.3 Analysis.

3.3.1 Water. Same as 3.1.3.

3.3.2 Isopropanol, 100 Percent.

3.3.3 Thorin Indicator. 1-(o-arsonophenylazo)-2-naphthol-3, 6-disulfonic acid, disodium salt, or equivalent. Dissolve 0.20 g in 100 ml of deionized, distilled water.

3.3.4 Barium Perchlorate trihydrate ($Ba(ClO_4)_2{\cdot}3H_2O$) in 200 ml deionized, distilled water, and dilute to 1 liter with isopropanol; 1.22 g of barium chloride dihydrate ($BaCl_2{\cdot}2H_2O$) may be used instead of the barium perchlorate. Standardize with sulfuric acid as in Section 5.2. This solution must be protected against evaporation at all times.

V 42 160 AUG 18 77 UM

3.3.5 Sulfuric Acid Standard (0.0100 N). Purchase or standardize to ±0.0002 N against 0.0100 N NaOH that has previously been standardized against primary standard potassium acid phthalate.

4. *Procedure*

4.1 Sampling.

4.1.1 Pretest Preparation. Follow the procedure outlined in Method 5, Section 4.1.1; filters should be inspected, but need not be desiccated, weighed, or identified. If the effluent gas can be considered dry, i.e., moisture free, the silica gel need not be weighed.

4.1.2 Preliminary Determinations. Follow the procedure outlined in Method 5, Section 4.1.2.

4.1.3 Preparation of Collection Train. Follow the procedure outlined in Method 5, Section 4.1.3 (except for the second paragraph and other obviously inapplicable parts) and use Figure 8-1 instead of Figure 5-1. Replace the second paragraph with: Place 100 ml of 80 percent isopropanol in the first impinger, 100 ml of 3 percent hydrogen peroxide in both the second and third impingers; retain a portion of each reagent for use as a blank solution. Place about 200 g of silica gel in the fourth impinger.

NOTE.—If moisture content is to be determined by impinger analysis, weigh each of the first three impingers (plus absorbing solution) to the nearest 0.5 g and record these weights. The weight of the silica gel (or silica gel plus container) must also be determined to the nearest 0.5 g and recorded.

4.1.4 Pretest Leak-Check Procedure. Follow the basic procedure outlined in Method 5, Section 4.1.4.1, noting that the probe heater shall be adjusted to the minimum temperature required to prevent condensation, and also that verbage such as, "• • • plugging the inlet to the filter holder • • •," shall be replaced by, "• • • plugging the inlet to the first impinger • • •." The pretest leak-check is optional.

4.1.5 Train Operation. Follow the basic procedures outlined in Method 5, Section 4.1.5, in conjunction with the following special instructions. Data shall be recorded on a sheet similar to the one in Figure 8-2. The sampling rate shall not exceed 0.030 m³/min (1.0 cfm) during the run. Periodically during the test, observe the connecting line between the probe and first impinger for signs of condensation. If it does occur, adjust the probe heater setting upward to the minimum temperature required to prevent condensation. If component changes become necessary during a run, a leak-check shall be done immediately before each change, according to the procedure outlined in Section 4.1.4.2 of Method 5 (with appropriate modifications, as mentioned in Section 4.1.4 of this method); record all leak rates. If the leakage rate(s) exceed the specified rate, the tester shall either void the run or shall plan to correct the sample volume as outlined in Section 6.3 of Method 5. Immediately after component changes, leak-checks are optional. If these leak-checks are done, the procedure outlined in Section 4.1.4.1 of Method 5 (with appropriate modifications) shall be used.

Figure 8-2. Field data.

After turning off the pump and recording the final readings at the conclusion of each run, remove the probe from the stack. Conduct a post-test (mandatory) leak-check as in Section 4.1.4.3 of Method 5 (with appropriate modification) and record the leak rate. If the post-test leakage rate exceeds the specified acceptable rate, the tester shall either correct the sample volume, as outlined in Section 6.3 of Method 5, or shall void the run.

Drain the ice bath and, with the probe disconnected, purge the remaining part of the train, by drawing clean ambient air through the system for 15 minutes at the average flow rate used for sampling.

NOTE.—Clean ambient air can be provided by passing air through a charcoal filter. At the option of the tester, ambient air (without cleaning) may be used.

4.1.6 Calculation of Percent Isokinetic. Follow the procedure outlined in Method 5, Section 4.1.6.

4.2 Sample Recovery.

4.2.1 Container No. 1. If a moisture content analysis is to be done, weigh the first impinger plus contents to the nearest 0.5 g and record this weight.

Transfer the contents of the first impinger to a 250-ml graduated cylinder. Rinse the probe, first impinger, all connecting glassware before the filter, and the front half of the filter holder with 80 percent isopropanol. Add the rinse solution to the cylinder. Dilute to 250 ml with 80 percent isopropanol. Add the filter to the solution, mix, and transfer to the storage container. Protect the solution against evaporation. Mark the level of liquid on het container and identify the sample container.

4.2.2 Container No. 2. If a moisture content analysis is to be done, weigh the second and third impingers (plus contents) to the nearest 0.5 g and record these weights. Also, weigh the spent silica gel (or silica gel plus impinger) to the nearest 0.5 g.

Transfer the solutions from the second and third impingers to a 1000-ml graduated cylinder. Rinse all connecting glassware (including back half of filter holder) between the filter and silica gel impinger with deionized, distilled water, and add this rinse water to the cylinder. Dilute to a volume of 1000 ml with deionized, distilled water. Transfer the solution to a storage container. Mark the level of liquid on the container. Seal and identify the sample container.

4.3 Analysis.

Note the level of liquid in containers 1 and 2, and confirm whether or not any sample was lost during shipment; note this on the analytical data sheet. If a noticeable amount of leakage has occurred, either void the sample or use methods, subject to the approval of the Administrator, to correct the final results.

4.3.1 Container No. 1. Shake the container holding the isopropanol solution and the filter. If the filter breaks up, allow the fragments to settle for a few minutes before removing a sample. Pipette a 100-ml aliquot of this solution into a 250-ml Erlenmeyer flask, add 2 to 4 drops of thorin indicator, and titrate to a pink endpoint using 0.0100 N barium perchlorate. Repeat the titration with a second aliquot of sample and average the titration

values. Replicate titrations must agree within 1 percent or 0.2 ml, whichever is greater.

4.3.2 Container No. 2. Thoroughly mix the solution in the container holding the contents of the second and third impingers. Pipette a 10-ml aliquot of sample into a 250-ml Erlenmeyer flask. Add ml of isopropanol, 2 to 4 drops of thorin indicator, and titrate to a pink endpoint using 0.0100 N barium perchlorate. Repeat the titration with a second aliquot of sample and average the titration values. Replicate titrations must agree within 1 percent or 0.2 ml, whichever is greater.

4.3.3 Blanks. Prepare blanks by adding 2 to 4 drops of thorin indicator to 100 ml of 80 percent isopropanol. Titrate the blanks in the same manner as the samples.

5. *Calibration*

5.1 Calibrate equipment using the procedures specified in the following sections of Method 5: Section 5.3 (metering system); Section 5.5 (temperature gauges); Section 5.7 (barometer). Note that the recommended leak-check of the metering system, described in Section 5.6 of Method 5, also applies to this method.

5.2 Standardize the barium perchlorate solution with 25 ml of standard sulfuric acid, to which 100 ml of 100 percent isopropanol has been added.

6. *Calculations*

Note.—Carry out calculations retaining at least one extra decimal figure beyond that of the acquired data. Round off figures after final calculation.

6.1 Nomenclature.

A_n = Cross-sectional area of nozzle, m^2 (ft^2).
B_{ws} = Water vapor in the gas stream, proportion by volume.
$C_{H_2SO_4}$ = Sulfuric acid (including SO_3) concentration, g/dscm (lb/dscf).
C_{SO_2} = Sulfur dioxide concentration, g/dscm (lb/dscf).
I = Percent of isokinetic sampling.
N = Normality of barium perchlorate titrant, g equivalents/liter.
P_{bar} = Barometric pressure at the sampling site, mm Hg (in. Hg).
P_s = Absolute stack gas pressure, mm Hg (in. Hg).
P_{std} = Standard absolute pressure, 760 mm Hg (29.92 in. Hg).
T_m = Average absolute dry gas meter temperature (see Figure 8-2), °K (°R).
T_s = Average absolute stack gas temperature (see Figure 8-2), °K (°R).
T_{std} = Standard absolute temperature, 293° K (528° R).
V_a = Volume of sample aliquot titrated, 100 ml for H_2SO_4 and 10 ml for SO_2.
V_{lc} = Total volume of liquid collected in impingers and silica gel, ml.
V_m = Volume of gas sample as measured by dry gas meter, dcm (dcf).
$V_{m(std)}$ = Volume of gas sample measured by the dry gas meter corrected to standard conditions, dscm (dscf).
v_s = Average stack gas velocity, calculated by Method 2, Equation 2-9, using data obtained from Method 8, m/sec (ft/sec).
V_{soln} = Total volume of solution in which the sulfuric acid or sulfur dioxide sample is contained, 250 ml or 1,000 ml, respectively.
V_t = Volume of barium perchlorate titrant used for the sample, ml.
V_{tb} = Volume of barium perchlorate titrant used for the blanl ml.
Y = Dry gas meter calibration factor.
ΔH = Average pressure drop across orifice meter, mm (in.) H_2O.
θ = Total sampling time, min.
13.6 = Specific gravity of mercury.
60 = sec/min.
100 = Conversion to percent.

6.2 Average dry gas meter temperature and average orifice pressure drop. See data sheet (Figure 8-2).

6.3 Dry Gas Volume. Correct the sample volume measured by the dry gas meter to standard conditions (20° C and 760 mm Hg or 68° F and 29.92 in. Hg) by using Equation 8-1.

$$V_{m(std)} = V_m Y \left(\frac{T_{std}}{T_m}\right) \frac{P_{bar} + \left(\frac{\Delta H}{13.6}\right)}{P_{std}}$$

$$= K_1 V_m Y \frac{P_{bar} + (\Delta H/13.6)}{T_m}$$

Equation 8-1

where:
K_1 = 0.3858 °K/mm Hg for metric units.
= 17.64 °R/in. Hg for English units.

NOTE.—If the leak rate observed during any mandatory leak-checks exceeds the specified acceptable rate, the tester shall either correct the value of V_m in Equation 8-1 (as described in Section 6.3 of Method 5), or shall invalidate the test run.

6.4 Volume of Water Vapor and Moisture Content. Calculate the volume of water vapor using Equation 5-2 of Method 5; the weight of water collected in the impingers and silica gel can be directly converted to milliliters (the specific gravity of water is 1 g/ml). Calculate the moisture content of the stack gas, using Equation 5-3 of Method 5. The "Note" in Section 6.5 of Method 5 also applies to this method. Note that if the effluent gas stream can be considered dry, the volume of water vapor and moisture content need not be calculated.

6.5 Sulfuric acid mist (including SO_3) concentration.

$$C_{H_2SO_4} = K_2 \frac{N(V_t - V_{tb})\left(\frac{V_{soln}}{V_a}\right)}{V_{m(std)}}$$

Equation 8-2

where:
K_2 = 0.04904 g/milliequivalent for metric units.
= 1.081×10^{-4} lb/meq for English units.

6.6 Sulfur dioxide concentration.

$$C_{SO_2} = K_2 \frac{N(V_t - V_{tb})\left(\frac{V_{soln}}{V_a}\right)}{V_{m(std)}}$$

Equation 8-3

where:
K_2 = 0.03203 g/meq for metric units.
= 7.061×10^{-4} lb/meq for English units.

6.7 Isokinetic Variation.

6.7.1 Calculation from raw data.

$$I = \frac{100\, T_s [K_4 V_{lc} + (V_m/T_m) P_{bar} + \Delta H/13.6)]}{60\, \theta V_s P_s A_n}$$

Equation 8-4

where:
K_4 = 0.003464 mm Hg-m³/ml-°K for metric units.
= 0.002676 in. Hg-ft³/ml-°R for English units.

6.7.2 Calculation from intermediate values.

$$I = \frac{T_s V_{m(std)} P_{std} 100}{T_{std} v_s \theta A_n P_s 60 (1 - B_{ws})}$$

$$= K_5 \frac{T_s V_{m(std)}}{P_s v_s A_n \theta (1 - B_{ws})}$$

Equation 8-5

where:
K_5 = 4.320 for metric units.
= 0.09450 for English units.

6.8 Acceptable Results. If 90 percent ≤I ≤110 percent, the results are acceptable. If the results are low in comparison to the standards and I is beyond the acceptable range, the Administrator may opt to accept the results. Use Citation 4 in the Bibliography of Method 5 to make judgments. Otherwise, reject the results and repeat the test.

DEPARTMENT OF STATE

FISHERY CONSERVATION AND MANAGEMENT ACT OF 1976

Applications for Permits To Fish Off the Coasts of the United States

V42 160 AUG 18 77 UM V

DEPARTMENT OF STATE

[Public Notice 562]

FISHERY CONSERVATION AND MANAGEMENT ACT OF 1976

Applications for Permits To Fish Off the Coasts of the United States

The Fishery Conservation and Management Act of 1976 (Pub. L. 94-265) (the "Act") provides that no fishing shall be conducted by foreign fishing vessels in the Fishery Conservation Zone of the United States after February 28, 1977, except in accordance with a valid and applicable permit issued pursuant to Section 204 of the Act.

The Act also requires that all applications for such permits be published in the FEDERAL REGISTER.

Applications for fishing during 1977 have been received from the Government of the German Democratic Republic and the Government of Spain, and are published herewith.

Dated: August 12, 1977.

LARRY L. SNEAD,
Acting Director, Office of Fisheries Affairs.

FISHING VESSEL IDENTIFICATION FORM (FOREIGN)

FISHING VESSEL IDENTIFICATION FORM (FOREIGN)

Permit Period Applied For: ____

Application No. GC-77-003/1 For Use of Issuing Office

State: German Democratic Republic

1. Name of Vessel Robert Koch
2. Vessel No.: Hull No. ROS 314 Registration No. 2259
3. Name and Address of Owner / Name and Address of Charterer

Name VEB Fischkombinat Rostock

Address VEB Fischkombinat Rostock

GDR, 251 Rostock 5

Cable Address 31121 Fiko dd

4. Homeport and State of Registry: Rostock, GDR
5. Type of Vessel Crew Transport Vessel
6. Tonnage (Gross) 1.092,72 (Net) 320,33
7. Length 66,13 M. 8. Breadth 9,72 M. 9. Draft 5,20 M.
10. Horsepower 2x1.170 shp. 11. Maximum Speed 13 kt.
11. Propulsion: Diesel (2), Steam (-), Diesel/Electric (-),

Other -

13. Date Built 1956
14. Number and Nationality of Personnel 28, GDR

Officers 10 Crew 18 Other (Specify) -

15. Communications: VHF-FM (x), AM/SSB, Voice (x), Telegraphy (x),

Other ____

International Radio Call Sign DHUO

Radio Frequencies Monitored 500, 2182

Other Working Frequencies 425,454,468,512,2046,2191,2099

Schedule zone time:08.00-10.00;18.00-20.00 o' clock

16. Navigation Equipment: Loran C (-), Loran A (1), Omega (-), Decca (1), Navsat (-), Radar (2), Fathometer (1),

Other ____

17. Cargo Capacity (MT)

		18. Cargo Space Number	Name
Salted Fish	-		Freezer
Fresh Fish	-		Dry Hold
Frozen Fish	-		Tanks
Fish Meal	-		Other
Other	-		

19. Processing Equipment (Indicate daily capacity,MT)

-

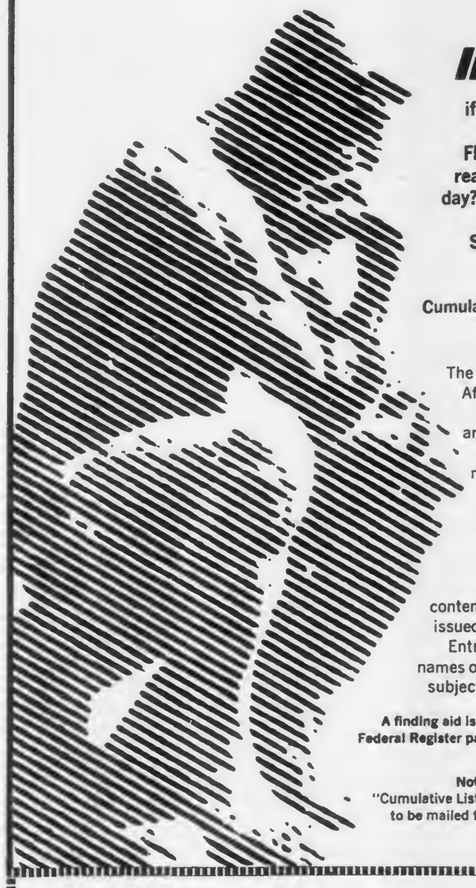
20. Fisheries for which Permit is Requested:

Ocean Area	Period (From-To)	Species	Contemplated Catch (MT)	Gear to be Used
Georges-Bank	1.12.-31.12.77	-	-	-

21. Name and Address of Agent appointed to receive any legal process issued in the United States:

Faulkner & Schmidt, Attorney at Law

9 East, 40th Street



New York, N.Y. 100 16, USA

Anlage 2

Ocean area	Name of vessel	Typ of vessel	Period from - to	Species	Contemplated catch (mt)	Gear to be used	Permit Number	Remarks
Long Island/ Georgesbank	ROS 319 "Lütten Klein"	transport vessel	14.8.- 31.12.77 (14 AUG - 31 DEC)	-	no catch	-	GC-77-0026	to extend the period of the old application
Long Island/ Georgesbank	ROS 320 "Eversbagen"	transport vessel	15.8.- 31.12.77 (15 AUG - 31 DEC)	-	no catch	-	GC-77-0027	to extend the period of the old application

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "Cumulative List of CFR Sections Affected," the "Federal Register Index," or both.

Cumulative List of CFR Sections Affected
$10.00
per year

The "Cumulative List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index **$8.00**
per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the "Cumulative List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

There is enclosed $_____ for _____ subscription(s) to the publications checked below:

..... **CUMULATIVE LIST OF CFR SECTIONS AFFECTED ($10.00 a year domestic; $12.50 foreign)**
..... **FEDERAL REGISTER INDEX ($8.00 a year domestic; $10.00 foreign)**

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of the Interior

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment changes the title of the position of Special Assistant to the Assistant Secretary—Administration and Management to Special Assistant to the Assistant Secretary—Policy, Budget, and Administration because this title reflects the new title of the supervisor.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3312(a)(30) is amended as set out below:

§ 213.3312 Department of the Interior.

(a) *Office of the Secretary.* • • •

(30) One Special Assistant to the Assistant Secretary—Policy, Budget and Administration.

• • • • • • •

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-24050 Filed 8-18-77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Agriculture

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: This amendment excepts under Schedule C one position of Confidential Assistant to the Director of Agricultural Economics because the position is confidential in nature.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3313(n)(4) is amended as set out below:

§ 213.3313 Department of Agriculture.

• • • • • • •

(n) *Agricultural Economics.* • • •

(4) Two Confidential Assistants to the Director.

• • • • • • •

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218).

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-24051 Filed 8-18-77;8:45 am]

PART 213—EXCEPTED SERVICE

Community Services Administration

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment changes the headnote title of the Office of Legislative Relations to the Office of Legislative Affairs because it reflects an organizational redesignation. Also, the position of Confidential Secretary (Typing) to the Associate Director for Legislative Affairs is excepted under Schedule C because it is confidential in nature.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3373(d) is amended and (d)(4) is added as set out below:

§ 213.3373 Community Services Administration.

• • • • • • •

(d) *Office of Legislative Affairs.* • • •

(4) One Confidential Secretary (Typing) to the Associate Director.

• • • • • • •

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218.)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77-24052 Filed 8-18-77;8:45 am]

PART 213—EXCEPTED SERVICE

Department of Housing and Urban Development

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: The position of Secretary to the Deputy Assistant Secretary for Housing—Deputy Federal Housing Commissioner is excepted under Schedule C because it is confidential in nature.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3384(b)(24) is added as set out below:

§ 213.3384 Department of Housing and Urban Development.

• • • • • • •

(b) *Office of the Assistant Secretary for Housing—Federal Housing Commissioner.* • • •

(24) One Secretary to the Deputy Assistant Secretary for Housing—Deputy Federal Housing Commissioner.

• • • • • • •

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954-1958 Comp., p. 218.)

V 42 161 AUG 19 77 UM V

PART 213—EXCEPTED SERVICE
Federal Energy Administration

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: (1) The following positions are excepted under Schedule C because they are confidential in nature: One position of Staff Assistant to the General Counsel, one position of Confidential Assistant to the Assistant Administrator for Energy Information and Analysis, and one position of Confidential Assistant for Legislation, Office of Energy Resource Development. (2) The position of Executive Assistant to the Administrator is revoked in accordance with the provisions of the automatic revocation system.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3388 (e) (3) and (k) (3) are added, (j) (2) is amended, and (k) (1) is revoked as set out below:

§ 213.3388 Federal Energy Administration.

* * * * * *

(e) *Office of the General Counsel.* * * *

(3) One Staff Assistant to the General Counsel.

* * * * * *

(j) *Office of the Assistant Administrator for Energy Resource Development.* * * *

(2) Two Confidential Assistants for Legislation. * * *

(k) *Office of the Assistant Administrator for Energy Information and Analysis.*

(1) (Revoked) * * *

(3) One Confidential Assistant to the Assistant Administrator.

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954–1958 Comp., p. 218).

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77–24099 Filed 8–18–77;8:45 am]

PART 213—EXCEPTED SERVICE
Department of Agriculture

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment excepts from the competitive service under Schedule A seasonal positions of supervisory cotton classers, GS–11, and supervisory clerks, GS–4, in the cotton classing offices of the Agricultural Marketing Service, U.S. Department of Agriculture. This exception is granted because it is impractical to examine for these intermittent positions since the skills and abilities needed are developed by the unique and specialized experience received in lower graded seasonal positions involved in cotton classing work.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202–632–4533.

Accordingly, 5 CFR 213.3113(f) (1) is amended to read as follows:

§ 213.3113 Department of Agriculture.

* * * * * *

(f) *Agricultural Marketing Service.*

(1) Positions of supervisory cotton classers GS–11, cotton classers GS–9 and below, clerks GS–2, supervisory clerks GS–3 and GS–4, and laborers, employed on a seasonal basis in cotton-classing offices outside the Washington, D.C. metropolitan area. Employment under this authority (or under a combination of this authority and any other excepting authority) shall not exceed 1,280 hours a year in the case of supervisory cotton classers, cotton classers and laborers, and 1,040 hours a year in the case of clerks; except that a GS–5 cotton classer may be employed as a trainee during his first appointment for an initial period of 6 months for training purposes without regard to the above time limitation.

(5 U.S.C. 3301, 3302; EO 10577, 3 CFR 1954–1958 Comp., p. 218)

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SPRY,
Executive Assistant to the Commissioners.

[FR Doc.77–24055 Filed 8–18–77;8:45 am]

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lemon Reg. 106]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA
Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period August 21–27, 1977. This regulation is needed to provide for orderly marketing of fresh lemons for the regulation period because of the production and marketing situation confronting the lemon industry.

EFFECTIVE DATE: August 21, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202–447–3545).

SUPPLEMENTARY INFORMATION: (a) *Findings.* (1) Pursuant to the amended marketing agreement and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee established under the amended marketing agreement and order, and upon other available information, it is found that the limitation of handling of such lemons, as provided in this regulation will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the quantity of lemons that may be marketed during the specified week stems from the production and marketing situation confronting the lemon industry.

(i) The committee has submitted its recommendation for the quantity of lemons it considers advisable to be handled during the specified week. The recommendation resulted from consideration of the factors covered in the order. The committee further reports the demand for lemons is good on size 140's and smaller, but poorer on larger sizes. Average f.o.b. price was $6.63 per carton the week ended August 13, 1977, compared to $6.89 per carton the previous week. Track and rolling supplies at 170 cars were down 55 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantity of lemons which may be handled should be established as provided in this regulation.

(3) It is further found that it is impracticable and is contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information upon which this regulation is based became available and the time when it must become effective to effectuate the declared policy of the act is insufficient. A reasonable time is permitted, for preparation for the effective time; and good cause exists for making the regulation effective as specified. The committee held an open meeting during the current week, after giving due notice, to consider supply and market conditions for lemons and the need for regulation. Interested persons were afforded an opportunity to submit information and views at this meeting. The recommendation and supporting information for regulation during the period specified were promptly submitted to the Secretary after the meeting was held, and information concerning the provisions and effective time has been provided to handlers of lemons. It is necessary, to effectuate the declared policy of the act, to make this regulation effective as specified. The committee meeting was held on August 16, 1977.

§ 910.406 Lemon Regulation 106.

(b) *Order.* (1) The quantity of lemons grown in California and Arizona which may be handled during the period August 21, 1977, through August 27, 1977, is established at 270,000 cartons.

(2) As used in this section, "handled" and "carton(s)" have the same meaning as when used in the amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: August 17, 1977.

CHARLES R. BRADER,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77–24299 Filed 8–18–77;11:54 am]

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS AND GRANTS PRIMARILY FOR REAL ESTATE PURPOSES

[FmHA Instruction 443.2]

PART 1821—FARM PURCHASE AND DEVELOPMENT LOANS TO INDIVIDUALS
Soil and Water Loans

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulations to accept applications for soil and water loans when work was started or completed between April 7, 1977, and August 2, 1977. This action is necessary because of the extreme drought in some states and is intended to help this situation.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Denton E. Sprague, 202–447–4597.

SUPPLEMENTAL INFORMATION: Subpart B of Part 1821; Title 7, Code of Federal Regulations is amended in Exhibit B to authorize accepting of applications for work started or completed between April 7, 1977, and August 2, 1977. Because of the extreme drought, early expectations of irrigation water shortages, the urgency to develop a water supply, and the competition for development services and irrigation equipment, many farmers obtained interim short-term financing to drill wells or made other arrangements for water prior to the issuance of Exhibit B. This situation has placed such farmers in a precarious financial position. We believe it will be possible by this amendment to assist most of those farmers under the provisions of the Emergency Drought Act of 1977 Because of this situation, any delay in giving this assistance by reason of the publication of this change in proposed rulemaking form would be contrary to the public interest.

As amended, Exhibit B to Subpart B, paragraph I, is revised to add the following to the end of the paragraph as follows:

EXHIBIT B—BUREAU OF RECLAMATION LOANS TO IRRIGATORS ADMINISTERED BY FARMERS HOME ADMINISTRATION

I. *General.* * * *

County Supervisors are authorized to accept applications and consider loans for applicants whose development work was started or completed prior to issuance of Exhibit B but after enactment of the Emergency Drought Act of 1977 on April 7, 1977, under the following conditions:

1. The development work is for an authorized purpose as stated in Attachment I of this Exhibit.

2. The work is or has been completed in accordance with the requirements of Subpart B of Part 1821 of this Chapter.

3. All the other requirements of this exhibit apply.

* * * * * *

(7 U.S.C. 1989; 31 U.S.C. 686; delegation of authority by the Sec. of Agri., 7 CFR 2.23; delegation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.70.)

NOTE.—The Farmers Home Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: August 9, 1977.

DENTON E. SPRAGUE,
Acting Administrator, Farmers Home Administration.

[FR Doc.77–24026 Filed 8–18–77;8:45 am]

SUBCHAPTER N—OTHER LOAN PROGRAMS

[FmHA Instruction 441.2]

PART 1832—EMERGENCY LOANS
Emergency Loan Policies, Procedures, and Authorizations

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration amends its regulations to add provisions authorizing a reduction of interest rates on emergency loans for actual losses. This is a result of Pub. L. 95–89, which was enacted August 4, 1977, authorizing new interest rates for emergency loans for actual losses for disasters occurring on or after July 1, 1976, and prior to October 1, 1978. This is intended to further aid disaster victims.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Jesse C. Joyner, 202–447–6257.

SUPPLEMENTARY INFORMATION: Sections 1832.21 and 1832.30 of Subpart A, Part 1832, Title 7, Code of Federal Regulations (40 FR 42321) are amended. It is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. This amendment, however, is not published for proposed rulemaking since the change is mandated by Pub. L. 95–89. Proposed rulemaking is therefore unnecessary. Pub. L. 95–89 provides that interest rates on emergency loans for actual losses be set in the following manner:

(a) For repair or replacement of the primary residence and personal property, 1 percent on the first $10,000, 3 percent on the balance not to exceed $40,000, and 5 percent above $40,000.

(b) For other actual loss loans, 3 percent up to $250,000 and 5 percent above $250,000.

For disasters occurring prior to July 1, 1976, the interest rate for actual losses will remain at 5 percent. The law further provides that when a loan bears interest at different rates repayment of principal and interest on the lowest interest rate portion of the loan will be scheduled for repayment before principal payments on those portions of the loan bearing higher interest rates.

Sections 1832.21 and 1832.30 are amended as follows:

1. In § 1832.21, paragraph (a) is amended as set forth below, a new paragraph (b) is added as set forth below and the current paragraphs (b) and (c) are redesignated as (c) and (d) respectively.

§ 1832.21 Rates and terms.

(a) *Interest rates.* Interest rates on the initial advance will accrue from the date of the promissory note. Interest on other advances will accrue from the date of the loan check for each such advance. Interest rates are as follows:

(1) Except for disasters occurring on or after July 1, 1976, and prior to October 1, 1978, EM loans for actual losses will be 5 percent.

(2) For disasters occurring on or after July 1, 1976, and prior to October 1, 1978, EM loans for actual losses will be as follows:

(i) For repair or replacement of the primary residence and personal property, 1 percent on the first $10,000, 3 percent on the balance not to exceed $40,000, and 5 percent above $40,000.

(ii) For other actual loss loans, 3 percent up to $250,000 and 5 percent above $250,000.

(3) The interest rate for EM loans made under § 1832.20 paragraphs (b) and (c) (2) (Subtitle B purposes), and § 1832.20 paragraphs (c) (1) (Subtitle A purposes) will be the interest rate prevailing in the private market for similar loans, as determined by the Secretary of Agriculture. The prevailing market rates are specified in Part 1810 Subpart A of this Chapter. These interest rates, for other than actual losses, will be reviewed in June and December of each year with new interest rates established on July 1 and January 1 of each year by the Secretary.

(b) *Establishing repayment terms and delay of principal payments.* EM loans for actual losses where different interest rates are authorized as set forth in § 1832.21(a) (2) will be scheduled for repayment of the principal and interest on that portion of the loan bearing the lowest interest rate before principal pay-

V 42 161 AUG 19 77 UMI

ments are scheduled for portions of the loan bearing higher interest rates. However, interest must be collected on the portion of the principal deferred during the period principal payments are not scheduled. The portion of the loan bearing the lower interest rate should be repaid as soon as possible, consistent with the applicant's repayment ability. This deferral of principal does not apply to EM Annual Production or Major Adjustment Loans.

* * * * *

2. Paragraphs (a) and (b) of 1832.30 are amended as set forth below to clarify the internal procedures which will accompany the new interest rate structure.

§ 1832.30 Loan docket forms.

(a) *Promissory Note(s).* A separate note will be prepared for each Form FmHA 440–1, "Request for Obligation of Funds," used in obligating the total amount of the EM loan. Each scheduled installment will include interest in addition to principal unless deferment of principal is authorized in accordance with § 1832.21 (b) and (d). The first installment may not be less than the amount equal to interest on the loan from the estimated date or actual date of closing to installment due date.

(1) Form FmHA 441–1, "Promissory Note," will be used when a loan is scheduled for payment in unequal annual installments, or within one full crop year after loan closing.

(2) Form FmHA 440–16, "Promissory Note," will be used when a loan is scheduled for payment in equal annual installments of three years or more. Also, this note may be used when the first two installments are unequal and the balance consists of equal installments.

(3) When the applicant is partnership, the promissory note(s) will be executed so as to evidence the liability of the partnership as well as each partner as an individual. This will be accomplished by typing the name of the partnership above the space provided for signatures and having the note executed by each member of the partnership both as a partner and as an individual. To evidence the liability of the partnership, the words "As Partners" will be typed immediately beneath the name of the partnership and each partner will sign thereunder. To evidence the partners' liability as individuals, the words "As Individuals" will be typed at the top of the blank space to the left of the lines for signatures, and each partner will sign thereunder, along with his spouse if required by State Instructions or loan closing instructions.

(4) When the applicant is a corporation, the promissory note(s) will be executed by the corporation acting through its appropriate officials and, in order to evidence their personal liability for the debt, by the principal stockholders as individuals. To evidence the principal stockholders' liability as individuals each principal stockholder will sign the note(s) except in unusual circumstances including legal disability, absence from the country, or legal justification. Their spouses will also sign the note if required by State Instructions or loan closing instructions.

(b) *Form FmHA 440–1, "Request for Obligations of Funds."* This form is used to obligate loan funds to provide certain statistical information about the loan and applicant and to request all or part of the loan funds obligated.

(1) A separate Form FmHA 440–1 will be prepared for each amount of the total loan which is at a different interest rate or repayment period as established in accordance with § 1832.21 (a) and (c). The full amount of the loan as obligated on the Form FmHA 440–1 will be rounded to the nearest $10.

(2) EM loans approved for borrowers presently indebted for an EM loan, but having NEW qualifying losses from a subsequent major or natural disaster for which a MDDN, PEDN, SDDN, or SDAN has been assigned, will show the new appropriate disaster designation number. This number will be used for all subsequent EM loans approved unless the borrower has new qualifying losses from a different disaster for which another disaster designation number has been assigned.

(3) The Finance Office will not process Form FmHA 440–1 for EM loans that are not coded with a disaster designation number.

* * * * *

(7 U.S.C. 1989; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.70.)

NOTE.—The Farmers Home Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: August 13, 1977.

GORDON CAVANAUGH,
Administrator, Farmers Home Administration.

[FmHA Instructions 440.1 and 1980–C]

PART 1980—GUARANTEED LOAN PROGRAMS

Subpart C—Emergency Livestock Loans

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule, revision and redesignation.

SUMMARY: The Farmers Home Administration adds and revises regulations as part of a general administrative restructuring of all guaranteed loan regulations. This addition and revision is intended to enable lenders to make more guaranteed loans from the funds received from secondary market sales, and to redesignate, clarify, and revise the regulations concerning Emergency Livestock loans. This Subchapter C will apply only to loans made on and after August 19, 1977. Line of credit guarantees issued before August 19, 1977, will be administered under the provisions of Part 1845, Subchapter D, Chapter XVIII, Title 7, Code of Federal Regulations.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Denton E. Sprague, 202–447–4597.

SUPPLEMENTAL INFORMATION: On May 23, 1977, there was published in the FEDERAL REGISTER (42 FR 26358–26376) a notice of proposed rulemaking involving the addition of Subpart C, "Emergency Livestock Loans" of Part 1980, Subchapter N, Chapter XVIII, Title 7, Code of Federal Regulations. This Subpart C (§§ 1980.201–1980.299) redesignates, clarifies, and revises various sections of the regulations now contained in Subchapter D, Part 1845, "FmHA Emergency Livestock Line of Credit Guarantees," published at 40 FR 30623, and amended at 41 FR 7494; 41 FR 39005; 41 FR 55173; 41 FR 55321; 42 FR 2308. Part 1845 is to be retained, however, for servicing and liquidation of Contracts of Guarantee issued under that Part. Interested parties were given the opportunity to submit on or before June 23, 1977, all comments, suggestions, or objections regarding the proposed addition.

Comments have been received and considered and appropriate changes have been incorporated. The incorporated changes plus the major changes originally proposed will:

1. Implement FmHA's secondary market provisions contained in Subpart A of Part 1980 and published at 41 FR 47462, by providing two lending approaches for lenders to choose from. If a lender desires to sell notes in the secondary market it will receive a Loan Note Guarantee from FmHA. Such a guarantee constitutes full faith and credit to holders. On the other hand, if a lender desires a guarantee on a line of credit, FmHA will issue a Contract of Guarantee. Notes constituting a line of credit may not be sold in the secondary market with full faith and credit to holders.

2. Increase emphasis on loan analysis, and participation by FmHA County Supervisors and District Directors in the issuance of guarantees.

3. Increase FmHA County Supervisor and District Director responsibility in monitoring lender's servicing actions.

4. Strengthen and clarify existing procedures dealing with making and servicing these guarantees, and abolish the requirement of a County Committee certification.

5. Provide the means for converting Contract of Guarantee cases to Loan Note Guarantee cases when lenders desire to enjoy the benefits of the secondary market. A one percent conversion fee will be charged lenders for this servicing action. However, a lender may obtain a new guarantee without payment of a fee for a borrower who can qualify by refinancing the unpaid balance on his existing guaranteed loan(s) with a new guaranteed loan. This will require the lender to prepare and present a completely new guarantee request to FmHA for consideration.

Subpart C of Part 980, as added, is set forth below:

Subpart C—Emergency Livestock Loans

Sec.
1980.201 Introduction.
1980.202–1980.206 [Reserved]
1980.207 Definitions.
1980.208 Program objective.
1980.209 Eligible lenders.
1980.210 Case and identification (ID) numbers.
1980.211–1980.214 [Reserved]
1980.215 Types of guarantees.
1980.216 Full faith and credit.
1980.217 Guarantee limits.
1980.218–1980.219 [Reserved]
1980.220 Eligibility.
1980.221 Loan purposes.
1980.222 Prohibited loan purposes.
1980.223 Limitations and special provisions.
1980.224 Loan rates and terms.
1980.225 Collateral requirements.
1980.226 Promissory notes, security instruments, and financing statements.
1980.227 Relationship with other FmHA insured or guaranteed loans.
1980.228 Charges and fees by lender.
1980.229–1980.245 [Reserved]
1980.248 Receiving and processing applications.
1980.247 FmHA evaluation of applications.
1980.248 [Reserved]
1980.249 Review of requirements.
1980.250 Conditions precedent to issuance of the guarantee.
1980.251 Issuance of guarantee instruments.
1980.252–1980.259 [Reserved]
1980.260 Substitution of lenders.
1980.261–1980.268 [Reserved]
1980.269 Extension of guarantees issued before December 20, 1976.
1980.270 Changeover of loans covered by 80 percent loss guarantees to line of credit guarantees without sale to holder(s).
1980.271 Conversion of existing EL loans so the guaranteed portions can be sold as permitted by Subpart A of Part 1980.
1980.272 Refinancing existing EL loans so that the guaranteed portion can be sold through the Loan Note Guarantee system.
1980.273–1980.276 [Reserved]
1980.277 Change from livestock to farming operation after guarantee is issued.
1980.278 Transfer and assumption of loans.
1980.279 Loan servicing.
1980.280 Protective advances.
1980.281 Termination of guarantee.
1980.282 Defaults by borrower.
1980.283 Liquidation.
1980.284–1980.289 [Reserved]
1980.290 Graduation.
1980.291 Appeal procedure.
1980.292 Access to records of lender.
1980.293 County and State Office files.
(a) County Office files.
(b) State Office files.
1980.294 FmHA forms.
1980.295–1980.299 [Reserved]

AUTHORITY: Sec. 10 of Pub. L. 93–357 88 Stat. 392; delegation of authority Secretary of Agriculture (7 CFR 2.23); delegation of authority by Assistant Secretary for Rural Development (7 CFR 2.70).

Subpart C—Emergency Livestock Loans

§ 1980.201 Introduction.

(a) *Policy.* This Subpart contains regulations for making and servicing Emergency Livestock (EL) loans made after August 19, 1977, and applies to lenders, holders, borrowers, Farmers Home Administration (FmHA) personnel, and other parties involved in making, guaranteeing, holding, servicing, or liquidating such loans. In addition, Subpart A of this part applies to EL loans only to the extent that sections of Subpart A are specifically referred to in this Subpart.

(b) *Program administration.* This program like other FmHA programs is administered by the FmHA Administrator through the State Director serving each State through the District Director to the County Supervisor. The County Supervisor is the focal point for the program and the local contact person for guarantee processing and servicing activities even though this Subpart refers in various places to the duties and responsibilities of other FmHA employees.

(c) *Administrative provisions.* Throughout this subpart there appear administrative provisions for the State Director, District Director, and County Supervisor. These provisions establish the internal duties, responsibilities and procedures to carry out the requirements of the program and are identified as "ADMINISTRATIVE" and follow the appropriate sections of this Subpart.

§§ 1980.202–1980.206 [Reserved]

§ 1980.207 Definitions.

The following general definitions are applicable to the terms used in this Subpart. Additional definitions may be found in § 1980.6 of Subpart A, except that those contained in § 1980.6(a) (2), (4), (7), (9), (13) and (14) are not applicable to cases in which a lender requests a Contract of Guarantee.

(a) *Act.* The Emergency Livestock Credit Act of 1974 (P. L. 93–357); as amended by Public Laws 94–35, and 94–517.

(b) *Applicant.* The person or entity carrying on the farming or ranching operation and desiring EL loan assistance from a lender.

(c) *Approval officials.* These are field officials who have been delegated loan and grant approval authorities within applicable loan programs, subject to the dollar limitations contained in Tables available in any FmHA State or County Office, or from the National Office, 14th Street and Independence Avenue, SW, Washington, D.C. 20250. Field officials having loan and grant approval authorities are State Directors, District Directors, County Supervisors, and Assistant County Supervisors. Refer to Subpart A of Part 1901 of this Chapter for authorities and responsibilities delegated to field officials for all programs of FmHA.

(d) *Guaranteed line of credit.* EL loan advances made and serviced by a lender subject to a maximum amount agreed to by the lender and FmHA which is specified in a Form FmHA 449–27, "Contract of Guarantee (Emergency Livestock Loan)."

(e) *Livestock.* The term "livestock" means beef cattle, dairy cattle, including dairy cattle raised and maintained for the primary purpose of marketing dairy products, swine, sheep, goats, chickens, and turkeys.

(f) *Loan.* This term includes both a fixed amount loan to which a Loan Note Guarantee will be attached and an advance(s) made pursuant to a line of credit guaranteed by a Contract of Guarantee.

(g) *Loan servicing.* All actions that are necessary after loan closing to collect the indebtedness and to protect the security and security rights. The term "servicing" also includes transfer and assumption and liquidation.

(h) *Mortgage.* The term "mortgage" includes any form of instrument used to obtain a security interest or lien upon any rights or interest in real property of any kind. In Louisiana and Puerto Rico the term "mortgage" also refers to the instrument granting any security interest in chattel property.

(i) *Protective advances.* Payments made by the lender to third parties to protect or preserve security property.

(j) *Security.* The term "security" (sometimes referred to as collateral or security property) includes any rights or interests in property of any kind subject to a real or personal property lien.

(1) *Basic security.* All real estate and fixtures and personal property such as foundation herds, flocks, machinery, and equipment serving as security and crops when crops are the only security.

(2) *Normal income security.* All normal income security property planned to be marketed in the regular course of business unless liquidation is approved. If liquidation is approved, such security becomes basic security.

(k) *State.* Any of the fifty States, Puerto Rico, or the Virgin Islands.

(l) *United States.* The term "United States" means the United States itself, any of the 50 States, Puerto Rico, and the Virgin Islands, as appropriate in the context in which the term is used.

§ 1980.208 Program objective.

The basic objective is to make more credit available during the period authorized by Public Law 93–357 as amended, (authority expires September 30, 1978) in the form of loans guaranteed by FmHA for bona fide farmers and ranchers who are primarily and directly engaged in agricultural production and who have substantial livestock operations, so that they may continue their normal farming or ranching operations.

§ 1980.209 Eligible lenders.

See § 1980.13 of Subpart A except that in Contract of Guarantee cases, the form that will apply in §§ 1980.13 (g) and (h) will be Form FmHA 449–38, "Lenders Agreement (Emergency Livestock Loan—Contract of Guarantee)."

§ 1980.210 Case and identification (ID) numbers.

Refer to § 1980.12 of Subpart A.

§§ 1980.211–1980.214 [Reserved]

§ 1980.215 Types of guarantees.

(a) *Loan Note Guarantee.* Lenders desiring to sell the guaranteed portion of

V 42 161 AUG 19 77 UM V

fixed amount loans may use the method contained in Subpart A of this Part. In accordance with that method, loans may be made by a lender and guaranteed by issuance of Form FmHA 449–34, "Loan Note Guarantee," or

(b) *Contract of Guarantee.* Lenders desiring a guarantee on a "line of credit" may use the method contained in this Subpart. Line of credit loans are guaranteed by Form FmHA 449–27. The amount of loan advances outstanding at any one time under a Contract of Guarantee may not exceed the line of credit ceiling set forth in the contract.

(c) *Program termination date.* Neither a Loan Note Guarantee nor a Contract of Guarantee will be executed after September 30, 1978.

§ 1980.216 Full faith and credit.

The Loan Note Guarantee and Contract of Guarantee constitute obligations supported by the full faith and credit of the United States and are incontestable except for fraud or misrepresentation of which the lender or holder has actual knowledge at the time it becomes such lender or holder or which lender or holder participates in or condones. The guarantee and right to require purhase in Loan Note Guarantee cases will be directly enforceable by holder notwithstanding any fraud or misrepresentation by the lender or any unenforceability of the Loan Note Guarantee by lender. The Loan Note Guarantee and Contract of Guarantee will be unenforceable by the lender to the extent any loss is occasioned by violation of usury laws, use of loan funds for unauthorized purposes, negligent servicing, or failure to obtain the required security regardless of the time at which FmHA acquires knowledge of the foregoing.

§ 1980.217 Guarantee limits.

The maximum loss covered under Form FmHA 449–34 or Form FmHA 449–27 will not exceed ninety percent of the principal and accrued interest on the indebtedness represented by the borrower's guaranteed loan promissory note(s) or assumed under an assumption agreement. Lenders and applicant will propose the percentage of guarantee. The lender and applicant will be informed in writing on Form FmHA 449–14, "Title" or Form FmHA 449–15, "Title" by FmHA of any percentage of guarantee less than proposed by the lender and applicant, and the reasons, therefor, FmHA will determine the percentage of guarantee after considering all credit factors involved, including but not limited to those provisions contained in paragraphs (a), (b), (c), (d) and (e) of § 1980.20 of Subpart A.

§§ 1980.218–1980.219 [Reserved]

§ 1980.220 Eligibility.

To be eligible for an EL loan, an applicant must: (a) *Citizen.* Be a citizen of the United States or a person who has been legally admitted for permanent residence in the United States. If a partnership, the principal partners must be citizens or such permanent residents of the United States. If a corporation, it must be incorporated under the laws of the United States, its principal stockholders must be citizens or such permanent residents of the United States, and the corporation must be authorized to carry on farming or ranching operations in the State in which the EL operation is being conducted. See § 1980.207 for definition of "State" and "United States." Any partner or stockholder owning or controlling a 20 percent or more interest in a partnership or corporation will be considered a principal partner or stockholder. If no person owns or controls as much as 20 percent, all partners and stockholders will be considered principal partners or stockholders.

(b) *Bona fide farmer or rancher.* Be a *bona fide* farmer or rancher (owner-operator, or tenant), (1) doing business in the United States either as an individual, corporation, or partnership, which is recognized in the community as one whose chief occupation is farming or ranching, (2) primarily and directly engaged in agricultural production, and (3) having substantial operations in breeding, raising, fattening, or marketing livestock, including dairy cattle raised and maintained for the primary purpose of marketing dairy products (hereinafter referred to as a livestock operation). *In the case of an individual loan applicant* the term "primarily and directly engaged in agricultural production" means that he derives more than 50 percent of his gross income from *his own* agricultural production or devotes more than 50 percent of his time to such production. The term "substantial operations in livestock" means that he derives not less than 25 percent of his gross farm income from his own livestock operation, or devotes not less than 25 percent of his time to such operation, or has not less than 25 percent of his total capital investment in such operation. *In the case of a corporation or partnership loan applicant,* the term "primarily and directly engaged in agricultural production" means that the corporation or partnership derives more than 50 percent of its gross income from agricultural production, and the shareholders or partners owning or controlling a majority interest in such corporation or partnership derive more than 50 percent of their gross income from their own or the corporation's or partnership's agricultural production, *and* devote more than 50 percent of their time to such production. The term "substantial operations in livestock" means that the corporation or partnership derives not less than 25 percent of its gross farm income from its own livestock operation, or devotes not less than 25 percent of its time to such operation, or has not less than 25 percent of its total capital investment in such operation.

(1) Bona fide farmers and ranchers must be actually engaged in the livestock operations to be financed by the EL loan. If the applicant is an individual, he must manage such livestock operation. If the applicant is a partnership or corporation, it must be managed by one or more of the partners or stockholders. An applicant who does not devote full time to the livestock operation may be considered the manager provided he (or the managing partners or stockholders) visits the farm at sufficiently frequent intervals to exercise control and see that the livestock operation is being carried on properly. Any livestock operation that involves a full-time hired manager or management service does not qualify irrespective of the number of visits made by the partners or stockholders. In addition, bona fide farmers or ranchers do not include those commencing livestock operations or reentering such operations after July 25, 1974, or those engaged in farming ranching; or livestock operations as a hobby or for tax shelter purposes; or those chiefly engaged in other business or employment.

(2) An applicant conducting livestock operations as an individual in different counties or locations may be considered for more than one EL guarantee when more than one lender is involved, if each lender is financing a separate enterprise, provided (a) identifiable separate security is given to each lender and (b) the combined total principal balance outstanding at any one time on guaranteed loans for all lenders involved does not exceed $350,000.

(3) Individual members of a partnership, or individuals doing business jointly or as partners, will not receive individual loans to finance their interest in the joint or partnership livestock operation. The partnership or joint operation will be considered for one loan to cover the livestock operation being conducted jointly or as a partnership.

(4) An estate or trust; a corporation owned primarily by an estate, trust, other corporations, or other partnerships; a partnership composed primarily of an estate, trust, corporation or other partnerships; or an applicant operating under an order of a bankruptcy court, is not considered to be a bona fide farmer or rancher for EL loan purposes.

(c) *Legal capacity.* Possess legal capacity to contract for the loan.

(d) *Ability and experience.* Possess the ability, industry, and experience necessary to carry out the proposed livestock operations to assure a reasonable prospect of success with the assistance of the loan, and honestly endeavor to carry out the undertakings and obligations required of the applicant in connection with the loan.

(e) *Credit elsewhere.* Certify that he is unable to obtain financing without the guarantee. Furthermore, no loan shall be guaranteed unless the lender certifies that the lender is unwilling to provide the needed credit to the applicant without the guarantee.

(f) *Change in the form of an applicant.* Have conducted its livestock operations before July 25, 1974. A change in the form of an applicant from an individual, partnership, or corporation in existence before July 25, 1974, to another form of legal entity will not disqualify

the new entity if it is conducting basically the same operation as was conducted before July 25, 1974, and is primarily owned by substantially the same people that owned the operation before July 25, 1974. If the change in the legal entity has been accompanied by a substantial change in the type(s) of livestock, it will not be financed.

(1) When an individual that was engaged in a livestock operation before July 25, 1974, later forms a partnership or corporation which continues to carry on basically the same livestock operation, the operation's application may still receive consideration provided such individual owns at least 50 percent of the new partnership assets or corporation's voting stock and continues to manage or control the livestock operation.

(2) When a partnership that was engaged in a livestock operation before July 25, 1974, later dissolves but basically the same livestock operation is continued an application from the new legal entity may receive consideration provided:

(i) The assets of the prior partnership are now owned by an individual applicant who as a partner in the prior partnership had owned at least 50 percent of the partnership assets; or

(ii) The assets of the prior partnership are now owned by a new partnership applicant and the partners who had owned at least 50 percent of the assets of the prior partnership are now partners owning at least 50 percent of the assets of the new partnership applicant; or

(iii) The assets of the prior partnership are now owned by a new corporation applicant, and the partners of the prior partnership who had owned at least 50 percent of those assets now own at least 50 percent of the voting stock of the new corporation applicant.

(iv) One or more of the partners who managed the livestock operation for the prior partnership must now manage the operation for the applicant.

(3) When a corporation that was engaged in a livestock operation before July 25, 1974, dissolves but basically the same livestock operation is continued, the application from the new legal entity may receive consideration provided:

(i) The assets of the dissolved corporation are now owned by an individual who had owned at least 50 percent of the voting stock of the former corporation;

(ii) The assets of the former corporation are now owned by a new partnership applicant and the stockholders who had owned at least 50 percent of that corporation are now partners owning at least 50 percent of the assets of the new partnership applicant;

(iii) The assets of the former corporation are now owned by a new corporation applicant and the stockholders who had owned at least 50 percent of the voting stock of the former corporation are now stockholders owning at least 50 percent of the voting stock of the new corporation applicant;

(iv) One or more of the stockholders who managed the livestock operation for the prior corporation must now manage the operation for the new applicant.

§ 1980.221 Loan purposes.

EL loans may be guaranteed for purposes which are essential to carrying on livestock operations related to breeding, raising, fattening, or marketing livestock. These purposes are:

(a) Purchase of livestock for replacement or restocking purposes, but not to permit expansion of livestock operations beyond a level (represented by numbers of livestock) equal to the highest level reached during the eighteen months immediately preceding July 25, 1974. When operations have been expanded beyond that level, the cost of financing the total operation will be determined and a percentage of this amount equal to the current number of livestock in the applicant's operation divided into the highest 18 month livestock number level will be used in arriving at the amount of EL loan.

(b) Purchase of production of livestock feed.

(c) Payment of customary and equitable charges for grazing permits and for the use of farm or ranch buildings, pasture land, and land for the production of feed crops.

(d) Hire, repair, or replace fixtures, farm machinery, and equipment necessary for livestock production and marketing.

(e) Transportation of livestock, normally incurred in the livestock operation.

(f) Building or repair of fences and holding pens.

(g) Refinancing of secured and unsecured debts incurred for the livestock operation, when:

(1) Such refinancing is essential for the applicant to remain in business.

(2) The lending agency would not refinance the loan in the absence of a guarantee, and

(3) The lending agency is not currently refinancing similar loans to others without such a guarantee.

(h) Payment of real estate or personal property taxes and water or drainage taxes or assessments that must be paid to permit continuation of the livestock operation.

(i) Payment of premiums on insurance necessary to obtain or secure the loan.

(j) Repair or essential improvement of livestock water supplies, and provide any pollution abatement facilities which are necessary to comply with the requirements of Federal, State or local governments.

(k) Repair of existing irrigation systems necessary for livestock production.

(l) Payment of veterinary fees and charges for livestock medicines.

(m) Cost of hired labor used in livestock production.

(n) Cost of construction or repair and normal maintenance of farm and ranch buildings essential to continuance of the authorized level of operation including silos and other feed storage facilities necessary for livestock production.

(o) Purchase of fuel, seed, fertilizer, insecticides, farm supplies, and payment of other operating expenses that are essential to continuation of the livestock operations.

(p) Purchase any stock in a cooperative lending agency that is necessary to obtain the loan.

(q) Payment of a loan fee and costs incident to consummation of the loan as authorized in § 1980.22.

(r) Payment of essential family living expenses.

(s) Payment of not more than 1 year's installment(s) (principal and interest) on debts secured by liens on chattels or real estate related to the livestock operation when a deferment on such obligations cannot be obtained.

§ 1980.222 Prohibited loan purposes.

No EL loan may be guaranteed which will: (a) Establish or reestablish an applicant in livestock operations, or to permit an expansion of such operations beyond the level set forth in § 1980.221(a).

(b) Be used to finance livestock or poultry feeding operations when the applicant does not maintain ownership of the feeders through the normal feeding period or is only performing a service for others.

(c) Be used to finance or refinance anything not essential to the continuation of livestock enterprise.

(d) Be used by a landlord to furnish credit, equipment, or supplies to his tenant operators, whether share, cash, or standing rent is paid by the tenants.

(e) Enable an applicant to make major changes or adjustments in his livestock operation.

(f) Be used to pay Federal or State income taxes or to pay Social Security taxes payable by the borrower in his own behalf.

(g) Be used to pay for labor performed by the borrower or members of his immediate family.

(h) Be used to purchase passenger automobiles or any other vehicles, machinery, or equipment that is not essential to the livestock operation.

(i) Be used to purchase machinery or equipment, or for supplies or labor, which will be used in the handling, processing, or marketing of livestock products such as milk, eggs, wool, and mohair. However, this does not prohibit refinancing debts which have already been created for these purposes when they are part of an "overall" livestock operation indebtedness being refinanced with an EL loan under the conditions set forth in § 1980.221(g).

§ 1980.223 Limitations and special provisions.

(a) *Total loans to applicants.* The total principal balance outstanding at any one time on an EL loan(s) made to assist a livestock operation shall not exceed $350,000. If an individual owns or controls 20 percent or more of a corporation or partnership and they are engaged in the same or different livestock operations, or if an individual owns or controls less than 20 percent of a corporation or partnership and they are engaged in the same livestock operations, the individual and the corporation or partnership will be considered as one entity for application of the $350,000 ceiling. If an individual owns or controls less than 20 percent

V 42 161 AUG 19 77 UM V

of a corporation or partnership and the individual and corporation or partnership are engaged in separate livestock operations, the individual and the corporation or partnership will be considered as separate entities for application of the $350,000 ceiling.

(b) *County Committee certification.* A County Committee certification is not required.

§ 1980.224 Loan rates and terms.

(a) *Interest rate to borrower.* The interest rate to be paid by the borrower to the lender will be any legal rate agreed upon between the lender and the borrower. It may be a variable or fixed rate.

(b) *Variable interest rate.* (1) A variable interest rate must be a rate that is tied to a base rate published periodically in a financial publication specifically agreed upon by the lender and borrower. It must rise and fall with the selected base rate and changes can be made no more often than quarterly. There will be no floor or ceiling on variable interest rates.

(2) Any change in the interest rate between the date of issuance of the Form FmHA 449-14 or Form FmHA 449-15 and before the issuance of the Loan Note Guarantee or Contract of Guarantee must be approved by the State Director. Approval of such change will be shown on an amendment to Form FmHA 449-14 or 449-15.

(3) It is permissible to have one interest rate on the guaranteed portion of the loan and another interest rate on the unguaranteed portion of the loan, provided the lender and borrower agree, and

(i) The rate on the unguaranteed portion does not exceed that currently being charged on loans of similar size and purpose for borrowers under similar circumstances.

(ii) The rate on the guaranteed portion of the loan will not exceed the rate on the unguaranteed portion. Fixed and variable interest rates cannot be used on the same loan.

(4) When multi-rates are used the lender will provide FmHA with the overall effective interest rate for the entire loan.

(c) *Loan terms for Loan Note Guarantee and Contract of Guarantee.* Each loan will be scheduled for repayment over a period not to exceed 7 years from the date of the guarantee or such shorter period as may be necessary to assure that the loan will be adequately secured. The borrower's needs, repayment ability and type of security he has to offer will be taken into consideration when scheduling loans for repayment. Generally, amounts advanced for annual recurring operating expenses should be scheduled for repayment from that year's income. Use of a note with a "payment on demand" feature is not permissible.

(d) *Repayment schedules.* In order for notes to be acceptable to holders in Loan Note Gpuarantee cases, the principal and interest repayment schedules will have to be clearly shown in the note(s).

(e) *Advances under a Contract of Guarantee—line of credit.* Prior to September 30, 1978, a lender may pay off an outstanding guaranteed advance before the end of its term with funds from a new guaranteed advance, provided the line of credit ceiling is not exceeded. However, no advance may be made for a term which exceeds the period remaining in the original line of credit term. The original line of credit term may be up to seven years, but it is limited to the term established in the "Line of Credit Agreement." After September 30, 1978, no new advances may be made, but advances outstanding at that time may be renewed with FmHA consent at the end of the original term for a period not exceeding three additional years as set forth in § 1980.224(f) below.

(f) *Renewal authority.* When a lender determines that a renewal will assist in orderly collection of an EL loan which has reached the final maturity date, it may renew notes covering such loan one time only and not for more than 3 additional years, provided the lender and FmHA agree that: (1) the borrower meets the eligibility and security requirements for an initial loan as contained in Sections 1980.220 and 1980.225, and (2) the renewal will not be used in lieu of liquidation. Such renewal may not exceed 3 years from the date of the renewal. Renewal will be accomplished by obtaining a replacement note setting forth the new repayment schedule. Any renewal must be approved in writing by FmHA and when a Loan Note Guarantee is renewed, by any holder(s).

§ 1980.225 Collateral requirements.

(a) *Collateral.* (1) The lender is responsible for seeing that proper and adequate collateral is obtained and maintained in existence and of record to protect the interest of the lender, the holder, and FmHA.

(2) Collateral must be of such a nature that repayment of the loan is reasonably assured considering the integrity and ability of the applicant's management, soundness of the operation, and the applicant's prospective earnings. Collateral may include, but is not limited to, the following: Land, buildings, machinery, equipment, furniture, fixtures, inventory, accounts receivable, cash or special cash collateral accounts, personal and corporate guarantees, marketable securities, and cash surrender value of life insurance. Collateral may also include assignments of leases or leasehold interest, revenues, patents, and copyrights.

(3) All collateral must secure the entire loan. The lender may not take separate collateral to secure only that portion of the loan or loss not covered by the guarantee. The lender may not require compensating balances or certificates of deposit as a means of eliminating the lender's exposure on the unguaranteed portion of the loan. However, compensating balances or certificates of deposit as used in the ordinary course of business may be used.

(b) *Personal and corporate guarantees.* (1) Personal guarantees from principal stockholders in a corporation and all partners of partnerships usually will be required. Guarantees of parent, subsidiaries, or affiliated companies may also be required. Guarantees will be required in sufficient amounts depending on the credit factors in each loan to reasonably assure repayment of the loan and provide adequate security.

(2) The requirements for personal guarantees or corporate guarantees may be waived by FmHA if the proposed guarantors cannot provide such guarantee due to other existing contractual obligations or legal restrictions. For those applicants providing documented evidence of successful operations for the past three years, guarantees will be obtained as determined by FmHA.

(3) If a review of all credit factors indicates the need for additional security, FmHA may require additional personal and corporate guarantees. FmHA also may require that such guarantees be secured. Any collateral referred to in paragraph (a)(2) of this section may be used to secure the guarantees.

(4) *Guarantors of applicants will:* (i) In the case of personal guarantees, provide current financial statements (not over 60 days old at time of filing), signed by the guarantors and disclosing community or homestead property.

(ii) In the case of corporate guarantees, provide current financial statements (not over 90 days old at time of filing), certified by an officer of the corporation.

(iii) Provide written evidence through the lender to FmHA of their inability to provide a guarantee because of existing contractual arrangements or legal restrictions.

(c) *Security.* (1) The security property must be adequate in the opinion of the lender and FmHA to assure repayment of each loan. If the present market value of the security is not in an amount at least equal to the amount of the loan and the lender and FmHA agree, the applicant's repayment ability may be considered as security, provided:

(i) Such security property has depreciated in value due to temporary economic conditions;

(ii) The applicant's first full year's operating plans indicate ability to pay the loan in full in a period not exceeding 7 years, and;

(iii) The applicant will give a lien on all available security property.

(2) Any extension of credit by the lender on or after October 1, 1978, will be outside the guarantee and, if it is to be secured, the lien position must be junior to any liens taken for the guaranteed EL advances or by a lien on other collateral.

(3) *Separate loans.* When the same lender is involved in an EL guaranteed loan and a separate loan and there will be like security for each, the EL guaranteed loan must be adequately secured by (1) a lien on separate security property that is clearly identifiable, or (2) a lien of a higher priority if the same property is used to secure both loans. In the latter case when the same security secures both loans the lender must agree in writing that the scheduled installments on the EL guaranteed loan will be paid first.

(4) *Escrow accounts.* The use of escrow accounts by lenders to maintain ongoing livestock operations after the September 30, 1978, cutoff may continue provided any funds placed in such an account are assigned as collateral for the guaranteed loan made by the lender and provided further that the security and lien position of such loan is maintained.

(d) *Other requirements.* (1) The lender must ascertain that there are no claims or liens of laborers, materialmen, contractors, subcontractors, suppliers of machinery and equipment or other parties against the collateral of the borrower, and that no suits are pending or threatened that would adversely affect the collateral of the borrower when the security instruments are filed.

(2) Hazard insurance with a standard mortgage clause naming the lender as beneficiary will be required on every loan in an amount that is at least the lesser of the depreciated replacement value of the property being insured or the amount of the loan. Hazard insurance includes fire, windstorm, lightning, hail, business interruption, explosion, riot, civil commotion, aircraft, vehicle, marine, smoke, builder's risk, public liability, property damage, flood or mudslide, or any other hazard insurance that may be required to protect the collateral.

(3) Ordinarily, life insurance, which may be decreasing term insurance, is required for the principals and key employees of the borrower and will be assigned or pledged to the lender. A schedule of life insurance available for the benefit of the loan will be included as part of the application.

(4) Workmen's compensation insurance is required in accordance with State law.

Administrative: The County Supervisor will review and determine whether the lender has required the necessary security to be taken. If necessary, he will seek the advice and assistance of the District Director.

§ 1980.226 Promissory notes, security instruments, and financing statements.

(a) *Promissory notes, mortgages, and security agreements.* The lender may use its forms or promissory notes, real estate mortgages (including deeds of trust and similar instruments), and security agreements (including chattel mortgages in Louisiana and Puerto Rico), provided such forms do not contain any provisions that are in conflict or are inconsistent with the provisions of this subpart or Subpart A of this Part.

(b) *Financing statements.* Commercial financing statement forms that comply with State laws and regulations may be used. They must be adapted to meet FmHA requirements by inserting provisions: (1) Covering the "proceeds and products" of the collateral described, and

(2) Stating that "disposition of the collateral is not authorized hereby."

§ 1980.227 Relationship with other FmHA insured or guaranteed loans.

If an applicant for FmHA assistance will qualify for another type or types of FmHA insured or guaranteed loans and an EL guarantee for the same purpose, it will be the policy to process an EL guarantee for that purpose if the repayment and security requirements for the EL guarantee will not preclude furnishing the credit necessary to enable the applicant to carry on sound farming or ranching operations. However, if the applicant qualifies for an Emergency (EM) loan in a designated disaster area, he should be first considered for an EM loan. An EL guarantee may be processed to continue his livestock operation(s) even though the applicant receives an EM loan.

§ 1980.228 Charges and fees by lender.

For both Loan Note Guarantee and Contract of Guarantee cases, see § 1980.22 of Subpart A for these requirements.

§ 1980.246 Receiving and processing applications.

Applicant and/or lenders may file either a preliminary application or complete application. A preliminary application may be used when applicant or lender wants a determination from FmHA on eligibility, feasibility or availability of guaranteed authority before proceeding with a completed application. The County Supervisor will cooperate with the lender and applicant and provide appropriate assistance in connection with loan application processes. The degree of this assistance will be guided by the lender's experience with FmHA guaranteed loan processing, the lender's farm lending experience, and the complexity of the proposal. The lender and applicant should contact the local FmHA office serving the area where the livestock operation is conducted for guidance and assistance in preparing the request and for obtaining the guarantee. The County Supervisor will provide copies of all applicable FmHA forms and regulations. See "Appendix A" for list of these FmHA forms.

(a) *Preliminary application.* This will consist of: (1) Form FmHA 449-6, "Application for Guaranteed Loan (Farmer Programs)."

(2) Verification of off-farm employment, if any.

(3) Credit report.

(4) Form FmHA 440-32, "Request for Statement of Debts and Collaterals."

(5) Form FmHA 449-26, "Certificates of Lender and Loan Applicant (Emergency Livestock Loan)."

(6) Form FmHA 449-25, "Request for Guarantee (Emergency Livestock Loan)".

(7) A record of livestock production for each calendar year beginning with 1973 through the most recent completed calendar year.

(8) Proposed "Line of Credit Agreement" for Contract of Guarantee cases. See § 1980.246(c)(4).

(b) *Preliminary determination by FmHA.* If the preliminary application indicates the proposal will not meet FmHA's minimum credit standards for a sound loan, or the applicant appears to be ineligible, or funds or guarantee authority are not available, the County Supervisor will so inform the lender using Form FmHA 449-13, "Denial Letter." The lender will notify the applicant in writing of all the reasons for the decision indicated. If it appears that the proposal is economically feasible, the applicant is eligible, and loan guarantee authority is available, the County Supervisor will inform the lender in writing and request that the formal application be prepared.

(c) *Completed application.* This will consist of: (1) Those items listed in § 1980.246(a).

(2) Applicable items required by §§ 1980.40, 1980.41, 1980.42, 1980.43, 1980.44, and 1980.45 of Subpart A of this Part.

(3) A copy of the lease agreement between tenant applicants and their landlords. When a lease is not obtainable a statement will be included in the loan docket.

(4) Proposed loan agreements (or line of credit agreement when a Contract of Guarantee is requested) between the borrower and lender. (See paragraph VIII of Form FmHA 449-35, "Lender's Agreement", in Loan Note Guarantee cases or Form FmHA 449-38, in Contract of Guarantee cases.) Ordinarily, agreements will include information such as the following: (i) Improved management practices to be implemented, if any.

(ii) Requirements for accounting and recordkeeping and periodic financial reporting.

(iii) A list of security property for the loan and periodic accounting of security property (at least annually).

(iv) Prohibitions against assuming liabilities or obligations of others.

(v) Restrictions on dividend payments if a corporate entity.

(vi) Limitations on purchase or sale of equipment and/or fixed assets.

(vii) Limitations on compensation of officers and/or owners if applicant is a corporation or partnership.

(viii) Minimum working capital requirements.

(ix) Minimum debt to net worth ratio.

(x) Restrictions concerning consolidation, mergers or other circumstances of a corporate entity.

(xi) Repayment schedule for the loan, including for line of credit agreements, the ceiling and duration of the line of credit.

(xii) Purposes for which loan funds can be used.

V 42 161 AUG 19 77 UM

(xiii) Interest rate.

(5) *Appraisal report.* (i) Real estate or chattel property that will serve as collateral for loans will be appraised by a qualified appraiser selected by the lender. A real estate appraisal report will be based on at least two comparable sales. Appraisal reports may be on forms approved by the lender and/or Form FmHA 422–1, "Appraisal Report (Farm Tract)" and Form FmHA 440–21, "Appraisal of Chattel Property." However, for real estate security, an acceptable appraisal not over 3 years old may be used in lieu of a new appraisal providing the appraisal was completed by FmHA or another similarly qualified appraiser.

(ii) A current chattel appraisal will be required when chattels are taken as security.

(iii) The lender will be responsible for determining that appraisers have the necessary qualifications and experience to make appraisals. If the lender has any questions in this regard, it should consult with FmHA before having an appraisal made.

(6) *Notices of compliance with the Privacy Act of 1974.* (i) If the applicant is acting in a personal capacity and not as a representative of a partnership, or corporation, and FmHA solicits personal information from him, the individual will be provided Form FmHA 410–9, "Statement Required by the Privacy Act."

(ii) If FmHA desires to obtain information concerning an individual from any source, FmHA will provide such source with Form FmHA 410–10, "Privacy Act Statement to References."

§ 1980.247 FmHA evaluation of applications.

When the County Supervisor receives a completed application, he will make the proper independent investigations, inspections, and appraisal reviews necessary to determine whether the applicant is eligible, the proposed loan is for an eligible purpose, there is reasonable assurance of repayment ability, and there is sufficient collateral and equity. The County Supervisor's determinations will be recorded on Form FmHA 449–23, "Guaranteed Loan Evaluation Farmer Programs."

(a) *Indication of unacceptability.* If the evaluation indicates that the guarantee cannot be approved, the County Supervisor will inform the lender on Form FmHA 449–13 of the reasons and will discuss with the lender the items necessary to overcome any objections and will record such discussion in the County Office file.

(b) *Indication of acceptability.* If the evaluation is favorable, the County Supervisor will take the Administrative actions set forth in B and C in addition to those set forth in A of the Administrative section which follows.

Administrative: The County Supervisor will: 1. Determine if the material and information submitted is complete. If he determines that the lender's appraisal(s) of security property is inadequate or questionable, he will make a formal appraisal of the required security property.

2. Determine that the supporting items and forms listed in §§ 1980.40 through 1980.45 of Subpart A of this Part are a part of the application, and the conditions of each section are being complied with when applicable.

3. Review Form FmHA 449–10, "Applicant's Environmental Impact Evaluation," submitted by the applicant and follow the requirements of Subpart G of Part 1901 of this Chapter.

B. If the evaluation is favorable, the County Supervisor will: 1. Prepare Form FmHA 449–14 for Loan Note Guarantee cases; or Form FmHA 449–15 for Contract of Guarantee cases. If it is within his approval authority, he will list any special conditions of approval in the space provided on the form, including requirements for security, improved management practices, and type and frequency of financial reports required but not proposed by the lender. The County Supervisor is authorized to execute Forms FmHA 449–14 and 449–15.

2. Prepare and distribute Form FmHA 440–1, "Request for Obligation of Funds," in accordance with the Forms Manual Insert (FMI). The Finance Office will obligate funds and so notify the County Supervisor by forwarding the original and one copy of Form FmHA 440–57, "Acknowledgement of Obligated Funds/Check Request." When the County Supervisor receives notice that funds have been obligated, he will notify the lender by providing him a copy of Form FmHA 449–14 or 449–15 as appropriate. The County Supervisor will record the actual date of lender notification on the remaining copy of Form FmHA 440–1 and make such copy a permanent part of the County Office loan file.

3. Determine if the operation is located in a special flood or mudslide hazard area. (Refer to Subpart B of Part 1806 of this Chapter, FmHA Instruction 426.2)

4. Assure that equal opportunity and nondiscrimination requirements are met. (Refer to § 1980.41 of Subpart A)

5. Contract the District Director if he needs any assistance.

6. Forward the loan docket to the appropriate approval official if above his approval authority.

C. If the evaluation is favorable, the appropriate approval official within his authority whether County Supervisor, District Director, or State Director will: 1. Set forth any special conditions of approval, including requirements for security, improved management practices, type and frequency of financial reports required but not proposed by the lender in the space provided in Form FmHA 449–14 or 449–15 and return the form to the County Supervisor for execution and proper distribution.

2. Sign original and one copy of Form FmHA 440–1 and distribute copies in accordance with the Forms Manual Insert being sure the lender receives a signed copy.

3. Forward the loan docket to the National Office when assistance in handling any complaints of noncompliance is needed.

§ 1980.248 [Reserved]

§ 1980.249 Review of requirements.

The lender and applicant, after reviewing approval conditions and security requirements as set forth in Form FmHA 449–14 or 449–15 should complete and execute the "Acceptance or Rejection of Conditions" and return a copy to the County Supervisor. If the conditions cannot be met, the lender and applicant may propose alternate conditions to the County Supervisor. These alternatives will be considered by the County Supervisor and the lender will be advised of his decision. If altered conditions are acceptable, Form FmHA 449–14 or 449–15 will be revised.

§ 1980.250 Conditions precedent to issuance of the guarantee.

Refer to § 1980.60 of Subpart A for conditions precedent to the issuance of either a Loan Note Guarantee or a Contract of Guarantee except:

(a) The provisions of § 1980.60(a)(2) are not applicable to Loan Note Guarantee cases;

(b) The provisions of §§ 1980.60 (a)(2), and (d) are not applicable to Contract of Guarantee cases, and

(c) To meet the requirements of § 1980.60(c) in Contract of Guarantee cases, the lender will execute and deliver to FmHA, Form FmHA 449–38.

Administrative: The County Supervisor will: 1. Negotiate with the lender and applicant any changes made to the initially issued or proposed Form FmHA 449–14 or Form FmHA 449–15. For purposes of this Instruction, the State Director's approval of a change in interest rates required by Form FmHA 449–14 may be accomplished by the County Supervisor. A copy of the completed form and any amendments thereto will be included in the loan file.

2. Review the loan agreement or line of credit agreement between the borrower and lender. It should provide for the frequency of submission of financial statements to the County Supervisor. Quarterly financial statements should be required on new loans needing close monitoring. However, an annual analysis report will always be required.

3. Review plans for inspection made on any construction projects.

4. Review cost overruns, if any, and how they will be met.

5. Review basic credit requirements of all loans.

§ 1980.251 Issuance of guarantee instruments.

Events from issuance of a conditional commitment through issuance of the guarantee instruments may all occur at loan closing in their proper sequence.

(a) *Loan Note Guarantee cases.* Refer to § 1980.61 of Subpart A, except that paragraphs § 1980.61(b)(2) and § 1980.61(f) as well as the "guarantee fee" in paragraph § 1980.61(a) shall not apply.

(b) *Contract of Guarantee cases.* (1) If FmHA finds that all requirements have been met, FmHA will execute Form FmHA 449–38. The original will be delivered to FmHA and a signed duplicate original retained by the lender. There will be a Form FmHA 449–38 executed for all lines of credit guaranteed by FmHA. The Lender's Agreement will be executed not later than the time the Contract of Guarantee is signed.

(2) Upon receipt of the Form FmHA 449–38 and after all requirements have been met, FmHA will execute Form FmHA 449–27. An original will be provided to the lender. A conformed copy will be retained by FmHA.

(3) *Refusal to execute contract.* If FmHA determines that it cannot execute the Contract of Guarantee because all requirements have not been met, it will promptly inform the lender on Form FmHA 449–13 of the reasons, and give the lender a reasonable period within which to satisfy FmHA objections. If the lender writes FmHA within the period allowed requesting additional time to satisfy the objections, FmHA may, in writing, grant such additional time as it considers necessary and reasonable under the circumstances. If the lender satisfies the objections within the time allowed, the guarantee will be issued.

(4) *Cancellation of obligations.* If the conditions for the loan are rejected or cannot be met after completion of any appeal, FmHA will prepare and submit to the Finance Office, Form FmHA 440–10, "Cancellation of Loan or Grant Check and/or Obligation."

(c) *Authorized FmHA representatives to execute forms.* State Directors, District Directors, and County Supervisors are authorized to execute the Lender's Agreement, Loan Note Guarantee, Contract of Guarantee, and Assignment Guarantee Agreement.

Administrative: A. The original Form FmHA 449–35 of Form FmHA 449–38 will be kept in the County Office. A copy may be retained in the State Office.

B. Copies of Form FmHA 449–34 and Form FmHA 449–27 will be kept in the County Office. Additional copies may be retained by the State Office. Copies of issued guarantees will be kept in each borrower's loan file.

C. For reporting purposes when multinotes are issued, the loan to the borrower will be counted as one loan regardless of the number of notes issued.

D. The County Supervisor completes Form FmHA 449–31, "Emergency Livestock Loan Analysis," executes the original and conforms the copies. This will be done on the same date the guarantee instrument is executed. The original will be sent to the Finance Office and a copy transmitted to the State Office.

E. *Time limitation.* The guarantee processing actions required for an EL loan will be completed within fifteen days if possible, but in no case more than thirty days after FmHA receives a lender's formal written request for an EL guarantee, unless unusual circumstances are involved.

F. *State Office and Finance Office Actions.*

1. *State Office.* The State Director will maintain a daily record of all Forms FmHA 449–31 received. The record will provide the name of the borrower, his county code number, amount of loan or line of credit ceiling, and State subtotals.

2. *Finance Office.* Upon receipt of Form FmHA 449–31, the Finance Office will charge the loan amount or line of credit ceiling (as appropriate for the type of guarantee) against any allocation for the particular state. The Finance Office will submit a State summary report on loan obligations to the National Office weekly.

§§ 1980.252–1980.59 [Reserved]

§ 1980.260 Substitution of lenders.

With prior FmHA written approval, a new lender may be substituted for the original lender in either Loan Guarantee cases or Contract of Guarantee cases provided the new lender agrees to assume all servicing responsibilities and acquires the unguaranteed portion of the loan. In Loan Note Guarantee cases, such substitution may be made without holders' consent but not without notice to the holders by the substituted lender. The new lender will execute Form FmHA 449–35 for Loan Note Guarantee cases or Form FmHA 449–38 for Contract of Guarantee cases contemporaneously with the substitution. After FmHA approval of the new lender, Form FmHA 471–7, "Notice and Acknowledgment of Sale of Insured or Guaranteed Loan," will be completed by the old lender and mailed to the FmHA Finance Office.

§§ 1980.269–1980.28 [Reserved]

§ 1980.269 Extension of guarantees issued before December 20, 1976.

New loan advances made after December 31, 1976, will not be automatically covered by "line of credit" guarantees issued before December 20, 1976, under terms of the Emergency Livestock Credit Act of 1974, as amended by Pub. L. 94–35. Any advance(s) under these guarantees after December 1, 1976, requires an extension of the guarantee.

(a) When lenders desire to continue making new advances to borrowers indebted under a guarantee issued prior to December 20, 1976, it will not be necessary to issue a new contract of guarantee, provided the lender will certify in writing that:

(1) The borrower meets eligibility requirements including a statement that he (the lender) is unable to extend the additional credit without a guarantee,

(2) The outstanding balance is current,

(3) Collateral for the new advance(s) will be sufficient to meet EL security requirements,

(4) The borrower has reasonable repayment ability for the overall guaranteed indebtedness, and

(5) The advance(s) will be within the terms of the existing line of credit ceiling previously approved by FmHA.

(b) For cases meeting the criteria stated in § 1980.269(a) the County Supervisor will change the date "December 31, 1976," in the second line of item "a" of the existing Contract of Guarantee to "September 30, 1978," and initial the change. If the County Supervisor questions the proposal and needs supporting information in addition to that previously furnished by the lender, he will obtain it before initialing the change in the Contract of Guarantee.

(c) When a lender desires to make advance(s) above the previously approved line of credit ceiling, or when the advance(s) will not be within the limits of the "Line of Credit Agreement," or the line of credit loan advances are not paid current, the above method will not be used. In such cases it will be necessary for the lender to prepare a completely new guarantee request with all the supporting forms and information required by this Subpart for a Contract of Guarantee on a new line of credit. If the loan approval official determines that all the requirements for a new guarantee are met, the existing line of credit will be refinanced by the new line of credit, and a new Contract of Guarantee will be issued. To complete the transaction, the lender must surrender the previous Contract of Guarantee to the County Supervisor who will mail it to the Finance Office with a new Form FmHA 449–31. The County Supervisor will indicate in his transmittal letter to the Finance Office that the previous contract is being replaced and that the Finance Office records should be adjusted to reflect only the new line of credit guarantee.

§ 1980.270 Changeover of loans covered by 80 percent loss guarantees to line of credit guarantees without sale to holder(s).

(a) When a lender desires to change from an 80 percent loss guarantee (one issued by FmHA prior to July 14, 1975) to a guarantee not exceeding 90 percent of unpaid principal and interest on a line of credit for a borrower who qualifies for this and other provisions of the Emergency Livestock Credit Act of 1974 as amended, the lender must prepare and present to FmHA a request for a new Contract of Guarantee. The unpaid balance on the existing loan will be refinanced by the new line of credit loan. The request must contain all the FmHA forms required for a new Contract of Guarantee on a line of credit. If the request is approved by the loan approval official, a new Contract of Guarantee will be issued using Form FmHA 449–27. The previous Contract of Guarantee (old Form FmHA 449–27) must be surrendered by the lender and mailed to the Finance Office by the County Supervisor with a new Form FmHA 449–31. The County Supervisor will indicate in his transmittal letter to the Finance Office that the old contract is being replaced and that the Finance Office records should be adjusted to reflect only the new line of credit contract.

(b) The provisions of §§ 1980.246 through 1980.251 will be complied with.

§ 1980.271 Conversion of existing EL loans so the guaranteed portions can be sold as permitted by Subpart A of Part 1980.

(a) Conversion does not constitute a new guarantee. Rather, the process is a substitution of documents which confer additional rights to lenders but does not change what is being guaranteed.

(b) Existing EL loans covered by 80 percent loss guarantees issued by FmHA before July 14, 1976, and existing advances constituting an EL guaranteed line of credit may be converted to Loan Note Guarantee loans and structured and sold according to Subparts A and C of this Part. The percentage guaranteed must be the same as the percentage guaranteed in the old guarantee.

(c) Before the Loan Note Guarantee system can be used, the lender must notify FmHA of the option it has elected to use for sale of the guaranteed portion(s). Where necessary, existing notes must be constituted so that all regulations pertaining to the options found in Paragraph III of Form FmHA 449–35 will be complied with.

(d) For conversion of existing 80 percent guaranteed FL loans of a fixed amount, if a new note(s) has to be issued in order to meet the requirements of Subparts A and C of this Part, the provisions of this new note(s) must be identical to the terms and conditions of the note(s) being retired.

V 42 161 AUG 19 77 UM

(e) A conversion fee of 1 percent of the principal and interest owed on the loan at the time of the conversion must be paid by the lender to FmHA before a Loan Note Guarantee will be issued.

(f) The lender must certify in writing and FmHA must agree that the loan is in good standing and adequately secured.

(g) The lender's request for conversion will be transmitted to the County Supervisor with the following items: (1) A narrative of the proposal.

(2) Original Contract of Guarantee. If the lender does not want to deliver his original Contract of Guarantee with his request for a conversion to a Loan Note Guarantee, the County Supervisor will accept a copy of the Contract of Guarantee and proceed as set forth above. However, the Loan Note Guarantee will be delivered only upon receipt of the Contract of Guarantee.

(3) Copies of note(s) with lender's identification number(s).

(4) Certification that the loan is current and in good standing.

(5) Certification of outstanding principal and interest owed on the loan account.

(6) Executed Lender's Agreement.

(7) Current market value appraisals of loan collateral.

Administrative: A. The County Supervisor may approve all conversions to Loan Note Guarantee.

B. The original loan must be paid current at the time the Loan Note Guarantee is issued.

C. The County Supervisor will: 1. Check to see that the note or notes presented by the lender for sale in the Loan Note Guarantee system are structured to meet all requirements in the regulations.

(i) If the lender has selected the multi-note system, the note representing the unguaranteed portion must not mature before the other notes. If the lender is converting a line of credit represented by seperate notes for each advance, these existing, partially amortized notes may be used provided that; if the notes have different maturities, the note with the latest maturity date must represent the unguaranteed portion. The amount represented by this note must be exactly the unguaranteed portion of the face amount of all notes composing the loan which is to be converted to the Loan Note Guarantee system. If both these requirements cannot be met, the lender must get the borrower to execute new notes which do not exceed the limitations of the existing guaranteed line of credit.

(ii) If the lender has elected to sell the guaranteed portions through the assignment route, and is converting a line of credit, only one note may be presented for attachment to a Loan Note Guarantee. The face amount of the note must be equal to the entire amount of the loan.

2. Review all requirements of § 1980.271.

3. Arrange to inspect the livestock operation with the lender and the borrower. The inspection will include an observation of the farming or ranching facilities, any growing crops, and livestock and chattel security.

4. Reach a mutual understanding concerning the operating plans for the farming and ranching enterprises, plans for loan repayment, and the appraised value of the loan collateral.

5. Verify the submitted request and if in order complete the Loan Note Guarantee, date and sign the instrument. Before the form is signed the following statement will be entered at the top of the form: "This Loan Note Guarantee is issued in substitution of the Contract of Guarantee dated ----------." The County Supervisor will transfer from the outstanding Contract of Guarantee all pertinent information pertaining to the substitute Loan Note Guarantee.

6. Execute the Lender's Agreement either before or contemporaneously with execution of the Loan Note Guarantee.

7. Cancel the Contract of Guarantee being replaced.

8. Transmit to the lender the original of the Loan Note Guarantee, and a copy of the executed Lender's Agreement, and retain in the County Office file copies of the Loan Note Guarantee and attached canceled forms.

9. Notify the Finance Office of the substitution and cancellation by letter enclosing the conversion fee collected from the lender. The notification will indicate the date and amount of the Loan Note Guarantee and that it is not to be considered as a new loan for record keeping purposes.

§ 1980.272 Refinancing existing EL loans so that the guaranteed portion can be sold through the Loan Note Guarantee system.

(a) Lenders with existing EL loans covered by 80 percent loss guarantees issued by FmHA before July 14, 1975, or with existing guaranteed EL lines of credit, who desire to obtain a Loan Note Guarantee without payment of the fee provided in § 1980.271 may apply for a new Loan Note Guarantee under the regular procedure of this Subpart. All provisions including §§ 1980.246 through 1980.251 will be complied with. If all of the requirements of Subparts A and C of this Part are met, a new Loan Note Guarantee will be issued. The unpaid balance on the existing loan will be refinanced by the new loan guaranteed by the Loan Note Guarantee.

(b) The previous Contract of Guarantee must be surrendered by the lender and mailed to the Finance Office by the County Supervisor with a new Form FmHA 449-31. The County Supervisor will indicate in his transmittal letter to the Finance Office that the old guarantee is being replaced and that the Finance Office records should be adjusted to reflect only the new Loan Note Guarantee.

§§ 1980.273–1980.276 [Reserved]

§ 1980.277 Change from livestock to farming operation after guarantee is issued.

(a) When a borrower ceases to carry on a livestock operation, but will continue farming, he is not eligible to receive any more loan advances under the guarantee. In such cases the lender may continue with the loan(s) and reamortize it within the original term provided FmHA and the lender determine that:

(1) There is a reasonable chance for the guaranteed loan advance(s) to be paid in full.

(2) The remaining collateral plus any to be obtained will be sufficient to meet EL security requirements.

(3) Proceeds from livestock sales properly have been paid on the guaranteed loan advance(s) or released for authorized EL purposes, and

(4) Any holders consent to the reamortization and that the reamortization documents are attached to all documents evidencing the guarantee.

§ 1980.278 Transfer and assumption of loans.

(a) If the borrower can no longer continue with the loan, the lender may consider transfering the loan to an eligible transferee with the concurrence of fmHA. If the transferor has any equity in the loan the transferee will pay to the transferor this equity either in the form of cash, or by obtaining a loan with or without a guarantee or a combination of cash and a loan. The total security will be transferred unless unusual circumstances prevail in which case National Office approval will be required. Assumption and transfer of security property agreements, notes, or assumption forms provided by the lender will be executed by the transferee. An "eligible transferee" is one that, after the assumption, meets the eligibility requirements specified in § 1980.220. No applicant shall be deemed "eligible" after September 30, 1978. The transferee's application will be processed by the lender as prescribed in § 1980.246 and the following: (1) The priorities of the existing lien(s) securing the guarantee will not be adversely affected.

(2) Any cash down payment (other than an equity payment) or proceeds from the sale of any security property will be credited on the transferor's guaranteed loan before the transfer and assumption transaction is closed.

(3) The transferor may be released from personal liability with FmHA concurrence provided the total outstanding indebtedness is assumed and providing the collateral being transferred is at least equal to the amount of the loan being assumed and further provided all holders, if any, consent.

(4) *The existing guarantee will continue.* The existing guarantee will continue in effect, so a new guarantee instrument will not be issued. However, as soon as the transfer and assumption have been completed, the lender will so indicate on the original Loan Note Guarantee or Contract of Guarantee by inserting a check in the assumption agreement box and inserting the name of the assuming party for those purposes on the Loan Note Guarantee or Contract of Guarantee.

(b) *Change in loan terms.* All changes in loan terms must be approved in writing by the loan approval official, the borrower, and lender, and all holders if any, and a copy of the changed terms attached to each portion (both guaranteed and unguaranteed) of the loan.

Administrative: A. *Loan approval officials, consistent with their authority to approve guarantees, may consent:*

1. To all transfer and assumption cases.

2. To the releases of the transferor and guarantor(s) from liability on the loan and will notify the lender and the transferor and guarantors of the decision in writing.

3. To any changes in the loan terms provided the holder(s), if any and lender agree.

B. The Loan Note Guarantee or Contract of Guarantee will be endorsed in the space provided on the form.

C. A copy of the Assumption Agreement will be retained in the County Office file. The County Supervisor will notify the Finance Office of all approved Transfer and Assumption cases so that Finance Office records may be adjusted accordingly.

D. When all the security is not transferred the State Director will submit to the National Office the full facts and justification for his recommendation and the County Office files.

§ 1980.279 Loan servicing.

The lender is responsible for loan servicing. Refer to paragraph X of Form FmHA 449-35 for Loan Note Guarantee cases, and to paragraph IX of Form FmHA 449-38 for Contract of Guarantee cases.

Administrative: A. While the lender has the primary responsibility for loan servicing and protecting the collateral, the County Supervisor is responsible for seeing that required servicing is properly accomplished. Loan servicing is a preventive rather than a curative action. Prompt follow-up on delinquent payments and early recognition and solution of problems are keys to resolving many delinquent loan cases.

B. *The County Supervisor will:* 1. Make timely investigations during acquisition or development and at least annually thereafter to determine whether any security property that was to be acquired or constructed after issuance of the Contract of Guarantee or Loan Note Guarantee has been acquired or constructed, and whether the guaranteed loan is being properly serviced. If a problem develops the County Supervisor will promptly contact the lender to resolve it.

2. Review all EL borrowers financial statements furnished by the lender with the District Director, and will take appropriate servicing action reminding the lender of his servicing responsibilities. Refer to paragraph X of Form FmHA 449-35, or paragraph IX of Form FmHA 449-38.

3. Immediately contact the District Director when notified by the lender of borrower's failure to fulfill any of the loan approval conditions to determine the action to be taken.

4. Notify the District Director in writing upon receipt of notice from the lender when any guaranteed loan is delinquent more than 30 days or when the loan otherwise appears to be developing into a problem case. Refer to paragraph XI of Form FmHA 449-35, or paragraph X of Form FmHA 449-38.

5. Establish an office management system for guaranteed loans in accordance with applicable FmHA regulations (FmHA Instruction 405.1) to ensure timely followup on all required financial statements, and any special requirements for loan servicing conditions.

6. Notify the Finance Office when the lender makes any approved protective advances.

7. Submit to the Finance Office semiannually the lender's statement required in paragraph X B 10 of Form FmHA 449-35, or paragraph IX of Form FmHA 449-38, reflecting the unpaid principal balances on the loan.

C. *District Director will:* 1. Assure that the County Supervisor carries out his responsibilities.

2. Accompany the County Supervisor on initial field visits to the borrower's place of business and at least annually thereafter. Such visits should be coordinated with the lender.

3. Provide guidance and assistance to the County Supervisor if a loan develops into a problem case.

4. Review all Field Visit Reports and make recommendations or comments and transmit them to the State Director, if necessary.

D. *FmHA servicing authorizations.* For loans in amounts not in excess of their loan approval authority, FmHA officials are authorized to approve or concur in:

1. Alterations in the loan approval conditions which will not prejudice the Government's interest.

2. Any replacement of collateral for the loan.

3. All lien coverage and lien priorities on the collateral established by the lender before issuance of the Contract of Guarantee or Loan Note Guarantee.

4. Any renewal of loan notes in concurrence with the lender.

5. Use of proceeds from disposition of collateral meeting the provisions of paragraph X of Form FmHA 449-35, or paragraph IX of Form FmHA 449-38.

E. *National Office assistance.* State Directors may consult with the National Office on any servicing problem, and if it cannot be handled at the State level, the file will be forwarded to the National Office with proposed recommendations.

§ 1980.280 Protective advances.

Refer to paragraph XIII of Form FmHA 449-35 or paragraph XII of Form FmHA 449-38 as appropriate.

Administrative: A. It is not intended that protective advances be made in lieu of additional loans.

B. The County Supervisor is authorized to approve protective advances and will consider the following when approving such advances:

1. The total amount of outstanding advances, the amount of those for which approval is requested, the outstanding loan balance, whether the account is current, and, if not, the extent of the delinquencies.

2. The borrower's ability to pay the remaining loan balance and any future advances in accordance with the existing repayment schedule.

§ 1980.281 Termination of guarantee.

Refer to paragraph XII of Form FmHA 449-34 for termination of Loan Note Guarantees, and to Form FmHA 449-27 for termination of Contracts of Guarantee.

Administrative: The County Supervisor will advise Finance Office when a Loan Note Guarantee, or Contract of Guarantee is terminated.

§ 1980.282 Defaults by borrower.

(a) Refer to paragraph XI of Form FmHA 449-35 for Loan Note Guarantee cases and to paragraph X of Form FmHA 449-38 for Contract of Guarantee cases.

(b) The lender will arrange a meeting with the County Supervisor and the borrower to resolve the problems.

(c) The lender will summarize the meeting in a memorandum listing the individuals who attended, and describing the problems, and the proposed solutions. The original will be retained in the lender's loan file and a copy will be submitted to the County Supervisor.

Administrative: A. The County Supervisor monitoring the loan will coordinate and process any request for FmHA to purchase when the holder(s) are located in close proximity of the local lender. If several holders are located outside the area, the State Director will handle the transaction and notify the County Supervisor.

B. The County Supervisor will review the material submitted, verify the amounts due the holder(s) and transmit the request by memorandum to the State Director. Copies of evidence of ownership will be included. Any original evidence of ownership will be retained in the County Office. A proposed payment date will be established in order to calculate the interest due the holder(s).

C. The County Supervisor will verify the amounts payable to the holder and assure that all necessary material has been obtained. The County Supervisor will request a check to pay the holder(s) on the appropriate date entry form. The Finance Office will forward the check to the County Supervisor within 10 days after receipt of the request.

D. Any evidence of ownership retained in the County Office will be considered in any future report of loss calculations. A record of any purchase will be maintained in the loan file.

§ 1980.283 Liquidation.

Refer to paragraph XII of Form FmHA 449-35 for Loan Note Guarantee cases, and to paragraph XI of Form FmHA 449-38 for Contract of Guarantee cases.

Administrative: A. The District Director determines which FmHA personnel will attend meetings with the lender.

B. *Form FmHA 449-35, or Form FmHA 449-38, paragraphs XII B or XI B respectively.* FmHA will exercise the option to liquidate only when there is reason to believe the lender's liquidation plan will likely not result in maximum recovery. District Directors are authorized to approve lender liquidation plans or exercise the FmHA option to liquidate.

C. *Form FmHA 449-35, or Form FmHA 449-38, paragraphs XII D or XI D respectively.* County Supervisors are responsible for seeing that the lender complies with the requirements of paragraph XII D or paragraph XI D as appropriate. The concurrence of the District Director will be necessary before the County Supervisor may accept the accounting reports as submitted by the lender and before submission of such reports to lenders when FmHA is conducting liquidation.

D. *Form FmHA 449-35, or Form FmHA 449-38, paragraphs XII E 2 or XI E 2 respectively.* County Supervisors are authorized to accept Report of Loss determinations for both Loan Note Guarantee and Contract of Guarantee cases on Form FmHA 449-30 "Loan Note Guarantee Report of Loss," in those cases where loss will not exceed $35,000; District Directors for loss not to exceed $100,000; and State Directors for all others. The State Director will submit to the Finance Office for payment any losses claimed on Form FmHA 449-30. The Finance Office will forward loss payment checks within 10 days of receipt of the claim to the County Supervisor for delivery to the lender.

E. *Form FmHA 449-35, or Form FmHA 449-38, paragraphs XII E 3 or XI E 3 respectively.* Final loss payments will be made within the 60 days required but only after a review has been made to accurately determine FmHA liability. State Directors are responsible to see that such reviews are accomplished in time to be evaluated and accepted or otherwise resolved within the 60-day period. County Supervisors may con-

V 42 161 AUG 19 77 UM

duct such reviews when the loss does not exceed $35,000; District Directors when the loss does not exceed $100,000; and State Directors for amounts not to exceed their loan approval authority. If the State Director wishes National Office assistance in the conduct of the review, he may request it.

§§ 1980.284–1980.289 [Reserved]

§ 1980.290 Graduation.

There is no "graduation" requirement for EL loans. Therefore, these loans will not be reviewed by FmHA to determine whether lenders should be in position to carry them without a guarantee.

§ 1980.291 Appeal procedure.

See § 1980.80 of Subpart A for the method of having adverse decisions of County Supervisors, District Directors, and State Directors reveiwed in both Loan Note Guarantee and Contract of Guarantee cases.

§ 1980.292 Access to records of lenders.

See § 1980.81 of Subpart A for this requirement in both Loan Note Guarantee and Contract of Guarantee cases.

§ 1980.293 County and State Office files.

(a) *County Office files.* County Offices having charge of loan guarantees are not expected to maintain complete case files. However, the County Office case file for each loan guarantee should contain originals or copies of forms and other material which is needed to monitor the lender's loan servicing actions.

(b) *State Office files.* State Directors may maintain files on cases which require special servicing attention.

§ 1980.294 FmHA forms.

(a) See Appendix A for list of applicable FmHA forms, number to be prepared, signatures required, and manner of distribution.

(b) Forms FmHA 449–27, FmHA 449–38, FmHA 449–15, FmHA 449–25, and FmHA 449–26, appear as appendixes B, C, D, E, and F in the FEDERAL REGISTER. Copies of the forms may be obtained from any FmHA office.

§§ 1980.295–1980.299 [Reserved]

General Administrative: A. *Office of the General Counsel (OGC):* In performing the FmHA functions with respect to EL loans, the advice and assistance of OGC may be sought and followed on any legal matter. However, in loan making, it is the responsibility of the lender to ascertain that all requirements for making, securing, and servicing the loan are duly met. If FmHA has any questions concerning the lender's resolution of these matters it should consult with OGC.

B. *Delegation of Authority.* The State Director may delegate to his staff those administrative duties and responsibilities stipulated in the Administrative sections of this Subpart.

FmHA Forms

(a) The following chart lists applicable FmHA forms, number to be prepared, signatures required, and manner of distribution. Any of these FmHA forms and others needed by lenders or applicants may be obtained from FmHA.

FmHA form No.	Name of form	Total number	Signed by [1]	Distribution
	Forms needed by a lender for use in preparing the EL guarantee request			
400-1	Equal opportunity agreement	3	B-O	O-L, CB C-FmHA.
400-3	Notice to contractors and applicants	4	L-O	O-Con, C-B, C-L, C-FmHA.
400-6	Compliance statement	4	L & Con 3-O	O-L, C-Con, C-B, C-FmHA.
449-6	Application for guaranteed loan (farmer programs).	2	B-O	O-L, C-FmHA.
449-25	Request for guarantee (emergency livestock loan).	2	L-O	O-FmHA, C-L.
449-26	Certificates of lender and loan applicant (emergency livestock loan).	3	L & B-O.	O-FmHA, C-L, C-B.
449-35	Lender's agreement	2	L & FmHA	O-FmHA, C-L.
449-36	Assignment guarantee agreement	3	L, H & FmHA	O-H, C-L, C-FmHA.
449-38	Lender's agreement (emergency livestock loan—contract of guarantee).	2	L & FmHA (O & C).	O-FmHA, C-L.
	Forms used by FmHA in processing and handling the guarantee request			
440-1	Request for obligation of funds	4	FmHA-O	OLC-FC, C-County Office, C-State Director.
449-13	Denial letter	2	FmHA-O	O-L, C-FmHA.
449-14	Conditional commitment for guarantee	2	FmHA-O	Do.
449-15	Conditional commitment for emergency livestock loan guarantee.	2	FmHA-O	Do.
449-27	Contract of guarantee (emergency livestock loan).	2	FmHA-O	Do.
449-31	Emergency livestock loan analysis	3	FmHA-O	O-FC, C-FmHA, C-State Director.
449-34	Loan note guarantee	2	FmHA-O	O-L, C-FmHA.
	Forms used jointly by lender and FmHA			
449-30	Loan note guarantee report of loss	3	L-O	O-FmHA, C-L, C-FmHA.

[1] Signature and distribution "L"—lender; "H"—holder; "B"—borrower or assumptor; "FC"—finance office; "FmHA"—authorized FmHA official; "Con"—contractor; "O"—original; "C"—copy.

(b) *Other forms and information.* Any needed forms not furnished by FmHA will be provided by the lender. The lender may obtain information from FmHA and copies of other FmHA forms that may be helpful in various aspects of loan making, construction and development, and loan servicing.

(c) *Racial code.* Some FmHA forms contain space for coding the race of the applicant for the loan or assumption. In the code, "W" means "White," "N/B" means "Negro (Black)," "S" means "Spanish-American," "AI" means "American Indian," and "O" means any other race. The lender is responsible for completing this code on all forms on which it appears, in accordance with his best judgment as to the race involved.

(d) *Revision of existing forms.* Until the present supply is exhausted, the forms described below will be revised on an individual case basis as follows:

(1) *Form FmHA 400–1, "Equal Opportunity Agreement."* In the second paragraph after the word "Recipient" insert "or to Recipient's lender." In subparagraph 1(e), change the word "or" to "issued."

(2) *Form FmHA 400–6, "Compliance Statement."* In the first paragraph between "with" and "assistance," insert "loan guarantee."

(3) *Form FmHA 449–6, "Application for Guaranteed Loan (Farmer Programs)."* The crop and livestock production tables on the face of the form may be omitted.

Appendix B

USDA-FmHA Form FmHA 449-15 (7-29-77)	CONDITIONAL COMMITMENT FOR EMERGENCY LIVESTOCK LOAN CONTRACT OF GUARANTEE	*CASE NO.*
		State
TO: Lender		County
Lender's Address		Line of Credit Ceiling $
Borrower		Principal Amount of Initial Loan $

From an examination of information supplied by the Lender on the above proposed loan, the county committee certification or recommendation, if required, and other relevant information deemed necessary, it appears that the transaction can properly be completed.

Therefore, the United States of America acting through the Farmers Home Administration (FmHA) hereby agrees that, in accordance with applicable provisions of the FmHA regulations published in the Federal Register and related forms, it will execute Form FmHA 449-27, "Contract of Guarantee (Emergency Livestock Loan)," subject to the conditions and requirements specified in said regulations and below.

The interest rate for the loan is ____%. 1/ If a variable rate is used, it must be tied to a base rate which cannot change more often than quarterly and must be published periodically in a financial publication specifically agreed to by the Lender and Borrower. Any change in interest rates from date of issuance of this form must be approved by the FmHA County Supervisor. Such related information may be ascertained from any FmHA office or by consulting the Federal Register.

A Contract of Guarantee will not be issued until the Lender certifies that it has no knowledge of any adverse change, financial or otherwise, in the Borrower, his business, or any parent, subsidiaries, or affiliates since it requested a Contract of Guarantee.

Additional Conditions and Requirements: 2/

This conditional commitment will expire on _____ 3/ unless the time is extended in writing by FmHA, or upon the Lender's earlier notification to FmHA that it does not desire to obtain an FmHA guarantee.

Acceptance or Rejection of Conditions

To Farmers Home Administration (FmHA) 4/

The condition of Form FmHA 449-15 on the other side of this page:

1. ☐ are acceptable and the undersigned Lender intends to proceed with the loan transaction and to request issuance of a Contract of Guarantee at the appropriate time
2. ☐ are acceptable, but for other reasons the undersigned Lender does not desire a Contract of Guarantee.
3. ☐ are not acceptable and for that reason the undersigned Lender does not desire a Contract of Guarantee.
4. ☐ are not acceptable, but would be acceptable if the following changes were made.

If block number "1" above is checked:

(a) It is understood that the following information may now be released upon request: Name and address of Applicant, name and address of Lender, amount of loan, and general purpose of the loan.

(b) It is anticipated that the Contract of Guarantee will be requested in approximately _____ days.

_____
(Name of Lender)

_____ By: _____
(Date) *(Signature of Lender)*

1/ Insert fixed interest rate or, as authorized by regulations, variable interest rate followed by "V."

2/ Insert any additional conditions or requirements in this space or on an attachment referred to in this space; otherwise insert "NONE".

3/ Insert expiration date. (Allow sufficient time for processing and issuance of the Contract of Guarantee.)

4/ Return completed and signed copy of this form to FmHA office from which it was received.

NOTE TO LENDER Complete and execute the Acceptance or Rejection of Conditions as indicated above on the copy of this form and return it to FmHA.

22. The loan will be properly closed and the required security will be obtained.

23. The borrower has title marketable in fact to security property now owned (and will obtain such title to any additional property to be acquired with loan funds), subject only to the instruments securing the loan to be guaranteed and any other exceptions set forth below:

24. Security property now owned (any to be acquired) is considered adequate security for the loan to be guaranteed, or if inadequate state in item 29 of this form, why you believe the borrower's farm or ranch operating plans will permit him to pay the guaranteed EL loan in full within a period not exceeding 7 years. The security instruments will be properly filed or recorded prior to the issuance of the guarantee; except that if security property is yet to be acquired in a jurisdiction in which an after acquired property clause is not valid, a security instrument covering such property will be obtained as soon as appropriate and legally permissible.

25. Truth in Lending requirements will be met.

26. All Equal Opportunity and Nondiscrimination requirements will be met (or any that cannot yet be met will be met at the appropriate time).

CERTIFICATES OF LENDER AND LOAN APPLICANT
(Emergency Livestock Loan)

Lender — Lender's IRS Tax No.	CASE NO.
	State
Lender's Address	County
Loan Applicant's Name & Address	Principal Amount of Loan $; or
	Line of Credit Ceiling $

To induce the United States of America acting through the Farmers Home Administration of the United States Department of Agriculture (herein called "FmHA"), to execute a Loan Note Guarantee or Contract of Guarantee with respect to Emergency Livestock (EL) loan(s) pursuant to the Emergency Livestock Credit Act of 1974 as amended, and the regulations in 7 CFR Part 1980, Subparts A and C:

A. LENDER'S CERTIFICATE. The above-named lender hereby certifies that:

1. Lender has received an application from the above-named applicant for an EL loan or line of credit in the amount stated above for use for the purposes and in the amounts set forth in Form FmHA 449-25, to which this certificate is attached.
2. Lender is unwilling to make such loan or line of credit advances without an FmHA guarantee.
3. Loan applicant was engaged in particular livestock operation(s) on July 25, 1974, the effective date of said Act, and was engaged in said operation(s) continuously for a period of _____ immediately prior to July 25, 1974. *(months or years)*
4. Loan applicant is a bona fide farmer or rancher (a) doing business in the United States either as an individual, corporation, or partnership, which is recognized in the community as one whose chief occupation is farming or ranching, (b) primarily and directly engaged in agricultural production, and (c) having substantial operations in breeding, raising, fattening or marketing livestock, including dairy cattle raised and maintained for the primary purpose of marketing dairy products hereinafter referred to as a livestock operation). In the case of an individual loan applicant the term "primarily and directly engaged in agricultural production" means that he derives more than 50 percent of his gross income from his own agricultural production or devotes more than 50 percent of his time to such production. The term "substantial operations in livestock" means that he derives not less than 25 percent of his gross farm income from his own livestock operation, or devotes not less than 25 percent of his time to such operation, or has not less than 25 percent of his total capital investment in such operation. In the case of a corporation or partnership loan applicant, the term "primarily and directly engaged in agricultural production" means that the corporation or partnership derives more than 50 percent of its gross income from agricultural production, and that the shareholders or partners owning or controlling a majority interest in such corporation or partnership derive more than 50 percent of their gross income from their own or the corporation's or partnership's agricultural production, and devote more than 50 percent of their time to such production. The term "substantial operations in livestock" means that the corporation or partnership derives not less than 25 percent of its gross farm income from its own livestock operation, or devotes not less than 25 percent of its time to such operation, or has not less than 25 percent of its total capital investment in such operation.
5. The loan or line of credit requested by the loan applicant is to be used for purposes which are essential to carrying on livestock operations related to breeding, raising, fattening, or marketing livestock of the following type(s):
   ☐ Beef Cattle ☐ Dairy Cattle ☐ Swine ☐ Sheep ☐ Goats ☐ Chickens ☐ Turkeys
6. The requested loan or line of credit is for the purpose of maintaining said livestock operation(s), and will not exceed the amount necessary to permit the loan applicant to continue said livestock operation(s) at a level equal to the highest number at which the loan applicant conducted said livestock operation(s) during the 18 months immediately preceding July 25, 1974.
7. If any loan advance is to be used to refinance indebtedness incurred in conducting said livestock operation(s).
   (a) That part for refinancing is essential in order for the applicant to continue said livestock operation(s).
   (b) Lender will not refinance the existing loan without an FmHA guarantee, and
   (c) Lender is not currently refinancing similar loans to others without such guarantees.

B. LOAN APPLICANT'S CERTIFICATE. The above-named loan applicant hereby certifies that:

1. Loan applicant, if an individual (or its officials who execute this certificate in its behalf, if it is a legal entity) state(s) that (he has) (they have) read the within and foregoing Lender's Certificate and that the contents thereof are all true and correct to the best of his or their knowledge and belief.
2. Loan applicant will be unable to obtain the financing requested without an FmHA guarantee under said Act and regulations.
3. Loan applicant, if an individual, does not own or control as much as 20% interest in any corporation or partnership that is applying for or has received an Emergency Livestock loan or, if he has or does, the total of the loans applied for and/or received by all of them does not exceed $350,000. If the loan applicant is a corporation or a partnership, no person who owns or controls as much as 20% interest in it has applied for or received an Emergency Livestock loan or, if he has or does, the total of the loans applied for and/or received by all of them does not exceed $350,000. Ownership or control of less than 20% interest in a corporation or partnership does not affect the individual stockholder's, partner's, corporation's, or partnership's qualifications for an Emergency Livestock loan.
4. Loan applicant, if an individual, is a citizen of the United States or a person who has been legally admitted for permanent residence in the United States. If a corporation or partnership, the principal stockholders or partners are citizens or such permanent residents of the United States, and the corporation or partnership is authorized to carry on livestock operations in the State involved. For the purpose of meeting citizenship requirements, any partner or stockholder owning or controlling as much as 20 percent interest in a partnership or corporation will be considered a principal partner or stockholder. If no person owns or controls as much as 20 percent, all partners and stockholders will be considered principal partners or stockholders.
5. The loan may be accelerated if I cease to be a farmer or rancher.
6. Loan applicant has no FmHA guaranteed EL loan(s) except in the amount of $_____.

USDA-FmHA
Form FmHA 449-27
(Rev. 7-29-77)

CONTRACT OF GUARANTEE
(Emergency Livestock Loan)

	CASE NO.
	State
	County
Lender — Lender's IRS Tax No.	Date of Line of Credit Agreement
Lender's Address	Line of Credit Ceiling $
Borrower's Name and Address	

The guaranteed portion of this loan is _____ % of the principal balance owed at any one time on advances made within an approved line of credit before September 30, 1978 by the above-named Lender to the above-named Borrower.

In consideration of making loan advance(s) by the Lender within the line of credit ceiling pursuant to the Line of Credit Agreement, the United States of America acting through the Farmers Home Administration of the United States Department of Agriculture (herein called "FmHA"), pursuant to the Emergency Livestock Credit Act of 1974 (P. L. 93-357), as amended, does hereby agree that in accordance with and subject to the conditions and requirements herein, it will pay to the Lender who holds note(s) for said advance(s) (or assumption agreement) covered by this contract the lesser of 1. or 2. below:

1. Any loss sustained by such Lender on the guaranteed portion including:
   a. Principal and interest indebtedness as evidenced by said note(s) or by assumption agreement(s), and
   b. Principal and interest indebtedness on secured protective advances for protection and preservation of collateral made with FmHA's authorization, including but not limited to, advances for taxes, annual assessments, any ground rents, and hazard or flood insurance premiums affecting the collateral; or
2. The guaranteed principal advanced to or assumed by the Borrower under said note(s) or assumption agreement(s) and any interest due thereon.

If FmHA conducts the liquidation of the loan, loss occasioned to a Lender by accruing interest after the date FmHA accepts responsibility for liquidation will not be covered by this Contract of Guarantee. If Lender conducts the liquidation of the loan, accruing interest shall be covered by this Contract of Guarantee to date of final settlement when the Lender conducts the liquidation expeditiously in accordance with the liquidation plan approved by FmHA.

CONDITIONS OF GUARANTEE

1. Loan Servicing

Lender will be responsible for servicing the entire loan, and Lender will remain mortgagee and/or secured party of record.

2. Priorities

The entire loan will be secured by the same security with equal lien priority for the guaranteed and unguaranteed portions of the loan. The unguaranteed portion of the loan will not be paid first nor given any preference or priority over the guaranteed portion.

3. Full Faith and Credit

The Contract of Guarantee constitutes an obligation supported by the full faith and credit of the United States and is incontestable except for fraud or misrepresentation of which Lender has actual knowledge at the time it became such Lender or which Lender participates in or condones. In addition, the Contract of Guarantee will be unenforceable by Lender to the extent any loss is occasioned by the violation of usury laws, use of loan funds for unauthorized purposes, negligent servicing, or failure to obtain the required security regardless of the time at which FmHA acquires knowledge of the foregoing.

4. Protective Advances

Protective advances made by Lender pursuant to the regulations will be guaranteed against a percentage of loss to the same extent as provided in this Contract of Guarantee.

5. When Guarantee terminates

This Contract of Guarantee will terminate automatically (a) upon full payment of the guaranteed loan; or (b) upon full payment of any loss obligation hereunder; or (c) upon written notice from the Lender to FmHA that the guarantee will terminate 30 days after the date of notice.

Appendix E
Page 2

6. Settlement

The amount due under this instrument will be determined and paid as provided in the applicable Subpart of Part 1980 of Title 7 CFR in effect on the date of this instrument.

7. Notices

All notices and actions will be initiated through the FmHA County Supervisor for _____ (County) _____ (State with mailing address at the date of this instrument:

USDA-FmHA
Form FmHA 449-38
(7-29-77)

FmHA Loan Ident. No.

LENDER'S AGREEMENT
(Emergency Livestock Loan -- Contract of Guarantee)

Applicable 7 CFR Part 1980, Subpart C

_____(Lender) of _____

has established a line of credit to _____(Borrower) for the fiscal period ending

_____, 19 ___, for the purpose of _____

_____

in the maximum sum of $ _____ as evidenced by a "Line of Credit Agreement" dated _____,

19 ___.

The United States of America, acting through Farmers Home Administration (FmHA) has entered into a "Contract of Guarantee" (Form FmHA 449-27) or has issued a "Conditional Commitment for Guarantee" (Form FmHA 449-15) to enter into a Contract of Guarantee with the Lender applicable to such line of credit to participate in a percentage of any loss on the loan advances not to exceed _____% of the amount of the principal and any accrued interest. The terms of the Contract of Guarantee are controlling. As a condition for obtaining a guarantee of the loan advances the Lender enters into this agreement.

THE PARTIES AGREE:

I. The maximum loss covered under the Contract of Guarantee will not exceed _____ percent of the principal and accrued interest owed on any Emergency Livestock loan advances made within the line of credit ceiling and the terms and conditions of the Contract of Guarantee.

II. Full Faith and Credit.

The Contract of Guarantee constitutes an obligation supported by the full faith and credit of the United States and is incontestable except for fraud or misrepresentation of which the Lender has actual knowledge at the time it became such Lender or which Lender participates in or condones. The Contract of Guarantee will be unenforceable by the Lender to the extent any loss is occasioned by violation of usury laws, use of loan funds for unauthorized purposes, negligent servicing, or failure to obtain the required security regardless of the time at which FmHA acquires knowledge of the foregoing.

III. Lender's Sale of Guaranteed Loan by Participation.

A. The Lender may obtain participation in its loan under its normal operating procedures. Participation means a sale of an interest in the loan wherein the Lender retains the note, collateral securing the note, and all responsibility for loan servicing and liquidation.

B. The Lender may retain or sell any amount of the unguaranteed portion of the loan as provided in this section only through participation. However, the Lender will retain the responsibility for loan servicing and liquidation.

IV. The Lender agrees loan funds will be used for the purposes authorized in Subpart C of Title 7 CFR Part 1980 in accordance with the terms of Form FmHA 449-15.

V. The Lender certifies that it is a citizen of the United States of America, or, if an organization, that the ownership of at least 51 percent of any outstanding interests of the Lender is owned by citizens of the United States. Further, such Lender certifies that any guarantees received shall be only on loans made by it, operating for itself and not on behalf of foreign citizens or organizations.

VI. The Lender certifies that none of its officers or directors, stockholders or other owners has a substantial financial interest in the borrower. The Lender certifies that neither the borrower nor its officers or directors, stockholders or other owners has a substantial financial interest in the Lender.

VII. The Lender certifies that it has no knowledge of any material adverse change, financial or otherwise, in the Borrower, his business or any parent, subsidiaries, or affiliates since it requested a Contract of Guarantee.

Appendix F
2

VIII. Lender certifies that the Line of Credit Agreement and/or loan instruments concurred in by FmHA has been or will be signed with the Borrower.

IX. Servicing.

A. The Lender will service the entire loan and will remain mortgagee and/or secured party of record. The entire loan will be secured by the same security with equal lien priority for the guaranteed and unguaranteed portions of the loan. The unguaranteed portion of a loan will not be paid first nor given any preference or priority over the guaranteed portion of the loan.

B. It is the Lender's responsibility to see that all construction is properly planned before any work proceeds; that any required permits, licenses or authorizations are obtained from the appropriate regulatory agencies; that the Borrower has obtained contracts through acceptable procurement procedures; that periodic inspections during construction are made and that FmHA's concurrence on the overall development schedule is obtained.

C. Lender's servicing responsibilities include, but are not limited to:

1. Obtaining compliance with the covenants and provisions in the note, loan agreement, security instruments, and any supplemental agreements. None of the aforesaid instruments will be altered without FmHA's prior written concurrence.

2. Receiving all payments on principal and interest on the loan advances as they fall due.

3. Inspecting the collateral as often as necessary to properly service the loan.

4. Assuring that adequate insurance is maintained. This includes hazard insurance obtained and maintained with a loss payable clause in favor of the Lender as the mortgagee or secured party.

5. Assuring that: taxes, assessment or ground rents against or affecting collateral are paid; the loan and collateral are protected in foreclosure, bankruptcy, receivership, insolvency, condemnation, or other litigation; insurance loss payments, condemnation awards, or similar proceeds are applied on debts in accordance with lien priorities on which the guarantee was based, or to rebuilding or otherwise acquiring needed replacement collateral with the written approval of FmHA; proceeds from the sale or other disposition of collateral are applied in accordance with the lien priorities on which the guarantee is based, except that proceeds from the disposition of collateral, such as machinery, equipment, furniture or fixtures, may be used to acquire property of similar nature in value up to $ _____ without written concurrence of FmHA; the Borrower complies with all laws and ordinances applicable to the loan, the collateral and or operation of the farm or ranch.

6. Assuring that if personal or corporate guarantees are part of the collateral, current financial statements from such loan guarantors will be obtained and copies provided to FmHA at such time and frequency as required by the loan agreement or Conditional Commitment for Guarantee. In the case of guarantees secured by collateral, assuring the security is properly maintained.

7. Obtaining the lien coverage and lien priorities specified by the Lender and agreed to by FmHA, properly recording or filing lien or notice instruments to obtain or maintain such lien priorities during the existence of the guarantee by FmHA.

8. Assuring that the borrower obtains title marketable in fact to the collateral.

9. Assuring that the Borrower (any party liable) is not released from liability for all or any part of the loan, except in accordance with FmHA regulations.

10. Providing FmHA a statement certified by an officer of the Lender of the unpaid principal balance of the guaranteed loan semiannually as of June 30 and December 31.

11. Obtaining from the Borrower periodic financial statements under the following schedule: _____

_____.

Lender is responsible for analyzing the financial statements, taking any servicing actions needed, and providing copies of statements and record of actions to the County Supervisor.

X. Defaults by Borrower.

A. The Lender will notify FmHA when a Borrower is thirty (30) days past due on a payment and is unlikely to bring its account current within sixty (60) days, or if the Borrower has not met its responsibilities of providing the required financial statements to the Lender or is otherwise in default. A meeting will be arranged by the Lender with the Borrower and FmHA to resolve the problem. Actions taken by the Lender with concurrence of FmHA may include but are not limited to any curative actions contained in Subpart C of Part 1980, or liquidation.

B. The Lender will negotiate in good faith in an attempt to resolve any problem and to permit the Borrower to cure a default, where reasonable.

V42161 AUG 19 77 UMI

XI. Liquidation.

If the Lender concludes that liquidation of a guaranteed loan account is necessary because of one or more defaults or third party actions that the Borrower cannot or will not cure or eliminate within a reasonable period of time, a meeting will be arranged by the Lender with FmHA. When FmHA concurs with the Lender's conclusion or at any time concludes independently that liquidation is necessary, it will notify the Lender and the matter will be handled as follows.

The Lender will liquidate the loan unless FmHA, at its option, decides to carry out liquidation.

A. Lender's proposed method of liquidation. Within 30 days after the decision to liquidate is made, the Lender will advise FmHA of its proposed method of liquidation and will provide FmHA with:

1. Such proof as FmHA requires to establish the Lender's ownership of the guaranteed loan promissory note(s) and related security instruments.

2. Information lists concerning the Borrower's assets including real and personal property, fixtures, claims, contracts, inventory (including perishables), accounts receivable, personal and corporate guarantees, and other existing and contingent assets, advice as to whether or not each item is serving as collateral for the guaranteed loan.

3. A proposed method of making the maximum collection possible on the indebtedness.

4. If the outstanding principal balance including accrued interest is less than $200,000, the Lender will obtain an estimate of the market and potential liquidated value of the collateral. On principal balances in excess of $200,000, and all other loans, the Lender will obtain an independent appraisal report on all collateral securing the loan, which will reflect the current market value and potential liquidation value. The appraisal report is for the purpose of permitting the Lender and FmHA to determine the appropriate liquidation actions. Any independent appraiser's fee will be shared equally by FmHA and the Lender.

B. FmHA's response to Lender's liquidation proposal. FmHA will inform the Lender whether it concurs in the Lender's proposed method of liquidation within 30 days after receipt of such notification from the Lender. If FmHA needs additional time to respond to the liquidation plan, it will advise the Lender of a definite time for such response. Should FmHA and the Lender not agree on the Lender's liquidation proposal, FmHA will proceed with the liquidation as follows:

1. The Lender will transfer to FmHA all its rights and interests necessary to allow FmHA to liquidate the loan. In this event, the Lender will not be paid for any loss until after the collateral is liquidated and the final loss is determined by FmHA.

2. FmHA will attempt to obtain the maximum amount of proceeds from liquidation.

3. Options available to FmHA include any one or combination of the usual commercial methods of liquidation.

C. Acceleration. The Lender or FmHA, if it liquidates, will proceed as expeditiously as possible when acceleration of the indebtedness is necessary including giving any notices and taking any other legal actions required by the security instruments. A copy of the acceleration notice or other acceleration document will be sent to FmHA or the Lender, as the case may be.

D. Liquidation: Accounting and Reports. When the Lender conducts the liquidation, it will account for funds during the period of liquidation and will provide FmHA with periodic reports on the progress of liquidation, disposition of collateral, resulting costs, and additional procedures necessary for successful completion of liquidation. When FmHA liquidates, the Lender will be provided with similar reports on request.

E. Determination of Loss and Payment. In all liquidation cases, a final settlement will be made with the Lender after the collateral is liquidated. FmHA will have the right to recover losses paid under the guarantee from any party liable.

1. Form FmHA 449-30, "Loan Note Guarantee Report of Loss," will be used for calculations of all estimated and final determinations.

2. When the Lender is conducting the liquidation, he may request a tentative loss estimate by submitting to FmHA an estimate of the loss that will occur in connection with liquidation of the loan. Such estimate will be prepared on Form FmHA 449-30, using the basic formula as provided on the report except that the appraisal value will be used in lieu of the amount received from the sale of collateral.

After the Report of Loss Estimate has been approved by FmHA, and within 30 days, thereafter, FmHA will send the original Report of Loss Estimate to FmHA Finance Office for issuance of a Treasury check in payment of the estimated amount due the Lender.

After liquidation has been completed, a final loss report will be submitted on Form FmHA 449-30 by the Lender to FmHA.

3. After the Lender has completed liquidation FmHA, upon receipt of the final accounting and report of loss, may audit and will determine the actual loss. If FmHA has any questions regarding the amounts set forth in the Final Report of Loss, it will investigate the matter. The Lender will make its records available to and otherwise assist FmHA in making the investigation. If FmHA finds any discrepancies, it will contact the Lender and arrange for the necessary corrections to be made as soon as possible. When FmHA finds the Final Report of Loss to be proper in all respects, it will be tentatively approved in the space provided on the form for that purpose.

4. When the Lender has conducted liquidation and after the Final Report of Loss has been tentatively approved:

a. If the loss is greater than the estimated loss payment, FmHA will send the original of the Final Report Loss to the Finance Office for issuance of a Treasury check in payment of the additional amount owed by FmHA to the Lender.

b. If the loss is less than the estimated loss, the Lender will reimburse FmHA for the overpayment plus interest at the note rate from date of payment.

5. If FmHA has conducted liquidation, it will provide an accounting and report of loss to the Lender and will pay the Lender in accordance with the Contract of Guarantee.

6. In those instances where the Lender has made authorized protective advances, it may claim recovery for the guaranteed portion of any loss of monies advanced as protective advances and interest resulting from such protective advances as provided above, and such payment will be made by FmHA when the final Report of Loss is approved.

F. Maximum amount of interest loss payment. Notwithstanding any other provisions of this agreement, the amount payable by FmHA to the Lender cannot exceed the limits set forth in the Contract of Guarantee. If FmHA conducts the liquidation, loss occasioned by accruing interest will be covered by the guarantee only to the date FmHA accepts this responsibility. Loss occasioned by accruing interest will be covered to the extent of the guarantee to the date of final settlement when the liquidation is conducted by the Lender provided it proceeds expeditiously with the liquidation plan approved by FmHA. The balance of accrued interest payable to the Lender, if any, will be calculated on the final Report of Loss form.

G. Application of FmHA loss payment. The total amount of the loss payment remitted by FmHA will be applied by the Lender on the guaranteed loan debt. At time of final loss settlement the Lender will notify the Borrower that the loss payment has been so applied.

H. Income from collateral. Any net rental or other income that has been received by the Lender from the collateral will be applied on the guaranteed loan debt.

I. Liquidation costs. Certain liquidation costs will be allowed during the liquidation process. Such costs will be deducted from gross proceeds from the disposition of collateral. The amount allowed will be the amount agreed upon by FmHA and the Lender as being reasonable under the circumstances and should be determined prior to liquidation.

J. Foreclosure. The parties owning the guaranteed portion and unguaranteed portions of the loan will join to institute foreclosure action or, in lieu of foreclosure, to take a deed of conveyance to such parties. When the conveyance is received and liquidated, net proceeds will be applied to the guaranteed loan debt.

K. Payment. Such loss will be paid by FmHA within 60 days after the Lender has submitted the final Report of Loss form.

XII. Protective advances.

Protective advances must constitute an indebtedness of the Borrower to the Lender and be secured by the security instrument(s). FmHA written authorization is required on all protective advances in excess of $500. Protective advances include, but are not limited to, advances for taxes, annual assessments, ground rent, hazard or flood insurance premiums effecting the collateral, and other expenses necessary to preserve or protect the security.

XIII. Additional Loans or Advances.

The Lender will not make additional expenditures or new loans without first obtaining the written approval of FmHA even though such expenditures or loans will not be guaranteed.

XIV. Future Recovery.

After a loan has been liquidated and a final loss has been paid by FmHA, any future funds which may be recovered by the Lender, will be pro-rated between FmHA and the Lender. FmHA will be paid such amount recovered in proportion to the percentage it guaranteed for the loan and the Lender will retain such amounts in proportion to the percentage of the unguaranteed portion of the loan.

CHAPTER XXVIII—FOOD SAFETY AND QUALITY SERVICE, DEPARTMENT OF AGRICULTURE

PART 2852—PROCESSED FRUITS, VEGETABLES, PROCESSED PRODUCTS THEREOF, AND CERTAIN OTHER PROCESSED FOOD PRODUCTS

Subpart—United States Standards for Grades of Tomato Paste [1]

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Final rule.

SUMMARY: This rule will change the grading standards for tomato paste. This action was initiated at the request of the industry. The effect of the change will be to provide an alternative method of determining the color of the product.

EFFECTIVE DATE: September 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Dale C. Dunham, Processed Products Branch, Fruit and Vegetable Quality Division, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-4693.

SUPPLEMENTARY INFORMATION: Notice of a proposal to amend § 2852.5048 (formerly § 52.5048) of the United States Standards for Grades of Tomato Paste was published in the FEDERAL REGISTER of July 12, 1976 (41 FR 28527). Interested persons were allowed until December 31, 1976 in which to submit written data, views, or arguments concerning the proposed amendment.

Three letters were received in response to the notice. Brief summaries of the comments received along with the USDA's views and comments thereto and the reasons for such responses follow.

One comment was received in opposition to the adoption of the amendment for the following reasons: (1) The lack of published data which adequately established the relationship between visual and colorimetric evaluations of the color of tomato paste;

(2) A reference was made to the fact that some of the instruments used in accumulating data which would permit color determinations by electronic measurements were not universally accepted and recognized as colorimeters or spectrophotometers; and,

(3) A single specific color order system was not advocated nor designated.

Response. The USDA, University of California at Davis, and the Canners League of California expended substantial time and effort to obtain representative expert visual color judgments of tomato paste over the past several years. Electronically derived values from instruments made by several manufacturers which had been carefully calibrated and standardized were obtained on the same samples that had been visually evaluated. The resultant volume of data that was accumulated and the analyses thereof precluded publication in the FEDERAL REGISTER of all of the data which established the meaningful relationships between visual and instrumental evaluations of the colors of tomato paste.

However, all of the data and analyses thereof relating to the formal studies are available for review from the Statistics and Technical Support Staff of the Food Safety and Quality Service. For further information call William J. Franks; phone (202) 447-7081.

The Department concurs that some of the instruments used to derive values that were and can be used to evaluate the color of tomato paste are not universally accepted as being either colorimeters or spectrophotometers. In recognition of this fact and in the interest of technical accuracy, the phrase "electronic color meters" is used in lieu of the term "colorimeters" in this amendment.

The Department acknowledges the existence of different color order systems. However, the Department believes that the recommendation of or limitation to a single specified color order system at this time could be considered as restrictive or discriminatory to any other present or future systems that may be used to accurately describe or evaluate the color of tomato paste. Therefore, the Department can not recommend any one given color space system or electronic color meter. Any system will be approved by the USDA which has been adequately demonstrated and documented to be sufficiently accurate to evaluate tomato paste color.

A second submittal, while acknowledging the proposed amendment as "positive and directionally appropriate changes," recommended "a delay in a final amendment until tomato color space is properly recognized as a three dimensional system and can be properly related to USDA Standard and Fancy Tomato Paste Color."

In the same submittal, additional comments were made regarding the following: (1) The reliance that the USDA system for color measurement is interconvertible with other color measurement systems and that the USDA system should relate to consumer-perceived color "goodness" of the product;

(2) A recommendation for the use "of the best (electronically and optically) colorimeters available";

(3) A suggestion to the effect that whatever colorimeter is used be "standardized" to a standard, white tile rather than to a changeable tomato product; and

(4) The recommendation that the analysis be made on "as is" samples: that is, not diluted or modified in any way.

Response. The Department acknowledges that, in a purely technical and scientific sense, color is presented in a three dimensional concept. Specifically this concept (or color space) is often expressed in terms of hue, value and chroma or other synonymous terms. However, the Department believes that reference to a given color in absolute terms does not immediately and easily convey an accurate mental image of such color to average consumers or marketers of tomato paste.

Further, the Department believes that simple and descriptive expressions which effectively set forth the parameters by which the "degree of goodness" of tomato paste color can be judged are in the best interests of the consumers, users and processors of the product.

The amendment in no way intends to limit the design or the manner in which any electronic color meter may be used to determine values which are mathematically convertible to an accurate color ranking of the product. Such ranking in the USDA grade standards is expressed in terms of score points.

It is the intention of the USDA that, at this time, any satisfactory color measurement system may be used; provided such system is approved by the USDA. The system used shall be convertible to an index or ranking that simply and easily conveys a "consumer-perceived color 'goodness' of the product." Further, the perceived color must meet the requirements of the objective and descriptive provisions relating to color set forth in the USDA grade standards for tomato paste.

The USDA cannot recommend any given electronic color meter over any other similar or equivalent instruments which provide adequate and sufficiently accurate data that can be used to effectively evaluate the color of tomato paste. The USDA's concern is that all of the instruments of a given model manufactured by any company yield essentially identical instrumental values for any given sample in the color system chosen for use.

The data used to develop the mathematical conversions which establish the rankings of tomato paste were derived from electronic color meters that had been carefully standardized to specific references that approximated the spectral characteristics of the product. Also, all visual evaluations of the color of tomato paste are based on specific references which occupy the same approximate color spaces as the product. Therefore, all data-gathering procedures used to establish the relationship between visual and electronic color meter measurements utilized color references that appeared somewhat similar to the product that was evaluated. In other words, a "red" reference was used to evaluate a "red" product. Such related color references helped to improve the accuracy of the color measurements.

[1] Compliance with the provisions of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug, and Cosmetic Act, or with applicable State laws and regulations.

V 42 161 AUG 19 77 UMI

Since judgments of the color of tomato paste involve, primarily, the dark red area of the spectrum, the USDA believes at this time that electronic color meters that have been "standardized" to this area would be more reproducible and accurate in providing the values necessary to evaluate tomato paste color.

However, standardizing of a color meter to a "standard" white tile or reference is not precluded in this amendment. Any system, instrument or standardizing procedure may be used; provided documented data are provided to guarantee that sufficient instrument accuracy and reproducibility exists to warrant its approval by the USDA, and to permit the USDA to establish the necessary mathematical equations.

Tomato paste is processed to various degrees of concentration—from a minimum of 24.0 percent Natural Tomato Soluble Solids (NTSS) to well in excess of 45.0 percent NTSS. Although processed to this range of concentrations as a convenience, tomato paste is always diluted with other liquid (usually water) when used.

Because the color appearance of tomato paste varies with the concentration, the color evaluations are done on the product which are diluted with water to 8.5 percent ±0.1 percent NTSS. Such dilution permits the tomato paste color to be judged independently of its original concentration—that such judgments evaluate the product on an equal comparative basis.

For example, without dilution to a given constant, it is acknowledged that tomato paste of 24.0 percent NTSS concentration would visually appear "less red" than tomato paste having a concentration of 35.0 percent NTSS concentration even though the raw tomato quality, product preparation, and processing procedures were virtually identical. This is primarily because the more concentrated product has a somewhat lower value (less light, darker) and a higher chroma (greater degree of saturation) than the less concentrated product. The products would be noticeably different (appearance-wise) and would have appreciably different readouts when instrumentally measured for color.

However, when carefully diluted to a more limited range of concentration, the visual color impact due solely to product concentration is minimized and variations in instrumental readouts are not as great. Too, dilution appears to permit better color discrimination of tomato paste having indications of "yellowness," "browning," or dullness. These conditions are considered undesirable in the color of tomato paste since they are usually indicative of the use of lesser quality raw product, improper processing, or prolonged storage.

Generally tomato paste made from mature, sound, average field-ripened tomatoes which have been properly processed will usually produce a product having middle Grade A color. However, the use of better quality, riper tomatoes, along with better preparation and processing will usually produce a product having close to optimum (top Grade A) color. Use of poor raw product (green, under-colored, sunscald or yellow tomatoes) and/or improper processing will usually give rise to tomato paste of Grade C or Substandard color. Dilution to a given constant makes visual and instrumental distinctions between these color appearances possible, while still maintaining the established relationship.

A third comment was received from the Canners League of California. This organization represents processors who produce well over 75 percent of the tomato paste manufactured in the United States. The Canners League of California supports the proposed amendment. They recommend one modification—that all color evaluations (visual and/or instrumental) of tomato paste be made on the product after it has been carefully diluted with water to 8.5 ±0.1 percent natural tomato soluble solids

A second suggestion involved a representation of the text of the proposed amendment. These editorial changes do not alter in any manner the original intent of the proposed amendment.

Response. The USDA concurs that a dilution of tomato paste to a more restrictive range (8.5 ±0.1 percent NTSS) would minimize any apparent variation between visual color observations that were made at 9.0 percent NTSS and then at 8.0 percent NTSS which is permitted in the current standards.

Because this modification will provide increased accuracy and reduce the variation of color evaluation for a given sample, the Department hereby incorporates this modification in this amendment.

After careful review the Department concurs that the suggested changes in text more clearly and understandably present the provisions of the amendment. Therefore, in the interest of brevity and clarity of presentation, the modified text to the amendment proposed on July 12, 1976, is hereby adopted and is incorporated into the U.S. Standards for Grades of Tomato Paste (7 CFR 2852.5041 through 2852.5051) that are set forth as follows.

Subpart—United States Standards for Grades of Tomato Paste

Sec.
2852.5041 Product description.
2852.5042 Concentration.
2852.5043 Texture.
2852.5044 Grades.
2852.5045 Recommended fill of container.
2852.5046 Determining the grade of a sample unit.
2852.5047 Determining the rating for the factors which are scored.
2852.5048 Color.
2852.5049 Defects.
2852.5050 Determining the grade of a lot.
2852.5051 Scoresheet.

AUTHORITY: Agricultural Marketing Act of 1946, secs. 202–208, 60 Stat. 1087, as amended (7 U.S.C. 1621–1627).

Subpart—United States Standards for Grades of Tomato Paste

§ 2852.5041 Product description.

(a) "Tomato Paste" is the clean, sound, wholesome product as defined in the Standard of Identity for Tomato Paste (21 CFR 155.191) issued pursuant to the Federal Food, Drug, and Cosmetic Act and contains not less than 24.0 percent of natural tomato soluble solids.

(b) The standards in this subpart cover canned tomato paste processed by heat to assure preservation in hermetically sealed containers as well as tomato paste which may be preserved by other means.

§ 2852.5042 Concentration.

The degree of concentration is not considered a factor of quality for the purposes of these standards but the following designations of concentration may be used in connection with these standards for the applicable natural tomato soluble solids group:

Natural Tomato Soluble Solids	
Extra heavy concentration.	39.3 pct or more.
Heavy concentration.	32 pct or more, but less than 39.3 percent.
Medium concentration.	28 pct or more, but less than 32 percent.
Light concentration.	24 pct or more, but less than 28 percent.

§ 2852.5043 Texture.

(a) *General.* Texture is the degree of fineness or coarseness of the product. Texture is classified when the product is diluted with water to between 8 percent and 9 percent, inclusive, of natural tomato soluble solids.

(b) *Kinds of texture.*—(1) *"Fine"* texture means a smooth, uniform finish.

(2) *"Coarse"* texture means a coarse, slightly granular finish.

§ 2852.5044 Grades.

(a) *"U.S. Grade A"* (or *"U.S. Fancy"*) is the quality of tomato paste that: (1) Has a good flavor and odor,

(2) Has a good color,

(3) Is practically free from defects, and

(4) Scores not less than 90 points when scored in accordance with the scoring system outlined in this subpart.

(b) *"U.S. Grade C"* (or *"U.S. Standard"*) is the quality of tomato paste that: (1) Has at least a fairly good flavor and odor,

(2) Has at least a fairly good color,

(3) Is at least fairly free from defects, and

(4) Scores not less than 80 points when scored in accordance with the scoring system outlined in this subpart.

(c) *"Substandard"* is the grade of tomato paste that fails to meet the requirements of "U.S. Grade C."

§ 2852.5045 Recommended fill of container.

It is recommended that containers of tomato paste be filled as full as practicable without impairment of quality.

§ 2852.5046 Determining the grade of a sample unit.

(a) *General.* The grade of a sample unit of tomato paste is determined by considering the factor of flavor and odor which is not scored, the ratings for the factors of color and defects which are scored, the total score, and the limiting rules which apply.

(b) *Factors not rated by score points.*—(1) *Flavor and odor.* (i) The flavor and odor of the product is determined on undiluted samples and also after dilution with water to between 8 percent and 9 percent, inclusive, of natural tomato soluble solids.

(ii) *"Good flavor and odor"* means a distinct tomato paste flavor characteristic of ripe, good quality tomatoes and inclusive of any optional ingredient which may have been added. Such flavor and odor may be no more than slightly affected by any one or combination of the following: Stems, sepals, leaves, crushed seeds, cores; by immature, soured, or overripe tomatoes; from the effects of unsatisfactory preparation, processing, or storage; or from any other factor not specifically mentioned.

(iii) *"Fairly good flavor and odor"* means a characteristic tomato paste flavor and inclusive of any optional ingredient which may have been added. Such flavor and odor may be affected, but not to a serious degree, by any one or combination of the following: stems, sepals, leaves, crushed seeds, cores; by immature, soured, or overripe tomatoes; from the effects of unsatisfactory preparation, processing, or storage; or from any other factor not specifically mentioned.

(iv) *"Off flavor and odor"* means tomato paste flavor that fails to meet the requirements of "fairly good flavor and odor" or which has a flavor and/or odor which is seriously objectionable.

(c) *Factors rated by score points.* The relative importance of each scoring factor is expressed numerically on the scale of 100. The maximum number of points that may be given each factor is:

Factors:	Points
Color	50
Defects	50
Total score	100

§ 2852.5047 Determining the rating for the factors which are scored.

The essential variations within each factor which is scored are so described that the value may be determined numerically. The numerical range within each factor is inclusive. (For example, "45 to 50 points" means 45, 46, 47, 48, 49 or 50 points.)

§ 2852.5048 Color.

(a) *General.* The amount of red in tomato paste is determined by comparing the color of the product, diluted with water to 8.5 percent (±0.1 percent) of natural tomato soluble solids (N.T.S.S.), with that produced by spinning a combination of the following Munsell color discs:

Disc 1—Red (5R2.6/13) (glossy finish).
Disc 2—Yellow (2.5YR5/12) (glossy finish);
Disc 3—Black (N1) (glossy finish);
Disc 4—Grey (N4) (mat finish).

Such comparison is made under a diffused light source of approximately 250 footcandle (candela) intensity and having a spectral quality approximating that of daylight under a moderately overcast sky, and a color temperature of 7,500 degrees Kelvin ±200 degrees. With the light source directly over the disc and diluted product, observation is made at an angle of 45 degrees and at a distance of 12 or more inches from the product.

(b) *Availability of color reference.* The colors referred to in this section are available from the approved supplier under license from the U.S. Department of Agriculture:

Munsell Color Company, 2441 North Calvert Street, Baltimore, Md. 21218.

(c) *Use of electronic color meters.* (1) Values that may be used for conversion to a numerical score point color evaluation of the product, diluted to 8.5 percent (±0.1 percent) natural tomato soluble solids, may be determined by any electronic color meter system approved by the United States Department of Agriculture.

(2) The values derived with the approved electronic color meter system shall be resolvable into a calculated numerical score point by use of any appropriate conversion formula that has been approved by the USDA.

(d) *Grade A classification.* (1) Tomato paste that has a good color may be given a score of 45 to 50 points. "Good color" means a bright, typical, red tomato paste color. Such color, when the product is diluted and observed as specified in this section, is as red as, or more red than, that produced by spinning the Munsell color discs in the following combinations or an equivalent of such composite color:

65 percent of the area of Disc 1; 21 percent of the area of Disc 2, and 14 percent of the area of either Disc 3 or Disc 4; or
7 percent of the area of Disc 3 and 7 percent of the area of Disc 4, whichever most nearly matches the appearance of the diluted sample.

(2) Any calculated numerical score of 45 points for a diluted product shall be equivalent to a visually evaluated color score of 45 points produced under the conditions specified in paragraph (d)(1) of this section. Proportionately higher calculated numerical scores or visually assigned score points may be assigned to diluted products which show more redness.

(e) *Grade C classification.* (1) Tomato paste that has at least a fairly good color may be given a score of 40 to 44 points. Tomato paste that falls into this classification shall not be graded above U.S. Grade C regardless of the total score for the product (this is a limiting rule). "Fairly good color" means a typical red tomato paste color which may be slightly dull or may have a slightly brownish cast. Such color, when the product is diluted and observed as specified in this section, is as red as, or more red than, that produced by spinning the Munsell color discs in the following combinations or an equivalent of such composite color:

53 percent of the area of Disc 1;
28 percent of the area of Disc 2;
19 percent of the area of either Disc 3 or Disc 4; or
9½ percent of the area of Disc 3 and 9½ percent of the area of Disc 4, whichever most nearly matches the appearance of the diluted sample.

(2) Any calculated numerical score of 40 points for a diluted product shall be equivalent to a visually evaluated color score of 40 points produced under the conditions specified in paragraph (e) (1) of this section. Proportionately higher calculated numerical scores or visually assigned score points may be assigned to diluted products which show more redness.

(f) *Substandard classification.* Tomato paste that fails to meet the requirements of paragraph (e) of this section may be given a score of 0 to 39 points and shall not be graded above Substandard regardless of the total score for the product (this is a limiting rule).

§ 2852.5049 Defects.

(a) *General.* This factor is concerned with the degree of freedom from defects such as dark specks or scale-like particles, seeds or objectionable particles of seeds, objectionable tomato peel, harmless extraneous material, or any other similar substances.

(b) *Grade A classification.* Tomato paste that is practically free from defects may be given a score of 45 to 50 points. "Practically free from defects" means that any defects present do not more than slightly affect the appearance or usability of the product.

(c) *Grade C classification.* Tomato paste that is fairly free from defects may be given a score of 40 to 44 points. Tomato paste that falls into this classification shall not be graded above U.S. Grade C regardless of the total score of the product (this is a limiting rule). "Fairly free from defects" means that any defects present may be noticeable but are not so large, so numerous, nor of such contrasting color or nature as to seriously affect the appearance or usability of the product.

(d) *Substandard classification.* Tomato paste that fails to meet the requirements of paragraph (c) of this section may be given a score of 0 to 39 points and shall not be graded above Substandard regardless of the total score for the product (this is a limiting rule).

§ 2852.5050 Determining the grade of a lot.

The grade of a lot of tomato paste covered by these standards is determined by the procedures set forth in the Regulations Governing Inspection and Certification of Processed Fruits and Vegetables, Processed Products Thereof, and Certain Other Processed Food Products (§§ 2852.1 to 2852.83).

§ 2852.5051 Scoresheet.

PART 2858—GRADING AND INSPECTION, GENERAL SPECIFICATIONS FOR APPROVED PLANTS, AND STANDARDS FOR GRADES OF DAIRY PRODUCTS [1]

Subpart T—United States Sediment Standards For Milk and Milk Products

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Final rule.

SUMMARY: The amended U.S. sediment standards for milk and milk products will provide sediment standards for use with the "universal" sample sizes (4 ounces, 2 ounces, and 1 ounce) that are being utilized by the industry in their milk quality programs. A "universal sample" is taken from each producers milk when collected from the farm for use in determining quality and composition. The sediment standard for the universal sample will eliminate the need of larger special samples for determining sediment in milk. Also it will be equivalent to those presently used for the one pint mixed sample.

EFFECTIVE DATE: September 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Richard W. Webber, Dairy Standardization, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-7473.

SUPPLEMENTARY INFORMATION: On May 26, 1977, a notice was published in the FEDERAL REGISTER (42 FR 27011) to amend the U.S. sediment standards for milk and milk products to provide for sediment standards for use with the "universal" sample sizes (4 ounces, 2 ounces, and 1 ounce) that are being utilized by the industry in their milk quality programs. Interested parties were given the opportunity to submit, not later than July 15, 1977, data, comments, and recommendations regarding the proposed amendment.

Five responses were received to the proposed amendment. Three responses were from industry and two from State regulatory agencies. One industry response simply requested a copy of the proposed amendment. Three responses method. This was provided to the respondent. The other two industry responses supported the proposal.

One State regulatory agency strongly favored the proposal. However, it expressed a concern as to test procedures, accuracy, or limitations. The agency was provided a copy of the collaborative study which determined the feasibility of using "universal" samples to determine sediment. The results of this study were previously published in the January 1977 issue of the "Journal of Food Protection." The State regulatory agency also was provided a copy of the chapter "Sediment in Fluid Milk" which has been approved and accepted for inclusion in the next revision of "Standard Methods for the Examination of Dairy Products" (SMEDP). This chapter provides the sampling and testing methodology. These documents satisfied the concern of this agency.

The other State agency opposed any sediment standard that utilizes a filtering area of less than .20 inch diameter. The collaborative study referenced in the preceding paragraph was accepted unanimously by the committee responsible for the chapter in SMEDP for determining sediment in milk. The committee is composed of an industry representative, a trade association representative, a representative of a professional society, a representative of a State regulatory agency, and a Federal agency representative. The chapter on sediment in SMEDP, which was written by this committee, will include all three universal sample sizes. The chapter has been accepted by the Intersociety Council, the governing body of SMEDP, for inclusion in the next revision of SMEDP which will be published in the near future.

Each State regulatory agency has the privilege of specifying test procedures that are acceptable to it. The Department has no objection to this. In proposing the amendment the Department was responding to the needs and practices of industry based on acceptable studies and testing procedures.

On its own initiative the Department is making certain editorial changes in the United States Sediment Standards for Milk and Milk Products to be consistent with the new recodification designations established in the FEDERAL REGISTER, June 27, 1977 (42 FR 3514).

It is hereby further found that good cause exists for not postponing the effective date of these standards until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) these standards are equivalent to those presently used except the sample size has been reduced, (2) the industry has expressed a demand for the standards as soon as possible, (3) the industry will not have to make special preparations to use the standards, (4) the use of the standards are optional, and (5) notice of the proposed standards and the effective date has been given to the industry and such notice also was published in the FEDERAL REGISTER of May 26, 1977.

Therefore, under the authority of the Agricultural Marketing Act of 1946 (60 Stat. 1087, as amended; 7 U.S.C. 1621) Subpart T is amended; and republished in its entirety as follows:

Subpart T—United States Sediment Standards for Milk and Milk Products

Sec.

2858.2726 United States standards for milk and milk products.
2858.2728 United States sediment standards for milk and milk products: six 1⅛" diameter filtering area (coarse sediment).
2858.2729 United States sediment standards for milk and milk products: three 1¼" diameter filtering area (coarse sediment).
2858.2730 United States sediment standards for milk and milk products: six 0.40" diameter filtering area (fine sediment).
2858.2731 United States sediment standards for milk and milk products: three 0.40" diameter filtering area (fine sediment).
2858.2732 United States sediment standards for milk and milk products: for 0.10", 0.14", and 0.20" diameter filtering areas (fine sediment).

AUTHORITY: The Agricultural Marketing Act of 1946 (60 Stat. 1087, as amended; (7 U.S.C. 1621)).

Subpart T—United States Sediment Standard for Milk and Milk Products

§ 2858.2726 United States sediment standards for milk and milk products.

(a) The standards contained in this section consist of ten (10) sediment discs, prepared as hereinafter indicated, each of which represents one of the following:

0 mg. of sediment.
0.025 mg. of sediment.
0.050 mg. of sediment.
0.075 mg. of sediment.
0.10 mg. of sediment.
0.20 mg. of sediment.
0.30 mg. of sediment.
0.50 mg. of sediment.
1.00 mg. of sediment.
2.50 mg. of sediment.

(b) Each sediment disc was prepared in accordance with the procedure set forth in paragraph 9.04 of the publication "Standard Methods for the Examination of Dairy Products," Ninth Edition, 1948, published by the American Public Health Association, 1790 Broadway, New York, New York. To facilitate the use and availability of these standards, a composite photograph of the ten (10) sediment discs is made a part hereof; [2] and a copy of the photograph may be obtained, upon request, from Dairy Standardization, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250.

[1] Compliance with these standards does not excuse failure to comply with the provisions of the Federal Food, Drug and Cosmetic Act.

§ 2858.2728 United States sediment standards for milk and milk products: six 1⅛" diameter filtering area (coarse sediment).

(a) The standards contained in this section consist of six (6) sediment discs prepared as hereinafter indicated, each of which is numbered consecutively 0 to 5 representing one of the following amounts of sediment on a 1⅛" diameter filtering area.

0–0.0 mg.
1–0.5 mg.
2–1.5 mgs.
3–2.5 mgs.
4–3.0 mgs.
5–6.0 mgs.

(b) Each sediment disc was prepared from "coarse" sediment in accordance with the procedure set forth in paragraph 15.06 of "Standard Methods for the Examination of Dairy Products," Eleventh Edition 1960, published by the American Public Health Association, 1790 Broadway, New York, New York. To facilitate the use and availability of these standards, a composite photograph of the six (6) sediment discs is attached hereto and made a part hereof.[2]

§ 2858.2729 United States sediment standards for milk and milk products: three 1¼" diameter filtering area (coarse sediment).

The standards contained in this section are those most commonly used for the examination of raw milk by the "off-the-bottom method," and are the same three (3) sediment discs numbered as 1, 2 and 3 showing 0.5 mg., 1.5 mgs., and 2.5 mgs. of sediment, respectively, as designated in § 2858.2728. To facilitate the use and availability of these standards, a composite photograph of these three (3) sediment discs is attached hereto and made a part hereof.[2]

§ 2858.2730 United States sediment standards for milk and milk products: six 0.40" diameter filtering area (fine sediment).

(a) The standards contained in this section consist of six (6) sediment discs prepared as hereinafter indicated, each of which is numbered 0 to 5 representing one of the following amounts of sediment on a 0.40 inch diameter filtering area and is equivalent to the respective amounts of sediment on the 1⅛ inch diameter filtering area as described in § 2858.2728:

0–0.0 mg. (0.0 mg. equivalent).
1–0.0625 mg. (0.5 mg. equivalent).
2–0.1875 mg. (1.5 mgs. equivalent).
3–0.3125 mg. (2.5 mgs. equivalent).
4–0.3750 mg. (3.0 mgs. equivalent).
5–0.7500 mg. (6.0 mgs. equivalent).

(b) Each sediment disc was prepared from "fine" sediment in accordance with the procedure set forth in paragraph 15.07 of "Standard Methods for the Examination of Dairy Products," Eleventh Edition 1960. To facilitate the use and availability of these standards, a composite photograph of the six (6) sediment discs is attached hereto and made a part hereof.[2]

§ 2858.2731 United States sediment standards for milk and milk products: three 0.40" diameter filtering area (fine sediment).

The standards contained in this section are those most commonly used for the examination of raw milk by the "stirred sample method" and are the same three (3) sediment discs numbered as 1, 2 and 3 showing 0.0625 mg., 0.1875 mg. and 0.3125 mg. of sediment, respectively, as designated in § 2858.2730. To facilitate the use and availability of these standards, a composite photograph of these three (3) sediment discs is attached hereto and made a part hereof.[2]

§ 2858.2732 United States sediment standards for milk and milk products: for 0.10", 0.14", and 0.20" diameter filtering areas (fine sediment).

(a) The standards contained in this section consist of three series of four (4) sediment discs prepared as hereinafter indicated, each of which is numbered 0 to 3 representing one of the following amounts of sediment on a 0.10 inch, 0.14 inch, and 0.20 inch filtering area and is equivalent to the respective amounts of sediment on the 1⅛ inch diameter filtering area as described in § 2858.2728:

0.10 inch diameter filtering area.
0–0.0 mg. (0.0 mg. equivalent).
1–0.0039 mg. (0.50 mg. equivalent).
2–0.0118 mg. (1.50 mgs. equivalent).
3–0.0196 mg. (2.50 mgs. equivalent).

0.14 inch diameter filtering area.
0–0.0 mg. (0.0 mg. equivalent).
1–0.0078 mg. (0.50 mg. equivalent).
2–0.0235 mg. (1.50 mgs. equivalent).
3–0.0391 (2.50 mgs. equivalent).

0.20 inch diameter filtering area.
0–0.0 mg. (0.0 mg. equivalent).
1–0.0156 mg. (0.50 equivalent).
2–0.0469 mg. (1.50 mgs. equivalent).
3–0.0781 mg. (2.50 mgs. equivalent).

(b) Each sediment disc was prepared from "fine" sediment in accordance with the procedure set forth in paragraph 15.07 of "Standard Methods for the Examination of Dairy Products," Eleventh Edition, 1960 and paragraph 17.4, thirteenth edition, 1972. To facilitate the use and availability of these standards, a composite visual aid of the three series of four (4) sediment discs is attached hereto and made a part hereof.[2]

Done at Washington, D.C., this 13th day of August 1977.

ROBERT ANGELOTTI,
Administrator.

Title 8—Aliens and Nationality

CHAPTER I—IMMIGRATION AND NATURALIZATION SERVICE, DEPARTMENT OF JUSTICE

PART 235—INSPECTION OF PERSONS APPLYING FOR ADMISSION

Issuance of Arrival-Departure Cards (Forms I–94) to Mexican Nationals

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This order contains amendments of the regulations of the Immigration and Naturalization Service concerning the issuance of Arrival-Departure Cards (Forms I–94) to Mexican nationals. These amendments are the result of consultations between the Department of State and the Service respecting the immigration documentation which should be issued to Mexican nationals entering the United States, and are intended to facilitate travel and expedite immigration inspection.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

James G. Hoofnagle, Jr., Instructions Officer, Immigration and Naturalization Service, 425 Eye Street NW., Washington, D.C. 20536. Telephone 202-376-8373.

SUPPLEMENTARY INFORMATION: The amendments contained in this order are issued in accordance with section 552 of Title 5 of the United States Code (80 Stat. 383), as amended by Pub. L. 93-502 (88 Stat. 1561), and the authority contained in section 103 of the Immigration and Nationality Act (66 Stat. 173; 8 U.S.C. 1103), 28 CFR 0.105(b) and 8 CFR 2.1.

Existing 8 CFR 235.1(f)(1) provides that a completely executed Form I–94, Arrival-Departure Card, endorsed to show date and place of admission, period of admission and nonimmigrant classification, shall be issued to each nonimmigrant alien admitted to the United States except for certain specified classes of nonimmigrants set forth in the regulation.

This order amends 8 CFR 235.1(f)(1) in two respects: First, it divides the existing exempted classes into alphabetical subgroups for purposes of clarity. Secondly, it adds a new subgroup (D) setting forth an exemption from issuance of Form I–94 for a Mexican national in possession of a valid Mexican passport and multiple-entry nonimmigrant visitor for pleasure or business visa, admitted at a Mexican border port of entry as a border crosser or as a nonimmigrant visitor for a period of not more than 15 days to visit within the States of Texas, New Mexico, Arizona, or California. On the initial entry, an alien coming under the purview of this subparagraph will be issued a Form

V 4216161 AUG 19 77 UMI

I–94. On subsequent applications for admission, if the applicant is entering for less than 72 hours at a Mexican border port of entry and will proceed only within the 25 mile zone, the applicant may be allowed to enter without the issuance of either Form I–94 or Form SW–434. This amendment will extend to Mexican nationals in possession of valid Mexican passports and multiple-entry nonimmigrant visitor's visas the same privileges respecting documentation and entry into the United States now enjoyed by holders of Mexican Border Crossing Cards. The I–94 is required to be issued on the first entry to comply with section 290 of the Immigration and Nationality Act which requires the Service to keep a record of all aliens admitted to the United States.

Existing 8 CFR 235.1(g) provides that the holder of a Mexican Border Crossing Card (Form I–186) who wishes to enter the United States as a visitor for business or pleasure for more than 72 hours but not more than 15 days, or to proceed beyond 25 miles from the U.S.–Mexican border but within the four state area of Texas, New Mexico, Arizona or California shall be issued Form SW–434 endorsed to show date and place of admission, period of admission and nonimmigrant classification. This amendment provides that a Mexican national holding a valid Mexican passport and multiple-entry nonimmigrant visa authorizing entry for business or pleasure shall also be issued Form SW–434 under the same conditions.

8 CFR 235.1(g) is being further amended to provide that a Mexican national in possession of a valid Mexican passport and visa valid for limited applications to enter the United States shall be issued Form I–94 on his initial entry, and either Form I–94 or SW–434 on each subsequent entry. Also, the passport shall be endorsed on each admission until the allowable number of entries on the visa has been exhausted. This regulation is necessary to insure compliance with the terms of the limited-entry visa.

Since these amendments relate to Service procedure, compliance with the provisions of section 553 of Title 5 of the United States Code respecting notice of proposed rulemaking and delayed effective date is not required.

In the light of the foregoing, the following amendments are hereby prescribed to Title 8 of Chapter I of the Code of Federal Regulations:

In Part 235, §§ 235.1(f) (1), (2), and § 235.1(g), are revised to read as follows:

§ 235.1 Scope of examination.

* * * * *

(f) *Arrival-Departure Card, Form I–94*—(1) *Nonimmigrant applicants.* A completely executed Form I–94 endorsed to show date and place of admission, period of admission, and nonimmigrant classification shall be issued to each nonimmigrant alien admitted to the United States, except:

(i) A nonimmigrant alien coming within the purview of § 212.1(a) of this chapter and 22 CFR 41.129(a), who is admitted as a visitor for business or pleasure or to proceed in direct transit through the United States;

(ii) A nonimmigrant alien who has his residence in the British Virgin Islands and was admitted only to the United States Virgin Islands as a visitor for business or pleasure under the provision of § 212.1(b) of this chapter;

(iii) A Mexican national in possession of a valid Form I–186 who is admitted at a Mexican border port of entry as a border crosser or as a nonimmigrant visitor for a period of not more than 15 days to visit within the States of Texas, New Mexico, Arizona, or California. (See paragraph (g) of this section as to when SW–434 is required to be issued.)

(iv) A Mexican national in possession of a valid Mexican passport and multiple-entry nonimmigrant visitor for pleasure or business visa, and is admitted at a Mexican border port of entry as a border crosser or as a nonimmigrant visitor for a period of not more than 15 days to visit within the States of Texas, New Mexico, Arizona, or California, except on the initial entry, when an alien coming under the purview of this paragraph will be issued a Form I–94. On subsequent applications for admission, if he is entering for less than 72 hours at a Mexican border port of entry and will proceed only within the 25-mile zone the applicant may be allowed to enter without the issuance of either Form I–94 or Form SW–434.

A Form I–94 valid for any number of entries during a specified 6-month period may be issued to a nonimmigrant alien who will have occasion to make frequent entries into the United States over the land borders.

(2) *Paroled aliens.* An alien paroled into the United States pursuant to the provisions of Section 212(d)(5) of the Act, including an alien crewman, shall be issued a completely executed Form I–94 endorsed to show the date and place of parole, the period for, and conditions under which the alien was paroled into the United States.

(g) *Mexican Border Visitors Permit (SW–434).* A Mexican national described in paragraph (f)(1)(iv) of this section applying for a second or subsequent admission, and the rightful holder of a valid Form I–186, who is admitted as a visitor for business or pleasure at a Mexican border port of entry for a period of more than 72 hours but not more than 15 days in the immediate border area, or to proceed beyond 25 miles into the United States but within the States of Texas, New Mexico, Arizona, or California, for not more than 15 days, shall be issued Form SW–434 endorsed to show date and place of admission, period of admission, nonimmigrant classification, and place of destination. A Mexican national in possession of a valid passport and visa valid for limited applications to enter the United States shall be issued a Form I–94 on the initial entry and Form SW–434 or Form I–94 on each admission thereafter. The passport shall be endorsed on each admission until the number of entries allowed by the nonimmigrant visa has been exhausted.

* * * * *

(Sec. 103; 66 Stat. 173; 8 U.S.C. 1103.)

Effective date: The amendments contained in this order become effective on August 19, 1977.

Dated: August 11, 1977.

LEONEL J. CASTILLO,
Commissioner of Immigration and Naturalization.

[FR Doc.77-23994 Filed 8-18-77;8:45 am]

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER D—EXPORTATION AND IMPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

Issuance of Import Permits for Animals on a Lottery Basis

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: These amendments establish procedures to be used for the issuance of special permits for animals to be imported into the United States through the Fleming Key Animal Import Center, Fleming Key, Fla. Due to space limitations at the Center there is a need for a method of issuing permits which will insure fairness and equality to all importers requesting such permits.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. D. E. Herrick, USDA, Veterinary Services, Federal Building, Room 815, Hyattsville, Md. 20782, 301–436–8170.

SUPPLEMENTARY INFORMATION: On April 30, 1975, a notice was published in the FEDERAL REGISTER (40 FR 18821) which solicited comments and suggestions from the general public on methods and procedures to be used by the Department in the issuance of permits for animals to be imported through the Animal Import Center at Fleming Key, Fla. Because of space limitations at the Fleming Key facility and the number of applications for permits expected, the Department wished to develop a method to be used in issuing these permits which would insure fairness and equality to all importers requesting such permits and at the same time insure maximum utilization of space available without discrimination to anyone. A total of 120 days was allowed for comments.

A total of 36 comments were received, 35 of which favored establishing some system for the issuance of import permits with 24 of these suggesting use of a lottery. Two of these suggested that the

public be notified 90 days in advance of a public drawing.

After due consideration of all comments received and all other relevant information available to the Department, it was determined that further consideration should be given to the issuance of import permits on a lottery type selection basis.

On February 18, 1977, a second notice of proposed rulemaking was published in the FEDERAL REGISTER (42 FR 10013) which proposed procedures for use in the issuance of special import permits for animals to be imported through the Fleming Key Animal Import Center.

This proposal provided for public notification at least 90 days prior to the date of public drawing with the names of applicants for permits to be selected through consecutive drawings until all spaces available for 400 cattle for each quarantine period are allotted. If less than 400 applications were received, it was proposed to issue one permit for one animal to each applicant, with the names of applicants wishing to import more than one animal, selected through consecutive drawings until all spaces available for each quarantine period were allotted.

The method proposed was believed to be the most equitable means available to insure that each applicant had an opportunity to import at least one animal. A period of 60 days was allowed for comments. No comments were received.

After due consideration of all relevant information available to the Department, the proposal as published is adopted without change. Accordingly, Part 92, Title 9, Code of Federal Regulations is amended in the following respects:

In § 92.4, the section heading is amended; in paragraph (a)(2) the exception is amended; in paragraph (b) the first sentence is revised and a new paragraph (e) is added to read as follows:

§ 92.4 Import permits for ruminants, swine, poultry, animal semen, animal specimens for diagnostic purposes,[5] and special permits for cattle entering Fleming Key Animal Import Center.

(a) * * *

(2) * * *, except as provided in paragraphs (d) and (e) of this section.

* * * * *

(b) *Permit.* Except as provided in paragraph (e) of this section, when a permit is issued the original and two copies will be sent to the importer. * * *

* * * * *

(e) *Special permits required for quarantine of cattle at Fleming Key, Florida Animal Import Center.* Because of the extended period of time required to process cattle intended for importation from foot-and-month disease infected countries through the Animal Import Center at Fleming Key, Florida, special permits shall be required before any animal may enter such facility for quarantine. Such permits will be issued on a lottery basis in accordance with the following procedures:

(1) *Public notification of drawing.* For each importation of animals into the Fleming Key facility, a drawing will be held of the names of applicants who desire to import animals into the facility at that particular time. Each applicant shall complete an application for importing animals into the Fleming Key facility at least 15 days prior to the date of the drawing.[5a] The applicant shall state on the application the number of animals which he desires to import into the Fleming Key facility. At least 90 days prior to any drawing, notice will be given in the FEDERAL REGISTER of the date, time, and place of such event.

(2) *Drawing for permits.* At least 6 months before the proposed date of entry of cattle into the Fleming Key Animal Import Center and at the time, date, and places specified in the Notice of Drawing, a Department employee shall consecutively draw the names of applicants until a maximum of 400 names have been selected to receive one special permit for one animal each. In the event that there are less than 400 applicants for a particular drawing, each applicant shall initially receive one special permit to import one animal into the Fleming Key Animal Import Center. The remaining available special permits shall be issued by consecutive drawings of the names of those applicants who desire to import more than one animal into the Fleming Key Animal Import Center. The procedure for the consecutive drawings shall be as follows: A drawing will be held of the names of those applicants seeking to import at least two animals into the center. If, after these names have been selected, available space in the center still exists, a drawing will be held of the names of those applicants seeking to import at least three animals into the center. This selection process shall continue in the same manner until no available space exists for importing animals into the Fleming Key Animal Import Center. Within a reasonable time after the conclusion of the drawing, all applicants will be notified in writing by the Department as to whether or not the applicant has received a special permit. Any applicant who has not received a permit for any animal for which he has filed an application, may resubmit an application at any future drawing which is held.

(3) *Areas of origin; limitations.* All applications for special permits received will be carefully reviewed prior to the public drawing. In the event applications are received for the importation of cattle which originate from areas in which conditions are considered to be unacceptable as specified in § 92.4(a)(3), the applicant will be so advised, and the application for permit received will be returned.

(4) *Handling of permits.* Applicants selected to receive special permits for cattle to be imported through the Fleming Key Animal Import Center will be so advised in writing and corresponding permits will be distributed as soon as possible following the public drawing. Applicants so advised of their selection to receive permits should notify the Deputy Administrator if their permits are not received three weeks following the announced date of the drawing held. Special permits shall not be assigned or transferred, nor shall any interest in the special permit be assigned or transferred.

(Sec. 2, 32 Stat. 792, as amended; secs. 2, 3, 4, and 11, 76 Stat. 129, 130, 132, sec. 1, 84 Stat. 202 (21 U.S.C. 111, 134a, 134b, 134c, 134f, and 135); 37 FR 28464, 28477; 38 FR 19141.)

These amendments establish procedures to be used for the issuance of special permits for animals to be imported into the United States through the Fleming Key Animal Import Center, Fleming Key, Florida, and should be made effective promptly in order to be of maximum benefit to affected persons.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, good cause is found for making the amendments effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 16th day of August 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

NORVAN L. MEYER,
Acting Deputy Administrator Veterinary Services

[FR Doc.77-24124 Filed 8-18-77;8:45 am]

SUBCHAPTER E—VIRUSES, SERUMS, TOXINS, AND ANALOGOUS PRODUCTS; ORGANISMS AND VECTORS

PART 112—PACKAGING AND LABELING

Miscellaneous Amendments

AGENCY: Animal and Plant Health Inspection Service (APHIS).

ACTION: Final rule.

SUMMARY: This amendment deletes the usage of the term "U.S. Standard of Potency" which presently appears in the regulations. Such term is not defined in the regulations, and the usage of such term with respect to veterinary biologics has now become unnecessary.

EFFECTIVE DATE: This amendment becomes effective August 12, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. R. J. Price, 201–436–8245.

SUPPLEMENTARY INFORMATION: Section 112.2(a)(10) of the regulations

[5] For other permit requirements for birds, the regulations issued by the U.S. Department of the Interior (Part 17, Title 50, Code of Federal Regulations) and the regulations issued by the U.S. Department of Health, Education, and Welfare (Subpart J–1 of Part 71, Title 42, Code of Federal Regulations) should be consulted.

[5a] Application forms may be obtained upon request, from the Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Hyattsville, Md. 20782.

V42161 AUG 19 77 UMI

makes reference to the term "U.S. Standard of Potency". A "No U.S. Standard of Potency" statement is prescribed by that section for certain products when adequate tests for serial-to-serial release are not available. In products containing multiple fractions, the label must list those fractions for which a "U.S. Standard of Potency" has been established, since this requirement was published in the regulations, many of the products which do not have an established "U.S. Standard of Potency" have been removed from the market and tests have been developed for the balance.

During this same period, new products have been licensed only if an acceptable test could be conducted to evaluate the potency of the product. These tests have either been codified in 9 CFR, or written into the filed Outline of Production for the product, or both.

The reference to the term, "U.S. Standard of Potency," has served its purpose and is no longer needed.

Section 112.2(a)(10) is amended by revising the introductory paragraph and deleting paragraphs (a)(10)(i) and (ii) to read:

§ 112.2 Final container label, carton label, and enclosure.

* * * * * * *

(a) * * *

(10) In the case of a product which contains an antibiotic added during the production process, the statement "Contains _____ as a preservative," or an equivalent statement indicating the antibiotic added shall appear on cartons and enclosures if used: *Provided*, That if cartons are not used, such information shall appear on the final container label;

* * * * * * *

(21 U.S.C. 151 and 154; 37 FR 28477, 28646; 38 FR 19141.)

This amendment makes administrative changes to remove from the regulations a label requirement which has served its purpose and is no longer needed. In order for these changes to be of maximum benefit, it must be made effective immediately.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure concerning this amendment are impracticable and unnecessary, and good cause is found for making this amendment effective less than 30 days after publication in the FEDERAL REGISTER.

The foregoing amendment shall become effective upon issuance.

Done at Washington, D.C., this 12th day of August 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

NORVAN L. MEYER,
Acting Deputy Administrator,
Veterinary Services.

SUBCHAPTER I—ACCREDITATION OF VETERINARIANS AND SUSPENSION OR REVOCATION OF SUCH ACCREDITATION

PART 160—DEFINITION OF TERMS

PART 161—REQUIREMENTS AND STANDARDS FOR ACCREDITED VETERINARIANS AND SUSPENSION OR REVOCATION OF SUCH ACCREDITATION

Disciplinary Action by Secretary

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This action authorizes the Secretary of Agriculture to suspend or to revoke accreditation of a veterinarian, instead of the "Deputy Administrator", as required by the Department's rules of practice, when it is determined that any accredited veterinarian has not complied with the "Standards for Accredited Veterinarians." A definition of the term "Secretary" is also included. The effect of this action will be to authorize the Administrative Law Judges and the Judicial Officer of the Department, as well as the Deputy Administrator, to take disciplinary action in accordance with the provisions of the Department's rules of practice and the applicable supplemental rules of practice.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. H. L. Arnold, USDA, APHIS, VS, 6505 Belcrest Road, Federal Building, Room 867, Hyattsville, Md. 20782, 301-436-8684.

SUPPLEMENTARY INFORMATION: On January 4, 1977, the Department of Agriculture promulgated rules of practice, published in the FEDERAL REGISTER at 42 FR 743-749, governing inter alia, formal adjudicatory, administrative proceedings under the Animal Quarantine and Related Laws (21 U.S.C. 111 et seq.) for the suspension or revocation of accreditation of veterinarians (9 CFR Parts 160, 161). The Department's rules of practice became effective on February 1, 1977, and superseded all rules of practice and regulations which were in conflict with such rules. The Department's rules of practice require the Administrator of each agency administering the programs involved to publish documents revoking any rules or regulations superseded by the new rules and promulgating new, amended or supplemental rules and regulations pursuant to such new rules.

Section 161.3(a) of the regulations governing the suspension or revocation of veterinary accreditation (9 CFR 161.3(a)) provides that the Deputy Administrator may suspend or revoke a veterinarian's accreditation when he determines that the accredited veterinarian has not complied with the "Standards for Accredited Veterinarians." The regulations in this respect are inconsistent with the Department's rules of practice which authorize such actions, after opportunity for a hearing by an Administrative Law Judge, and upon appeal from a decision of such Judge, by the Judicial Officer of this Department. Therefore, the regulations are being amended to provide for such actions by those officials in accordance with the rules of practice by (1) deleting the term "Deputy Administrator" the first time it appears in § 161.3(a) of the regulations (9 CFR 161.3(a)) and inserting in lieu thereof the term "Secretary"; and (2) adding a new definition for "Secretary" as § 160.1(h)) to mean any officer or employee of the Department to whom authority has heretofore been delegated or to whom authority may hereafter be delegated to act in his stead.

Accordingly, Parts 160 and 161, Title 9, Code of Federal Regulations, are amended in the following respects:

1. A new paragraph (h) of § 160.1 of the regulations (9 CFR 160.1(h)) is added to read as follows:

§ 160.1 Definitions.

* * * * * * *

(h) *"Secretary."* The Secretary of Agriculture or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in his stead.

§ 161.3 [Amended]

2. Section 161.3(a) of the regulations (9 CFR 161.3(a)) is amended by deleting the term "Deputy Administrator" the first time it appears in said paragraph and by substituting the term "Secretary" in lieu thereof.

(23 Stat. 32 as amended; 26 Stat. 417; 32 Stat. 791, 792, as amended; 33 Stat. 1265, as amended; 41 Stat. 699; 58 Stat. 734, as amended; 65 Stat. 693; 78 Stat. 130, 132; 84 Stat. 1406 (15 U.S.C. 1828; 21 U.S.C. 105, 111-114, 114a-1, 116, 120, 121, 125, 134b, 134f).)

These amendments do not impose or relieve any restrictions but amends the regulations to conform with the Department's rules of practice.

It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendments are impracticable and unnecessary and good cause is found for making the amendments effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C., this 15th day of August 1977.

NOTE.—The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

J. K. ATWELL,
Acting Deputy Administrator,
Veterinary Services.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER A—GENERAL

PART 14—PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE

Panel on Review of Sedative, Tranquilizer, and Sleep Aid Drugs; Termination

AGENCY: Food and Drug Administration.

ACTION: Final Rule.

SUMMARY: Pursuant to § 14.55 (21 CFR 14.55) of the public advisory committee procedures, the Food and Drug Administration announces the termination of the Panel on review of Sedative, Tranquilizer, and Sleep Aid Drugs and amends the regulations to delete it from the list of standing advisory committees. The panel was terminated on July 17, 1977 because it was no longer needed.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Michael D. Kennedy,
Bureau of Drugs (HFD-510),
Food and Drug Administration,
Department of Health, Education, and Welfare,
5600 Fishers Lane,
Rockville, Md. 20857,
301-443-4960.

SUPPLEMENTARY INFORMATION: The panel's function were to review the data and information submitted and to prepare a report on the safety, effectiveness, and labeling of OTC products containing sedative, tranquilizer, sleep aid, and stimulant ingredients. The conclusions and recommendations in the panel's report were published in the FEDERAL REGISTER of December 8, 1975 (40 FR 57292).

Accordingly, the usefulness of the panel had been served and the panel was no longer needed. On July 17, 1977, the Secretary of Health, Education, and Welfare terminated the Committee's charter.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371 (a))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 14 is amended in § 14.100 list of standing advisory committees by deleting paragraph (c)(20)(i)(*d*) and marking it reserved.

Effective date: Since this is a technical conforming amendment to Part 14, the Commissioner finds that there is good cause for the rule to be effective immediately upon publication in the FEDERAL REGISTER, August 19, 1977.

Dated: August 12, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

[FR Doc.77-23976 Filed 8-18-77;8:45 am]

PART 14—PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE

Panel on Review of Laxative, Antidiarrheal, Emetic, and Antiemetic Drugs; Termination

AGENCY: Food and Drug Administration.

ACTION: Final Rule.

SUMMARY: Pursuant to § 14.55 (21 CFR 14.55) of the public advisory committee procedures, the Food and Drug Administration announces the termination of the Panel on Review of Laxative, Antidiarrheal, Emetic, and Antiemetic Drugs and amends the regulations to delete it from the list of standing committees. The panel was terminated on July 17, 1977 because it was no longer needed.

EFFECTIVE DATE: August 19. 1977.

FOR FURTHER INFORMATION CONTACT:

John T. McElroy, Bureau of Drugs (HFD-510), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4960.

SUPPLEMENTARY INFORMATION: The Commissioner of Food and Drugs appointed the panel to review the data and information submitted, and to prepare a report on the safety, effectiveness and labeling of OTC laxative, antidiarrheal, emetic, and antiemetic drug products pursuant to § 330.10(a)(1) (21 CFR 330.10(a)(1)). The conclusions and recommendations contained in the panel's report were published in the FEDERAL REGISTER of March 21, 1975 (40 FR 12902).

The Commissioner concluded that the panel's usefulness had been served and there was no longer a need for it. On July 17, 1977, the Secretary of Health, Education, and Welfare terminated the Committee's charter.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a))) and under authority delegated to the Commissioner (21 CFR 5.1), Part 14 is amended in § 14.100 List of standing advisory committees by deleting paragraph (c)(20)(i)(*c*) and marking it reserved.

Effective date: Since this is a technical conforming amendment to Part 14, the Commissioner finds that there is good cause for the rule to be effective immediately upon publication in the FEDERAL REGISTER, August 19, 1977.

Dated: August 12, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

[FR Doc.77-23977 Filed 8-18-77;8:45 am]

PART 14—PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE

Panel on Review of Cold, Cough, Allergy, Bronchodilator, and Antiasthmatic Drugs; Termination

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: Pursuant to § 14.55 (21 CFR 14.55) of the public advisory committee procedures, the Food and Drug Administration announces the termination of the Panel on Review of Cold, Cough, Allergy, Bronchodilator, and Antiasthmatic Drugs and amends the regulations to delete it from the list of standing advisory committees. The panel was terminated on July 17, 1977 because it was no longer needed.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Thomas D. DeCillis, Bureau of Drugs (HFD-510), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4960.

SUPPLEMENTARY INFORMATION: The panel's functions were to review the data and information submitted and to prepare a report on the safety, effectiveness, and labeling of OTC cold, cough, allergy, bronchodilator, and antiasthmatic drug ingredients. The conclusions and recommendations in the panel's report were published in the FEDERAL REGISTER of September 9, 1976 (41 FR 38312). Accordingly, the panel's usefulness had been served and the panel was no longer needed. On July 17, 1977, the Secretary of Health, Education, and Welfare terminated the Committee's charter.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 14 is amended in § 14.100 List of standing advisory committees by deleting paragraph (c)(20)(i)(*c*) and marking it reserved.

Effective date: Since this is a technical conforming amendment to Part 14, the Commissioner finds that there is good cause for the rule to be effective immediately upon publication in the FEDERAL REGISTER, August 19, 1977.

Dated: August 12, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

PART 14—PUBLIC HEARING BEFORE A PUBLIC ADVISORY COMMITTEE

Diagnostic Products Advisory Committee; Termination

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: Pursuant to § 14.55 (21 CFR 14.55) of the public advisory committee procedures, the Food and Drug Administration announces the termination of the Diagnostic Products Advisory Committee and amends the regulations to delete it from the list of standing advisory committees. This committee was ter-

V 42 161 AUG 19 77 UMI

minated on July 17, 1977, because its functions were assumed by advisory panels created under authority of the Medical Device Amendments of 1976 (Pub. L. 94-295).

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert S. Kennedy, Bureau of Medical Devices (HFK-1), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, Md. 20910, 301-427-7900.

SUPPLEMENTARY INFORMATION: The Diagnostic Product Advisory Committee's functions were to review and evaluate available data concerning the safety and effectiveness of devices currently in use and make recommendations for their regulation. On July 17, 1977, the Secretary of Health, Education, and Welfare terminated the committee's charter because its functions were assumed by advisory panels created under the Medical Device Amendments of 1976.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Part 14 is amended in § 14.100 List of standing advisory committees by deleting paragraph (d)(1)(xx) and marking it reserved.

Effective date: Since this is a technical conforming amendment to Part 14, the Commissioner finds that there is good cause for the rule to be effective immediately upon publication in the FEDERAL REGISTER, August 19, 1977.

Dated: August 15, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

SUBCHAPTER B—FOOD FOR HUMAN CONSUMPTION

[Docket Nos. 76F-0150; 76F-0194]

PART 176—INDIRECT FOOD ADDITIVES: PAPER AND PAPERBOARD COMPONENTS

Components of Paper and Paperboard in Contact with Aqueous and Fatty Foods

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The agency is amending the food additive regulations to provide for the use of two resins as drainage and/or retention aids in the manufacture of paper and paperboard for food-contact use. This amendment is based on evaluation of data contained in food additive petitions submitted by Calgon Corp.

DATES: Effective August 19, 1977; objections by September 19, 1977.

ADDRESS: Written objections to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

John J. McAuliffe, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: Notices were given by publication in the FEDERAL REGISTER of May 12, 1976 (41 FR 19362) and June 14, 1976 (41 FR 23989) that petitions (FAP 6B3193 and FAP 6B3199, respectively) had been filed by Calgon Corp., Calgon Center, Box 1346, Pittsburgh, PA 15230, proposing that § 176.170 Components of paper and paperboard in contact with aqueous and fatty foods (21 CFR 176.170, formerly § 121.2526 prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), be amended to provide for safe use of two resins produced by copolymerizing acrylamide, diallyldiethylammonium chloride, and diallyldimethylammonium chloride in two different weight ratios.

The Commissioner of Food and Drugs, having evaluated the data in the petitions and other relevant material, concludes that § 176.170 should be amended as set forth below.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1))) and under authority delegated to the Commissioner (21 CFR 5.1), Part 176 is amended in § 176.170(a)(5) by revising the listed substance (first listing) "Diallyldiethylammonium chloride * * *" in a weight ratio of 50-2.5-47.5, respectively * * *" to provide for two additional weight ratios of monomers in the production of resins to be used as retention and/or drainage aids, to read as follows:

§ 176.170 Components of paper and paperboard in contact with aqueous and fatty foods.

* * * * * * *

(a) * * *

(5) * * *

List of substances	*Limitations*
* * *	* * *
Diallyldiethylammonium chloride polymer with acrylamide and diallyldimethylammonium chloride, produced by copolymerizing acrylamide, diallyldiethylammonium chloride and diallyldimethylammonium chloride, respectively, in the following weight ratios and having viscosities determined at 22° C by LVF-series Brookfield viscometer using a No. 1 spindle at 60 r.p.m. (or by other equivalent method), as follows:	
1. Weight ratio: 50-2.5-47.5. The finished resin in a 1 percent by weight aqueous solution has a minimum viscosity of 22 centipoises.	For use only as a retention aid employed prior to the sheet-forming operation in the manufacture of paper and paperboard and limited to use at a level not to exceed 0.05 percent by weight of the finished paper and paperboard.
2. Weight ratio: 25-2.5-72.5. The finished resin in a 0.20 percent by weight aqueous solution has a minimum viscosity of 20 centipoises.	For use only as a drainage and/or retention aid employed prior to the sheet-forming operation in the manufacture of paper and paperboard and limited to use at a level not to exceed 0.075 percent by weight of the finished paper and paperboard.
3. Weight ratio: 80-2.5-17.5. The finished resin in a 0.30 percent by weight aqueous solution has a minimum viscosity of 20 centipoises.	For use only as a drainage and/or retention aid employed prior to the sheet-forming operation in the manufacture of paper and paperboard and limited to use at a level not to exceed 0.075 percent by weight of the finished paper and paperboard.
* * * * *	* * * * *

Any person who will be adversely affected by the foregoing regulation may at any time on or before September 19, 1977 submit to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Four copies of all documents shall be submitted and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this regulation. Received objections may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Effective date: This regulation shall become effective August 19, 1977.

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)))

Dated: August 12, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

[Docket No. 76F-0387]

PART 176—INDIRECT FOOD ADDITIVES: PAPER AND PAPERBOARD COMPONENTS

Components In Contact with Aqueous and Fatty Food

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: This document amends the food additive regulations to provide for safe use of a chemical as a component of paper and paperboard intended for food-contact use. This amendment is based on a petition filed by Buckman Laboratories, Inc.

DATES: Effective August 19, 1977; objections by September 19, 1977.

ADDRESSES: Written objections to this regulation may be filed with the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

John J. McAuliffe, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: A notice published in the FEDERAL REGISTER of September 29, 1976 (41 FR 42970) announced that a food additive petition (FAP 6B3184) had been filed by Buckman Laboratories, Inc., 1256 North McLean Blvd., Memphis, TN 38108, proposing that § 176.170 (21 CFR 176.170, formerly § 121.2526, prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)) be amended to provide for safe use of epichlorohydrin polymer with monomethylamine, reaction product with N,N,N',N'-tetramethylethylenediamine as a component of paper and paperboard intended for use in contact with aqueous and fatty foods.

The Commissioner of Food and Drugs, having evaluated data in the food additive petition and other relevant material, concludes that § 176.170 should be amended as set forth below.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1))) and under authority delegated to the Commissioner (21 CFR 5.1), Part 176 is amended in § 176.170(a)(5) by alphabetically inserting in the list of substances a new item, to read as follows:

§ 176.170 Components of paper and paperboard to contact with aqueous and fatty foods.

* * * * * * *

(a) * * *

(5) * * *

List of substances	*Limitations*
* * *	* * *
Polyamine-epichlorohydrin resin produced by reaction of epichlorohydrin with monomethylamine to form a prepolymer and further reaction of this prepolymer with N,N,N',N'-tetramethylethylenediamine such that the finished resin having a nitrogen content of 11.6 to 14.8 percent and a chlorine content of 20.8 to 26.4 percent and a minimum viscosity, in 25 percent by weight aqueous solution, of 500 centipoises at 25° C, as determined by LV-series Brookfield viscometer using a No. 2 spindle at 12 r.p.m. (or by other equivalent method).	For use only as a flocculant, drainage aid, formation aid, retention aid, or strength additive employed prior to the sheet-forming operation in the manufacture of paper and paperboard, and used at a level not to exceed 0.12 percent by weight of dry paper and paperboard fibers.
* * * * *	* * * * *

Any person who will be adversely affected by the foregoing regulation may at any time on or before September 19, 1977 submit to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Four copies of all documents shall be submitted and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this regulation. Received objections may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Effective date: This regulation shall become effective August 19, 1977.

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)).)

Dated: August 12, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

SUBCHAPTER B—FOOD FOR HUMAN CONSUMPTION

[Docket No. 75F-0173]

PART 176—INDIRECT FOOD ADDITIVES: PAPER AND PAPERBOARD COMPONENTS

Slimicides

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The food additive regulations are amended to provide for safe use of a chemical mixture as a component of slimicides in the manufacture of paper and paperboard intended to contact food. This amendment is based on evaluation of data contained in a food additive petition submitted by Rohm and Hass Co.

EFFECTIVE DATE: August 19, 1977; objections by September 19, 1977.

ADDRESS: Written objections to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, Md. 20857.

FOR FURTHER INFORMATION CONTACT:

John J. McAuliffe, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204, 202-472-5690

SUPPLEMENTARY INFORMATION: A notice published in the FEDERAL REGISTER of August 18, 1975 (40 FR 34624) announced that a food additive petition (FAP 5H3107) had been filed by Rohm and Haas Co., Independence Mall West, Philadelphia, PA 19105, proposing that §176.300 (21 CFR 176.300, formerly § 121.2505 prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), be amended to provide for the safe use of 5-chloro-2-

V 42 161 AUG 19 77 UMI

methyl - 4 - isothiazolin - 3 - one calcium chloride and 2-methyl-4-isothiazolin-3-one calcium chloride as components of a slimicide in the manufacture of paper and paperboard intended to contact food.

The Commissioner of Food and Drugs, having evaluated the data in the food additive petition and other relevant material, concludes that § 176.300 should be amended as set forth below.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1))) and under authority delegated to the Commissioner (21 CFR 5.1), Part 176 is amended in § 176.300(c) by alphabetically inserting a new item in the list of substances, to read as follows:

§ 176.300 Slimicides.

(c) * * *

List of substances	*Limitations*
* * *	* * *
5-Chloro-2 - methyl - 4 - isothiazolin-3-one calcium chloride and 2-methyl-4-isothiazolin-3-one calcium chloride mixture at a ratio of 3 parts to 1 part.	At a level of 2.5 pounds per ton of dry weight fiber.
* * *	* * *

Any person who will be adversely affected by the foregoing regulation may at any time on or before September 19, 1977 submit to the Hearing Clerk (HFC–20), Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Four copies of all documents shall be submitted and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this regulation. Received objections may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

Effective date. This regulation shall become effective August 19, 1977.

(Sec. 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)).)

Dated: August 12, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

[FR Doc.77–24148 Filed 8–18–77;8:45 am]

SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

PART 510—NEW ANIMAL DRUGS

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Poloxalene

AGENCY: Food and Drug Administration, HEW.

ACTION: Final rule.

SUMMARY: The animal drug regulations are amended to reflect an approved new animal drug application filed by A. E. Staley Manufacturing Co. The amendment provides for a medicated block for control of legume bloat in feeding cattle.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

David N. Scarr, Bureau of Veterinary Medicine (HFV–214), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3183.

SUPPLEMENTARY INFORMATION: In accordance with section 512(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(i)), Parts 510 and 520 (21 CFR 510 and 520) are amended to reflect an approved new animal drug application (NADA 33–773V) filed by A. E. Staley Manufacturing Co., 2200 Eldorado St., Decatur, IL 62525. The regulation reflecting this approval was originally published in the FEDERAL REGISTER of March 14, 1967 (32 FR 4019). The sponsor is incorrectly listed in the current regulations.

Publication of this approval has not required a reevaluation of the parent NADA and does not constitute a reaffirmation of the drug's safety and effectiveness.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), Parts 510 and 520 are amended as follows:

1. In Part 510, § 510.600 is amended in paragraph (c)(1) by adding a new sponsor alphabetically, and in paragraph (c)(2) by adding a new sponsor numerically, as follows:

§ 510.600 Names, addresses, and code numbers of sponsors of approved applications.

(c) * * *

(1) * * *

Firm name and address:	*Drug listing No.*
* * * * *	*
A. E. Staley Manufacturing Co., 2200 Eldorado St., Decatur, IL 62525.	012315
* * * * *	*

(2) * * *

Drug listing No.:	*Firm name and address*
* * * * *	*
012315--------	A. E. Staley Manufacturing Co., 2200 Eldorado St., Decatur, IL 62525.
* * * * *	*

2. In Part 520, § 520.1840 is amended by revising paragraph (c)(2) and adding new paragraph (c)(3), to read as follows:

§ 520.1840 Poloxalene.

* * * * *

(c) * * *

(2) See No. 000007 in § 510.600(c) of this chapter for sponsor of usage provided by paragraph (d)(3) of this section.

(3) See No. 012315 in § 510.600(c) of this chapter for sponsor of usage provided by paragraph (d)(2) of this section.

* * * * *

Effective date: August 19, 1977.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: August 9, 1977.

FRED J. KINGMA,
Acting Director, Bureau of Veterinary Medicine.

[FR Doc.77–23618 Filed 8–18–77;8:45 am]

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Amprolium Crumbles

AGENCY: Food and Drug Administration, HEW.

ACTION: Final rule.

SUMMARY: The animal drug regulations are amended to reflect approval of a supplemental new animal drug application (NADA) filed by Merck Sharp & Dohme Research Laboratories for use of amprolium crumbles as an aid in prevention and treatment of coccidiosis in calves.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Adriano R. Gabuten, Bureau of Veterinary Medicine (HFV–149), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, (301–443–4913).

SUPPLEMENTARY INFORMATION: In accordance with section 512(i) of the act (21 U.S.C. 360b(i)), Part 520 (21 CFR Part 520) is amended to reflect approval of a supplemental NADA (12–350V) filed by Merck Sharp & Dohme Research Laboratories, Division of Merck & Co., Inc., Rahway, NJ 07065. The crumbles contain 1.25 percent amprolium that is top-dressed on or mixed in the daily feed ration of calves as an aid in prevention and treatment of coccidiosis.

Approval of this application has not required a reevaluation of the parent NADA and does not constitute a reaffirmation of the drug's safety and effectiveness.

In accordance with the Freedom of Information Regulations and § 514.11(e)(2)(ii) of the animal drug regulations (21 CFR 514.11(e)(2)(ii)), a summary of the safety data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk (HFC–20), Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday, except on Federal holidays.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioned of Food and Drugs (21 CFR 5.1), Part 520 is amended by adding new § 520.100c Amprolium crumbles to read as follows:

§ 520.100c Amprolium crumbles.

(a) *Specifications.* Amprolium crumbles contain 1.25 percent amprolium.

(b) *Sponsor.* See No. 000006 in § 510.600(c) of this chapter.

(c) *Related tolerances.* See § 556.50 of this chapter.

(d) *Conditions of use.* It is top-dressed on or thoroughly mixed in the daily feed ration of calves as follows:

(1) *Amount.* 1.6 ounces of crumbles per 250 pounds of body weight per day (5 milligrams per kilogram of body weight).

(i) *Indications for use.* As an aid in the prevention of coccidiosis caused by *Eimeria bovis* and *E. zurnii.*

(ii) *Limitations.* Administer for 21 consecutive days during periods of exposure or when experience indicates that coccidiosis is likely to be a hazard. Withdraw 24 hours before slaughter. Use as sole source of amprolium.

(2) *Amount.* 3.2 ounces of crumbles per 250 pounds of body weight per day (10 milligrams per kilogram of body weight).

(i) *Indications for use.* As an aid in the treatment of coccidiosis caused by *Eimeria bovis* and *E. zurnii.*

(ii) *Limitations.* Administer for 5 consecutive days. For satisfactory diagnosis, a microscopic fecal examination should be done by a veterinarian or diagnostic laboratory before treatment. When treating outbreaks, the drug should be administered promptly after diagnosis is determined. Withdraw 24 hours before slaughter. Use as sole source of amprolium.

Effective date: August 19, 1977.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: August 11, 1977.

FRED J. KINGMA,
Acting Director, Bureau of Veterinary Medicine.

[FR Doc.77–23620 Filed 8–18–77;8:45 am]

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Phenylbutazone Tablets

AGENCY: Food and Drug Administration (FDA), HEW.

ACTION: Rule.

SUMMARY: FDA approves a new animal drug application (NADA 102–823V) filed by Norden Laboratories, Inc., Lincoln, NE 68501, proposing safe and effective use of phenylbutazone tablets to treat horses for the management of inflammatory conditions associated with the musculo-skeletal system. The Commissioner of Food and Drugs is amending § 520.1720a (21 CFR 520.1720a) to reflect this approval.

DATES: Effective August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert A. Baldwin, Bureau of Veterinary Medicine (HFV–114), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3420.

SUPPLEMENTARY INFORMATION: In accordance with § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness data and information submitted to support the approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk (HFC–20), Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, Monday through Friday from 9 a.m. to 4 p.m., except on Federal legal holidays.

Norden Laboratories, Inc., currently holds an approved NADA for use of phenylbutazone tablets for treating dogs, which is provided for in § 520.1720a(h) (21 CFR 520.1720a(h)). The firm will now have NADA approvals for use in dogs and horses. Accordingly, § 520.1720a is being amended to delete paragraph (h), which references the use for dogs only, and to insert the approvals under paragraph (g), which indicates uses for both animals.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i))) and under authority delegated to the Commissioner (21 CFR 5.1), § 520.1720a is amended by revising paragraph (g)(2) and by deleting and reserving paragraph (h) as follows:

§ 520.1720a Phenylbutazone tablets and boluses.

* * * * *

(g)(1) * * *

(2) *Sponsor.* See Nos. 000031, 000864, and 011519 in § 510.600(c) of this chapter.

* * * * *

(h) [Reserved]

* * * * *

Effective date: This regulation becomes effective August 19, 1977.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)))

Dated: August 9, 1977.

FRED J. KINGMA,
Acting Director, Bureau of Veterinary Medicine.

[FR Doc.77–23617 Filed 8–18–77;8:45 am]

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

Disophenol Sodium Injection

AGENCY: Food and Drug Administration, HEW.

ACTION: Final rule.

SUMMARY: This document provides for safe and effective use of an injection for treating hookworm infections in dogs and cats. American Cyanamid Co. filed an application for this use. The Commissioner of the Food and Drug Administration is amending the animal drug regulations to reflect this approval.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Henry C. Hewitt, Bureau of Veterinary Medicine (HFV–112), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3430.

SUPPLEMENTARY INFORMATION: A supplemental new animal drug application (12–598V), filed by the American Cyanamid Co., P.O. Box 400, Princeton, NJ 08540, provides for the use of a 0.9 percent disophenol sodium injection for treating hookworm infections in puppies, "toy" breeds, and cats.

In accordance with § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) of the animal drug regulations, a summary of the safety and effectiveness data and information submitted to support approval of this application is released publicly. The summary is available for public examination at the office of the Hearing Clerk (HFC–20), Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, during regular working hours.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)), and under authority delegated to the Commissioner (21 CFR 5.1), Part 522 is amended by revising paragraph (b) of § 522.740 to read as follows:

§ 522.740 Disophenol sodium injection.

* * * * *

(b) *Specifications.* The drug is sterile and contains the equivalent of 0.9 or 4.5 percent disophenol in polyethylene glycol 400 and distilled water.

* * * * *

Effective date: August 19, 1977.

(Sec. 512(i), 82 Stat. 347 (21 U.S.C. 306b(i)))

Dated: August 10, 1977.

FRED J. KINGMA,
Acting Director, Bureau of Veterinary Medicine.

[FR Doc.77–23619 Filed 8–18–77;8:45 am]

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

Amprolium, Ethopabate, Bacitracin Methylene Disalicylate; Correction

AGENCY: Food and Drug Administration.

V 42161 AUG 19 77 UMI

ACTION: Correction.

SUMMARY: A document published in the FEDERAL REGISTER of April 29, 1977 did not properly enumerate an addition to the amprolium and ethopabate regulation. This document corrects the error.

EFFECTIVE DATE: April 29, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert S. Brigham, Bureau of Veterinary Medicine (HFV-238), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-6243.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of April 29, 1977 (42 FR 21771), the regulation for amprolium and ethopabate (21 CFR 558.58) was amended by adding new item (iv) to the table in paragraph (e)(1). This amendment did not reflect the FEDERAL REGISTER publication of April 8, 1977 (42 FR 18616) which also added an item (iv) to the table. This document changes the item added on April 29, 1977 to (v). Accordingly, § 558.58 *Amprolium and ethopabate* is corrected in paragraph(e)(1) in the table by changing item "(iv) Amprolium 136.2 (0.015 pct) and ethopabate 3.6 (0.0004 pct)" to item "(v) * * *".

Dated: August 15, 1977.

FRED J. KINGMA,
Acting Director, Bureau of Veterinary Medicine.

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER A—INCOME TAX

[T.D. 7499]

PART 11—TEMPORARY INCOME TAX REGULATIONS UNDER THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

Minimum Funding Standards for Pension Plans

Correction

In FR Doc. 77-22050 appearing at page 39382 in the issue for Thursday, August 4, 1977, make the following corrections:

(1) On page 39383, first column, the 5th line of § 11.412(c)(1)-1(b) should be completed to read as follows: "* * * each specific method of computation used in applying * * *".

(2) In the same column, the first and second lines of § 11.412(c)(1)-2 are reversed and should be switched.

SUBCHAPTER F—PROCEDURE AND ADMINISTRATION

[T.D. 7502]

PART 404—TEMPORARY REGULATIONS ON PROCEDURE AND ADMINISTRATION UNDER THE TAX REFORM ACT OF 1976

Annual Return for Foreign Trust With United States Beneficiary

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document provides temporary regulations relating to the filing of an annual return for a foreign trust having a United States beneficiary. Provisions providing for the filing of such a form were added to the tax law by the Tax Reform Act of 1976. The temporary regulations provide the time, place and manner of filing the form and affect some United States persons who are transferors to or grantors of foreign trusts having United States beneficiaries.

DATE: The temporary regulations are effective for tax years ending on or after December 31, 1976.

FOR FURTHER INFORMATION CONTACT:

J. Douglas Sorensen of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3478).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 6048 (c) was added to the Internal Revenue Code of 1954 by section 1013 (d) of the Tax Reform Act of 1976 to enable the Secretary of the Treasury to prescribe an annual return for foreign trusts with one or more United States beneficiaries. The temporary regulations contained in this document require an annual return (Form 3520-A) to be filed by a grantor or transferor subject to tax under section 679 of the Code. The temporary regulations provided by this document will remain in effect until superseded by the adoption of final regulations.

Generally, the return is required to be filed by the 15th day of the fourth month following the end of the tax year of the grantor or transferor. Special due dates are provided for taxable periods ending before July 1, 1977.

DRAFTING INFORMATION

The principal author of these regulations was J. Douglas Sorenson of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

ADOPTION OF AMENDMENTS TO THE TEMPORARY REGULATIONS

Accordingly, the temporary regulations on procedure and administration under the Tax Reform Act of 1976 (26 CFR Part 404) are amended by adding the following new section in the appropriate place.

§ 404.6048-1 **Annual returns for foreign trusts with a United States beneficiary.**

(a) *Return required*—(1) *In general.* Each taxpayer subject to tax under section 679 with respect to a foreign trust having one or more United States beneficiaries must file Form 3520-A, Annual Return of Foreign Trust with U.S. Beneficiaries, together with any additional schedules or other information required by the form or the instructions to the form. Form 3520-A must be filed even if the taxpayer is treated as the owner of a foreign trust under both section 679 and some other provision of Subpart E of Part I of Subchapter J.

(2) *Joint returns.* If the taxpayer's spouse is also subject to tax under section 679 with respect to the same foreign trust for the same taxable year, and if both taxpayer and spouse file a joint return of income tax for that year, a single Form 3520-A may be filed jointly with respect to such trust for the year.

(b) *Period covered by return.* The period covered by the return required by this section is the taxable year of the taxpayer required to file the return, regardless of the period used by the trust for accounting or any other purpose.

(c) *Time for filing*—(1) *In general.* The return required by this section must be filed no later than the 15th day of the fourth month following the end of the taxable period covered by the return.

(2) *Transitional rule.* In the case of a return required by this section for a taxable period ending on or before June 30, 1977, the return must be filed no later than—

(i) October 15, 1977, in the case of a taxpayer treated as an owner with respect to the trust under both section 679 and a provision of sections 672 through 678, or

(ii) December 31, 1977, in all other cases.

(3) *Extensions of time for filing.* For rules relating to extensions of time for filing, see section 6081 and the regulations thereunder.

(d) *Place for filing.* The return required by this section must be filed with the Director, Internal Revenue Service Center, 11601 Roosevelt Boulevard, Philadephia, Pennsylvania 19155.

(e) *Effective date.* This section is effective for taxable periods ending on or after December 31, 1976.

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision. For this reason, it is found impracticable to issue it with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of subsection (d) of that section.

(Secs. 6048(c), 7805, Internal Revenue Code of 1954 (90 Stat. 1616, 68A Stat. 917; 26 U.S.C. 6048(c), 7805)

JEROME KURTZ,
Commissioner of Internal Revenue.

Approved: August 13, 1977.

LAURENCE N. WOODWORTH,
Assistant Secretary of the Treasury.

Title 29—Labor

CHAPTER XVII—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

PART 1952—APPROVED STATE PLANS FOR ENFORCEMENT OF STATE STANDARDS

Certification of Completion of Developmental Steps for California Plan

AGENCY: Occupational Safety and Health Administration.

ACTION: Final Rule.

SUMMARY: This Amendment to Subpart K of Part 1952 of Chapter XVII of Title 29 certifies that the State of California has completed all of the developmental steps specified in its occupational safety and health plan as approved on April 24, 1973 (38 FR 10717) and commencing with this certification, operations under the plan will be subject to at least one year of intensive evaluation to determine whether Federal occupational safety and health standards development and enforcement authority will be relinquished within the State pursuant to section 18(e) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667(e)).

EFFECTIVE DATE: August 12, 1977.

FOR FURTHER INFORMATION CONTACT:

Daniel C. Hoeschen, Office of State Programs, Occupational Safety and Health Administration, room N-3608, 200 Constitution Avenue, NW., Washington, D.C. 20210.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Subpart D of Part 1902 of Title 29, Code of Federal Regulations, sets out procedures under which the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter referred to as the Assistant Secretary) will make a determination under section 18(e) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) (hereinafter referred to as the Act) whether, on the basis of actual operations under a State plan, the criteria of section 18(c) of the Act are being applied under the plan. Such determination may not be made until at least three years after commencement of operations under the plan and, in the case of a developmental plan, until the State has satisfactorily completed all developmental steps and the Assistant Secretary has had at least one additional year to evaluate the plan on the basis of actual operations. Upon making a determination under section 18(e) that the requirements of section 18(c) are being applied, Federal enforcement of standards and Federal standards (except with regard to ongoing cases) cease to apply in the State with respect to any occupational safety and health issue covered under the determination.

Section 1902.34 of Subpart D provides that the evaluation of a State's fully operational program, preparatory to an 18(e) determination, shall commence upon publication in the FEDERAL REGISTER of a certification that all developmental steps have been completed. Such certification must list the developmental steps, including approved amendments thereto, and the dates their approvals were published in the FEDERAL REGISTER; approved substantive changes in the State plan and dates published in the FEDERAL REGISTER; documentation that the State merit system has been approved and found acceptable; and a description of the occupational safety and health issues covered by the certification. If the Assistant Secretary finds that the State has completed all the developmental steps specified in the plan, he shall give notice of same by publishing the certification in the FEDERAL REGISTER and amend the appropriate Subpart of Part 1952 of this Chapter to reflect that finding. During the period following commencement of operations under the California plan and ending June 1, 1976, Rose Elizabeth Bird, Secretary of the California Agriculture and Services Agency, submitted documentation attesting to the completion of each State developmental commitment for review and approval as provided in 29 CFR Part 1953 with the exception of standards covering temporary labor camps which was submitted after review of earlier proposals, on March 11, 1977. Following Departmental review, opportunity for public comment, and subsequent modification of the State's submissions, as deemed appropriate, the Assistant Secretary has approved the completion of all individual California developmental steps.

CONTENTS OF CERTIFICATION OF COMPLETION OF DEVELOPMENTAL STEPS UNDER THE CALIFORNIA PLAN

In accordance with the provisions of 29 CFR 1902.34, notice is given that the California occupational safety and health plan is hereby certified effective as having completed all of the developmental steps specified in the plan as approved April 24, 1973 on or before June 1, 1976, except for the promulgation and enforcement of temporary labor camp standards, which was completed, after review and modification, on March 11, 1977, as follows:

1. All developmental steps specified in the plan and amendments thereto have been completed.

(a) The California enabling legislation became effective on October 2, 1973, as indicated in a supplement submitted by the State on December 23, 1973, and approved by the Assistant Secretary on April 18, 1975 (40 FR 18420);

(b) Amendments to the enabling legislation correcting certain errors and inconsistencies in enabling legislation enacted by the California legislature were submitted on November 7, 1974, and approved by the Assistant Secretary on August 27, 1975 (40 FR 40155);

(c) Occupational safety and health standards have been promulgated and subsequently amended to reflect changes in Federal standards and were found by the Regional Administrator for Occupational Safety and Health to be at least as effective as the comparable Federal standards on June 25, 1976 (41 FR 40241), September 17, 1976 (41 FR 40241), March 11, 1977 (42 FR 13612), and April 8, 1977 (42 FR 18671);

(d) Rules of Procedure for the California Occupational Safety and Health Appeals Board were submitted on September 11, 1974, and were approved by the Assistant Secretary on August 27, 1975 (40 FR 40155);

(e) The California Occupational Safety and Health Standards Board began operations and regulations pertaining to its responsibilities were submitted on September 11, 1974, and approved by the Assistant Secretary on August 27, 1975 (40 FR 40155);

(f) A voluntary compliance program has been developed and implemented as indicated in a supplement submitted on September 11, 1974, and approved by the Assistant Secretary on August 27, 1975 (40 FR 40155);

(g) Recordkeeping regulations pertaining to private employers within the State became effective on July 1, 1975, were submitted on September 5, 1975, and approved by the Assistant Secretary on September 28, 1976 (41 FR 43404);

(h) Recordkeeping regulations pertaining to State and local public agencies within the State became effective on July 1, 1974, were submitted on September 11, 1974, and were approved by the Assistant Secretary on August 27, 1975 (40 FR 40155);

(i) The State's management information system was implemented in January 1974, as indicated in a supplement submitted by the State on November 7, 1974, and approved by the Assistant Secretary on August 27, 1975 (40 FR 40155);

(j) The State poster notifying public and private employees of their protections and obligations under the California plan was submitted by the State on March 13, 1975, and approved by the Assistant Secretary on August 27, 1975 (40 FR 40155);

(k) Inter-agency agreements to provide technical support to the program were entered into between the Agriculture and Services Agency and the State Department of Health on June 28, 1973, as indicated in a supplement submitted on December 7, 1973, and approved by the Assistant Secretary on April 18, 1975 (40 FR 18426);

(l) The State's program for on-site consultation services became fully functional in January 1974, as indicated in a supplement submitted on December 7, 1973, and approved by the Assistant Secretary on April 18, 1975 (40 FR 18426);

(m) Regulations concerning enforcement activities such as inspection procedures, citation procedures and penalty procedures were submitted on June 17, 1975, and approved by the Assistant Secretary on September 28, 1976 (41 FR 43404);

(n) The State's inspection scheduling system was fully implemented and in operation by June 1975, as indicated in a supplement submitted on October 1, 1975, and approved by the Assistant Secretary on September 28, 1976 (41 FR 43404);

V 42 161 AUG 19 77 UMI

(o) The State's compliance manual for use by California compliance personnel was submitted on October 9, 1975, and approved by the Assistant Secretary on September 28, 1976 (41 FR 43404);

(p) In-service training programs for safety and health enforcement personnel were implemented within 18 months of plan approval as indicated in the semi-annual reports conducted by the Occupational Safety and Health Administration and grant applications submitted by the State. The completion of this developmental step was approved by the Assistant Secretary on November 19, 1976 (41 FR 51012);

(q) An inter-agency agreement was entered into between the Agriculture and Services Agency and the California Department of Housing and Community Development for the development and enforcement of standards pertaining to temporary labor camps on March 10, 1977, as indicated in a supplement submitted on March 11, 1977, and approved by the Assistant Secretary on July 22, 1977 (42 FR 37548).

2. The personnel operations of the California Agriculture and Services Agency and the State personnel agency have been found to be in substantial conformity with the Standards for a Merit System of Personnel Administration by the U.S. Civil Service Commission by a letter dated January 19, 1976.

3. This certification covers all occupational safety and health issues covered under the Federal program with the exception of those working conditions subject to exclusive Federal maritime jurisdiction.

LOCATION OF THE PLAN AND ITS SUPPLEMENTS FOR INSPECTION AND COPYING

A copy of the approved supplements, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Technical Data Center, Occupational Safety and Health Administration, room S–6212, 200 Constitution Avenue, NW., Washington, D.C. 20210; Office of the Regional Administrator, Occupational Safety and Health Administration, room 9470, 450 Golden Gate Avenue, San Francisco, Calif. 94102; and the California Occupational Safety and Health Administration, 455 Golden Gate Avenue, room 3052, San Francisco, Calif. 94102.

EFFECT OF CERTIFICATION

The operation of the California occupational safety and health program will be monitored and evaluated for a period of not less than one year after publication of this certification to determine whether the State program in operation is at least as effective as operations under the Federal program in order to make a determination under section 18(e) of the Act that Federal enforcement authority and standards should cease to apply in issues covered under the plan.

In accordance with 29 CFR 1902.35 Federal enforcement authority under Sections 5(a)(2), 8, 9, 10, 13 and 17 of the Act (29 U.S.C. § 654(a)(2), 657, 658, 659, 662 and 666) and Federal standards authority under section 6 of the Act (29 U.S.C. 655) will not be relinquished during this evaluation period. However, the terms of the operational agreement entered into with the State on September 30, 1975 (41 FR 1904, January 13, 1976), continue to apply, unless amended.

In accordance with this certification, 29 CFR 1952.114 is hereby amended to reflect the successful completion of the developmental period by changing the title of the section and by adding a paragraph (p) as follows:

§ 1952.174 Completion of developmental steps and certification.

* * * * *

(p) In accordance with § 1903.34 of this chapter, the California occupational safety and health plan was certified, effective August 12, 1977, as having completed all developmental steps specified in the plan as approved on April 24, 1973, on or before June 1, 1976, with the exception that temporary labor camp standards development and enforcement program was completed on March 11, 1977.

(Sec. 18 Pub. L. 91–596, 84 Stat 1608 (29 U.S.C. 667).)

Signed at Washington, D.C. this 12th day of August 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

[FR Doc.77–24102 Filed 8–18–77;8:45 am]

CHAPTER XXVI—PENSION BENEFIT GUARANTY CORPORATION

PART 2602—PAYMENT OF PREMIUMS

PART 2606—ANNUAL REPORT

Extension of Form PBGC–1's Expiration Date

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Extension of expiration date of Form PBGC–1.

SUMMARY: Notice is hereby given that the expiration date of Form PBGC–1 (Rev. August 1976), prescribed for use by the Pension Benefit Guaranty Corporation's premium payment regulation (41 FR 32740) and annual report regulation (41 FR 32741), has been extended from September 1, 1977 to December 31, 1977.

EFFECTIVE DATE: Effective August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Barry S. Levine, Deputy Assistant General Counsel, Pension Benefit Guaranty Corporation, Office of the General Counsel, 2020 K Street NW., Washington, D.C. 20006, telephone 202–254–3010.

Dated: August 15, 1977.

MATTHEW M. LIND,
Acting Executive Director, Pension Benefit Guaranty Corporation.

[FR Doc.77–24040 Filed 8–18–77;8:45 am]

PART 2610—INTERIM REGULATION ON VALUATION OF PLAN BENEFITS

Amendment Adopting Additional PBGC Rates

AGENCY: Pension Benefit Guaranty Corporation.

ACTION: Amendment to the Interim Regulation.

SUMMARY: This amendment to the interim regulation on valuation of plan benefits prescribes the rates and factors to be used for valuing plan benefits under Title IV of the Employee Retirement Income Security Act of 1974 for plans that terminated on or after December 1, 1976, but before March 1, 1977. It is necessary to finalize the valuation rates and factors for plans that terminated during the period covered by the amendment. The amendment's effect is to provide notice of the rates and factors that will be used to value benefits provided under such plans.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

William E. Seals, Staff Attorney, Office of the General Counsel, Pension Benefit Guaranty Corporation, 2020 K Street NW., Washington, D.C. 20006, 202–254–4895.

SUPPLEMENTARY INFORMATION: On November 3, 1976, the Pension Benefit Guaranty Corporation (the "PBGC") issued an interim regulation establishing the methods for valuing plan benefits under Title IV of the Employee Retirement Income Security Act of 1974 (the "Act") (41 FR 48484 et seq.). The regulation included an appendix containing rates and factors to be used to value benefits in plans that terminated on or after September 2, 1974, but before October 1, 1975. Subsequently the PBGC adopted additional rates and factors for valuing benefits in plans that terminated on or after October 1, 1975, but before December 1, 1976. (42 FR 2678 et seq., 42 FR 32777 et seq.).

On June 8, 1977, the PBGC published for comment in the FEDERAL REGISTER additional rates and factors for valuing benefits in plans that terminated on or after December 1, 1976, but before March 1, 1977 (42 FR 29318 et seq.). No comments were received regarding that proposed amendment to the interim regulation, and accordingly the PBGC hereby adopts the proposed interest rates and factors without change.

Because of the need to provide immediate guidance for the valuation of benefits in plans that terminated on or after December 1, 1976, but before March 1, 1977, and because no adjustment by ongoing plans is required by this amendment, the PBGC finds that good cause exists for making this amendment to the interim regulation effective immediately.

In consideration of the foregoing, Part 2610 of Chapter XXVI, Code of Federal Regulations, is amended by adding a new Table VIII to Appendix B as set forth below.

Issued at Washington, D.C., on this 10th day of August 1977.

RAY MARSHALL,
Chairman, Board of Directors, Pension Benefit Guaranty Corporation.

Issued on the date set forth above, pursuant to a resolution of the Board of Directors authorizing its Chairman to issue same.

HENRY ROSE,
Secretary, Pension Benefit Guaranty Corporation.

APPENDIX B [AMENDED]

The following table is added to Appendix B of 29 CFR, Part 2610:

* * * * *

VII. The following interest rates and quantities used to value benefits shall be effective for plans that terminate on or after December 1, 1976, but before March 1, 1977.

TABLE I.—INTEREST RATE FOR VALUING IMMEDIATE ANNUITIES

An interest rate of 7 percent shall be used to value immediate annuities, to compute the quantity "G" in § 2610.6, and for valuing both portions of a cash refund annuity.

TABLE II.—INTEREST RATE FOR VALUING DEATH BENEFITS

An interest rate of 5 percent shall be used to value death benefits other than the decreasing term insurance portion of a cash refund annuity pursuant to § 2610.8.

TABLE III.—INTEREST RATES AND QUANTITIES USED TO VALUE DEFERRED ANNUITIES

The following factors shall be used to value deferred annuities pursuant to § 2610.6:

k1 = 1.0625
k2 = 1.0475
k3 = 1.0375
n1 = 7
n2 = 10

(Authority: Secs. 4002(b)(3), 4041(b), 4044, 4062(b)(1)(A), Pub. L. 93–406, 88 Stat. 1004, 1020, 1025–27, 1029 (29 U.S.C. 1302(b)(3)), 1341(b), 1344, 1362(b)(1)(A)).)

Title 31—Money and Finance: Treasury

CHAPTER I—MONETARY OFFICES, DEPARTMENT OF THE TREASURY

PART 51—FISCAL ASSISTANCE TO STATE AND LOCAL GOVERNMENTS

Fiscal Procedures and Auditing

AGENCY: Office of Revenue Sharing, Treasury Department.

ACTION: Final rule.

SUMMARY: This final rule amends the interim regulations setting forth the fiscal procedures that must be followed by recipient governments in the expenditure of revenue sharing funds. The purpose of the final rule is to clarify certain provisions of the existing regulations about which concern was expressed in the comments received. The final rule will further effectuate the provisions of the Revenue Sharing Act as amended by the 1976 Amendments.

DATE: This final rule is effective October 1, 1977 to cover entitlement periods beginning on or after October 1, 1977.

FOR FURTHER INFORMATION CONTACT:

William H. Sager, Chief Counsel, Office of Revenue Sharing, 2401 E St., N.W., Columbia Plaza Highrise, Room 1545, Washington, D.C. 20226, Telephone No. 202–634–5182.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On October 21, 1972, the State and Local Fiscal Assistance Act of 1972 (Pub. L. 92–512) was enacted. The State and Local Fiscal Assistance Act, commonly known as the Revenue Sharing Act, established the General Revenue Sharing Program. On October 10, 1976, the State and Local Fiscal Assistance Amendments of 1976 (Pub. L. 94–488) were enacted. The Revenue Sharing Amendments necessitated the amendment of the revenue sharing regulations set forth in 31 CFR part 51. The first step in the process was the publication of interim rules in the Federal Register on January 11, 1977 to amend subpart F entitled Fiscal Procedures and Auditing (42 FR 2422). Comments were requested on the interim regulations. Seventeen were received prior to the promulgation of this final rule. Those comments will be discussed below as part of the section by section analysis of the changes made.

SECTION 51.101 AUDITING AND EVALUATION

Most of the comments received objected to the requirement in § 51.101(a) in the interim regulations that an independent audit be performed not less often than once every three years covering the three year period. The comments suggested that the revenue Sharing Act requires an audit of a recipient government's accounts once every three years as opposed to each year. The Director accepted this interpretation of § 123(c) of the Revenue Sharing Act and has therefore amended § 51.101(a) to require an audit not less often than once every three years. Similarly §§ 51.101(d)(3), and 51.101(f) are amended to delete any reference to the requirement of an audit each year.

Many comments requested clarification concerning the definition of independent audit contained in § 51.101(b), and pointed out a type of independent audit that was overlooked. A State or local auditor appointed by the chief executive officer and reporting to the legislative body can perform an independent audit so long as he is not responsible for the maintenance of the accounts being audited. Section 51.101(b)(1) is therefore amended by the addition of subsection (C) to provide that an audit shall be considered to meet the requirements of an independent audit if the principal audit officer is appointed by the Governor and confirmed by and reports to the legislature. Similarly § 51.101(b)(3) is amended to add a new § (C) to accept as independent audits, those audits conducted by auditors appointed by the executive body of the local recipient government and reporting to the governing body of the local recipient government or a committee thereof.

The definition of generally accepted auditing standards in paragraph 51.101(c)(1) has been amended in response to comments to mean those auditing standards pronounced by the American Institute of Certified Public Accountants and incorporated in its Statements on Auditing Standards, or those in the financial and compliance element of the Standards for Audit of Governmental Organizations, Programs, Activities and Functions, issued by the Comptroller General of the United States in 1972. Several comments objected to § 51.101(c)(2) as defining independent public accountant too narrowly. The Director has decided not to amend that section because it is the defintion provided in the Standards for Audit of Governmental Organizations, Programs, Activities & Functions mentioned above.

Several comments suggested that § 51.101(e) be amended to provide that audits conducted by recipient governments cover only those accounts under the control of the recipient government. We did not accept these comments because Section 106, Scope of Audits, provides that only those accounts audited under State or local law shall be audited for revenue sharing purposes.

Section 51.101(e) was amended in response to a comment that a series of audits did not make the audit requirement inapplicable. Section 51.101(e)(1) was therefore deleted. Section 51.101(e)(2) is redesignated § 51.101(e). Section 51.101(e)(1) is redesignated § 51.101(f).

SECTION 51.103 AUDIT OF SECONDARY RECIPIENTS

A new § 51.103 has been added to provide that a recipient government which transfers $25,000 or more of revenue sharing funds to a secondary recipient is responsible for the audit of the transferred funds.

SECTION 51.104 RELIANCE UPON OTHER FEDERAL AUDIT AGENCIES

Current § 51.103 is redesignated § 51.104.

SECTION 51.105 AUDIT OPINIONS

Current § 51.104 is redesignated § 51.105 and is amended in response to comments to provide additional guidance concerning the nature of audit opinions.

SECTION 51.106 SCOPE OF AUDITS

Current § 51.105 is redesignated § 51.106 and is amended in response to comments to provide additional guidance concerning what funds are to be included in an audit, namely those funds which are required to be audited under State or local law or procedures. The Director will accept the recipient government's Attorney General or other official legal opinion as to what funds are to be included in an audit.

SECTION 51.107 RETENTION OF AUDIT WORKPAPERS

Current § 51.106 is redesignated § 51.107.

V 42 161 AUG 19 77 UMI V

SECTION 51.108 REQUIREMENT TO SUBMIT AUDIT PAPERS

Current § 51.107 is redesignated § 51.108.

ECONOMIC IMPACT

The Department of the Treasury has determined that these final rules do not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Orders 11821 and 11949, and OMB Circular A-107.

AUTHORITY

These final rules are issued under the authority of the State and Local Fiscal Assistance Act of 1972, as amended, Title I, Pub. L. 92-512 and the State and Local Fiscal Assistance Amendments of 1976, Pub. L. 94-488, (31 U.S.C. 1221-1263), and Treasury Department Order No. 224, dated January 26, 1973 (38 FR 3342) as amended by Treasury Department Order No. 242 (Revision 1) dated May 17, 1977.

31 CFR, Part 51, subpart F, is therefore amended in the manner set forth below:

Date: August 16, 1977.

BERNADINE DENNING,
Director,
Office of Revenue Sharing.

Approved:

ROGER C. ALTMAN,
Assistant Secretary.

Subpart F—Fiscal Procedures and Auditing

Sec.

51.100 Procedures applicable to the use of funds.
51.101 Auditing and evaluation.
51.102 Waiver of auditing provisions where financial accounts are unauditable.
51.103 Audit of secondary recipients.
51.104 Reliance upon audits under other Federal laws.
51.105 Audit opinions.
51.106 Scope of audits.
51.107 Retention of audit workpapers.
51.108 Requirement to submit audit reports.

Subpart F—Fiscal Procedures and Auditing

§ 51.100 Procedures applicable to the use of funds.

A recipient government which receives entitlement funds under the Act shall:

(a) Establish a trust fund and deposit all entitlement funds received and all interest earned thereon in that trust fund. The trust fund may be established on the books and records as a separate set of accounts, or a separate bank account may be established.

(b) Use, obligate, or appropriate such funds within 24 months from the end of the entitlement period to which the entitlement payment is applicable. Such use, obligation or appropriation of entitlement funds shall be consistent with State or local law requiring a legislative enactment in ordinance or resolution form. Any interest earned on such funds while in the trust fund shall be used, obligated, or appropriated within 24 months from the end of the entitlement period during which the interest was received or credited. An extension of time in which to act on the funds, or interest earned thereon, shall be obtained by application to the Director. Such application will set forth the facts and circumstances supporting the need for more time and the amount of additional time requested. The Director may grant such extensions of time as in his judgment appear necessary or appropriate.

(c) Provide for the expenditure of entitlement funds in accordance with the laws and procedures applicable to the expenditure of its own revenues.

(d) Maintain its fiscal accounts in a manner sufficient to:

(1) Permit the reports required by the Director to be prepared therefrom, and

(2) Permit the tracing of entitlement funds to a level of expenditure adequate to establish that such funds have not been used in violation of the restrictions and prohibitions of this part. Such tracing requires that vouchers in support of expenditures funded by the Act shall be identified. Such identification can be made in any one of three ways as follows:

(i) Maintain a separate set of fund accounts; or,

(ii) Maintain a separate bank account; or,

(iii) Keep a memorandum record of the voucher numbers and amounts for the expenditures funded by entitlements received under the Act.

The accounting for entitlement funds shall at a minimum employ the same fiscal accounting and internal audit procedures as are used with respect to expenditures from revenues derived from the recipient government's own sources.

(e) Provide to the Director and to the Comptroller General of the United States, on reasonable notice, access to and the right to examine such books, documents, papers or records as the Director may reasonably require for the purpose of reviewing compliance with the Act and the regulations of this part or, in the case of the Comptroller General, as the Comptroller General may reasonably require for the purpose of reviewing compliance and operations under the Act.

§ 51.101 Auditing and evaluation.

(a) *In general.* Each recipient government which expects to receive entitlement funds for entitlement periods beginning on or after January 1, 1977, shall have an independent audit of its financial statements conducted for the purpose of determining compliance with the provisions of the Act, in accordance with generally accepted auditing standards, not less often than once every three years.

(b) *Independent audit—defined.* For purposes of this section an independent audit is an audit conducted by independent public accountants, or by independent qualified accountants or examiners from a State or local agency. An independent public accountant or independent qualified accountant or examiner is one who has no personal interest directly or indirectly in the financial affairs of the government being audited, or in the financial affairs of any of the officers of the government being audited.

(1) In those States in which an audit is required by State law to be made of the State government by a State office or official, such audit shall be considered to meet the requirements of an independent audit provided the principal officer of the State audit agency is not responsible for the maintenance of the accounting records being audited and does not report to the officer responsible for maintenance of such accounting records, and is:

(i) Elected by the citizens of the State; or

(ii) Elected or appointed by and reports to the State legislature or a committee thereof; or

(iii) Appointed by the Governor and confirmed by and reports to the legislature or a committee thereof.

(2) In those States in which an audit is made of local governments (or certain categories of local government) by a State office or official, such audit shall be considered to meet the requirements of an independent audit.

(3) Audits of local recipient governments made by a permanent (internal) auditing office or officer employed on a full-time basis shall be considered to meet the requirements of an independent audit provided the principal officer of the audit agency is not responsible for the maintenance of the official accounting records being audited and does not report to the officer responsible for maintenance of official accounting records, and is:

(i) Elected by the citizens of the local recipient government; or,

(ii) Reports to the governing body of the local recipient government or a committee thereof; or

(iii) Appointed by the executive officer of the local recipient government and reports to the governing body of the local recipient government or a committee thereof.

(4) Audits other than those specified in subparagraphs (1), (2), and (3) of this paragraph shall not be considered to be independent audits.

(c) *Generally accepted auditing standards and independent public accountant—defined.* (1) As used in paragraph (a) of this section, and as defined in § 51.2(h) of this part, "generally accepted auditing standards" means those auditing standards pronounced by the American Institute of Certified Public Accountants and incorporated in its Statements on Auditing Standards, or those in the financial and compliance element of the Standards for Audit of Governmental Organizations, Programs, Activities & Functions, issued in 1972 by the Comptroller General of the United States.

(2) As used in paragraph (b) of this section and as defined in § 51.2(j) of this part "independent public accountant" means independent certified public accountants, and licensed public accountants licensed on or before December 31, 1970, certified or licensed by a regulatory authority of a State or other political subdivision of the United States.

(d) *Election by recipient government.* A recipient government may elect to have the requirements of paragraph (a) of this section not applicable to that government upon the filing of a written assurance by the chief executive officer that:

(1) The financial statements of the recipient government are audited by independent public accountants as defined in § 51.2(j) of this part, or by independent auditors as defined in paragraph (b) of this section, and that such financial statements are audited in accordance with State or local law; and

(2) The audits of the recipient government are conducted in accordance with generally accepted auditing standards; and

(3) The audits of the recipient government will be conducted not less often than every three years.

(e) *Inapplicability of audit requirement.* The requirement of paragraph (a) of this section shall not apply where the recipient government's entitlement for any of its fiscal years is less than $25,000, except where there is a State or local law requiring an audit of such government's financial statements which must be complied with in accordance with § 51.100(c) of this part.

(f) *Series of audits.* A series of independent audits may be used as an alternative to the provisions of paragraph (a) if they are conducted in accordance with generally accepted auditing standards, over a period not to exceed three fiscal years, and cover, in the aggregate, all of the accounts of a recipient government.

§ 51.102 Waiver of auditing provisions where financial accounts are unauditable.

The Director may, upon written application of the chief executive officer of the recipient government on or before March 31, 1978, waive the provisions of § 51.101 of this part for any fiscal period if in the course of determining compliance with § 51.101, the independent auditor renders an opinion that the financial accounts of such recipient government are not auditable, and the chief executive officer of such recipient government assures the Director that the accounts are not auditable and clearly sets forth the arrangements which have been made or taken toward making such financial accounts auditable. The Director shall satisfy himself by investigation or injury that the recipient government is achieving substantial progress toward making its financial accounts auditable. A recipient government which fails to apply to the Director on or before March 31, 1978 that its financial accounts are not auditable shall not be entitled to the waiver provisions of this section.

§ 51.103 Audit of secondary recipients.

Where a primary recipient government transfers during its fiscal year $25,000 or more of revenue sharing funds to a single secondary recipient, the primary recipient government shall be responsible for an audit of the revenue sharing funds transferred to the secondary recipient pursuant to the regulations of this subpart and to the Audit Guide and Standards for Revenue Sharing Recipients published by the Office of Revenue Sharing and available to each recipient government.

§ 51.104 Reliance upon audits under other Federal laws.

The Director may rely upon audits of the financial statements of recipient governments conducted in accordance with other Federal laws, for any fiscal period, provided that such audits substantially satisfy the requirements for audits contained in § 51.101(a) of this part.

§ 51.105 Audit Opinions.

(a) *In general.* Opinions made with respect to audits must be rendered as a part of the audit report and shall be in accordance with the opinion in general use for attesting to financial statements, as defined in paragraph 51.101 (c) (1). Examples of opinions are set out in the appendix of the Audit Guide and Standards for Revenue Sharing Recipients published by the Office of Revenue Sharing and available to each recipient government.

(b) *Nature of opinions.* Audit opinions may be unqualified, qualified, adverse, or a disclaimer of an opinion (provided the accounts are auditable). Audit opinions may be expressed on cash basis statements.

(c) *Expression of unqualified opinions.* The expression of an unqualified opinion shall include the statement that the financial statements are in accordance with generally accepted accounting principles. Generally accepted accounting principles are defined as those pronouncements of the National Committee on Governmental Accounting as set forth in its publication Governmental Accounting, Auditing and Financial Reporting published in 1968, or any subsequent revisions thereof.

§ 51.106 Scope of audits.

(a) *In general.* The scope of each audit required under § 51.101 (a) of this part shall include each separate fund which is defined as a self-balancing group of accounts required under State or local law and procedures (as determined by the State Attorney General or the legal counsel of a unit of local government) to be maintained by the recipient government. The audit shall be of the financial and compliance type described in The Standards for Audit of Governmental Organizations, Programs, Activities & Functions as issued in 1972 by the Comptroller General of the United States, and as described further in the Audit Guide and Standards for Revenue Sharing Recipients published by the Office of Revenue Sharing. The audit for compliance shall pertain only to entitlement funds of the recipient government received under the Act.

(b) *Verification of fiscal data reported to the Bureau of the Census.* The scope of the audit shall include also a verification of the recipient government's fiscal data as reported by it to the Bureau of the Census.

§ 51.107 Retention of audit workpapers.

Audit workpapers and related audit reports shall be retained for three years after the issuance of the audit report, and shall be available upon request to the Director and the Comptroller General or to their representatives.

§ 51.108 Requirement to submit audit reports.

The Director may require the chief executive officer of a recipient government to submit a copy of its audit reports at such times as he may request.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of Barnegat National Wildlife Refuge, New Jersey, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Barnegat National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 1, 1977, through February 28, 1977.

FOR FURTHER INFORMATION CONTACT:

Gaylord Inman, Brigantine National Wildlife Refuge, Great Creek Road, P.O. Box 72, Oceanville, New Jersey 08231, Telephone No. 609-652-1665.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations: migratory game birds: for individual wildlife refuge areas.

Public hunting of rails, gallinules, waterfowl and coots on the Barnegat National Wildlife Refuge, New Jersey, is permitted during established State and Federal seasons on only those areas designated by signs as open to hunting.

These open areas are delineated on maps available at refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158.

Hunting shall be in accordance with State and Federal regulations covering the hunting of migratory game birds subject to the following special conditions:

1. On opening days, Saturdays and holidays a Federal permit will be required.

V 42 161 AUG 19 77 UMI

2. No permanent blinds or pit blinds may be constructed.

3. The use of steel shot ammunition on the refuge hunting area is required—shotshell limit 25 rounds per hunter per day. No person may have more than 25 steel shotshells or any lead shotshells in their possession while hunting waterfowl.

4. Hunters, when requested by Federal or State enforcement officers must display for inspection all game, hunting equipment, and ammunition.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

Dated: August 10, 1977.

WILLIAM C. ASHE,
Acting Regional Director,
U.S. Fish and Wildlife Service.

[FR Doc.77–23984 Filed 8–18–77;8:45 am]

PART 32—HUNTING

Opening of Brigantine National Wildlife Refuge, New Jersey, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Brigantine National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 1, 1977, through February 28, 1978.

FOR FURTHER INFORMATION CONTACT:

Gaylord Inman, Brigantine National Wildlife Refuge, Great Creek Road, P.O. Box 72, Oceanville, New Jersey 08231, Telephone No. 609–652–1665.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory game birds; individual wildlife refuge areas.

Public hunting of rails, gallinules, waterfowl, and coots on the Brigantine National Wildlife Refuge, New Jersey, is permitted during established State and Federal seasons on those areas designated by signs as open to hunting.

These open areas are delineated as Hunting Units 1, 2 and 3 on maps available at refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158.

Hunting shall be in accordance with State and Federal regulations covering the hunting of migratory game birds subject to the following special conditions:

1. Steel shotshells are required for 12 gauge shotguns used to hunt migratory waterfowl during the State waterfowl hunting season. Persons may not possess 12 gauge lead shotshells during the State waterfowl hunting season. Lead shotshells of all other gauges may be used to hunt migratory waterfowl. Lead shot in any gauge may be used to hunt rails, coots and gallinules prior to the waterfowl hunting season in accordance with State laws.

2. Hunters when requested by Federal or State enforcement officers, must display for inspection all game, hunting equipment and ammunition.

3. Hunting on Unit 3 during the waterfowl season is restricted to certified Young Waterfowler Program Trainees only, from designated blind sites.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

Dated: August 10, 1977.

WILLIAM C. ASHE,
Acting Regional Director,
U.S. Fish and Wildlife Service.

[FR Doc.77–23985 Filed 8–18–77;8:45 am]

PART 32—HUNTING

Opening of Chincoteaque National Wildlife Refuge, Virginia, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Chincoteaque National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 15, 1977 through January 5, 1978.

FOR FURTHER INFORMATION CONTACT:

J. C. Appel, Chincoteaque National Wildlife Refuge, Box 62, Chincoteaque, Va. 23336. Telephone No. 804–336–6122.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public hunting of deer is permitted only on designated areas shown on maps available at refuge headquarters, and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center. Suite 700, Newton Corner, Mass. 02158. Hunting shall be in accordance with all State regulations subject to the following special conditions:

1. Species to be taken: (a) Archery Hunt—Sika and Whitetail deer. (b) Stag Hunt—Sika and Whitetail deer.

2. Bag Limits: (a) Archery Hunt—One per day three per license year. At least one of the three must be a female which will be tagged with a Virginia nuisance deer tag. (b) Stag Hunt—One per day, three per license year. The first deer must be an adult female or buck with unbranched antlers which will be tagged with a State of Virginia nuisance deer tag. The second and third may be either an adult female, buck with unbranched antlers or a trophy stag (five points or better) but bag limit of three may not include more than one trophy stag or more than two adult females.

3. Season: (a) Archery—Will coincide with the State archery deer season. (b) Stag Hunt—Six 5-day hunts (November 14–18, November 28–December 2, December 5–9, December 12–16, December 19–23, December 26–30 and one 4-day hunt—January 2–5, 1978.

4. Method of taking: (a) Archery—Long bow, Recurve, or Compound bow and arrows (cross bow prohibited). Archers must use broadheads with blades at least ¾ inches wide and bows capable of propelling any arrow in their possession 125 yards. All arrows in an archers possession while hunting must be permanently marked with hunters name and address. Archers may not have firearms or illegal archery equipment in their possession while hunting. (b) Stag Hunt firearms—All firearms must function as a single shot only. Modern firearms may be used if modified to hold only one round. Rifles of .23 caliber or larger and shotguns of 20 guage or larger will be permitted. Slugs only will be permitted in shotguns. Possession of firearms or ammunition not stipulated above is prohibited.

5. Dogs are prohibited.

6. Hunting hours—One half hour before sunrise to one half hour after sunset. All hunters must leave their hunting areas within two and one half hours after sunset.

7. Carrying loaded firearms or nocked arrows in or on vehicles is prohibited.

8. Camping and fires on refuge are prohibited.

9. All hunters under 18 years of age must be accompanied by an unarmed adult.

10. One other individual may accompany each hunter, but only one gun will be allowed per area.

11. All wounded deer will be reported to refuge personnel immediately, so that data on wounded deer can be gathered. All deer taken on the area must be brought to the maintenance area to be checked out. Jawbones may be removed by refuge personnel.

12. There are two species of endangered wildlife found on the refuge: Delmarva Fox Squirrel and Peregrine Falcon. Shooting at wildlife other than deer is prohibited.

13. Before any hunter is issued a permit, he/she must meet all the following qualification requirements:

(a) All firearm hunters must provide proof of passing a State hunter safety course.

(b) Archery hunters must provide proof of passing the National Field Archery Association Bowhunters Education Program or equivalent course. This course is required to be taken only once, but shooting qualification is required each year.

(c) Hunters/applicants must present written Certification from a range officer (civilian or military), police officer, or refuge personnel that they have performed the following qualification test or tests.

(1) Archery: Place three out of five shots in the 9" x 14" chest area of a standard size deer target at 25 yards.

(2) Shotgun with slugs, muzzleloader, and rifle: From the standing firing position, place three out of three rounds in a 12" target at a distance of 50 yards.

(3) All hunters are required to wear a minimum of 400 square inches of safety florescent color material on the head, chest, and back.

(4) Youths who have not reached their 18th birthday must hunt under the control of a qualified adult hunter or a legal guardian.

The provisions of this Special Regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

Dated: August 10, 1977.

PART 32—HUNTING

Opening of Erie National Wildlife Refuge, Pennsylvania, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Erie National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 1, 1977 through January 14, 1978.

FOR FURTHER INFORMATION CONTACT:

Allen Hundley, Erie National Wildlife Refuge, RD 2, Box 191, Guys Mills, Pa. 16327. Telephone No. 814–789–3585.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public hunting of deer on the Erie National Wildlife Refuge, Pennsylvania, is permitted. The open hunting area is shown on maps available at refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Mass. 02158.

Hunting shall be in accordance with all State and Federal regulations covering the hunting of deer, subject to the following special condition: All hunters, except archery hunters, shall be required to wear a minimum of 400 total square inches of a safety fluorescence color material on the head, chest and back.

The provisions of this special regulation supplement the regulations governing hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

Dated: August 10, 1977.

SUPPLEMENTARY INFORMATION:

§ 32.12 **Special regulations; migratory game birds; for individual wildlife refuge areas.**

Public hunting of migratory waterfowl on the Iroquois National Wildlife Refuge, New York, is permitted in designated areas. Information on this program is available at refuge headquarters, and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Mass. 02158. Hunting shall be in accordance with all State and Federal regulations covering the hunting of migratory waterfowl subject to the following special conditions:

(1) Waterfowl hunting is by permit only.

(2) Hunting is permitted on Monday, Tuesday, Thursday, and Saturday.

(3) Prior registration is required for opening day and the first two Saturdays. On other hunt days permits are issued on the basis of a daily drawing held prior to legal opening time. On prior registration days, hunters will draw for hunting sites on the morning of the hunt. On other hunt days, hunters will have a choice of available hunting sites as their names are drawn.

(4) All hunting ends each day at 12 noon local time, and all hunters must check out and present harvested game at the permit station on Casey Road, not later than 1 p.m. local time.

(5) No loaded guns are permitted beyond a 50-foot radius of the hunting stand marker and no more than two hunters are permitted to each stand.

(6) Hunters will be limited to 15 steel shotshells not larger than #1 with the exception of participants in the Young Waterfowlers Program (see No. 12 below). Possession of lead shotshells is not permitted.

(7) Disorderly conduct, intoxication, "sky busting" or otherwise unsportsmen-like conduct will not be tolerated and the permittee will be ejected from the area.

(8) A hunter who leaves his stand must have permission from official personnel to return.

(9) Hunters who have completed the New York State Waterfowl Hunter Training Course will be given preference for permits on Tuesdays.

(10) No person shall use or hunt from a boat.

(11) Hunters, when requested by Federal or State enforcement officers must display for inspection all game, hunting equipment, and ammunition.

(12) Participants in the Young Waterfowlers Program may use lead shotshells only in shotguns smaller than 12 gauge. Possession of more than 15 shotshells is not permitted.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: August 10, 1977.

WILLIAM C. ASHE,
Acting Regional Director,
U.S. Fish and Wildlife Service.

PART 32—HUNTING

Opening of Valentine National Wildlife Refuge, Nebraska, to the Hunting of Migratory Game Birds

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This rule opens Valentine National Wildlife Refuge for the hunting of migratory game birds. National wildlife refuges are closed to hunting unless the Director determines that the opening of the area is compatible with the principles of sound wildlife management and is in the public interest. Migratory game bird hunting will be permitted subject to special regulations issued at a later date.

EFFECTIVE DATE: September 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Ralph H. Town, Division of National Wildlife Refuges, U.S. Fish and Wildlife Service, Washington, D.C. 20250, telephone number 202-343-4307.

SUPPLEMENTARY INFORMATION: Ralph H. Town is the principal author of this final rule.

On June 15, 1977, there was published (42 FR 30524) a notice of proposed rulemaking adding Valentine National Wildlife Refuge, Nebraska, to the list of refuge areas which are open for the hunting of migratory game birds. As a general rule, most areas within the National Wildlife Refuge System are closed to hunting until officially opened by regulation. The public was provided a 30-day comment period and was advised that an environmental assessment had been prepared on the proposal and was available for public inspection. No comments were received on the proposed rulemaking.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Accordingly, 50 CFR 32.11 is amended as follows:

§ 32.11 **List of open areas: migratory game birds.**

NEBRASKA

Valentine National Wildlife Refuge

Dated: August 16, 1977.

KEITH M. SCHREINER,
Acting Director, United States
Fish and Wildlife Service.

[FR Doc.77-24029 Filed 8-18-77;8:45 am]

PART 32—HUNTING

Opening of Savannah National Wildlife Refuge, South Carolina, to the Hunting of Big Game

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This rule adds Savannah National Wildlife Refuge to the list of refuge areas open for the hunting of big game, which is published in 50 CFR 32.31. The Director has determined that a harvestable surplus of big game exists, that there is public demand for additional recreational opportunity, and that this action is compatible with the major purposes for which this refuge was established. Hunting will provide for the harvest of a renewable resource and for additional public recreational opportunity.

EFFECTIVE DATE: September 15, 1977.

FOR FURTHER INFORMATION CONTACT:

Ralph H. Town, Division of National Wildlife Refuges, U.S. Fish and Wildlife Service, Washington, D.C. 20250, telephone number 202-343-4307.

SUPPLEMENTARY INFORMATION: Ralph H. Town is the principal author of this final rule.

On July 7, 1977, there was published (42 FR 34898) a notice of proposed rulemaking adding Savannah National Wildlife Refuge, South Carolina, to the list of refuge areas which are open for the hunting of big game. As a general rule, most areas within the National Wildlife Refuge System are closed to hunting until officially opened by regulation.

The public was provided a 30-day comment period and was advised that an environmental assessment had been prepared on the proposal and was available for public inspection. One comment, favorable to the proposal, was received.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Accordingly, 50 CFR 32.3. is amended by the addition of Savannah National Wildlife Refuge as follows:

§ 32.31 **List of open areas: big game.**

SOUTH CAROLINA

Savannah National Wildlife Refuge

Dated: August 16, 1977.

KEITH M. SCHREINER,
Acting Director, United States
Fish and Wildlife Service.

V 42 161 AUG 19 77 UMI

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

CIVIL SERVICE COMMISSION

[5 CFR Part 890]

FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM

Opportunities To Register To Enroll and Change Enrollment; Open Season

AGENCY: Civil Service Commission.

ACTION: Proposed rulemaking.

SUMMARY: The Civil Service Commission proposes to extend the dates of the 1977 Federal Employees Health Benefits (FEHB) Program open season from approximately two weeks in length to four work weeks. The FEHB open season is a time during which all eligible employees may enroll in the Program, and enrolled employees and annuitants may change plans, options, types of enrollment, or a combination of these changes. This extension is necessary to enable the Commission to ensure that all employees receive 1977 open season materials timely, as well as to permit employees enough time to carefully study the benefits or services offered by all available plans before deciding what action, if any, they want to take during the open season. In addition, during past FEHB open seasons the Commission has received numerous requests from agencies, employees and insurance carriers, asking that open season extensions be granted. The proposed amendment will change the dates of the 1977 FEHB open season from November 15–30 to November 14–December 9.

DATE: Comments must be received on or before September 19, 1977.

ADDRESS: Comments should be directed to: Thomas A. Tinsley, Director, Bureau of Retirement, Insurance, and Occupational Health, Civil Service Commission, 1900 E Street NW., Washington, D.C. 20415.

FOR FURTHER INFORMATION CONTACT:

Edward G. Borchers—202–632–4684. Bureau of Retirement, Insurance, and Occupational Health, Office of Policy Development and Technical Services, Room 4334, 1900 E Street NW., Washington, D.C. 20415.

It is proposed to amend § 890.301(d)(1) of Part 890, Title 5, Code of Federal Regulations, to read as follows:

§ 890.301 Opportunities to register to enroll and change enrollment.

* * * * *

(d) *Open season.* (1) During the period November 14, 1977 through December 9, 1977, an employee who is not registered to be enrolled may register to be enrolled, and an enrolled employee or annuitant may change his or her enrollment from one plan or option to another, or from self only to self and family, or both.

NOTE.—The Civil Service Commission has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended, and OMB Circular A–107.

UNITED STATES CIVIL SERVICE COMMISSION,
JAMES C. SRY,
Executive Assistant to the Commissioners.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 931]

HANDLING OF FRESH BARTLETT PEARS GROWN IN OREGON AND WASHINGTON

Minimum Grade, Size and Container Requirements

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposal would continue through June 30, 1978, current minimum grade, size and container requirments applicable to fresh shipments of Bartlett pears grown in Oregon (except the Medford District) and Washington. The proposal is designed to provide for orderly marketing in the interest of producers and consumers.

DATE: Comments must be received on or before September 5, 1977.

ADDRESS: Send comments to: Hearing Clerk, Room 1077, South Building, USDA, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202–447–3545).

SUPPLEMENTARY INFORMATION: The proposed amendment was submitted by the Northwest Fresh Bartlett Pear Marketing Committee, established pursuant to the marketing agreement and Order No. 931 (7 CFR Part 931) regulating the handling of fresh Bartlett pears grown in Oregon and Washington. This is a regulatory program effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

Bartlett Pear Regulation 12 is currently effective during the period August 1, 1977, through September 15, 1977. This regulation specifies grade and size requirements for fresh Bartlett pears grown in Oregon, except the Medford District, and Washington. The requirements are that Bartlett pears, other than Red Bartlett pears, when packed in any of the authorized containers except the western lug or containers of 14–15 pounds net weight, shall grade at least U.S. No. 1 and be not smaller than 165 size except such pears grading U.S. No. 2 may be shipped if they are 150 size or larger. Red Bartlett pears shall grade at least U.S. No. 1 and be not smaller than 180 size except such pears grading U.S. No. 2 may be shipped if they are 165 size or larger. Bartlett pears of any variety packed in the western lug must grade at least U.S. No. 2 and be not smaller than 2¼ inches in diameter, except that pears may be handled in such container which fail to meet the requirements of U.S. No. 2 grade only because of serious, but not very serious, damage caused by hail marks or frost if the shape of the pear is such that it will cut at least one good half. Bartlett pears of any variety packed in containers of 14–15 pounds net weight must grade at least U.S. No. 2 and be at least 2⅛ inches in diameter, except that pears may be handled in such containers if they grade Washington C Grade and are not smaller than 2⅜ inches in diameter. Several containers and packs are prescribed. The proposed extension of the effective period of Bartlett Pear Regulation 12 is designed to provide for orderly marketing in the interest of producers and consumers. Committee reports indicate that fresh shipments of Washington-Oregon Bartlett pears will total about 2.4 million standard box equivalents in 1977, compared to 1.9 million standard box equivalents in 1976. The proposed amendment is consistent with the quality and size composition of the estimated crop of Washington-Oregon Bartlett pears.

All persons who desire to submit written data, views, or arguments for consideration in connection with Bartlett Pear Regulation 12, as published in the FEDERAL REGISTER on July 29, 1977 (42 FR 38578), or the proposed amendment published herein, shall file the same, in duplicate, with the Hearing Clerk, United States Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250, not later than September 5, 1977. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Under the proposal, the provisions of Bartlett Pear Regulation 12 (§ 931.312; 42 FR 38578) are revised to read as follows:

§ 931.312 Bartlett Pear Regulation 12.

(a) During the period August 1, 1977, through June 30, 1978, no handler shall handle any lot of Bartlett pears, except Bartlett pears grown in the Medford District, unless such pears meet the following applicable requirements or are handled in accordance with subparagraphs (4) or (5) of this paragraph:

(1) *Minimum Grade and Size.* (i) Bartlett pears of varieties other than Red Bartletts, when packed in the standard western pear box, the "L.A. lug", or their carton equivalents, in halfcartons (containers with inside dimensions of 19¼ x 11½ x 5½ inches), in master containers containing overwrapped consumer packages of pears, or in "tight-filled" containers shall be of a size not smaller than 165 size and shall grade at least U.S. No. 1: *Provided,* That Bartlett pears of such varieties may be handled in such containers if they grade at least U.S. No. 2 and are of a size not smaller than 150 size. Red Bartlett variety pears, when packed in any of the containers specified in this subdivision, shall be of a size not smaller than 180 size and shall grade at least U.S. No. 1: *Provided,* That pears of such variety may be handled in such containers if they grade at least U.S. No. 2 and are of a size not smaller than 165 size;

(ii) Bartlett pears of any variety, when packed in the "western lug", shall grade at least U.S. No. 2 and be not less than 2¼ inches in diameter: *Provided,* That such pears of any variety which fail to meet the requirements of U.S. No. 2 grade only because of serious, but not very serious, damage caused by hail marks and/or frost may be shipped if the shape of the pear is such that it will cut at least one good half; and

(iii) Bartlett pears of any variety, when packed in containers containing at least 14 pounds but not more than 15 pounds net weight, shall grade at least U.S. No. 2 grade and measure not less than 2⅛ inches in diameter: *Provided,* That such pears may be handled in such containers if they meet the minimum requirements of Washington C Grade and are not less than 2⅜ inches in diameter.

(2) *Pack or Container Requirements.* Bartlett pears of any variety shall be packed in one of the following types of containers:

(i) "Standard western pear box" or "L.A. lug" or their carton equivalents;

(ii) "Western lug" or containers having a capacity equal to or greater than said lug;

(iii) "Half-carton" containers;

(iv) Containers of at least 14 pounds but not more than 15 pounds net weight;

(v) "Tight-filled" containers; or

(vi) Master containers containing overwrapped consumer packages.

(3) *Special inspection requirements for minimum quantities.* During the aforesaid period any handler may ship on any conveyance up to, but not in excess of, an amount equivalent to 200 "standard western pear boxes" of pears without regard to the inspection requirements of § 931.55 under the following conditions: (i) Each handler desiring to make shipment of pears pursuant to this subparagraph shall first apply to the committee on forms furnished by the committee for permission to make such shipments. The application form shall provide a certification by the shipper that all shipments made thereunder during the marketing season shall meet the marketing order requirements, that he agrees such shipments shall be subject to spot check inspection, and that he agrees to report such shipments at time of shipment to the committee on forms furnished by the committee, showing the car or truck number and destination; and (ii) on the basis of such individual reports, the committee shall require spot check inspection of such shipments.

(4) *Special purpose shipments.* Notwithstanding any other provision of this section, any shipment of pears in gift packages may be handled without regard to the provisions of this paragraph and of §§ 931.41 and 931.55.

(5) Notwithstanding any other provision of this section, any individual shipment of pears which meets each of the following requirements may be handled without regard to the provisions of this paragraph and of §§ 931.41 and 931.55:

(i) The shipment consists of pears sold for home use and not for resale;

(ii) The shipment does not, in the aggregate, exceed 500 pounds net weight of pears; and

(iii) Each container is stamped or marked with the handler's name and address and with the words "not for resale" in letters at least one-half inch in height.

(b) Terms used in the marketing agreement and order shall, when used herein, have the same meaning as is given to the respective term in said marketing agreement and order; "U.S. No. 1, "U.S. No. 2", and "size" shall have the same meaning as when used in the United States Standards for Summer and Fall Pears (7 CFR 51.1260–51.1280); "150 size", "165 size", and "180 size" shall mean that the pears are of a size which pack, in accordance with the sizing and packing specifications of a standard pack, as specified in said United States Standards, 150, 165, or 180 pears, as the case may be, in a standard western pear box (inside dimensions 18 inches by 11½ by 8½ inches); the term "tight-filled" shall mean that the pears in any container shall have been well settled by vibration according to approved and recognized methods; the term "master container" shall mean those containers containing overwrapped consumer packages of pears; the term "very serious damage" shall mean any injury or defect which very seriously affects the appearance or the edible or shipping quality of the pears, "Washington C Grade" shall have the same meaning as when used in the State of Washington Department of Agriculture Permanent Order 103 (Effective November 10, 1966); the term "Western lug" shall mean a container with inside dimensions of 18 by 11½ by 7 inches and the term "L.A. lug" shall mean a container with inside dimensions of 16⅛ by 13½ by 5¾ inches.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: August 16, 1977.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-24122 Filed 8-18-77;8:45 am]

[7 CFR Part 989]

RAISINS PRODUCED FROM GRAPES GROWN IN CALIFORNIA

Proposed Changes to Improve Administrative Operating Procedures

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice of proposed rulemaking invites written comments on changes to improve administrative operating procedures, and organizational changes to facilitate reference in certain provisions established under the Federal marketing order for California raisins. Some of the changes are needed to bring the procedures and provisions in line with recent order amendments. Other changes update provisions so they are more reflective of current industry operating practices. The changes are based on a recommendation by the Raisin Administrative Committee, and would facilitate operations under, administration of, and compliance with the requirements of the amended marketing order.

DATES: Comments must be received prior to September 9, 1977.

ADDRESSES: Comments should be addressed to the Hearing Clerk, U.S. Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250. Two copies of all written comments should be submitted, and they will be available for public inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202–447–3545.

SUPPLEMENTARY INFORMATION: This proposed amendment is to revise Subpart—Administrative Rules and Regulations (7 CFR 989.101–989.176), Subpart—Supplementary Regulations (7 CFR 989.201–989.231), Subpart—Schedule of Payments (7 CFR 989.401), Subpart—Conversion Factors (7 CFR 989.601), and to add a new Subpart—Quality Control (7 CFR 989.701–989.702). The subparts are pursuant to the marketing agreement, as amended, and Order No.

V 42 161 AUG 19 77 UMI

989, as amended (7 CFR 989; 42 FR 37200), regulating the handling of raisins produced from grapes grown in California (hereinafter referred to collectively as the "order"). The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The terms "Order" and "Terms in the order" as defined in §§ 989.101 and 989.103, respectively, are proposed to be deleted because they are superfluous. The administrative rules and regulations are operative pursuant to the order, and terms used in the administrative rules and regulations have the same meaning as in the order.

The August 1, 1977, amendment of the order reduced the extensive number of varietal type categories to simplify classification of raisins used in regulating the volume and quality of raisins moved to market. Seven varietal types were established incorporating those in § 989.110. These are now set forth in § 989.10 of the order, as amended August 1. Thus, the list of varietal types in § 989.110 is obsolete and should be deleted.

The list of varietal types with conversion factors for converting packed weight to natural condition weight in § 989.601 is proposed to be revised to reflect the changes in varietal type categories. The categories Dipped Seedless and Golden Seedless were not changed by the amendment and need not be changed in the table. All of the other varietal types in the list are proposed to be changed according to the varietal types in § 989.10.

The 1977 amendment of the order also provided for the deletion of § 989.96, containing provisions dealing with Raisin Administrative Committee grower districts and representation per district, and the transferral of these provisions from the order to the rules and regulations to facilitate reference. Producer representation is required to be reviewed every three years for equitable representation and any necessary changes made. Pursuant to this, changes were made in district boundaries and representation in 1973 and set forth in §§ 989.125 and 989.126, respectively. However, this format requires a reader to refer to the order and the rules and regulations to find the applicable provisions. To facilitate reference, the provisions in § 989.96 on districts are proposed to be combined with the provisions of § 989.125 in a new § 989.122, and § 989.125 is proposed to be deleted. Section 989.122 would be made applicable to the Raisin Administrative Committee, not the Raisin Advisory Board, because the Board was abolished and replaced with the Committee on August 4, 1976. The provisions in new § 989.122 would be slightly different from those in § 989.96 in that they would serve the purpose only of defining district areas and would not deal with the membership per district.

The number of members per district and provisions pertaining to change for equitable representation would continue to be specified in § 989.126. The provisions of § 989.126 are the same as the current provisions except for minor wording and conforming changes made necessary because of the proposed establishment of § 989.122, and the establishment of the Raisin Administrative Committee in place of the Raisin Advisory Board.

The provisions in § 989.138 relating to producer districts and § 989.139 relating to producer representation per district on the Raisin Administrative Committee are proposed to be moved to §§ 989.142 and 989.143, respectively, so that the numbering of these provisions conforms with the numbering of the corresponding provisions in the order. It is also proposed that the provisions be made applicable to the Executive Operations Committee, rather than the Raisin Administrative Committee. Effective August 4, 1976, the membership provisions of the order applicable to the Raisin Administrative Committee were made applicable to an Executive Operations Committee. Also, the references to "§ 989.125" in paragraphs (a) (1), (2), and (3) of § 989.138 are proposed to be changed to "§ 989.122" because of the proposal to transfer the provisions in § 989.125 to § 989.122. The reference to "board" in § 989.129 relating to voting in nomination meetings is proposed to be changed to "Committee".

Provisions relating to handler and dehydrator representation on the abolished Raisin Advisory Board are contained in §§ 989.127 and 989.128. These provisions are obsolete and are proposed to be deleted because similar provisions were added to § 989.26 applicable to the Raisin Administrative Committee in August 1976. Handler representation provisions on the abolished Raisin Administrative Committee in § 989.140 were moved to § 989.43 of the order and made applicable to the Executive Operations Committee by the August 1976 order amendment. Hence, § 989.140 is obsolete and is proposed to be deleted. The mail and telegraph voting provisions in § 989.152 of the rules and regulations are proposed to be deleted because the corresponding order provisions were deleted by the 1976 order amendment.

The provisions currently in § 989.148 on compensation for attendance at committee meetings are proposed to be moved to § 989.139 so the numbering of this provision conforms with the corresponding order provisions. The title of revised § 989.139 would be the same as current § 989.148, but the provisions would contain minor changes clarifying that alternates of both the Raisin Administrative Committee and Executive Operations Committee are covered, and the reference to "§ 989.48" at the end of these provisions is changed to "§ 989.39".

The most recent amendment of the order provides for grading requirements on natural condition raisins in § 989.97 (Exhibit B) and for packed raisins in § 989.59(a) to be transferred from the order to the rules and regulations to facilitate reference. Numerous changes have been made in these requirements by rulemaking, and consequently the applicable requirements are in the order and/or Subpart—Supplementary Regulations. As a result, this format requires reference to the order and that subpart to find all applicable grading requirements.

Therefore, it is proposed that the grading requirements on natural condition raisins in § 989.97 (Exhibit B) and the changes in these requirements pursuant to § 989.58(b) and §§ 989.201, 989.203, and 989.211 be combined and included in a new Subpart—Quality Control for better organization. The requirements would be placed in § 989.701 titled "Minimum grade and condition standards for natural condition raisins". Except for the addition of requirements on water dipped, vine sprayed, or similarly treated Muscats (including other raisins with seeds), the grade and condition requirements prescribed for the individual varietal types would be essentially the same as currently prescribed.

The requirements in § 989.59(a) for packed raisins and the changes pursuant to § 989.59(b), in §§ 989.204, and 989.212 are proposed to be combined and placed in § 989.702, titled "Minimum grade standards for packed raisins" for the same reasons that the relocation of the natural grade and condition requirements are proposed to be made. The requirements are the same as currently prescribed, and minor wording changes reflecting the varietal type changes are proposed.

Because of this change combining provisions on grading requirements, §§ 989.201, 989.203, 989.204, 989.211, and 989.212 are obsolete and are proposed to be deleted.

The desirable free tonnage concept of volume control was eliminated August 4, 1976. With the elimination of this concept § 989.224 is no longer needed and it is proposed to be deleted.

Also proposed is a revision of § 989.158 (a) (8) prescribing rules and procedures on fumigation. This is to implement the authority added to § 989.58(d) (1) by the August 1977 amendment giving handlers the option of eliminating the initial inspection check for infestation at the time of receipt. To the extent that handlers take advantage of this option, the unnecessary delay in completion of the inspection and certification process would be eliminated, because these activities would not be interrupted by the fumigation process. If the handler elects not to take advantage of this option, and have the raisins inspected for infestation upon receipt, he would continue to be given the opportunity to fumigate lots prior to the completion of the inspection and certification process.

Currently, §§ 989.159(g) (2) and 989.173 (d) (2) contain parenthetical references to the definitions of off-grade raisins, and other failing raisins which had been contained in § 989.59(f). The most recent amendment of the order moved these definitions from § 989.59(f) to § 989.24. Section 989.24 is in that portion of the order devoted to definitions. Therefore, these references are no longer needed and are proposed to be deleted. Also, included in paragraph (g) (2) of § 989.159 is a parenthetical expression defining raisin residual material.

The definition of this term was also moved to § 989.24. Thus, it is not needed in § 989.159(g) (2) and is proposed to be deleted.

Section 989.166(c) (2) provides that normal and natural deterioration and shrinkage of raisins stored in portable containers be judged as if they had been stored in sweat boxes or picking boxes. Bins are now the common storage containers used by the industry. This requirement is obsolete and proposed to be deleted because deterioration and shrinkage experienced with bins has been no different from that experienced with sweat boxes or picking boxes.

Section 989.166(c) (3) is proposed to be revised to bring it into conformity with the corresponding order provisions on substitutions of reserve tonnage raisins. The 1977 amendment of the order brought provisions in § 989.66(c) (3) relating to the substitution of reserve tonnage raisins in line with the method of Committee application by deleting the requirement that the raisins substituted for the reserve raisins by "like quality".

A literal application of this requirement was never adopted because reserve tonnage raisins only have to be standard raisins, i.e.—raisins at least meeting the effective minimum grade and condition Standards. Section 989.166(d) pertains to the delivery of reserve tonnage raisins by a handler to the Committee in the quantity and quality for which he has become obligated. Since a handler is obligated to deliver only standard raisins to the Committee it is proposed that § 989.166(d) be revised to clarify this fact.

In the August 4, 1976, amendment, the crop year was changed from a September 1-August 31 period to an August 1-July 31 period. Because of this change, the provisions in § 989.173 should be amended by changing the August 31 and September 6 dates for submission of inventory reports to July 31 and August 6, respectively. The reports would be submitted by handlers for each varietal type held by him.

Another proposal deals with the revision of § 989.210 to include Golden Seedless and Dipped Seedless under the weight dockage system for immaturity the same as Natural (sun-dried) Seedless have been for several years. This would permit handlers to acquire lots of natural condition Golden Seedless and Dipped Seedless raisins with more than the permitted level of immature raisins. As is now done on Natural (sun-dried) Seedless raisins, the creditable weight of such lots would be computed by multiplying the net weight of the lot by a dockage factor. The factor would reduce the weight of the lot by an amonut about equal to the weight of the immature raisins needed to be removed from the lot to bring it up to the permitted maturity level.

Although there is more control of maturity in selecting grapes for dehydration than in sun-drying, makers of Golden Seedless and Dipped Seedless raisins encounter maturity problems, especially in a year of poor grape maturity. Permitting handlers to acquire low maturity Golden Seedless and Dipped Seedless raisins as standard raisins under this system would lessen the handlers' inspection costs on such lots.

The provisions in § 989.401 deal with compensation of raisin handlers for services performed on reserve tonnage raisins held for the account of the Committee during and beyond the crop year of acquisition. Because the crop period was changed, minor wording changes are proposed in paragraphs (a) (1), (b) and (c) of § 989.401. Also, the next-to-the-last sentence in § 989.401(c) is proposed to be amended by changing the word "box" to "container" wherever it appears, to clarify that the sentence deals with the weight of raisins in both boxes and bins.

The proposal is as follows:

Subpart—Administrative Rules and Regulations

§§ 989.101, 989.103, 989.110 [Deleted]

1. Section 989–101 is deleted.
2. Section 989.103 is deleted.
3. Section 989.110 is deleted.
4. The center heading "RAISIN ADVISORY BOARD" immediately following § 989.110 is changed to "RAISIN ADMINISTRATIVE COMMITTEE", and a new § 989.122 is added to read:

RAISIN ADMINISTRATIVE COMMITTEE

§ 989.122 Producer districts for representation on Raisin Administrative Committee.

Commencing with the term of office beginning May 1, 1977, producer member districts are as follows:

(a) *District No. 1—Clovis-Sanger.* All of T. 12S., R. 20E. in Fresno County; all of T.11S., R.20E. in Fresno County; all of T.11S., R.21E. in Fresno County; all of T.12S., R.21E; all of T.12S., R.22E; Secs. 1, 2, 11, 12, 13, and 14 of T.13S., R.20E; Secs. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 21, 22, 23, 24, 25, 26, 27, 28, 33, 34, 35, and 36 of T.13S., R.21E; and Secs. 4, 5, 6, 7, 8, 9, 18, 19, 30, and 31 of T.13S., R.22E. The east one-half and Secs. 16, 17, 20, 21, 28, 29, 32, and 33, T.13S., R.22E; all of T.13S., R.23E. lying north and west of the east channel of Kings River; all of T.14S., R.23E. lying west of the each channel of Kings River; and Secs. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 35 and 36, T.14S., R.22E; all of Secs. 5 and 6, T.15S., R.23E., lying north of Kings River.

District No. 2—Kerman. All of T.13S., R.14E. in Fresno County; all of T.13S., R.15E. in Fresno County; all of T.13S., R.16E. in Fresno County; all of T.13S., R.17. in Fresno County; Secs. 30 and 31 of T.13S., R.18E; all of T.14S., R.14E; all of T.14S., R.15E; all of T.14S., R.16E; all of T.14S., R.17E; all of T.14S., R.18E; the west two-thirds of T.14S., R.19E; all of T.15S, R.14E; all of T.15S., R.15E; all of T.15S., R.16E; all of T.15S., R.17E; and all of T.15S., R.18E.

District No. 3—Biola. All of T.13S., R.18E. in Fresno County, except Secs. 30 and 31; all of T.12S., R.19E. in Fresno County; and all of T.13S., R.19E., except Secs. 25, 26, 27, 28, 33, 34, 35, and 36.

District No. 4—Fresno. Secs. 25, 26, 27, 28, 33, 34, 35, and 36, T.13S., R.19E; all of T.13S., R.20E., except Secs. 1, 2, 11, 12, 13 and 14; Secs. 19, 20, 29, 30, 31 and 32 of T.13S., R.21E; the east one-third of T.14S., R.19E; all of T.14S., R.20E; and Secs. 5, 6, and 7 of T.14S., R.21E.

District No. 5—Lone Star. All of T.14S., R.21E., except Secs. 5, 6, 7, and 36.

District No. 6—Easton-Oleander. The north one-half of T.15S., R.19E; the north two-thirds of T.15S., R.20E., except Sec. 19; and Secs. 6, 7, 18, and 19, T.15S., R.21E.

District No. 7—Fowler. The south one-half of Sec. 1, and Secs. 2, 3, 4, 5, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 20, 21, 22, 23, 24, 26, 27, 28 29, and 33, T.15S., R.21E; and Sec. 18, T.15S., R.22E.

District No. 8—Del Rey. Secs. 29, 30, 31, 32, 33 and 34, T.14S., R.22E; Sec. 36, T.14S, R.21E; the north one-half of Sec. 1, T.15S., R.21E; and Secs. 2, 3, 4, 5, 6, 7, 8, 9, 10, 16, and 17, T.15S., R.22E.

District No. 9—Parlier. All of Secs. 4, 9, 16 and 21 lying west of Kings River, and all of Secs. 5 and 6 lying west and south of Kings River, and Secs. 7, 8, 17, 18, 19, 20, 29, 30, 31, and 32, T.15S., R.23E; Secs. 1, 11, 12, 13, 14, 15, 21, 22, 23, 24, 25, 26, 27, 35 and 36, T.15S., R.22E; and Secs. 5 and 6, T.16S., R.23E.

District No. 10—Reedley. All of T.13S., R.24E., lying east and south of the east channel of Kings River; all of T.13S., R.23E., lying east and south of the east channel of Kings River; all of T.14S., R.23E., lying east and south of the east channel of Kings River; T.14S., R.24E; T.14S., R.25E; all of T.15S., R.23E., lying east of the east channel of Kings River; all of Secs. 28 and 34, T.15S., R.23E., lying west of Kings River; Sec. 33, T.15S., R.23E; all of Sec. 4, T.16S., R.23E. in Fresno County; and T.15S., R.24E.

District No. 11—Kingsburg. Secs. 11, 12, 13, 14, 15, 21, 22, 23, 27, 28, and 33, T.16S., R.22E; those portions of Secs. 24, 26 and 34, T.16S., R.22E. within Fresno County; Sec. 7, T.16S., R.23E; those portions of Secs. 8 and 18, T.16S., R.23E. within Fresno County; and those portions of Secs. 4, 5, 8, 9, and 17, T.17S., R.22E within Fresno County.

District No. 12—Selma. Secs. 25, 34, 35 and 36, T.15S., R.21E; Secs. 19, 20, 28, 29, 30, 31, 32, 33 and 34, T.15S., R.22E; Secs. 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 16, 17, 18, 19, 20, 29, 30, 31 and 32, T.16S., R.22E; the east one-half of T.16S., R.21E; Secs. 1 to 23, both inclusive, T.17S., R.21E., and that part of Secs. 24 to 30, both inclusive, T.17S., R.21E., within Fresno County; Secs. 6 and 7, T.17S, R.22E; and those portions of Secs. 18 and 19, T.17S., R.22E. within Fresno County.

District No. 13—Monmouth. Secs. 25, 26, 27, 34, 35 and 36, T.15S., R.20E; Secs. 30, 31 and 32, T.15S., R.21E; and the west one-half of T.16S., R.21E.

District No. 14—Caruthers. The south one-half of T.15S., R.19E; Secs. 19, 28, 29, 30, 31, 32 and 33, T.15S., R.20E; T.16S., R.15E; T.16S., R.16E; T.16S, R17E; T.16S., R.18E; T.16S., R.19E; T.16S., R.20E; T.17S., R.16E; T.17S., R.17E; T.17S., R.18E; T.17S., R.19E; T.17S., R.20E; T.18S., R.16E; T.18S., R.17E; T.18S., R.18E; T.19S., R.17E; T.19S., R.18E; T.20S., R.17E; and all of T.20S., R.1E within Fresno County.

(b) *District No. 15—The Counties of (Kings, Monterey and San Benito).*

(c) *District No. 16—The Counties of (Tulare and Inyo).*

(d) *District No. 17—The Counties of (Kern, San Bernardino, Riverside, Imperial, San Diego, Orange, Los Angeles, Ventura, Santa Barbara and San Luis Obispo).*

(e) *District No. 18—The Counties of (Madera and Mono).*

(f) *District No. 19—The Counties of (Merced, Tuolumne, Mariposa, Stanislaus,*

V42161 AUG 19 77 UMI

San Joaquin, Santa Clara, San Francisco, San Mateo, Santa Cruz, Alameda, Contra Costa, Calaveras, Alpine, Marin, Solano, Sacramento, Amador, Eldorado, Placer, Nevada, Sutter, Yolo, Napa, Sonoma, Mendocino, Lake, Colusa, Yuba, Sierra, Plumas, Butte, Glenn, Tehama, Shasta, Lassen, Modoc, Siskiyou, Del Norte, Humboldt and Trinty).

§§ 989.125–989.126 [Deleted]

5. Section 989.125 is deleted.

6. Section 989.126 is revised to read:

§ 989.126 Producer representation on Raisin Administrative Committee.

(a) Commencing with the term of office beginning May 1, 1977, apportionment of the 35 producer members of the Raisin Administrative Committee among the 19 districts set forth in § 989.122 shall be as provided in this section.

(b) Each district shall have one producer member for each quantity of raisins produced therein that represents, as nearly as possible, one thirty-fifth of the total tonnage of raisins produced in all districts; *Provided*, That each district shall have at least one member. The producer representation on the Committee shall be reviewed every 3 years after 1976 and any necessary changes made to continue such representation on the basis of one thirty-fifth of the total tonnage of raisins produced. The raisin production to be used shall be that of the then preceding crop year.

(c) Whenever any change causes a reduction in the number of producer members to represent a particular district in the ensuing terms of office, the appointment theretofore made of all incumbent producer members representing that district shall be terminated. The reduced number of such members and the new members for districts gaining representation shall be nominated and selected, consistent with § 989.28(a), for the ensuing term of office.

(d) Apportionment of the 35 producer members of the Raisin Administrative Commitee among the 19 districts set forth in § 989.122 on the basis of the quantity of raisins produced, as provided in paragraph (b) of this section, shall be as follows:

(1) One member for each of the 19 districts.

(2) One additional member for each of the following districts: No. 6—Easton-Oleander; No. 7—Fowler; No. 8—Del Rey; and No. 16—Tulare and Inyo Counties.

(3) Two additional members for each of the following districts; No. 2—Kerman; No. 3—Biola; No. 12—Selma; and No. 18—Madera and Mono Counties.

(4) Four additional members for District No. 14—Caruthers.

§§ 989.127—989.128 [Deleted]

7. Section 989.127 is deleted.

8. Section 989.128 is deleted.

§ 989.129 [Amended]

9. In the first sentence of § 989.129, the word "board" is changed to the "Committee".

§§ 989.138, 989.140 [Deleted]

10. Sections 989.138 and 989.140 are deleted, and § 989.139 is revised to read:

§ 989.139 Compensation for attendance of alternates at committee meetings.

Whenever a member of the Raisin Administrative Committee or Executive Operations Committee has reason to believe that he will be unable to attend a Committee meeting and has so notified his alternate or the Committee manager, such notification or a request from the manager shall be held to be a request for the alternate to attend and he shall be reimbursed for reasonable expenses subject to the limitations contained in § 989.39.

11. The center heading "RAISIN ADMINISTRATIVE COMMITTEE" immediately following § 989.129 is changed to "EXECUTIVE OPERATIONS COMMITTEE" and inserted after revised § 989.139.

12. A new § 989.142 is added to read:

EXECUTIVE OPERATIONS COMMITTEE

§ 989.142 Producer districts for representation on Executive Operations Committee.

(a) As used in § 989.143, the term "group of districts" means any one of the following:

(1) Group I districts means Districts No. 1 through 14 as set forth in § 989.122;

(2) Group II districts means Districts No. 15, 16 and 17 as set forth in § 989.122; and

(3) Group III districts means Districts No. 18 and 19 as set forth in § 989.122.

13. A new § 989.143 is added to read:

§ 989.143 Producer representation on Executive Operations Committee.

(a) Commencing with the term of office beginning June 1, 1977, apportionment of the eight producer members of the Executive Operations Committee among the three groups of districts set forth in § 989.142 shall be as provided in this section.

(b) Each group of districts shall have one producer member for each quantity of raisins produced in such districts that represents, as nearly as possible, one-eighth of the total tonnage of raisins produced in all districts; *Provided*, That each group of districts shall have at least one member. The producer representation on the Executive Operations Committee shall be reviewed every three years after 1976 and any necessary changes made to continue such producer member representation on the basis of one-eighth of the total tonnage of raisins produced. The raisin production to be used in such review or change shall be that of the then preceding crop year.

(c) Apportionment of the eight producer members of the Executive Operations Committee among the three groups of districts (as set forth in § 989.142) on the basis of the quantity of raisins produced, as provided in paragraph (b) of this section, is as follows:

(1) Six members for Group I districts;

(2) One member for Group II districts; and

(3) One member for Group III districts.

§§ 989.148, 989.152 [Deleted]

14. Section 989.148 is deleted.

15. Section 989.152 is deleted.

16. The center heading "GRADE AND CONDITION STANDARDS" immediately preceding § 989.158 is changed to "QUALITY CONTROL" and § 989.158 (a)(8) is revised to read:

QUALITY CONTROL

§ 989.153 Natural condition raisins.

(a) * * * (8) With respect to any lot of natural condition raisins being received and inspected at a handler's inspection point pursuant to paragraph (a)(3) of this section, the handler shall notify the inspection service if he elects to have the raisins inspected for infestation. If the handler elects not to have the raisins inspected for infestation, he shall: (i) Fumigate promptly all raisins he receives; (ii) notify the inspection service in advance of the time he plans to fumigate such raisins; (iii) permit the inspection service to monitor the fumigation; and (iv) permit the inspection service to make periodic incubation checks of his packed raisins. The inspection service shall certify the raisins received as standard raisins if they meet all other grade and condition standards. If the handler elects to have the raisins inspected for infestation, the inspector shall afford such handler the opportunity to fumigate such raisins during the inspection and certification process. Such raisins shall remain under the supervision of the inspector during the fumigation. The inspection certificate shall not be issued until the fumigation is completed: *Provided*, That the inspection certificate shall be issued, whether or not the fumigation is completed, not later than five business days after the date the inspection and certification process is suspended by the inspector to permit fumigation.

* * * * *

17. In § 989.159(g), the undesignated paragraph beginning with the words "Except as authorized in this part, no handler shall ship or otherwise" following paragraph (g)(1)' is corrected by placing the heading "(2) Disposition. (i)" immediately before the word "Except"; in that paragraph, the parenthetical reference "(as defined in § 989.59 (f))" and the parenthetical expression "(including defective raisins, stemmer waste, sweepings, and other residue)" are deleted; and the reference to paragraph "(g)(1)(iii)" in subdivision (e) adn (ii) of that undesignated paragraph are changed to paragraph "(g)(2)(iii)".

18. In § 989.166, paragraphs (c)(2) and (3) are revised, and the second sentence of paragraph (d) is amended by deleting the words "and quality" immediately following the word "quantity". As revised, paragraphs (c)(2) and (3) read as follows:

§ 989.166 Reserve tonnage generally.

* * * * *

(c) * * * (2) *Conditions.* Each handler shall store reserve tonnage raisins in storage and under conditions which protect them from rain and which reasonably can be expected to maintain the raisins free of any biological or other infestation or contamination. Each handler shall, pursuant to § 989.66(b)(2), store each varietal type of reserve tonnage raisins held by him for the account of the Committee, separate and apart from all other raisins. Storage of such raisins shall be deemed "separate and apart" if the containers are so marked and placed as to be capable of ready and clear identification as to the category in which they are held. Reserve tonnage raisins shall be stored in sweatboxes, picking boxes, or other portable containers not exceeding one ton capacity.

(3) *Substitution of reserve tonnage.* A handler may, pursuant to § 989.66(b)(3), after giving the Committee reasonable advance notice in writing and under its direction and supervision, substitute standard raisins for reserve tonnage raisins.

* * * * *

§ 989.173 [Amended]

19. In § 989.173, paragraph (a) is amended by changing the dates August 31 and September 6 to July 31 and August 6, respectively, and paragraph (d)(2) is amended by deleting the words "(as defined in § 989.59(f))".

Subpart—Supplementary Regulations

§§ 989.201, 989.203, 989.204, 989.211, 989.212, 989.224 [Deleted]

20. Sections 989.201, 989.203, 989.204, 989.211, 989.212 and 98.224 are deleted.

21. In § 89.210, paragraphs (a) through (f) are revised to read:

§ 989.210 Handling of natural (sun-dried) seedless, golden seedless, and dipped seedless raisins acquired pursuant to a weight dockage system.

(a) *General.* Subject to prior agreement between handler and tenderer, a handler may acquire as standard raisins any lot of Natural (sun-dried) Seedless, Golden Seedless, and Dipped Seedless raisins containing more than 8 percent, by weight, of substandard raisins under a weight dockage system. The creditable weight of such lot acquired shall be that obtained by multiplying the net weight of the raisins in the lot by the applicable dockage factor from the dockage table prescribed in paragraph (g) of this section.

(b) *Free and reserve tonnage percentages.* Whenever free and reserve percentages are designated for Natural (sun-dried) Seedless, Golden Seedless, and Dipped Seedless raisins for a crop year, such percentages shall be applicable to the creditable weight of any lot of such raisins acquired by a handler pursuant to a weight dockage system.

(c) *Reserce tonnage.* A handler may hold as reserve tonnage raisins any lot, or portion thereof, of Natural (sun-dried) Seedless, Golden Seedless, and Dipped Seedless raisins acquired pursuant to a weight dockage system: *Provided*, That only the creditable weight of such lot, or portion thereof, may be applied by the Committee against the handler's reserve tonnage obligation.

(d) *Assessments.* Assessments on any lot of Natural (sun-dried) Seedless, Golden Seedless, and Dipped Seedless raisins acquired by a handler pursuant to a weight dockage system shall be applicable to the free tonnage portion of the creditable weight of such lot.

(e) *Payments for services on reserve tonnage.* Payment to a handler for services performed by him with respect to reserve tonnage Natural (sun-dried) Seedless, Golden Seedless, and Dipped Seedless raisins acquired pursuant to a weight dockage system shall be made on the basis of the creditable weight of such lot and at the applicable rate specified for such services in § 989.401 of Subpart—Schedule of Payments.

(f) *Identification.* Any lot of Natural (sun-dried) Seedless, Golden Seedless, and Dipped Seedless raisins acquired by a handler pursuant to a weight dockage system shall be so identified by the inspection service by affixing to one container on each pallet, or to each bin, in such lot, a prenumbered RAC control card (to be furnished by the Committee) which shall remain affixed to the container or bin until the raisins are processed or disposed of as natural condition raisins. The control card shall only be removed by, or under the supervision of, an inspector of the inspection service or authorized Committee personnel.

* * * * *

Subpart—Schedule of Payments

22. In § 989.401, the date "September 1, 1975" in paragraph (a)(1) is changed to "August 1, 1977" and paragraphs (b) and (c) are revised to read:

§ 989.401 Payments for services performed with respect to reserve tonnage raisins.

* * * * *

(b) *Additional payment for raisins held beyond crop year of acquisition.* Additional payment for reserve tonnage raisins held beyond the crop year of acquisition shall be made in accordance with this paragraph. Each handler holding such raisins for the account of the Committee on August 15 and the following September 1 shall be compensated for storing, handling, and fumigating such raisins at the rate of 85 cents per ton per month, or any part thereof, for each month of the 3-month period ending November 30, and 42½ cents per ton per month, or any part thereof for each month of the next 9 months. Such services shall be completed so that the Committee is assured that the raisins are maintained in good condition.

(c) *Payment of rental on boxes and bins containing raisins held beyond crop year of acquisition.* Payment of rental on boxes and bins containing reserve tonnage raisins held beyond the crop year of acquisition shall be made in accordance with this paragraph. Each handler, producer, dehydrator, and other person who furnishes boxes or bins in which such raisins are held for the account of the Committee on August 15 and the following September 1 shall be compensated for the use of such boxes and bins. The rate of compensation shall be: For boxes, one and two-thirds cents per day, not to exceed a total payment of 50 cents per box per year, per average net weight of raisins in a sweatbox, with the equivalent rates for raisins in boxes other than sweatboxes; and for bins, thirteen and one-third cents per day per bin, not to exceed a total of $4 per bin per year. For purposes of this paragraph, box means any container with a capacity of less than 1,000 pounds and bin means any container with a capacity of 1,000 pounds, or more. The average net weight of raisins in each type of container shall be the industry average as computed by the Committee for the container in which the raisins are so held. No further compensation shall be paid unless the raisins are so held in the boxes or bins on the succeeding September 1.

* * * * *

Subpart—Conversion Factors

23. The table in § 989.601 is revised to read:

§ 989.601 Conversion factors for raisin weight.

* * * * *

Varietal type	Weight taken after— Passing through stemmer and blower	Weight taken after— Completion of processing
Natural (sun-dried) seedless	0.94	0.92
Golden seedless	.96	.95
Dipped seedless	.96	.95
Muscats (including other raisins with seeds):		
Seeded		.80
Unseeded	.94	.92
Sultana	.94	.92
Zante currant	.93	.91

* * * * *

Subpart—Quality Control

24. The center heading "Subpart—Quality Control" is added after § 989.601 and a new § 989.701 is added to read:

§ 989.701 Minimum grade and condition standards for natural condition raisins.

Effective pursuant to § 989.58, raisins meeting the varietal standards set forth hereinafter shall be considered as standard raisins and those failing to meet such standards shall be considered as off-grade raisins. Where the raisins in any lot consist of two or more varietal types commingled within their containers, the lot shall be considered as a mixed lot and as standard raisins if they meet for each defect the most restrictive requirements for the defect pro-

V 42 161 AUG 19 77 UMI

vided in this section for the varietal types of raisins comprising the lot: *Provided,* That in the event layered Muscats (including other raisins with seeds) are commingled within their containers with loose Muscats (including other raisins with seeds) the entire lot shall be considered as loose Muscats (including other raisins with seeds) and as standard raisins if the lot as a whole meets the minimum standards for loose Muscats (including other raisins with seeds): *Provided further,* That with respect to the requirements peculiar to a varietal type such as possessing characteristic color, flavor, or odor, the raisins shall be considered as meeting such requirement if they have been properly prepared as raisins. In each category, only those raisins which have been properly dried and cured in original natural condition, are free from active infestation and are in such condition that they are capable of being received, stored and packed without undue deterioration or spoilage, shall be considered as storable raisins.

(a) *Natural (sun-dried) Seedless Raisins.* Natural condition Natural (sun-dried) Seedless Raisins shall have been prepared from sound, wholesome, matured grapes properly dried and cured, and shall meet the following additional requirements: (1) Shall be fairly free from damage by sugaring, mechanical injury, sunburn, or other similar injury; (2) shall have a normal characteristic color, flavor, and odor of properly prepared raisins; (3) shall contain not more than 8 percent by weight of substandard raisins (raisins that show development less than that characteristics of raisins prepared from fairly well matured grapes); (4) shall not exceed 16 percent moisture as determined by the dried fruit moisture tester method; and (5) the raisings shall be of such quality and condition as can be expected to withstand storage as provided in the marketing agreement and order and that when processed in accordance with good commercial practice will meet the minimum standards for processed raisins established by the Committee.

(b) *Dipped Seedless.* Natural condition Dipped Seedless raisins shall have been prepared from sound, wholesome, matured grapes properly dried and cured, and shall meet the following additional requirements: (1) Shall be fairly free from damage by sugaring, mechanical injury, sunburn, or other similar injury; (2) shall have a normal characteristic flavor and odor of properly prepared raisins; (3) shall contain not more than 8 percent by weight of substandard raisins (raisins that show development less than that characteristic of raisins prepared from fairly well matured grapes); (4) shall not exceed 14 percent moisture as determined by the dried fruit moisture tester method, and (5) the raisins shall be of such quality and condition as can be expected to withstand storage as provided in the marketing agreement and order and that when processed in accordance with good commercial practice will meet the minimum standards for processed raisins established by the Committee.

(c) *Golden Seedless.* Natural condition Golden Seedless raisins shall have been prepared from sound, wholesome, matured grapes properly dried and cured, and shall meet the following additional requirements: (1) Shall be fairly free from damage by sugaring, mechanical injury, sunburn or other similar injury; (2) shall have a normal characteristic flavor and odor of properly prepared raisins; (3) shall contain not more than 8 percent by weight of substandard raisins (raisins that show development less than that characteristic of raisins prepared from fairly well matured grapes); (4) shall not exceed 14 percent moisture as determined by the dried fruit moisture tester method (5) the raisins shall be of such quality and condition as can be expected to withstand storage as provided in the marketing agreement and order and that when processed in accordance with good commercial practice will meet the minimum standards for processed raisins established by the Committee; and (6) shall possess a color varying from yellowish green to dark amber or dark greenish amber with not more than 15 percent, by weight, of all the raisins being definitely dark berries. "Definitely dark berries" means raisins which are definitely darker than dark amber and characteristic of "naturally" raisined grapes.

(d) *Muscats (including other raisins with seeds).* Natural condition Muscat raisins (including other raisins with seeds) shall have been prepared from sound, wholesome, matured grapes properly dried and cured, and shall meet the following additional requirements:

(1) Shall be fairly free from damage by surgaring, mechanical injury, sunburn or other similar injury; (2) shall be fairly free from immature (skinny) raisins and shall have a normal characteristic color, flavor, and odor of properly prepared raisins; (3) shall not exceed 16 percent moisture as determined by the dried fruit moisture tester method, except that water dipped, vine sprayed or similarly treated Muscats (including other raisins with seeds) shall not exceed 14 percent moisture, and that there shall be no maximum moisture content for layered Muscats (including other raisins with seeds); (4) the raisins shall be of such quality and condition as can be expected to withstand storage as provided in the marketing agreement and order, and that when processed in accordance with good commercial practice will meet the minimum standards for processed raisins established by the Committee, and that with respect to layered Muscats (including other raisings with seeds), in addition to the above requirements the raisins shall be fairly free from shattered (or loose end) berries; uniformly cured; 30 percent or more "3 Crown" or larger size; of such quality and condition that when processed in accordance with good commercial practice will, except for moisture content, meet the minimum standards for processed raisins established by the Committee.

(e) *Sultana Raisins.* Natural condition Sultana raisins shall have been prepared from sound, wholesome, matured grapes properly dried and cured, and shall meet the following additional requirements: (1) Shall be fairly free from damage by sugaring, mechanical injury, sunburn, or other similar injury; (2) shall be fairly free from immature (skinny) raisins and shall have a normal characteristic color, flavor, and odor of properly prepared raisins; (3) shall not exceed 16 percent moisture as determined by the dried fruit moisture tester method; and (4) the raisins shall be of such quality and condition as can be expected to withstand storage as provided in the marketing agreement and order, and that when processed in accordance with good commercial practice will meet the minimum standards for processed raisins established by the Committee.

(f) *Zante Currant Raisins.* Natural condition Zante Currant raisins shall have been prepared from sound, wholesome, matured grapes properly dried and cured, and shall meet the following additional requirements; (1) Shall be fairly free from damage by sugaring, mechanical injury, sunburn, or other similar injury; (2) shall be fairly free from immature (skinny) raisins and shall have a normal characteristic color, flavor, and odor of properly prepared raisins for the varietal type; (3) shall not exceed 16 percent moisture as determined by the dried fruit moisture tester method; and (4) the raisins shall be of such quality and condition as can be expected to withstand storage as provided in the marketing agreement and order, and that when processed in accordance with good commercial practice will meet the minimum standards for processed raisins established by the Committee.

25. A new §989.702 is added to read:

§ 989.702 Minimum grade standards for packed raisins.

Effective pursuant to § 989.59, the minimum grade standards for packed raisins shall be as follows: (a) With respect to Natural (sun-dried) Seedless, Dipped Seedless, Golden Seedless, Muscats (including other raisins with seeds), and Sultana raisins, "U.S. Grade C" as defined in effective United States Standards for Grades of Processed Raisins (§§ 52.1841–52.1858 of this title); (b) with respect to Golden Seedless raisins, the color requirements for "colored" as defined in the said standards; (c) with respect to layered Muscats (including other raisins with seeds), "U.S. Grade B" as defined for "Layer or Cluster Raisins With Seeds" in the said standards, except the provisions therein relating to moisture content; and (d) with respect to Zante Currant raisins, "U.S. Grade B" as defined in the said standards. A handler may grind raisins, which do not meet these minimum grade standards be-

cause of mechanical damage or sugaring, into a raisin paste.

Dated: August 16, 1977.

MILK IN THE CENTRAL ARKANSAS, FORT SMITH, ARKANSAS AND MEMPHIS, TENNESSEE MARKETING AREAS

Extension of Time for Filing Exceptions to the Recommended Decision on Proposed Amendments to Tentative Marketing Agreements and to Orders

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Extension of time for filing exceptions.

SUMMARY: This notice extends the time for filing exceptions to the July 21, 1977, decision recommending a merger of the Central Arkansas, Fort Smith and Memphis orders (7 CFR Parts 1108, 1102 and 1097) and expansion of the marketing area to include additional areas in Arkansas, Tennessee and Mississippi.

DATE: Comments now are due on or before August 30, 1977.

ADDRESS: Exceptions (four copies) should be filed with the Hearing Clerk, Room 1077, South Building, United States Department of Agriculture, Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT:

Robert F. Groene, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202-447-4824.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding: Notices of Hearing: Issued November 19, 1976, published November 24, 1976 (41 FR 51819); issued February 11, 1977, published February 17, 1977 (42 FR 9674); issued March 3, 1977, published March 8, 1977 (42 FR 13024); and issued March 25, 1977, published March 31, 1977 (42 FR 17130).

Extension of time for filing briefs: Issued May 18, 1977, published May 23, 1977 (42 FR 26217).

Recommended Decision: Issued July 21, 1977, published July 26, 1977 (42 FR 38070).

Notice is hereby given that the time for filing exceptions to the recommended decision with respect to the proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the Central Arkansas, Fort Smith, Arkansas and Memphis, Tennessee marketing areas which was issued July 21, 1977 (42 FR 38070) is hereby extended to August 30, 1977.

This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

Signed at Washington, D.C., on August 12, 1977.

WILLIAM T. MANLEY,
Acting Administrator.

Food Safety and Quality Service

[9 CFR Part 381]

POULTRY SLAUGHTERING PRACTICES

Notice of Proposed Rulemaking

AGENCY: Food Safety and Quality Service, USDA.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the poultry products inspection regulations by adding provisions containing new procedures and criteria for reprocessing poultry carcasses accidentally contaminated during slaughter with digestive tract contents. Recent information indicates that newer technology makes unsuitable present procedures that require the removal of internal contamination with digestive tract contents from carcasses by trimming only. The new procedures would permit the reprocessing of such contaminated carcasses by using various combinations of trimming, vacuuming, and washing, and then treating all surfaces of the carcasses with a chlorine solution.

DATE: Comments must be received on or before October 18, 1977.

ADDRESSES: Written Comments to: Hearing clerk, U.S. Department of Agriculture, Washington, D.C. 20250. Oral Comments to: Dr. J. P. Lyons, 202-447-3219.

FOR ADDITIONAL INFORMATION ON COMMENTS AND CONFIDENTIALITY SEE SUPPLEMENTARY INFORMATION.

FOR FURTHER INFORMATION CONTACT:

Dr. J. P. Lyons, Chief Staff Officer, Inspection Standards and Regulations Staff, Technical Services, Meat and Poultry Inspection Program, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C., 202-447-3219.

SUPPLEMENTARY INFORMATION:

COMMENTS

Interested persons are invited to submit comments concerning this proposal. Written comments must be sent in duplicate to the Hearing Clerk. Comments should bear a reference to the date and page number of this issue of the FEDERAL REGISTER. Any person desiring opportunity for oral presentation of views must make such request to Dr. J. P. Lyons so that arrangements may be made for such views to be presented. A transcript shall be made of all views orally presented. All comments submitted pursuant to this notice will be made available for public inspection in the Office of the Hearing Clerk during regular hours of business.

BACKGROUND

Due to the nature of the evisceration process of poultry, an occasional spillage on edible tissue of digestive tract contents (opened crops, material from the vent and broken intestines, etc.) is unavoidable even when the best dressing techniques are used. The cleaning up of product so contaminated has evolved over the years into set patterns, each dependent upon the nature and location of the contaminant. Spilled digestive tract contents are permitted to be removed only by trimming, if found on the inside of the carcass or on an outside surface that has been cut. Spilled digestive tract contents are permitted to be removed by washing, if found on an uncut surface on the outside of a carcass. (Such practices are contained in a manual of instruction for inspectors—the Meat and Poultry Inspection Manual. These instructions may be viewed in the Office of the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. Additionally, copies will be provided free upon request to Dr. J. P. Lyons, Inspection Standards and Regulations Staff, Technical Services, Meat and Poultry Inspection Program, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250.) These practices appear to be authorized under section 6 of the Poultry Products Inspection Act (21 U.S.C. 455) which provides, among other things, that carcasses and parts which may be made not to be adulterated by reprocessing, need not be condemned and destroyed if reprocessed under the supervision of an inspector and thereafter found to be not adulterated.

WHY IS THIS PROPOSAL NEEDED?

It appears that the proposal would strengthen the regulations by spelling out specific procedures and criteria for reprocessing digestive tract contents. Also, the poultry industry believes that the recent availability of newer technology makes unsuitable the present policy that requires the removal of internal contamination with digestive tract contents from carcasses by trimming. This occasionally results in the unnecessary loss of carcass parts and consequent downgrading of product. The technology is essentially the reprocessing of such contaminated carcasses, first using various combinations of trimming, vacuuming and washing, and then treating all surfaces of the carcass with a chlorine solution. They point out that all losses due to unnecessary trimming and downgrading must eventually be borne by consumers. The proposed regulations would permit this type of reprocessing, but under strict inspection controls.

V42161 AUG 19 77 UMI

WHAT STUDIES WERE MADE TO SUPPORT THIS CHANGE?

A recent USDA, Agricultural Research Service study found that it was possible to wash internally contaminated carcasses to the degree that their microbiological profile was equal to noncontaminated carcasses. In response to this research and following some feasibility studies, the Food Safety and Quality Service set up a study to see if equal results could be obtained by reprocessing carcasses internally contaminated with visible particles of digestive tract contents. This has been the historical criterion for disposition of contaminated product by inspectors in poultry slaughter plants. Both of these studies may be viewed in the Office of the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. Additionally, copies will be provided free upon request to Dr. J. P. Lyons, Inspection Standards and Regulations Staff, Technical Services, Meat and Poultry Inspection Program, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250.

Four broiler plants were selected for the test. A reprocessing station was set up in each plant. While not identical, they all had facilities for trimming, vacuuming, washing, and reinspection. During the test period, the usual procedure for reprocessing was one of trimming off all contaminated cut surfaces and fat, vacuuming, and internal washing. A variety of nozzles and spray heads were utilized, as were variations in water pressure and volume.

Following the reprocessing, carcasses were examined by a plant representative to assure that they were visually clean. During the test period, carcasses passed by the plant examiner were visually reinspected by inspection personnel. Additionally, 10 percent of the acceptable, visually clean carcasses were cut open and subjected to minute scrutiny by a USDA inspector to make sure that nothing was overlooked. The criterion used for the reinspection during the test was extremely tight—any visible speck called for rejection.

Analysis of the test results indicated that, when a carefully designed reprocessing procedure is applied with diligence by plant management, practically all contaminated carcasses can be reprocessed into an acceptable product without significant downgrading, and that the remainder of the carcass may be salvaged.

HOW WOULD THE INSPECTION SERVICE CONTROL THE REPROCESSING?

Reprocessing of contaminated inner surfaces other than by trimming alone would be permitted only at reprocessing stations found by the Administrator to be capable of being operated in accordance with the poultry products inspection regulations and of providing operations capable of removing all visible specks of contamination on the inner surface of a carcass. This appears to be necessary to assure that such reprocessing operations would be feasible and not contaminate other processing areas.

The inspection service would reinspect sufficient completed carcasses to assure that all visible specks have been removed. Carcass examinations and inspections that call for visual searches would be made without additional openings. Any visible particles would be cause for further reprocessing. All carcasses reprocessed under this program would be treated with chlorinated water at a level of 50 ppm before being returned to production. This would give additional assurance of product wholesomeness.

The proposal also contains provisions and criteria for the withdrawal of approval of a reprocessing station.

Accordingly, it is proposed to amend § 381.91 of the poultry products inspection regulations (9 CFR 381.91) by designating the first two sentences as paragraph (a) and by adding a new paragraph (b) to read as follows:

§ 381.91 Contamination.

* * * * *

(b)(1) Any carcass of poultry accidentally contaminated during slaughter with digestive tract contents shall not be condemned if promptly reprocessed under the supervision of an inspector and thereafter found not be be adulterated. Contaminated surfaces that are cut shall be removed only by trimming. Contaminated inner surfaces that are not cut may be cleaned by trimming alone, or at an approved reprocessing station, by any method that will remove the contamination, such as vacuuming, washing, and trimming, singly or in combination. All visible specks of contamination must be removed, and if the inner surfaces are reprocessed other than solely by trimming, all surfaces of the carcass shall be treated with chlorinated water at a level of 50 ppm.

(2) An area will be designated as an approved reprocessing station only if the Administrator determines that reprocessing operations can be conducted in that area in accordance with all of the requirements of this Part and that the reprocessing methods to be utilized are capable of removing all visible specks of contamination on the inner surface of a carcass. Requests for such approval shall be submitted to the Inspector in Charge and shall describe the proposed area, proposed methods of reprocessing, and proposed equipment to be utilized. Whenever the Administrator finds that reprocessing operations cannot be conducted in such area in accordance with all of the requirements of this Part or that the reprocessing methods utilized are not capable of removing all visible specks of contamination on the inner surface of a carcass, he may withdraw approval of such area, effective upon oral or written notification, whichever is earlier, to the operator of the establishment. In the event of oral notification, a written confirmation thereof shall be given to the operator as promptly as circumstances permit. The notification shall specify the reasons for such withdrawal and shall afford the operator of the establishment an opportunity to present his views. In any instance where there is a conflict as to the facts, a hearing shall be held to resolve such conflict.

NOTE: The Food Safety and Quality Service has determined that this proposal does not require preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Done at Washington, D.C., on August 16, 1977.

ROBERT ANGELOTTI,
Administrator, Food Safety and Quality Service.

FEDERAL TRADE COMMISSION

[16 CFR Part 13]

[File No. 771 0025]

PUBLIC RELATIONS SOCIETY OF AMERICA, INC.

Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Provisional consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this provisionally accepted consent order, among other things, would require a New York City trade association to cease promulgating rules that affect fee arrangements or business solicitations between members of the association and their clients and prospective clients.

DATE: Comments must be received on or before October 17, 1977.

ADDRESS: Comments should be directed to: Office of the Secretary, Federal Trade Commission, 6th and Pennsylvania Ave. NW., Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT:

Ronald J. Dolan, Assistant Director, Bureau of Competition, Federal Trade Commission, 6th and Pennsylvania Ave. NW., Washington, D.C. 20580, 202-634-4397.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the FTC Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's rules of practice (16 CFR 2.34), notice is hereby given that the following consent agreement containing a consent order to cease and desist and an explanation thereof, having been filed with and provisionally accepted by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with

§ 4.9(b) (14) of the Commission's rules of practice (16 CFR 4.9(b)(14)).

PUBLIC RELATIONS SOCIETY OF AMERICA, INC.

[File No. 771 0025]

AGREEMENT CONTAINING CONSENT ORDER TO CEASE AND DESIST

The Federal Trade Commission having initiated an investigation of certain acts and practices of the Public Relations Society of America, Inc., a corporation, and it now appearing that the Public Relations Society of America, Inc., hereinafter sometimes referred to as proposed respondent, is willing to enter into an agreement containing an order to cease and desist from the use of the acts and practices being investigated.

It is hereby agreed by and between the Public Relations Society of America, Inc., by its duly authorized officer, and its attorney, and counsel for the Federal Trade Commission that:

1. Proposed respondent Public Relations Society of America, Inc., is a corporation organized, existing and doing business under and by virtue of the laws of the State of New York, with its office and principal place of business located at 845 Third Avenue, New York, New York 10022.

2. Proposed respondent admits all the jurisdictional facts set forth in the draft of complaint here attached.

3. Proposed respondent waives:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a statement of findings of fact and conclusions of law; and

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement.

4. This agreement shall not become a part of the official record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it, together with the draft of complaint contemplated thereby, will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released; and such acceptance may be withdrawn by the Commission if comments or views submitted to the Commission disclose facts or considerations which indicate that the order contained in the agreement is inappropriate, improper or inadequate.

5. This agreement is for settlement purposes only and does not constitute an admission by proposed respondent that the law has been violated as alleged in the draft of complaint here attached.

6. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 2.34 of the Commission's rules, the Commission may, without further notice to proposed respondent, (1) issue its complaint corresponding in form and substance with the draft of complaint here attached and its decision containing the following order to cease and desist in disposition of the proceeding, and (2) make information public in respect thereto. When so entered, the order to cease and desist shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Mailing of the complaint and decision containing the agreed-to-order to proposed respondent's address as stated in this agreement shall constitute service. Proposed respondent waives any right it may have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or the agreement may be used to vary or contradict the terms of the order.

7. Proposed respondent has read the proposed complaint and order contemplated hereby, and it understands that once the order has been issued, it will be required to file one or more compliance reports showing that it has fully complied with the order and that it may be liable for a civil penalty in the amount provided by law for each violation of the order after it becomes final.

ORDER

I

It is ordered, That respondent, respondent's officers, directors, agents, employees, successors and assigns, cease and desist from adopting, disseminating, continuing or otherwise having in effect any code of ethics, rule, bylaw, resolution, policy statement, or interpretation thereof, which prohibits or limits in any way the manner in which members may arrange their fees with clients or prospective clients for payment of service; or which prohibits or restricts any communication to clients or prospective clients with respect to the arrangement of fees.

II

It is further ordered, That respondent, respondent's officers, directors, agents, employees, successors and assigns, cease and desist from adopting, disseminating, continuing, or otherwise having in effect any code of ethics, rule, bylaw, resolution, policy statement, or interpretation thereof, which prohibits or restricts a member from soliciting, negotiating, or entering into a business relationship with a prospective client.

III

It is further ordered, That the respondent corporation shall within sixty (60) days from the date of service of this order, send a copy of this order to each chapter of the society in the United States, and cause the publication of this order in the "PRSA National Newsletter" and send a copy thereof to each current member of respondent.

IV

It is further ordered, That respondent notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment, sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of the order.

It is further ordered, That the respondent herein shall within sixty (60) days after service upon it of this order, file with the Commission a report, in writing, setting forth in detail the manner and form in which it has complied with this order.

ANALYSIS OF PROPOSED CONSENT ORDER TO AID PUBLIC COMMENT

The Federal Trade Commission has accepted an agreement containing a proposed consent order from Public Relations Society of America, Inc. ("PRSA").

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during the period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should withdraw from the agreement or make the final the agreement's proposed order.

Public Relations Society of America is a corporation representing approximately 8,400 members engaged in public relations. The proposed complaint alleges that since 1959, PRSA has promulgated and enforced a code of professional standards containing restrictions on the use of contingent fee arrangements and on the encroachment of other members' clients. Contingent fees are fees charges for services rendered that are conditioned on or measured by the happening of some future event. According to the proposed complaint, the "non-encroachment" rule restricts members from soliciting clients of other members.

The proposed complaint also charged that the aforementioned restrictions have the effect of tampering, stabilizing, fixing or otherwise interfering with the fees members charge for services; suppressing price competition among members; hindering, restraining, foreclosing or frustrating competition in that industry; raising barriers to the entry of new public relations practitioners; and depriving clients of the benefits of free and open competition in the sale of public relations services in violation of Section 5 of the Federal Trade Commission Act.

In the agreement reached between PRSA and the staff, PRSA has agreed to be bound by an order to delete the challenged code restrictions, to cease from promulgating rules in the future affecting members' arrangements of fees with clients or prospective clients, to cease from promulgating rules in the future effecting members' solicitation, negotiation or entering into a business relationship with prospective clients, and to distribute a copy of the order to each member.

To ensure that the order is obeyed, PRSA must, within sixty (60) days after the effective date of the order, file with the Commission a written report showing in detail the manner and form of its compliance.

The purpose of this analysis is to facilitate public comment on the proposed order and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

CAROL M. THOMAS,
Secretary.

Food and Drug Administration

[21 CFR Parts 182, 184]

[Docket No. 77N-0043]

AGAR-AGAR

Proposed Affirmation of GRAS Status With Specific Limitations as Direct Human Food Ingredient

AGENCY: Food and Drug Administration.

ACTION: Proposed Rule.

SUMMARY: This is a proposal to affirm the generally recognized as safe (GRAS) status of agar-agar as a direct human food ingredient with specific limitations. The safety of this ingredient has been evaluated pursuant to the comprehensive safety review being conducted by the agency. The proposal would list the ingredient as a direct food substance affirmed as GRAS.

DATES: Comments by October 18, 1977.

ADDRESSES: Written comments to Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Corbin Miles, Bureau of Foods (HFF-335), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204, 202-472-4750.

SUPPLEMENTARY INFORMATION: The Food and Drug Administration is conducting a comprehensive safety review of direct and indirect human food ingredients classified as generally recognized as safe (GRAS) or subject to a prior sanction. The Commissioner of Food and Drugs has issued several notices and proposed regulations, published in the FEDERAL REGISTER of July 26, 1973 (38 FR 20040), initiating this review. Pursuant to this review, the safety of agar-agar has been evaluated. In accordance with provisions of § 170.35 (formerly § 121.40, prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), the Commissioner proposes to affirm the GRAS status of this ingredient with specific limitations.

Agar-agar is a complex high molecular weight polysaccharide extracted from several commercially available genera of red algae, notably *Gelidum, Gracilaria, Suhria,* and from at least 14 other genera used as commercial sources. Agar-agar consists of linear sulfated polysaccharide chains having alternate alpha and beta linkages. Structural components and charge may vary for each genus, depending upon the time of harvest and stage of growth. In general the extremes of structure of agar are: (a) Neutral agarose consisting of alternating (1-4)-linked, 3,6-anhydro-alpha-L-galactose and (1-3)-linked beta-D-galactose containing no charge; (b) pyruvated agarose with little sulfation (approximately 2 percent); and (c) sulfated galactan with neutral components almost completely replaced by galactose sulfate. Gelling potency decreases from (a) type to (c) type. The molecular weight varies with the grade, being 5,000 to 30,000 in the usual form but up to 160,000 in laboratory extracted types. Agar-agar is listed in § 182.7115 (formerly § 121.101 (d)(7)), prior to recodification published in the FEDERAL REGISTER of March 15, 1977 (42 FR 14302)), as GRAS for use in food as a stabilizer and thickener pursuant to regulations published in the FEDERAL REGISTER of November 20, 1959 (24 FR 9369), and subsequently recodified. It has been available in the United States since late in the 19th century but has enjoyed wide use in the food industry only in recent years.

A representative cross section of food manufacturers was surveyed to determine the specific foods in which agar-agar was used and at what levels. Information from surveys of consumer consumption was obtained and combined with the manufacturing information to obtain an estimate of consumer exposure to agar-agar. The total amount of agar-agar used in food in 1970 was reported to be approximately 350,000 pounds, about twice the reported poundage for 1960.

Agar-agar has been the subject of a search of the scientific literature from 1920 to the present. The parameters used in the search were chosen to discover any articles that considered (1) chemical toxicity, (2) occupational hazards, (3) metabolism, (4) reaction products, (5) degradation products, (6) any reported carcinogenicity, teratogenicity, or mutagenicity, (7) dose response, (8) reproductive effects, (9) histology, (10) embryology, (11) behavioral effects, (12) detection, and (13) processing. A total of 298 abstracts on agar-agar was reviewed and 28 particularly pertinent reports from the literature survey have been summarized in a scientific literature review.

The scientific literature review shows, among other studies, the following information as summarized in the report of the Select Committee on GRAS Substances (hereinafter referred to as the Select Committee), selected by the Life Sciences Research Office of the Federation of American Societies for Experimental Biology:

The digestibility of agar-agar has been estimated in a number of studies. Nilson and Schaller fed groups of six male, weanling rats diets containing 0 to 30 percent agar-agar for 10 weeks. Irrespective of levels fed, the digestibility was estimated to be 28 percent. In a similar study, Booth et al. found the digestibility to be 21 percent in rats when agar-agar was fed at a level of 15 percent in the diet. By contrast, Ariyama and Takahasi reported that agar-agar had no nutritive value for the rat. No direct information is available concerning the form in which agar-agar is absorbed or the nature of its digestive products. It is likely, however, that the complex polysaccharide is first digested to simple sugars in the intestine prior to absorption.

While no acute oral toxicity studies have been reported, it should be noted that agar-agar has been used for many years as a gelling and bulking agent in semisynthetic diets for animal feeding studies. In most studies the agar-agar is present as 2 to 5 percent of the diet. No significant effects have been observed on growth, reproduction, or cytopathology. Because this material is often used in experimental diets, including controls, pathological disturbances are likely to have been noted if they occurred.

In studies in which agar-agar was fed to rats at dietary levels up to 30 percent, no significant pathological effects have been reported. In one experiment, male weanling rats were fed levels of agar-agar up to 30 percent of the diet for 10 weeks with no observable effect on growth. Ershoff and McWilliams fed weanling female rats diets containing 10 percent agar-agar and noted only a slight depression in growth rate. However, Wierda observed a thickening of the small intestine and an increase in length of the large intestine in rats fed high levels of agar-agar. In one study, 10 to 30 percent diets where fed to rats for 40 weeks; in a subsequent study, 50 weanling rats were fed a 30 percent agar-agar diet for 44 weeks. In both cases, the only change noted was an increase in intestinal weight and length. Increases in intestinal weight, due to mucosal rather than to muscular growth, also occurred at high levels of agar-agar after shorter feeding times; such changes were observed when a 25 percent agar-agar diet was fed to rats for four weeks. These changes are presumably related to the low digestibility and gelling properties of agar-agar. The increased bulk would cause these effects, and concentrations of 25 percent or more of agar-agar in the diet appear to be needed to produce them.

Schulz and Thomas found that 25 percent of agar-agar in the diet of rats had no effect on the retention of lipids when compared to sucrose feeding. Thus it appears that the bulking effect of agar-agar does not prevent lipid absorption.

Other experimental animal studies yield analogous data. For example, rabbits showed increased growth rates, compared to controls, when fed 20 percent agar-agar diets for 40 days. At 2 percent of the diet, chicks showed no effect after 20 days. Cats grew at a normal rate and no gross pathological changes were observed when they were fed 5 percent agar-agar in the diet for one year beginning at 4 weeks of age.

No evidence of fetal toxicity was noted when 0.2 ml of a one percent agar-agar solution was administered intraperitoneally to mice each day from the 11th to the 15th day of gestation. Similar treatments during the 4th to 8th days of gestation increased resorptions by 15 percent. Oral administration of solutions containing one percent and 10 percent agar-agar from day 11 to day 15 of gestation produced no effect on the fetus and did not increase the rate of fetal resorption.

However, teratologic evaluations of agar-agar conducted recently by the Food and Drug Research Laboratories have provided some evidence of maternal toxicity in two of the four species tested. Oral administration of up to 1140 mg per kg daily in rats (day 6 through day 15 of gestation), and up to 650 mg per kg daily in hamsters (day 6 through day 10 of gestation), had no clearly discernible effect on nidation or on maternal or fetal survival. The number of abnormalities seen in soft and skeletal tissues of the test groups did not differ from the number occurring spontaneously in the sham-treated controls. Oral administration of up to 329 mg per kg daily in mice (day 6 through day 15 of gestation), and up to 118.5 mg per kg daily in rabbits (day 6 through day 18 of gestation), also elicited no discernible effect on nidation or on maternal or fetal survival, and resulted in no increase in the number of abnormalities in the soft or skeletal tissues of the offspring. However, when the dose was increased to 1570 mg per kg in mice and to 400 mg per kg in rabbits, there was a significant increase in mortality among the treated dams and a decrease in the pregnancy rate of surviving dams. In the case of mice, there was also a marked increase in the number of resorption sites in females examined at term, and the live fetuses showed significant retardation in maturation. There was no evidence of a teratogenic effect of agar-agar on mice or rabbits even at the highest dose level. The Food and Drug Research Laboratories' report indicated that the behavior of agar-agar in their teratologic tests was similar to that found previously with other high molecular weight polysaccharides. In their opinion, the administration of a dose of agar-agar amounting essentially 'to an LD_{50} dose even though distributed over a 10-day period,' resulted 'in a predictable effect on both the pregnant animals and on the embryos present in the uterus'.

Feeding studies designed to elicit evidence of mutagenicity have not been reported.

No specific studies of agar-agar are available in which the material was fed for more than one year to determine toxicity. However, it has been general practice to use agar-agar in animal diets as a gelling and bulking agent at levels ranging from 2 to 5 percent, and no adverse effects appear to have been reported in the numerous life-time animal studies that have been conducted over the past several decades. Moreover, agar-agar has been used in basal diets fed to animals in numerous carcinogencity studies, and the Select Committee is not aware of any reports of increased tumor incidence. Based upon the normal food intake of the rat, a concentration of 5 percent agar-agar in the diet is equivalent to 3 g per kg per day, a level considerably greater than that consumed by man on a body weight basis.

Since agar-agar serves as the gelling agent for media used in bacteriological investigations, the effect on this material on the growth of microorganisms has been intensively studied. For example, De and Guha reported that an 82 percent agar-agar diet provided a favorable medium for the growth of intestinal microflora. On the other hand, variable results were found in studies performed in vitro in which the effect of agar-agar on the inhibition of microbial growth by various antibiotics was reported. However, at levels generally used in foods, there is no evidence that agar-agar affects microbial metabolism in the alimentary tract.

Since 1905, agar-agar has been used by man as a laxative, in doses ranging from 4 to 15 g per day with no apparent adverse effect. These doses are equivalent to 67 to 250 mg per kg per day, levels that are considerably above those estimated as the daily intake from food.

All of the available safe information on agar-agar has been carefully evaluated by qualified scientists of the Select Committee. It is the opinion of the Select Committee that:

Agar-agar has relatively little effect when added to the diets of animals in amounts considerably greater than those present in the human diet. The observed increases in intestinal weight and length in animals appear to be related to the bulking and hydrocolloidal properties of the material, and these changes occur only at relatively high concentrations of agar-agar.

Although no specific studies of the carcinogenicity or other long-term investigations of agar-agar have been made, this material has a long history of use as a gelling agent and bulk component of experimental animal diets. Because 2 to 5 percent of this material has been used routinely in control diets in numerous studies without reported significant effects, it is reasonable to conclude that even at these high levels, agar-agar produces no significant chronic effects.

However, there is one report that agar-agar, fed at relatively high levels (400 to 1570 mg per kg per day), is lethal to many pregnant mice and rabbits but not to pregnant rats and hamsters fed at equivalent levels (650 to 1140 mg per kg per day). Significant numbers of maternal deaths occurred in pregnant mice and rabbits fed agar-agar at levels 119 fold greater (mice) and 30 fold greater (rabbits), than the maximum level estimated to be consumed by adults (13.2 mg per kg per day) in the daily diet, but no toxic effects were observed in pregnant mice and rabbits fed levels 25 fold greater (mice) and 9 fold greater (rabbits) than the estimated adult human intake level. With respect to these comparisons it should be emphasized that the Select Committee believes the intake estimate of 13.2 mg per kg per day is overstated by a considerable margin, which could make the foregoing differences in each case even larger.

It is noteworthy that similar toxic effects have been observed in identical tests on a number of other polysaccharides (gum arabic, sterculia gum, carob bean gum, guar gum, gum ghatti, gum tragacanth, carrageenan, propylene glycol alginate, and methyl cellulose) fed at very high levels. The relative sensitivity of the several animal species to these effects varies depending on the particular polysaccharide tested, but in all cases very large doses are required. Until these effects have been adequately explained, it appears to be inappropriate to conclude that unrestricted use of such substance in food would be without hazard.

Agar-agar is a product extracted from marine algae. The possibility exists that harmful concentrations of certain metals such as mercury, may be accumulated in the commercial product if algae are harvested from coastal waters contaminated with significant levels of such heavy metals. Current specifications for food grade agar-agar place a limitation on the content of "heavy metals as lead." Because modern methods of analysis are capable of distinguishing between and measuring the amounts of several metal elements, it would appear advisable to make the specifications for agar-agar more specific with respect to allowable concentrations of potentially toxic heavy metals, such as mercury.

It is the conclusion of the Select Committee that there is no evidence in the available information on agar-agar that demonstrates, or suggests reasonable grounds to suspect, a hazard to the public when it is used at levels that are now current and in the manner now practiced. However, it is not possible to determine without additional data, whether a significant increase in consumption would constitute a dietary hazard. Based upon his own evaluation of available information on agar-agar (including a report of mutagenic tests which was not available when the Select Committee formed its conclusion), the Commissioner concurs with this conclusion. The Commissioner therefore concludes that continued safe use of agar-agar requires regulation of this GRAS ingredient with specific limitations to preserve present conditions of use.

The Commissioner shares the concern of the Select Committee in that harmful concentrations of certain heavy metals may be accumulated in commercial agar-agar, particularly if the algae are harvested from coastal waters contaminated with significant levels of heavy metals. Heavy metals such as mercury have been found in aquatic animal life at levels exceeding those which are considered safe for human ingestion. The present limitation of "heavy metals" such as lead lacks the element specificity that modern analytical methods can provide. Therefore, the Commissioner will investigate the background levels of individual heavy metals (arsenic, cadmium, lead, mercury, selenium, and zinc) in samples of agar-agar during this comment period. If this investigation indicates that specific heavy metal specifications need to be adopted for the continued safe use of this ingredient, these specifications will be adopted as part of the final regulation. All available data and information on the heavy metal content of agar-agar are also solicited as comments on this proposal.

The levels of use adopted in this proposal for the various categories of food are the maximum levels reported to the National Academy of Sciences/National Research Council in their survey of food manufacturers. Use of the ingredient in any manner not permitted by the proposed regulation results in it becoming a food additive for which no regulation currently exists.

Copies of the scientific literature review, reports of teratogenic and mutagenic tests, and the report of the Select Committee on agar-agar are available for review at the office of the Hearing Clerk, Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857, and may be purchased from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22151, as follows:

V 42 161 AUG 19 77 UMI

Title	Order number	Price code	Price [1]
Agar-agar (scientific literature review)	PB-221 225	A04	$4.00
Agar-agar (teratology tests)	PB-225-820/AS	A04	4.50
Agar-agar (mutagenic tests)	PB-245-443/AS	A07	6.00
Agar-agar (select committee report)	PB 265-702/AS	A02	3.50

[1] Price subject to change.

This proposed action does not affect the present use of agar-agar for pet food or animal feed.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 201(s), 409, 701(a), 52 Stat. 1055, 72 Stat. 1784–1788, as amended (21 U.S.C. 321(s), 348, 37(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes that Parts 182 and 184 be amended as follows:

PART 182—SUBSTANCES GENERALLY RECOGNIZED AS SAFE

§ 182.7115 [Deleted]

1. By deleting § 182.7115 Agar-agar.

Maximum usage levels permitted

Foods (as served)	Percent	Functions
Baked goods and baking mixes, sec. 170.3(n)(1) of this chapter.	0.8	Drying agent, sec. 170.3(o)(7) of this chapter; flavoring agent, sec. 170.3(o)(12) of this chapter; stabilizer, thickener, sec. 170.3(o)(28) of this chapter.
Confections and frostings, sec. 170.3(n)(9) of this chapter.	.05	Flavoring agent, sec. 170.3(o)(12) of this chapter; stabilizer, thickener, sec. 170.3(o)(28) of this chapter; surface finisher, sec. 170.3(o)(30) of this chapter.
All other food categories	.25	Flavoring agent, sec. 170.3(o)(12) of this chapter; formulation aid, sec. 170.3(o)(11) of this chapter; humectant, sec. 170.3(o)(16) of this chapter; stabilizer, thickener, sec. 170.3(o)(28) of this chapter.

The Commissioner hereby gives notice that he is unaware of any prior sanction for the use of this ingredient in food under conditions different from those proposed herein. Any person who intends to assert or rely on such a sanction shall submit proof of its existence in response to this proposal. The regulation proposed above will constitute a determination that excluded uses would result in adulteration of the food in violation of section 402 of the act, and the failure of any person to come forward with proof of such an applicable prior sanction in response to this proposal constitutes a waiver of the right to assert or rely on such sanction at any later time. This notice also constitutes a proposal to establish a regulation under Part 181 (21 CFR Part 181), incorporating the same provisions, in the event that such a regulation is determined to be appropriate as a result of submission of proof of such an applicable prior sanction in response to this proposal.

Interested persons may, on or before October 18, 1977, file with the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20857, written comments (preferably in quadruplicate) regarding this proposal. Received comments may be seen in the above office during working hours, 9 a.m. to 4 p.m., Monday through Friday.

PART 184—DIRECT FOOD SUBSTANCES AFFIRMED AS GENERALLY RECOGNIZED AS SAFE

2. In Part 184 by adding new § 184.1115 to read as follows:

§ 184.1115 Agar-Agar.

(a) Agar-agar (CAS Reg. No. PM 9002–18–0) is a dried, hydrophyllic, colloidal polysaccharide extracted from one of a number of related species of red algae (class *Rhodophyccae*).

(b) The ingredient meets the specifications of the Food Chemicals Codex, 2d Ed. (1972).[1]

(c) The ingredient is used in food under the following conditions:

[1] Copies may be obtained from: National Academy of Sciences, 2101 Constitution Ave. NW., Washington, D.C. 20037.

NOTE.—The Food and Drug Administration has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A–107.

Dated: August 12, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

DEPARTMENT OF JUSTICE

Parole Commission

[28 CFR Part 2]

PAROLE, RELEASE, SUPERVISION AND RECOMMITMENT OF PRISONERS, YOUTH OFFENDERS AND JUVENILE DELINQUENTS

Proposed Rulemaking

AGENCY: United States Parole Commission, Justice.

ACTION: Proposed rule.

SUMMARY: This proposal is to establish a new category of offense severity ratings in the Commission's guidelines for decision-making. The proposal is to set specific time ranges for several types of offenses presently contained in the "greatest" severity category, a category

in which specific ranges have not previously been set due to the infrequency with which such cases occur and the extreme variations possible in each instance.

DATES: Comments must be received on or before September 21, 1977.

ADDRESS: Send comments to the United States Parole Commission, Federal Home Loan Bank Board Building, 320 First Street NW., Washington, D.C. 20537; Attention: Rulemaking Committee.

FOR FURTHER INFORMATION, CONTACT:

Michael A. Stover, Office of the General Counsel, United States Parole Commission, Telephone: 202–724–3092.

SUPPLEMENTARY INFORMATION: Pursuant to the authority of 18 U.S.C. 4203(a)(1) and 4204(a)(6), notice is hereby given that the United States Parole Commission intends to consider the adoption of a proposed regulation as set forth below. All interested persons who wish to comment on this proposal should send their written statements and suggestions to the United States Parole Commission, Federal Home Loan Bank Board Building, 320 First Street NW., Washington, D.C. 20537, Attention: Rulemaking Committee. All comments must be received by September 21, 1977.

The text of the proposed rule is as follows:

§ 2.20 **Paroling policy guidelines; statement of general policy.**

* * * * *

Guidelines for decisionmaking

	Parole prognosis			
	Very good	Good	Fair	Poor
ADULT				
Greatest I Aggravated felony (e.g., robbery: Weapon fired—no serious injury). Explosive detonation (involving potential risk of physical injury to person(s)—no serious injury occurred). Robbery (multiple instances (2–3)). Hard drugs (possession with intent to distribute/sale—large scale (e.g., over $100,000)). Sexual act—force (e.g., forcible rape).	40–55	55–70	70–85	85–110
Greatest II Aggravated felony—serious injury (e.g., injury involving substantial risk of death, or protracted disability, or disfigurement). Aircraft hijacking. Espionage. Kidnaping. Homicide (intentional or committed during other crime).	Greater than above—however, specific ranges are not given due to the limited number of cases and the extreme variation possible within the category.			
YOUTH/NARA				
Same as above, except that the suggested ranges are as follows:				
Greatest I	30–40	40–50	50–60	60–78
Greatest II	Greater than above—however, specific ranges are not given due to the limited number of cases and the extreme variation possible within the category.			

NOTE.—Adoption of this proposal would affect the very high severity category as follows: "sexual act—force"—delete.

Dated: August 15, 1977.

GEORGE J. REED,
Acting Vice Chairman, United States Parole Commission.

[FR Doc.77-23995 Filed 8-18-77;8:45 am]

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 21323; RM-2836]

TELEVISION TRANSMITTERS

Use of Subcarrier Frequencies in Aural Baseband; Order Extending Time for Filing Comments and Reply Comments; Inquiry

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: Action taken herein extends the time for filing comments and reply comments to a Notice of Inquiry concerning the use of subcarrier frequencies in the aural baseband of television transmitters. Consumer Electronics Group of the Electronic Industries Association states the additional time is necessary so that it can schedule necessary meetings between broadcasters and television receiver manufacturers to aid it in preparing useful comments.

DATES: Comments must be filed on or before November 25, 1977, and reply comments must be filed on or before December 9, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202–632–7792.

SUPPLEMENTARY INFORMATION:

In the matter of the use of subcarrier frequencies in the aural baseband of television transmitters, Docket No. 21323, RM–2836.

Adopted: August 12, 1977.

Released: August 16, 1977.

1. *Notice of Inquiry* in this proceeding was adopted July 1, 1977, 42 FR 38606. The present dates for filing comments and reply comments are August 18, and August 29, 1977, respectively.

2. On August 4, 1977, the Consumer Electronics Group of the Electronic Industries Association ("EIA/CEG") filed a request seeking a 90-day extension of time for filing comments and reply comments. EIA/CEG states that it represents all the major domestic manufacturers of television receivers as well as several Japanese companies that have manufacturing facilities in the United States. EIA/CEG notes that the Commission is inquiring into a broad range of possible uses for television aural transmiter subcarriers which would directly affect television receiver manufacturers. It states that additional time is required in order to schedule necessary meetings between broadcasters and television receiver manufacturers so that intelligent comments can be prepared.

3. We believe the requested additional time is warranted in order to assure development of a sound and comprehensive record on which to base a decision in this proceeding. *Accordingly, it is ordered*, That the dates for filing comments and reply comments in Docket 21323 are extended to and including November 25, and December 9, 1977, respectively.

4. This action is taken pursuant to authority found in sections 4(i), 5(d)(1) and 303(r) of the Communications Act of 1934, as amended, and § 0.281 of the Commission's rules.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

TAKING OF MARINE MAMMALS INCIDENTAL TO COMMERCIAL FISHING OPERATIONS

Public Hearing on Proposed Rules

AGENCY: National Marine Fisheries Service, Commerce.

ACTION: Notice of public hearing.

SUMMARY: On July 20, 1977, the Director, National Marine Fisheries Service, published a proposal to amend regulations regarding the take of marine mammals incidental to commercial tuna purse seine operations and to establish limits on marine mammals which would be taken during 1978, 1979, and 1980 (42 FR 37217, July 20, 1977). That proposal will be the subject of the public hearings which this notice is announcing.

DATES: The hearings will begin on Monday, August 22, 1977, and will continue until completed.

V 42 161 AUG 19 77 UM

ADDRESSES: Public hearings will begin at 9:30 a.m. local time in Room 4519, Tax Court, Federal Building, San Diego, California.

FOR FURTHER INFORMATION CONTACT:

William P. Jensen, Marine Mammal Program Manager, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C. 20235. Telephone: 202-634-7461.

SUPPLEMENTARY INFORMATION: The presiding officer will be the Honorable Frank W. Vanderheyden, Administrative Law Judge, U.S. Department of Commerce. The hearing will be conducted in accordance with procedural rules published on July 13, 1977 (42 FR 35967).

Dated: August 16, 1977.

WINFRED H. MEIBOHM,
Acting Deputy Director, National Marine Fisheries Service.

FEDERAL POWER COMMISSION

[Docket No. CI77-657]

AMERICAN NATURAL GAS PRODUCTION CO.

Application

AUGUST 15, 1977.

Take notice that on July 20, 1977, American Natural Gas Production Company (Applicant), One Woodward Avenue, Detroit, Michigan 48226, filed in Docket No. CI77-657 an application pursuant to Section 7(c) of the Natural Gas Act, as amended, and Section 2.75 of the Commission's General Policy and Interpretations, Optional Procedure For Certificating New Producer Sales Of Natural Gas, for a certificate of public convenience and necessity authorizing the sale of natural gas from West Cameron Block 504, offshore Louisiana to Michigan Wisconsin Pipe Line Company (Michigan Wisconsin), all as more fully set forth in the application, which is on file with the Commission and open to public inspection. Applicant is a wholly owned subsidiary of Michigan Wisconsin.

The application indicates that as a result of exploratory drilling in West Cameron Block 504, offshore Louisiana, Applicant has calculated total reserves (all interests) of 42.9 Bcf for said tract. Applicant estimates that initial deliveries from its interest could approximate 3.6 MMcf per day.

Applicant states that pursuant to a gas sales contract dated as of June 23, 1977, it has agreed to sell all gas produced from and attributable to its interests in wells proposed to be drilled in West Cameron Block 504 (14.524 percent working interest) to Michigan Wisconsin at an initial rate of $2.389 per Mcf at 15.025 psia. The rate is proposed to escalate $0.01 quarterly.

Any person desiring to be heard or to make any protest with reference to said application, on or before September 9, 1977, should file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-23966 Filed 8-18-77;8:45 am]

[Docket No. CP77-552]

CITIES SERVICE GAS CO.

Application

AUGUST 15, 1977.

Take notice that on August 4, 1977, Cities Service Gas Company (Applicant), P.O. Box 25128, Oklahoma City, Oklahoma 73125, filed in Docket No. CP77-552 an application pursuant to Section 7(b) of the Natural Gas Act and Section 157.7 (e) of the Regulations thereunder (18 CFR 157.7(e)) for permission and approval to abandon during the calendar year 1978, direct sale service and facilities no longer required for deliveries of natural gas to Applicant's customers, all as more fully set forth in the application on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act reasonable dispatch in abandoning service and removing direct sale measuring, regulating, and related facilities. Applicant states that it would abandon service and facilities only when deliveries to any one direct sale customer would not exceed 100,000 Mcf of Natural gas during the last year of service.

The application states that Applicant would not abandon any service unless it would have received a written request or written permission from the customer to terminate service. In the event such request or permission could not be obtained, a statement certifying that the customer has no further need for service would be filed with the Commission it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 9, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP77-549]

CITIES SERVICE GAS CO.

Application

AUGUST 15, 1977.

Take notice that on August 4, 1977, Cities Service Gas Company (Applicant), P.O. Box 25128, Oklahoma City, Oklahoma 71325, filed in Docket No. CP77-549 an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.7 (g) of the Regulations thereunder (18 CFR 157.7(g)) for a certificate of public convenience and necessity authorizing the construction and for permission for and approval of the abandonment, during the calendar year 1978, and operation of field gas compression and related

V 42 161 AUG 19 77 UMI

metering and appurtenant facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in the construction and abandonment of facilities which would not result in changing Applicant's system salable capacity or service from that authorized prior to the filing of the instant application.

Applicant states that the total cost of the proposed construction and abandonment would not exceed $2,000,000 and the cost of any single project would not exceed $500,000. These costs would be financed by Applicant from treasury cash, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 9, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24014 Filed 8-18-77;8:45 am]

[Docket No. ER76-912]

CITY OF PASADENA

Cancellation

AUGUST 11, 1977.

Take notice that the City of Pasadena (City) on July 5, 1977, tendered for filing a notice of cancellation of the Power Sales Contract between City and the Puget Sound Power and Light Company (Puget Sound). City indicates that cancellation is in accordance with Section 10 of the Power Sales Contract.

City requests waiver of the Commission's notice requirements to allow for the cancellation to become effective upon Puget Sound's receipt of the filing.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE, Washington, DC 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 26, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24018 Filed 8-18-77;8:45 am]

[Docket No. E-9566]

DEPARTMENT OF THE INTERIOR BUREAU OF RECLAMATION

Order Confirming and Approving Rates

AUGUST 12, 1977.

Pursuant to the provisions of the Falcon Dam Act of 1954 (68 Stat. 255, as amended by 77 Stat 475), the Department of the Interior (Interior) on behalf of the Bureau of Reclamation (Reclamation), submitted on August 20, 1976, a request for Commission confirmation and approval of a contract for the sale of power and energy from the Falcon Project and for additional power and energy from proposed new generating facilities at the Amistad Project. The contract provides for the sale of excess power and energy at both sites to South Texas Electric Cooperative, Inc. and Medina Electric Cooperative, Inc., (Cooperatives). Approval of the contract is requested for a 50 year period, beginning when the Falcon-Amistad System becomes operational.

Following conferences between Interior and the Commission staff, Interior on July 12, 1977, submitted an amended filing, consisting of a revised copy of the proposed contract for the sale of power and energy from the Falcon-Amistad System to the Cooperatives and a separate contract for the sale of power and energy generated at the Falcon Project to Central Power and Light Co. for the period beginning January 1, 1978, through December 31, 1982, or to the initial commercial operation of the power facilities at the Amistad Project, whichever occurs first.[1] On August 10, 1977, Interior submitted an executed copy of the contract with the Cooperatives.

The Falcon and Amistad Dams are two international storage projects on the Rio Grande constructed jointly by the United States and Mexico under the provisions of the Treaty of 1944, which provides for the utilization of water of the Colorado and Tijuana Rivers and of the Rio Grande. The Treaty vests the International Boundary and Water Commission (IBWC) with the responsibility of constructing, operating and maintaining the Falcon and Amistad Dams.

The Falcon Dam, located about 130 miles upstream from Brownsville, Texas was completed in 1954. Its primary purpose was water conservation of the Rio Grande. Storage was provided for domestic, municipal, industrial, and irrigation purposes but not for the generation of hydroelectric power. However, both the United States and Mexico have added hydroelectric power plants on their respective sides of the dam. Each plant contains generating capacity of 31,500 kilowatts. Annual generation at the United States power plant has been estimated at 87.5 million kilowatt hours by Reclamation.

Power and energy generated at Falcon Dam is marketed pursuant to the Falcon Dam Act of 1954. The Act provides that power and energy generated at the Falcon Dam:

> • • • be delivered to the Secretary of the Interior (hereinafter referred to as the Secretary) who shall transmit and dispose of such power and energy in such manner as to encourage the most widespread use thereof at the lowest possible rates to consumers consistent with sound business principles, the rate schedules to become effective upon confirmation and approval by the Federal Power Commission. Rate schedules shall be drawn having regard to the recovery (upon the basis of the application of such rate schedules to the capacity of the electric facilities of the project) of the cost of producing and transmitting such electric energy, including the amortization of the capital investment allocated to power by the Secretary, in collaboration with the Secretary of State, over a reasonable period of years. Preference in the sale of such power and energy shall be given to public bodies and cooperatives.

The Amistad Dam, located about 300 miles upstream from the Falcon Dam, was completed in 1968 by the IBWC. Amistad, like Falcon, was primarily constructed for conservation of Rio Grande waters. Other project purposes are flood control, increased fishery resources, and recreation; hydroelectric power generation is a secondary purpose. The act authorizing the construction of the Amistad Dam (P.L. 86-605) provided for hydroelectric power at the project subject to the conditions contained in the following section:

> Sec. 2. If agreement is concluded pursuant to Section 1 of this Act for the construction of a major international storage dam the Secretary of State, acting through the United States Commissioner, International Boundary and Water Commission, United States and Mexico, is authorized to conclude with the appropriate official or officials of Mexico an agreement consistent with article 7 of the treaty of February 3, 1944, for the construction, operation, and maintenance on a self-liquidating basis, for the United States share, of facilities for generating hydroelectric energy at said dam.

In 1963 Congress amended the Falcon Dam Act of 1954 to include the marketing of power from the Amistad Dam (P.L. 88-237). In addition to the power marketing provisions, Congress added a new Section 4 to the Act further limiting both projects' use of water for power purposes as follows:

> Sec. 4. The release of United States water from the Falcon and Amistad Dams for the production of hydroelectric energy shall be such as not to interfere with United States vested rights to the use of water for municipal, domestic, irrigation, and industrial purposes or with storage of water for these purposes.

At the time Amistad was constructed, feasibility studies indicated that hydroelectric facilities could not be constructed on a self-liquidating basis. However, some power generating features were included in the Amistad Project for possible power production in the future: power intakes, trashrocks, penstocks, excavation of an approach channel leading to the power intakes upstream of the dam and excavation for a powerhouse and tailrace channel downstream of the dam were included in the original construction. It is estimated that these power related facilities constructed at Amistad cost the United States $2,887,751.

The current rates for the sale of power and energy generated at the Falcon Project to Central Power & Light Co. were confirmed and approved by the Commission by order issued December 29, 1972, in Docket No. E-6577. Commission approval of these rates, which average about 3 mills per kWh, extends through December 31, 1977. By order issued August 1, 1977, in this docket, the Commission confirmed and approved rates for the sale of Falcon Dam power and energy to Central Power & Light beginning January 1, 1978, through December 31, 1982 or when the Falcon-Amistad System becomes operational, whichever occurs first. These rates will average about 14 mills per kWh.

Interior's filing of August 20, 1976, requested Commission confirmation and approval of a proposed contract for the sale of power and energy from a combined Falcon-Amistad System to the Cooperatives. Power and energy sold pursuant to the contract would be produced from the existing power facilities at Falcon Dam and from the power facilities to be constructed at the Amistad Dam.

The proposed contract provides that all the excess power and energy generated by the Falcon-Amistad System would be sold to the Cooperatives, who would pay the following:

(1) The amount necessary to amortize the remaining investment costs of the power facilities at Amistad over a 50 year period;

(2) The amount necessary to amortize the remaining investment costs of the power facilities at Falcon; and

(3) The annual projects' operation, maintenance, replacement costs, and the administrative costs of the IBWC and Reclamation.

[1] Public notice of Intervenor's amended filing was issued on July 19, 1977, with comments or suggestions due on or before July 25, 1977. No comments have been received.

On July 12, 1977, Interior submitted an amended filing which included a revised proposed contract with the Cooperatives, agreeing as in the previous contract, to pay all project operating, maintenance and investment costs of the two projects over a 50 year period. In addition, the Cooperatives would repay the interest on the initial power facilities built into Amistad Dam as discussed above.

Reclamation estimates that the average generation of the System will be 244 million kilowatt hours annually. The annual cost to the Cooperatives under the proposed contract is estimated to be $2,800,000, or an average cost of 11.5 mills per kilowatt hour. Provisions in the proposed contract require an annual review of the payment level and an annual adjustment of the payment as required to meet the System payout.

A combined power repayment study was provided in the amended filing which includes the repayment of both the Falcon and Amistad Dams. The study shows the expected on-line date for the Falcon-Amistad System to be October 1, 1982. The estimated investment to be repaid as of that date is shown below:

Investment	Interest rate (In percent)	Amount
Power investment at Falcon	2½	$4,980,613
Initial power investment at Amistad	2½	2,887,751
Interest on initial Amistad power investment	2½	900,626
New Amistad construction costs	7	27,980,000
Total investment to be repaid		36,767,030

The proposed contract, in practical effect, guarantees the repayment of the System power investment and costs over a 50 year period. The annual payments which would be required of the Cooperatives are not dependent on the amount of power being made available from the System for any year; nor is there any power storage in either project. The daily demands for water from these projects for other purposes will dictate when and how much water will be available for power purposes. Consequently, the flow available for power will experience large daily and seasonal fluctuations.

The Falcon Dam Act of 1954, as amended, provides that the rate schedule for the sale of power and energy generated at Falcon and Amistad Dams be confirmed and approved by the Commission. Section 2 of the act authorizing the construction of the Amistad Dam (P.L. 86-605) provides that hydroelectric power generating facilities at the project must be constructed, operated and maintained on a self-liquidating basis.

The contract obligates the Cooperatives to repay all of the costs allocated to power of the Falcon and Amistad Projects, as well as the operation, maintenance, and administrative costs associated therewith. Because of the statutory restrictions on the use of the water from the Falcon and Amistad Dams, it is doubtful that the power from the projects could be independently marketed and still fulfill the repayment requirement of the Falcon Dam Act of 1954 and the self-liquidating requirement of the Amistad authorization act.

Review of the contract indicates that the procedures for collection of the costs of operating the projects will enable the Government to recover its investment in power facilities over a reasonable period of time. However, to insure that result, we will require Interior to file with this Commission or any other agency having jurisdiction over this matter, a request for approval of any change in the rates or procedures for the recovery of the Government's investment or at the conclusion of each 5 year period, whichever occurs first.

The Commission finds: 1. Good cause exists to confirm and approve the rates and charges contained in Reclamation's contract with the Cooperatives.

2. Good cause exists to require further future requests for confirmation and approval of Reclamation's rates and charges to the Cooperatives as hereinafter ordered.

The Commission orders: (A) The rates and charges contained in Interior's filings submitted to this Commission on August 20, 1976, July 12, 1977, and August 10, 1977, are hereby confirmed and approved.

(B) The confirmation and approval of the rates and charges in Paragraph (A) above are hereby effective for the period from the commencement of service of the Falcon-Amistad System for 5 years or until Interior proposes to change the rates, whichever occurs first.

(C) At the conclusion of each 5 year period or prior to any proposed rate change, Interior shall submit to this Commission a request for confirmation and approval of its rates and charges to the Cooperatives.

By the Commission.[2]

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24001 Filed 8-18-77;8:45 am]

[Docket No. CP77-553]

EL PASO NATURAL GAS CO.

Application

AUGUST 15, 1977.

Take notice that on August 5, 1977, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP77-553 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the retention in place of the existing loop pipeline, meter and dehydration facilities located in Washita County, Oklahoma, for use as the need may arise, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is indicated that by letter dated June 16, 1977, Applicant notified the Commission that on June 6, 1977, it had completed the construction and commenced operation of approximately 5.83 miles of $6^5/_8$-inch O.D. pipeline, with appurtenances, looping the existing $4^1/_2$ inch O.D. South Zybach area Supply Lateral C-6 pipeline, $4^1/_2$ inch O.D. and $6^5/_8$ inch O.D. meter runs located at the existing authorized Washita Exchange Point and a 20 Mcf per day capacity central dehydration unit.

Said loop pipeline, meter and dehydration facilities were required to be immediately constructed and placed in operation due to the emergency conditions encountered upon completion of the Floyd Niece No. 1 well located in Washita County, Oklahoma, it is said. It is indicated that in drilling the Floyd Niece No. 1 well, Applicant encountered fluctuating high pressures and, in order to prevent the well from blowing out, had to flare immediately the gas produced from the well on an emergency basis, commencing April 29, 1977. Subsequently, on May 2, 1977, the flaring of natural gas produced from said well was terminated by the connection of the well into Applicant's existing Supply Lateral C-6 pipeline, it is indicated. Applicant states that gas volumes produced from the Floyd Niece No. 1 well are delivered to Natural Gas Pipeline Company of America (Natural) at the Washita Exchange Point in accordance with the authorized Gas Exchange Agreement dated September 24, 1973, as amended, between Applicant and Natural. It is indicated that due to the limited capacity available to Applicant through utilization of the $4^1/_2$ inch O.D. Supply Lateral C-6 pipeline, production of the immediate gathering system area form other wells was required to be reduced to permit the uncontrolled production from the Floyd Niece No. 1 well to enter such pipeline and to alleviate high operating pressures occurring on the pipeline in transporting volumes of gas to the Washita Exchange Point during the emergency conditions.

Applicant states that as an expedient means of eliminating the high pressure problems incurred with the attachment of the Floyd Niece No. 1 well and to assure that additional flaring would not be required, Applicant, on May 5, 1977, commenced the construction of approximately 5.83 miles of $6^5/_8$-inch loop pipeline, $4^1/_2$-inch O.D. and $6^5/_8$-inch O.D. meter runs and a 20 Mcf per day capacity central dehydration unit. Applicant further states that during the construction period, the flowing pressure and volume decrease on the Floyd Niece No. 1 well allowing normal, controlled production and gathering operations to be continued. Applicant asserts that although stabilized production from said well was established much more rapidly than anticipated, there was no assurance that a reoccurence of uncontrolled production from the well would not occur; therefor, Applicant completed the installation of the said loop pipeline, meter and dehydration facilities.

It is stated that the requested authorization would permit Applicant to retain the additional flexibility, initially provided by the installation of emergency facilities, available for the transportation of volumes of gas which it has contracted to purchase in the immediate gathering area without the construction of additional facilities.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 8, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24008 Filed 8-18-77;8:45 am]

[Docket No. CP76-464]

EQUITABLE GAS CO.

Amendment

AUGUST 15, 1977.

Take notice that on July 29, 1977, Equitable Gas Company (Equitable), 420 Boulevard of the Allies, Pittsburgh, Pennsylvania 15219, filed in Docket No. CP76-464 an amendment to its application filed in this docket pursuant to Section 7 of the Natural Gas Act proposing the renewal of 7.5 miles of 16-inch pipeline with new 16-inch pipe in lieu of the 20-inch pipe originally proposed, all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Equitable states that by the application in this proceeding it seeks authorization to renew and replace certain transmission lines in Greene and Washington Counties, Pennsylvania, and in Monongalia County, West Virginia, and to abandon certain minor sections of its transmission facilities also located in those counties. Equitable states that the purpose of its proposals is to achieve compliance with Department of Transportation Regulations, to provide it with a more efficient transmission system, to reduce maintenance costs, to maintain delivery capacity, and to improve reliability and safety.

Equitable asserts that because of a proposed interconnection with Columbia Gas Transmission Corporation at Waynesburg, Pennsylvania, it will be feasible to replace the existing 16-inch lines with new 16-inch pipe in lieu of 20-inch pipe as originally proposed. Additionally, it is indicated that only 4.0 miles, instead of 4.6 miles, of Line H-117 would be renewed because the additional 0.6 mile of pipeline is not to be used to transport high pressure gas.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before September 9, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the

Commission's Rules. Persons who have heretofore filed need not file again.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-196]

FLORIDA POWER CORP.

Certification of Settlement Agreement and Motion for Reassessment of Filing Fee

AUGUST 11, 1977.

Take notice that Presiding Administrative Law Judge Samuel Kanell on June 27, 1977 certified to the Commission a Settlement Agreement, dated June 23, 1977, among Florida Power Corporation (Florida) and 13 intervening wholesale customers (Customers). Florida indicates that the Settlement Agreement provides for new rate schedules containing revised rate levels and revised terms and conditions.

Along with the Settlement Agreement, Florida and Customers submitted a Motion requesting that the Secretary reassess the filing fee, which Florida and Customers purport to be excessive because said fee is based on an inflated statement of the amount of the rate increase.

Comments on the Settlement Agreement and the Motion will be taken into consideration in the Commission's determination of the proceeding. Comments may be filed with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C., 20426, on or before August 26, 1977.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-545]

GULF POWER CO.

Initial Rate Filing

August 15, 1977.

Take notice that Gulf Power Company (Gulf), on August 8, 1977 tendered for filing as an Initial Rate Schedule a contract between it and the Southeastern Power Administration (SEPA), United States Department of the Interior. Gulf states that the contract provides for exchange of electric power between Gulf and SEPA, including provision of capacity and energy for the account of SEPA to Gulf's REA Electric Cooperative wholesale customers.

Gulf Power requests waiver of the Commission's notice requirements to allow an effective date of August 1, 1977.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 31, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. E-8121]

GULF STATES UTILITIES CO.

Compliance Filing

AUGUST 11, 1977.

Take notice that Gulf States Utilities Company (Gulf) on July 29, 1977 tendered for filing rate schedules and billing information regarding the settlement agreement between Gulf and Sam Rayburn Dam Electric Cooperative, Inc. Gulf indicates that the filing is in compliance with the Commission order in the above-noted docket, dated June 27, 1977.

Comments will be considered by the Commission in determining action taken in the proceeding. Comments may be filed with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before August 26, 1977.

KENNETH F. PLUMB,
Secretary.

[Docket No. ES77-51]

IOWA ELECTRIC LIGHT AND POWER CO.

Application

AUGUST 11, 1977.

Take notice that on August 4, 1977, the Iowa Electric Light and Power Company (Applicant) filed an application pursuant to Section 204 of the Federal Power Act with the Federal Power Commission seeking authority to issue 150,000 shares of Common Stock.

Applicant is incorporated under the laws of the State of Iowa and is authorized to do business in the States of Iowa, Minnesota, Colorado and Nebraska with its principal business office at Cedar Rapids, Iowa. Applicant is engaged primarily in the generation, transmission and sale at retail of electric energy in 55 counties in the State of Iowa.

The Common Stock is to be issued commencing on approximately September 15, 1977 pursuant to the Company's Employee Stock Ownership Plan. The Common Stock is subject to the prior rights and preferences of the existing outstanding classes of Cumulative Preferred Stock and to the prior rights and preferences of the existing outstanding classes of Cumulative Preference Stock. The price to the Company for the Common Stock will be the market value as determined in the Plan.

According to the Applicant, the purpose for which the Common Stock is to be issued is to provide without cost to the employees shades in the Company's Common Stock as an additional benefit to such employees in an amount equal to the additional amount of Federal investment tax credit available to the Company (and affiliates) solely by reasons of the Company's contribution of an amount to the Plan.

Any person desiring to be heard or to make any protest with reference to this Application should on or before August 26, 1977, file with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, petitions or protests in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The Application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-543]

KANSAS CITY POWER & LIGHT CO.

Filing of Contract

AUGUST 11, 1977.

Take notice that on August 8, 1977, Kansas City Power & Light Company ("KCPL") tendered for filing a Cooperative Wholesale Firm Power Contract dated July 7, 1977, between KCPL and United Electric Cooperative, Inc. KCPL requests an effective date thirty (30) days after filing. KCPL indicates that the Contract terminates the Cooperative Firm Power Contract, dated April 2, 1968, KCPL Rate Schedule FPC No. 68, and provides for rates and charges for wholesale firm power service by KCPL to United Electric Cooperative, Inc.

KCPL states that the proposed rates are KCPL's rates and charges for similar service under schedules previously filed by KCPL with the Federal Power Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 31, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commis-

[Docket No. ER77-427]

MINNESOTA POWER & LIGHT CO.

Order Accepting for Filing and Suspending Proposed Rate Increase Filing, Initiating Hearing and Establishing Procedures; Correction

The second sentence, page 35689, should be changed to read as follows: MPL also filed a rate increase for transmission service applicable to one transmission service customer.[1]

Footnote 4 of page 35689 should be changed to read as follows:

[1] The transmission service customer is the City of Wadena which is served under Rate Schedule FPC No. 120.

Published in the FEDERAL REGISTER on July 11, 1977, 42 FR (35689).

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24004 Filed 8-18-77;8:45 am]

[Docket No. CP77-545]

NORTHERN NATURAL GAS CO.

Application

AUGUST 15, 1977.

Take notice that on August 4, 1977, Northern Natural Gas Company (Applicant), 2223 Dodge Street, Omaha, Nebraska, filed in Docket No. CP77-545, an application to the Federal Power Commission pursuant to Section 7(c) of the Natural Gas Act, as amended, for a Certificate of Public Convenience and Necessity authorizing Applicant to construct and operate a pipeline interconnect, measuring station and compressor station between pipeline facilities of Columbia Gulf Transmission Company (Columbia Gulf) and Trunkline Gas Company (Trunkline) to be located in Arcadia Parish, Louisiana. Northern also requests the Commission to grant a Temporary Certificate for the proposed construction and operation, all as more fully set forth in the Application on file with the Commission and open to public inspection.

Northern and Columbia Gulf are parties to certain transportation agreements covering the transportation of Applicant's Offshore Louisiana reserves to onshore facilities of Columbia Gulf near Egan, Louisiana. Under terms of a transportation agreement presently being negotiated between Northern and Trunkline, Trunkline will transport offshore gas for the account of Northern from Egan to a point near Longville, Louisiana.

The proposed facilities, to be designated as the Egan Interconnect and Compressor Station, will consist of 2,800 feet of 16-inch pipeline, a measuring station and 1,000 H.P. electric motor driven compressor. The Egan Interconnect and Compressor Station will provide the means necessary for transference of Northern's offshore gas from Columbia Gulf to Trunkline for further transportation and eventual redelivery to Northern by Panhandle Eastern Pipe Line Company at Mullinville, Kansas. The estimated cost of the facilities is $926,850.

Any person desiring to be heard or to make any protest with reference to said application, on or before September 9, 1977, should file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24005 Filed 8-18-77;8:45 am]

[Docket Nos. CP75-341, CP75-342]

NORTHWEST PIPELINE CORP.

Petition To Amend

AUGUST 12, 1977.

Take notice that on July 29, 1977, Northwest Pipeline Corporation (Petitioner), P.O. Box 1526, Salt Lake City, Utah 84110, filed in Docket Nos. CP75-341 and CP75-342 a petition to amend pursuant to Section 3 of the Natural Gas Act the Commission's order of December 17, 1976 (56 FPC ——) issued in the instant dockets so as to authorize the continued importation of natural gas from Canada at a price of $2.16 (U.S.) per Mcf, effective September 21, 1977, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is indicated that the gas is purchased by Petitioner from Westcoast Transmission Company Limited (Westcoast), and that Petitioner has been authorized to import from Canada 809,200 Mcf per day of gas at the Sumas, Washington (Sumas) import point under an agreement dated October 10, 1969, and 151,732 Mcf per day at the Kingsgate, British Columbia (Kingsgate) import point under an agreement dated September 23, 1960.

It is stated that Westcoast exports said volumes of gas pursuant to Export Licenses issued to it by the National Energy Board of Canada (NEB) and that such licenses have been amended to reflect various directives of the NEB as to the pricing provisions of such licenses. In accordance with the NEB price changes the Commission by various orders has authorized Petitioner to continue the subject imports at the increased border prices of $1.40 and $1.60 per Mcf, $1.80 per Mcf and $1.94 per Mcf, it is indicated.

It is asserted that the NEB announced that Order-In Council P.C. 1977-1915 dated July 7, 1977, established an increase in the export price for natural gas to $2.16 (U.S.), effective September 21, 1977. Petitioner states that without the grant of the authorization requested and the corresponding rate relief, Petitioner would be financially incapable of paying its Canadian supplier and thereby face the loss of its entire Canadian gas supply which would result in an adverse impact on those states in the Rocky Mountain and Pacific Northwest areas relying on Petitioner for all or a portion of their natural gas requirements.

Accordingly, Petitioner requests authorization to continue the importation of said volumes of natural gas from Canada at the Sumas and Kingsgate import points at an increased cost of $2.16 (U.S.) per Mcf.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before August 31, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24016 Filed 8-18-77;8:45 am]

[Docket Nos. ER77-127, ER77-306, ER77-215, and ER77-502]

OKLAHOMA GAS & ELECTRIC CO.

Order Accepting for Filing and Suspending Rate Increases, Granting Intervention, Setting Price-Squeeze Issue for Hearing, and Consolidating Proceedings

AUGUST 11, 1977.

On July 8, 1977, Oklahoma Gas and Electric Company (OG&E) tendered for filing a proposed Electric Service Agreement for the City of Geary (Geary) and for the City of Prague, Oklahoma (Prague). These Agreements are to supersede existing Agreements providing wholesale electric service to these municipalities.

Notice of the filing was issued on July 20, 1977, with protests or petitions to intervene due on or before July 29, 1977. On July 28, 1977, Prague filed a Protest, Petition to Intervene, Motion to Reject Rate Filing Pursuant to Section 205 of the Federal Power Act and Motion To Consolidate.

The Agreements follow the form of those filed by OG&E in Docket No. ER77-127, for service to its municipal customers. Prague's Motion to Reject contains the same argument that it made in Docket No. ER77-127, namely that OG&E may not proceed simultaneously under Sections 205 and 206 of the Federal Power Act. By order issued March 24, 1977, in Docket No. ER77-127, the Commission granted rehearing in order to reconsider, inter alia, the same argument. Therefore, we shall defer discussion of Prague's contention pending a further order in Docket No. ER77-127. Docket No. ER77-127 shall be consolidated with this docket as hereinafter ordered. The Commission shall accept for filing and suspend OG&E's submittal as hereinafter ordered.

OG&E requested effective dates of August 8, 1977 for Geary and September 4, 1977, for Prague. By letter filed August 8, 1977, OG&E requested that the proposed effective date for Geary be postponed until August 12, 1977.

Several other outstanding dockets exist relating to OG&E's service to wholesale customers. We shall order consolidation of all these dockets to promote the efficiency of the administrative process.

Prague raises a "price-squeeze" allegation[1] in its filing. We will direct the Administrative Law Judge to convene a prehearing conference within 15 days from the date of this order for the purpose of hearing the petitioner's request for data necessary to present its prima-facie showing on the price-squeeze issue.

The Commission finds:

(1) Good cause exists to accept for filing the proposed agreements submitted by OG&E, and suspend the rates contained therein as hereinafter ordered and conditioned.

(2) Good cause exists to accept the Petition to Intervene of the City of Prague.

(3) Good cause exists to establish "price-squeeze" procedures to effectuate the Commission's policy announced in Order No. 563.

(4) Good cause exists to consolidate Docket No. ER77-127, ER77-306, ER77-215, and ER77-502.

The Commission orders:

(A) Pursuant to the authority contained in the Federal Power Act, The Commission's Rules of Practice and Procedure and the Regulations under the Federal Power Act, a public hearing shall be held concerning the justness and reasonableness of the rates proposed by OG&E in Docket No. ER77-502.

(B) Pending a hearing and decision thereon, proposed rates tendered in Docket No. ER77-502 are hereby accepted for filing and suspended to be come effective subject to refund for the City of Geary on August 13, 1977, and for the City of Prague on September 5, 1977.

(C) The proceedings in Docket Nos. ER77-127, ER77-306, ER77-215, and ER77-502 are hereby consolidated for purposes of hearing and decision.

(D) The petition to intervene of the City of Prague in Docket No. ER77-502 is hereby granted; *Provided, however,* that participation of such intervenors shall be limited to matters set forth in the petitions to intervene; and *Provided, further,* that the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(E) The Administrative Law Judge shall convene a prehearing conference within 15 days from the date of this order for the purpose of hearing the Prague's request for data required to present its case, including a prima facie showing, on the price-squeeze issue. OG&E shall also be required to respond to the discover requests authorized by the Administrative Law Judge within 30 days and the Prague shall file its case-in-chief on the price-squeeze issue within 30 days after OG&E's response.

(F) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.[2]

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24012 Filed 8-18-77;8:45 am]

[1] *F.P.C. v. Conway Corporation*, 426 U.S. 271 (1976).

[Docket No. ER77-544]

PACIFIC GAS & ELECTRIC CO.

Proposed Changes in Rates and Charges

AUGUST 15, 1977.

Take notice that on August 8, 1977, Pacific Gas and Electric Company (PG&E) tendered for filing proposed changes in rates and charges for electric resale service to the City and County of San Francisco in its FPC Electric Tariff, Original Volume No. 1. PG&E indicates that the proposed rate change is intended only to offset changes resulting from certain modifications to PG&E's fuel cost adjustment as proposed in FPC Docket No. ER76-319. PG&E states that the change in rates will result in no net change in revenues from jurisdictional sales and services. PG&E requests waiver of the Commission's notice requirements to allow for an effective date of January 1, 1977, concurrent with the effective date of the settlement rates in Docket No. ER76-319.

According to PG&E copies of the filing were served upon the Public Utilities Commission of the City and County of San Francisco and the California Public Utilities Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 31, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-221]

POTOMAC EDISON CO.

Compliance Filing

AUGUST 11, 1977.

Take notice that the Potomac Edison Company (Edison) on May 2, 1977, tendered for filing revisions to Original Sheets No. 9, 12, 15, and 21 to FPC Electric Tariff, First Revised Volume No. 1. Edison also tendered for filing Amendment No. 2 to the Electric Service Agreement between Edison and the Town of Front Royal, Amendment No. 5 to the Electric Service Agreement between Edison and the Borough of Chambersburg, and Amendment No. 7 to the Electric Service Agreement between Edison and the City of Hagerstown.

Edison states that all of the aforementioned revised sheets and contract amendments are being filed in conformance with the Commission's Order Accepting Settlement and Resolving Dispute in the above-noted proceeding, dated March 21, 1977.

Comments will be considered by the Commission in determining the outcome of the proceeding. Any person desiring to comment should file on or before August 24, 1977, with the Federal Power

V 42 161 AUG 19 77 UM V

Commission, 825 North Capitol Street NE., Washington, D.C. 20426.

[Docket No. CP-77-546]

SOUTHWEST GAS CORP.

Application

AUGUST 15, 1977.

Take notice that on August 4, 1977, Southwest Gas Corporation (Applicant), P.O. Box 15015, Las Vegas, Nevada 89114, filed in Docket No. CP77-546 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of two tap facilities at Franktown Road on the North Lake Tahoe Lateral of Applicant's northern Nevada transmission system, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant seeks authorization to construct and operate a minor tap on its North Lake Tahoe Lateral known as Shaheen Tap. It is stated that this tap, with appurtenant facilities, would enable Applicant to deliver volumes of gas to one residential customer on Franktown Road. Facilities downstream of the tap would be constructed, and actual sales of gas would be made pursuant to Applicant's existing State of Nevada authorization, it is said.

Applicant also seeks authorization to construct and operate a minor tap on its North Lake Tahoe Lateral known as Loeb Tap. Applicant states that this tap, with appurtenant facilities, would enable it to deliver volumes of gas to one residential customer on Franktown Road, and facilities downstream of the tap would be constructed, and actual sales of gas would be made pursuant to Applicant's existing State of Nevada authorization.

It is stated that the volumes of gas to be delivered to each residential unit would be approximately .45 Mcf on an average day with peak day requirements of 1.26 Mcf, equalling about 167 Mcf annually and that the volumes of gas delivered to each residential unit would be solely for Priority 1 uses. Applicant states that its pipeline facilities presently have adequate capacity to make the contemplated deliveries.

Applicant indicates that the cost of the Shaheen Tap with appurtenant facilities would be approximately $2,000 and that the cost of the Loeb Tap with appurtenant facilities would be approximately $1,729. Both taps would be financed by refundable advances made to Applicant by the residents, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 8, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24009 Filed 8-18-77;8:45 am]

[Docket No. CP77-548]

TEXAS EASTERN TRANSMISSION CORP.

Application

AUGUST 15, 1977.

Take notice that on August 5, 1977, Texas Eastern Transmission Corporation (Applicant), P.O. Box 2521, Houston, Texas 77001, filed in Docket No. CP77-458 an application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of up to 30 dekatherms (dths) equivalent of natural gas per day for NCNG Exploration Corporation (NCNG Exploration), a wholly owned subsidiary of North Carolina Natural Gas Corporation (North Carolina) a direct customer of Transcontinental Gas Pipe Line Corporation (Transco), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport for NCNG Exploration up to 30 dt equivalent of natural gas per day pursuant to proposed Rate Schedule TS-2. Applicant states that under the terms of proposed Rate Schedule TS-2, it would transport on an interruptible, best efforts basis, a maximum daily transportation quantity (MAXDTQ) to be agreed upon by a service agreement dated July 7, 1977, between Applicant and NCNG Exploration.

Applicant states that North Carolina has acquired from its producing subsidiary gas supplies of approximately 30 dths per day in the South Gist Field, Newton County, Texas which gas would be delivered to Applicant at its existing interconnection located in Newton County, Texas for redelivery to Transco at the existing point of interconnection in Beauregard Parish, Louisiana for delivery to North Carolina.

Applicant indicates that the transportation rate which it proposes to charge for transportation service under the TS-2 rate is an amount equal to Applicant's rate for deliveries in the particular zone at which the proposed delivery would be made, based on the 100 percent DCQ load factor level rate, less applicant's purchased gas costs and fuel cost and is identical to Applicant's Rate Schedule TS rate. Applicant states that the deliver volumes would be reduced 3 percent to offset volumes used by Applicant in the performance of the transportation service, and pursuant to the proposed Rate Schedule, NCNG Exploration would reimburse Applicant for any cost of construction that may be required to receive the gas supplies.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 9, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to

the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-24010 Filed 8-18-77;8:45 am]

[Docket No. CP77-547]

TRANSCONTINENTAL GAS PIPE LINE CORP.

Application

AUGUST 15, 1977.

Take notice that on August 4, 1977, Transcontinental Gas Pipe Line Corp. (Applicant), P.O. Box 1396, Houston, Tex. 77001, filed in Docket No. CP77-547 an application pursuant to Section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the rendition of an additional 3,000,000 dekatherms (dt) equivalent of temporary natural gas storage service to its customers during the 1977-78 winter heating season, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant indicates that additional storage service on a best efforts basis is available for the coming winter from two of Applicant's storage fields; (1) 2,000,000 dt of authorized but unallocated capacity would be available from Applicant's newly-acquired Hester-Storage Field; and (2) an additional 1,000,000 dt is available from the Washington Storage Field in excess of both the presently authorized service under the Rate Schedule WSS and the Rate Schedule TSS-1 service due to the fact that experience so far this summer indicates that the existing field facilities are capable of injecting such additional quantity. No field facilities other than those presently authorized, and no additional base gas, would be required to render the proposed service, Applicant indicates.

It is stated that the proposed TSS-2 storage service is to be subordinate to Applicant's obligations under authorized storage services from the two fields; that is, the Storage and Exchange Agreement between Applicant and Mid Louisiana in the Hester Field, and Rate Schedule WSS and TSS-1 in the Washington Field, and would also be subordinate to Applicant's system flexibility requirements associated with the Hester Field. Applicant states that injections into storage are contemplated to commence upon receipt of the requisite authorization and continue until November 1, 1977, and that withdrawals are to commence at that time and would terminate March 31, 1978, but may continue for an additional fifteen days if necessary to effectuate redelivery of the temporary storage quantities.

It is indicated that Applicant has offered the proposed temporary storage service to its customers at a rate of 30.0 cents per dt, and that such rate is divided equally into injection and withdrawal charges, and Applicant would be provided a total of 2 percent (1.5 percent on injection and 0.5 percent on withdrawal) of the quantities as fuel.

Applicant indicates that the customers desiring this temporary storage service and the proposed storage quantity allocation for each customer (based upon a proration of its respective requested quantity to the total requested quantities) are as follows:

Customer:	*Storage quantity dekatherms*
City of Alexander City, Ala	27,000
Atlanta Gas Light Co	893,000
CNG Transmission Co	156,000
Eastern Shore Natural Gas Co	18,000
City of Lexington, N.C	12,000
Pennsylvania Gas & Water Co	447,000
Philadelphia Gas Works	179,000
Public Service Co. of North Carolina, Inc	134,000
Public Service Electric & Gas Co	893,000
City of Shelby, N.C	22,000
City of Union, S.C	9,000
Union Gas Co	210,000
Total	3,000,000

Any person desiring to be heard or to make any protest with reference to said application should on or before September 8, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

TRANSCONTINENTAL GAS PIPE LINE CORP.

Further Extension of Time

AUGUST 10, 1977.

On August 3, 1977, Transcontinental Gas Pipe Line Corp. (Transco) filed a motion to further extend the time for filing the information required by Ordering Paragraph (B) of Commission Opinion No. 801, issued May 31, 1977, in the above designated proceeding.

By Opinion No. 801-A, opinion and order on rehearing, issued July 29, 1977, Transco was granted an extension of time to and including August 13, 1977.

Upon consideration, notice is hereby given that a further extension of time is granted to and including September 15, 1977, within which Transco shall comply with Ordering Paragraph (B) of Opinion No. 801.

UNITED GAS PIPE LINE CO.

Order Accepting Revised PGA Rates for Filing, Initiating Hearing, Granting Intervention, and Establishing Procedures

AUGUST 11, 1977.

On May 16, 1977, United Gas Pipe Line Co. (United) tendered for filing proposed increased PGA rates to become effective on July 1, 1977. On June 30, 1977, the Commission suspended the proposed

V42161 AUG 19 77 UM

rates for one day until July 2, 1977, and required United to file revised rates excluding certain claimed costs found by the Commission not to be justified. United on July 12, 1977, filed revised rates in accordance with the order of June 30.

On July 12, 1977, Brooklyn Union Gas Co. (Brooklyn Union) and Elizabethtown Gas Co. (Elizabethtown) jointly filed an untimely petition to intervene in the proceeding and requested that "an investigation of United's proposed PGA rate increase be undertaken promptly in order to correct the unduly discriminatory method by which United has allocated its emergency gas purchase costs, both as between its jurisdictional and non-jurisdictional markets, and as among its individual jurisdictional customers." A petition to intervene was also filed on July 15, 1977, by Public Service Electric and Gas Co. (Public Service).

In support of its request for an investigation, Brooklyn Union states as follows:

"In ordering paragraphs B through E of its order of June 30, 1977, the Commission has required United to make certain adjustments to the rates proposed to be charged, placed conditions upon its acceptance of the filing and directed United to supply certain additional information with respect to the cost of emergency purchases. At this time, Brooklyn Union and Elizabethtown take no position with respect to these matters. However, Petitioners desire to bring to the Commission's attention another aspect of United's proposed PGA treatment of emergency purchases which does not appear to have been expressly addressed by June 30 order, and which we believe is unduly discriminatory and in violation of the Natural Gas Act.

As part of its PGA filing, United proposes to recover the costs of emergency purchases made by it during the period October 1, 1976 through March 31, 1977.

* * * * *

Petitioners are informed and believe that United proposes to recoup a disproportionately large share of these costs from all of its jurisdictional customers, notwithstanding the fact that Texas Eastern (and, therefore, Texas Eastern's customers, including Petitioners) and, we believe, several other jurisdictional customers of United received little or no additional gas as a result of United's emergency purchases.

Under United's current curtailment plan, the principal gas supply beneficiaries of these emergency purchases have apparently been United's nonjurisdictional direct sale customers. However, Petitioners believe that under United's filing, these nonjurisdictional customers have been allocated a disproportionately small share of the cost of United's emergency purchases. Petitioners submit that United's attempt to confer the gas supply benefits of emergency purchases upon its nonjurisdictional customers while shifting the cost burden of such purchases to its jurisdictional customers constitutes undue discrimination and is unlawful under the Natural Gas Act.

Petitioners, as indirect distributor customers of United, do not have the resources to secure and analyze the information necessary to a determination of the matters adressed herein. However, Petitioners believe that a substantial number of direct and indirect customers of United will be adversely affected if United's unlawful rate and cost allocation practices are permitted to stand."

On July 29, 1977, United filed an answer in opposition to Brooklyn Union's request for an investigation. United argues that Brooklyn Union's request represents a collateral attack on United's PGA clause, that the Commission's policy is to permit emergency gas costs to be flowed through by means of PGA rate adjustments computed on a rolled-in basis, and that Brooklyn Union's position is inequitable and unreasonable because it would require the emergency costs to be allocated on an incremental basis.

It is true that the Commission's general policy is to permit the flow through of the cost of emergency gas suppliers under pipeline PGA clauses on a rolled-in basis. However this procedure contemplates that there is a reasonable correlation between service received by a pipeline's customers in relation to their cost responsibility. Brooklyn Union argues that its cost responsibility under United's proposal is greatly in excess of any benefit it received from the availability to United of the subject emergency suppliers.

The Commission is not able to establish the necessary relationship between costs and benefits solely by reference to the present pleadings and representations of the parties. The Commission finds that a hearing should be held for the purpose of investigating the allegations made by Brooklyn Union in its filing of July 12th. United shall provide all necessary data for purposes of the subject investigation and hearing. Pending the hearing and decision, the Commission shall accept the revised rates filed by United on July 12, 1977, to be effective on July 2, 1977, subject to refund.

The Commission finds that Brooklyn Union, Elizabethtown, and Public Service have demonstrated an interest in this proceeding and that good cause exists to grant their petitions to intervene.

The Commission finds: It is necessary and proper in the public interest and in carrying out the provisions of the Natural Gas Act that a hearing be held for the purpose of investigating the allegations made against United by Brooklyn Union.

The Commission orders: (A) Pursuant to the authority of the Natural Gas Act, particularly sections 4, 5, 7, 14, 15, and 16 thereof, and the Commission's rules and regulations, a hearing shall be held in this proceeding for the purpose of investigating and determining the allegations contained in Brooklyn Union's filing of July 12, 1977.

(B) A Presiding Administrative Law Judge, to be designated by the Chief Administrative Law Judge pursuant to 18 CFR 3.5(d), shall convene a prehearing conference in this proceeding on September 8, 1977, at 10:00 a.m. EST, in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, for the purpose of establishing procedures for the investigation and hearing to be held pursuant to this order. The Presiding Judge shall be authorized to modify all procedural dates and to establish further procedures as may in his judgment be required for purposes of the investigation and hearing pursuant to this order. The Presiding Judge shall also be authorized to rule upon all motions except motions to consolidate, sever, or dismiss, as provided for in the rules of practice and procedure.

(C) Pending hearing and decision, the revised rates filed herein by United on July 12, 1977, are accepted for filing and permitted to become effective on July 2, 1977, subject to refund.

(D) Brooklyn Union, Elizabethtown, and Public Service are permitted to intervene in this proceeding, subject to the Commission's rules and regulations.

(E) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.[1]

KENNETH F. PLUMB,
Secretary.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

[Designation Number A493]

NEBRASKA

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in the following Nebraska Counties as a result of adverse weather conditions shown on the attached sheet:

Box Butte	Garden
Brown	Morrill
Cheyenne	Rock
Deuel	Scotts Bluff
Fillmore	

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Public Law 94-68, and the provisions of 7 CFR 1832.3 (b) including the recommendation of Governor J. James Exon that such designation be made.

Applications for emergency loans must be received by this Department no later than October 3, 1977, for physical losses and May 3, 1978, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

[1] Before Commissioners: Charles B. Curtis, Chairman; Don S. Smith, and Georgiana Sheldon.

Done at Washington, D.C., this 16th day of August, 1977.

DENTON E. SPRAGUE,
Acting Administrator,
Farmers Home Administration.

Nebraska (9 counties)

County	Type of disaster	Incidence periods
Box Butte	Hail, rain, flood and wind	May 6, 25, 1977, and June 8, 20, 1977.
Brown	Hail, wind, and flood	July 9, 1977.
Cheyenne	Hailstorms	May 14 and 26, 1977, June 9, 20, and 28, 1977.
Deuel	Hailstorms	May 18 and July 7 and 9, 1977.
	Flood and heavy rains	May 20, 1977.
Fillmore	Hailstorms	June 12 and 17, 1977.
Garden	Hailstorms, high winds, and heavy rains.	May 18, June 22 and July 9, 1977.
Morrill	Hailstorms	May 6, June 8, 13, 14, 18, and 22, 1977, and July 9, 1977.
	Heavy rains and flood	May 26, 1977, and July 9, 1977.
	Tornado	June 14, 1977.
Rock	Hail, wind, and flood	July 9, 1977.
Scotts Bluff	High winds, severe hail, and heavy rains.	June 9, 14, 18, and 20, 1977.
	Tornado	June 14, 1977.

Federal Grain Inspection Service

GRAIN STANDARDS

Tennessee Grain Inspection Point

Statement of considerations. On June 20, 1977, a notice was published in the FEDERAL REGISTER (42 FR 31178-31179) announcing that (1) the Chattanooga Grain Inspection Department requested that its designation under section 7(f) of the U.S. Grain Standards Act (7 U.S.C. 79(f)) to operate as an official agency at Chattanooga, Tennessee, be canceled, and (2) Richard G. Lyons applied for designation in accordance with the Act and section 26.96 of the regulations (7 CFR 26.96) to operate the official agency at Chattanooga, Tennessee.

Interested persons were given until July 20, 1977, to submit written views and comments on the requested cancellation and/or to make application to become the official agency at Chattanooga, Tennessee.

No comments or additional applications were received with respect to the June 20, 1977, notice in the FEDERAL REGISTER.

After due consideration of all relevant matters, the designation of the Chattanooga Grain Inspection Department to operate as an official agency at Chattanooga, Tennessee, is canceled and Mr. Richard G. Lyons is hereby designated on an interim basis to operate the official agency at Chattanooga, Tennessee.

As a point of clarification, it should be noted that the United States Grain Standards Act (7 U.S.C. 71 et seq.), hereinafter referred to as the Act, has been amended by Public Law 94-582, effective November 20, 1976, to extensively modify the official inspection system. The amended Act provides that the Administrator of the newly created Federal Grain Inspection Service (FGIS), after conducting investigations and other studies, will designate official agencies at the various interior points. In implementing these provisions, FGIS is currently in the process of reviewing the designations of all agencies or persons presently designated to provide official inspection services. The amended Act further provides that existing agencies may continue to operate without a designation under the new law until the Administrator either grants or denies such designation to them or sets a period of time for their termination, not to exceed 2 years from the effective date of the amended Act, provided such agencies pay any required fees to FGIS.

Accordingly, the designation which is the subject of this notice, is on an interim basis and will continue until the Administrator of FGIS either grants or denies an official designation under the amended Act to the recipient or sets a period of time for its termination.

(Sec. 7, 82 Stat. 764, as amended 90 Stat. 2870, 7 U.S.C. 79; Sec. 3A, 90 Stat. 2868, 7 U.S.C. 75a.)

Effective date: This notice shall become effective August 19, 1977.

Done in Washington, D.C., on: August 11, 1977.

D. R. GALLIART,
Acting Administrator.

Food Safety and Quality Service

DELEGATION OF AUTHORITIES

By order dated March 14, 1977, notice of which was published in the FEDERAL REGISTER April 18, 1977, (42 FR 20165) the Secretary of Agriculture established the Food Safety and Quality Service in the Department of Agriculture and assigned to it the functions and responsibilities formerly assigned to the Animal and Plant Health Inspection Service relating to meat and poultry inspection activities, including voluntary inspection programs under the Agricultural Marketing Act of 1946, as amended (except with respect to animal byproducts), and functions under the Humane Slaughter Act; and functions and responsibilities formerly assigned to the Agricultural Marketing Service relating to meat and poultry grading and standardization; the inspection and grading of dairy products; standardization and inspection for fresh and processed fruit and vegetable products; and those functions authorized by the Egg Products Inspection Act, by Section 32 of the Act of August 24, 1935, as supplemented by the Act of June 28, 1937, and related legislation.

By order effective July 11, 1977, (42 FR 35626) the Secretary of Agriculture delegated to the Assistant Secretary for Food and Consumer Services certain listed functions and responsibilities.

By order effective July 11, 1977, (42 FR 35631) the Assistant Secretary for Food and Consumer Services delegated to the Administrator, Food Safety and Quality Service, certain of these functions and responsibilities.

For the purpose of providing for the orderly exercise of the functions and responsibilities so delegated to the Administrator, Food Safety and Quality Service, officials occupying positions which were formerly delegated authority to carry out the above stated functions by the Administrator of the Animal and Plant Health Inspection Service and the Administrator of the Agricultural Marketing Service, which were transferred to the Food Safety and Quality Service, are hereby delegated authority on a temporary basis to perform the same functions formerly delegated.

This delegation shall also apply to the successor in office of such persons. All actions heretofore taken by such persons or their successors in accordance with this delegation are hereby ratified.

This action shall become effective upon issuance.

Done at Washington, D.C., this 12th day of August 1977.

ROBERT ANGELOTTI,
Administrator,
Food Safety and Quality Service.

HARDWARE SUBCOMMITTEE OF THE COMPUTER SYSTEMS TECHNICAL ADVISORY COMMITTEE

Closed Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. V, 1975), notice is hereby given that a meeting of the Hardware Subcommittee of the Computer Systems Technical Advisory Committee will be held on Wednesday, September 7, 1977, at 9 a.m. in Room 3708, Main Commerce Building, 14th and Constitution Avenue NW., Washington, D.C.

The Computer Systems Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974 and January 13, 1977, the Assistant Secretary for Administration approved the recharter and extension of the Committee, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act. The Hardware Subcommittee of the Computer Systems Technical Advisory Committee was established on July 8, 1975, with the approval of the Director, Office of Export Administration, pursuant to the charter of the Committee.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to computer systems, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls. The Hardware Subcommittee was formed to continue the work of the Performance Characteristics and Performance Measurements Subcommittee, pertaining to (a) Maintenance of the processor performance tables and further investigation of total systems performance; and (b) investigation of array processors in terms of establishing the significance of these devices and determining the differences in characteristics of various types of these devices.

The Subcommittee will meet only in Executive Session to discuss matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

Written statements may be submitted at any time before or after the meeting.

The Acting Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 27, 1977, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government In The Sunshine Act, Pub. L. 94-409, that matters to be discussed in Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because Executive Sessions will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by an Executive Order to be kept secret in the interests of the national defense or foreign policy. All materials to be reviewed and discussed by the Subcommittee in Executive Session have been properly classified under the Executive Order. All Subcommittee members have appropriate security clearances.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International

Business Administraton, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4196.

The complete Notice of Determination to close meetings or portions of the series of meetings of the Computer Systems Technical Advisory Committee and of any subcommittees thereof, was published in the FEDERAL REGISTER on February 2, 1977 (42 FR 6374).

Dated: August 15, 1977.

RAUER H. MEYER,
Director, Office of Export Administration, Bureau of East-West Trade, United States Department of Commerce.

[FR Doc.77-23967 Filed 8-18-77;8:45 am]

TECHNOLOGY TRANSFER SUBCOMMITTEE OF THE COMPUTER SYSTEMS TECHNICAL ADVISORY COMMITTEE

Closed Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. V, 1975), notice is hereby given that a meeting of the Technology Transfer Subcommittee of the Computer Systems Technical Advisory Committee will be held on Thursday, September 8, 1977, at 9 a.m. in Room 3708, Main Commerce Building, 14th and Constitution Avenue, NW., Washington, D.C.

The Computer Systems Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974 and January 13, 1977, the Assistant Secretary for Administration approved the recharter and extension of the Committee, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act. The Technology Transfer Subcommittee of the Computer Systems Technical Advisory Committee was initially established on April 10, 1974. On July 8, 1975, the Director, Office of Export Administration, approved the reestablishment of this Subcommittee pursuant to the charter of the Committee.

The Committee advises the Office of Export Administration, Bureau of East-West Trade, with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which affect the level of export controls applicable to computer systems, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls. The Technology Transfer Subcommittee was formed to examine the impact of transferring Automatic Data Processing technology to Communist destinations.

The Subcommittee will meet only in Executive Session to discuss matters properly classified under Executive Order 11652, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

Written statements may be submitted at any time before or after the meeting.

The Acting Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on January 27, 1977, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government In The Sunshine Act, Pub. L. 94-409, that matters to be discussed in Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because Executive Sessions will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by an Executive Order to be kept secret in the interests of the national defense or foreign policy. All materials to be reviewed and discussed by the Subcommittee in Executive Session have been properly classified under the Executive Order. All Subcommittee members have appropriate security clearances.

For further information, contact Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, Domestic and International Business Administration, Room 1617M, U.S. Department of Commerce, Washington, D.C. 20230, telephone: A/C 202-377-4196.

The complete Notice of Determination to close meetings or portions of the series of meetings of the Computer Systems Technical Advisory Committee and of any subcommittees thereof, was published in the FEDERAL REGISTER on February 2, 1977 (42 FR 6374).

Dated: August 15, 1977.

NEW ENGLAND FISHERY MANAGEMENT COUNCIL

Public Meetings

Notice is hereby given of public informational meetings to inform the New England fishing industry of the status of catch quotas for cod, haddock, and yellowtail flounder.

Early in 1977 the New England Fishery Management Council held a series of public meetings to receive public comment on proposed fishing quotas for 1977 for these species. The comments received at those meetings were considered in the development of final fishing regulations for cod, haddock and yellowtail flounder.

After the public meetings were held and after the regulations went into effect, the United States and Canada entered into a reciprocal fishing agreement for 1977. As a result of that and other fishing agreements with Canada, the quotas for U.S. fishermen were reduced by significant amounts below those proposed by the Council at the public meetings and incorporated in the Council's groundfish management plan and the Council's proposed groundfish regulations.

The Council therefore will hold public meetings in an attempt to provide full information and explanation to the public on the U.S.-Canadian fishing agreements and the causes of the reduction of U.S. quotas for cod, haddock, and yellowtail flounder. Representatives of the New England Fishery Management Council and the U.S. Department of State will answer all questions that may arise on any issue associated with the quotas for these species, and the U.S.-Canadian fishing agreements. Comments and recommendations from the public on this issue will be welcomed at the meetings.

The meetings will be from 7:30-9:30 p.m. at the following dates and locations:

September 12—Dutch Inn, Great Island Road, Galilee, Rhode Island.
September 13—Holiday Inn, Hathaway Road, New Bedford, Massachusetts.
September 14—New England Aquarium, Central Wharf, Boston, Massachusetts.
September 15—Gloucester City Hall, Dale Avenue, Gloucester, Massachusetts.
September 16—Holiday Inn, 81 Riverside Street, Exit 8, Portland, Maine.
September 19—Federal Building, Corner of Main and Water Streets, Ellsworth, Maine.

Dated: August 15, 1977.

JOSEPH W. SLAVIN,
Acting Associate Director,
National Marine Fisheries Service.

SOUTH ATLANTIC FISHERY MANAGEMENT COUNCIL

Public Meeting and Public Hearing Cancellation

Notice is hereby given that the public meeting for the purpose of providing an opportunity for public input and to serve as a factfinding mechanism relative to development of a fishery management plan for the domestic and foreign billfish fishery on August 30, 1977 in Ft. Fisher, North Carolina as announced on July 18, 1977 (42 FR 36857) has been cancelled. Other meetings announced in the cited notice remain unchanged.

Notice is also given that the public hearing for the purpose of providing an opportunity for public comment on a draft environmental impact statement for the proposed implementation of a preliminary fishery management plan for the Atlantic Foreign Pelagic Longline Fshery (billfishes and sharks) scheduled on August 30, 1977 in Ft. Fisher, North Carolina has been cancelled. The hearing notice was published on July 22, 1977 (42 FR 37583). Other hearings announced in the cited notice remain unchanged.

Dated: August 15, 1977.

JOSEPH W. SLAVIN,
Acting Associate Director,
National Marine Fisheries Service.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

TEXTILE AGREEMENTS PROGRAM

Review of TSUSA Numbers

August 16, 1977.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Review of the Need for Certain 7-Digit TSUSA Numbers in Relation to the Textile Agreements Program.

SUMMARY: The Committee for the Implementation of Textile Agreements, in response to a request from the Chairman, Committee for Statistical Annotation of Tariff Schedules, is developing a list of 7-digit items of the Tariff Schedules of the United States Annotated (TSUSA) which have either insignificant trade or which could be combined without eliminating detailed import data required to implement the bilateral textile agreements.

Published below is a list of the TSUSA numbers which CITA proposes for combination. This list provides a brief description of the item, the applicable textile category, and the 1975 import value. Combinations of the listed TSUSA numbers are designed to reduce annotations in the TSUSA by approximately 175, simplify the entry of textile items, and maintain adequate category coverage under the bilateral textile agreements.

Interested parties are invited to submit their written views and comments concerning these proposals to Mr. Robert E. Shepherd, Chairman of the Committee for the Implementation of Textile Agreements and Deputy Assistant Secretary for Resources and Trade Assistance, Room 3826, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, D.C. 20230. All submissions should be made in ten copies. Because of the necessity to incorporate any changes in the 1978 edition of the TSUSA which is now being prepared, such submissions should be received no later than September 1, 1977.

Copies of all written comments received will be available for public inspection between the hours of 8:30 a.m. and 5:00 p.m., Monday through Friday, in the Office of Textiles, Room 2815, U.S. Department of Commerce, Washington, D.C. 20230.

FOR FURTHER INFORMATION CONTACT:

Leonard A. Mobley, Director, Trade Analysis Division, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230 (202-377-4212).

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance, U.S. Department of Commerce.

ADJUSTING IMPORT RESTRAINT LEVELS FOR CERTAIN COTTON, WOOL AND MAN-MADE FIBER TEXTILE PRODUCTS FROM THE REPUBLIC OF KOREA

Notice

AUGUST 16, 1977.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: Granting increases for flexibility in Categories 22/23 (twill and sateen) and 238 (trousers, not knit) during the agreement year which began on October 1, 1976.

(A detailed description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010), as amended on December 31, 1975 (40 FR 60220), December 30, 1971 (41 FR 56881), January 21, 1977 (42 FR 3888), and March 7, 1977 (42 FR 12898).))

SUMMARY: Paragraph 5(b) of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of June 26, 1975, as amended, between the Governments of the United States and the Republic of Korea, provides, for percentage increases in certain specific category ceilings for flexibility during an agreement year. Pursuant to paragraph 5(b) of the bilateral agreement, as amended, the import restraint levels for Categories 22/23 and 238 are being adjusted for the agreement year which began on October 1, 1976 and extends through September 30, 1977.

EFFECTIVE DATE: August 17, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert C. Woods, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230, 202-377-5423.

SUPPLEMENTARY INFORMATION: On October 1, 1976, a letter from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs was published in the FEDERAL REGISTER (41 FR 43440), which established import restraint levels for certain specified categories of cotton, wool and man-made fiber textile products, produced or manufactured in the Republic of Korea and exported to the United States during the twelve-month period which began on October 1, 1976. A correction in certain of the levels of restraint was published in the FEDERAL REGISTER on November 5, 1976 (41 FR 48765).

In the letter published below the Commissioner of Customs is directed, in accordance with the provisions of the bilateral agreement, to adjust the twelve-month levels of restraint previously established for Categories 23/23 and 238 to the designated amounts.

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

AUGUST 16, 1977.

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C.

DEAR MR. COMMISSIONER: On September 29, 1976, the Chairman, Committee for the Implementation of Textile Agreements, directed you to prohibit entry for consumption or withdrawal from warehouse for consumption during the twelve-month period beginning on October 1, 1976 and extending through September 30, 1977 of cotton, wool and man-made fiber textile products in certain specified categories, produced or manufactured in Korea, in excess of designated levels of restraint. The Chairman further advised you that the levels of restraint are subject to adjustment.[1]

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, pursuant to paragraphs 5(b) and 7(a) (ii) of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of June 26, 1975, as amended, between the Governments of the United States and the Republic of Korea, and in accordance with the provisions of Executive Order 11651, you are directed to amend, effective on August 17, 1977, the twelve-month levels of restraint previously established for Categories 22/23 and 238 to the following amounts:

Category:		*Amended 12-mo. level of restraint* [2]
22/23	square yards	3,964,780
238	dozen	221,020

[2] The levels of restraint have not been adjusted to reflect any imports after September 30, 1976.

The actions taken with respect to the Government of the Republic of Korea and with respect to imports of cotton, wool and man-made fiber textile products from Korea have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

[1] The term "adjustment" refers to those provisions of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of June 26, 1975, as amended, between the Governments of the United States and the Republic of Korea which provide, in part, that: (1) within the aggregate and applicable group limits, specific levels of restraint may be exceeded by designated percentages; (2) these same levels may be increased for carryover and carryforward up to 11 percent of the applicable category limit; (3) consultation levels may be increased within the aggregate and applicable group limits upon agreement between the two governments; and (4) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1977

Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to procurement list.

SUMMARY: This action adds to Procurement List 1977 a commodity to be produced by and a service to be provided by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: August 19, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher, 703) 557-1145

SUPPLEMENTARY INFORMATION: On April 22, 1977 and June 24, 1977 the Committee for Purchase from the Blind and Other Severely Handicapped published notices (42 FR 20844) and (42 FR 32288) of proposed additions to Procurement List 1977, November 18, 1976 (41 FR 50975).

After consideration of the relevant matter presented, the Committee has determined that the commodity and service listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48(c), 85 Stat. 77.

Accordingly, the following commodity and service are hereby added to Procurement List 1977:

Class 8470

Headband, Ground Troop, Helmet Liner (IB), 8470-00-153-6671. (For Mechanicsburg, Pa. and Richmond, Va. only.)

SIC 7399

Affix Labels—U.S. Patent Documents (SH), U.S. Department of Commerce, Patent and Trademark Office, Crystal City, Arlington, Va.

C. W. FLETCHER,
Executive Director.

[FR Doc.77-24084 Filed 8-18-77;8:45 am]

PROCUREMENT LIST 1977

Deletion

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Deletion from procurement list.

SUMMARY: The Committee has received a proposal to delete from Procurement List 1977 commodities produced by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: August 19, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher (703) 557-1145

SUPPLEMENTARY INFORMATION: On May 13, 1977 the Committee for Purchase from the Blind and Other Severely Handicapped published a notice (42 FR 24302) of proposed deletion from Procurement List 1977, November 18, 1976 (41 FR 50975).

After consideration of the relevant matter presented, the Committee has determined that the commodities listed below are no longer suitable for procurement by the Federal Government under 41 U.S.C. 46-48(c), 85 Stat. 77.

Accordingly, the following commodities are hereby deleted from Procurement List 1977:

Class 7920

Brush, Floor Sweeping, 7920-00-238-2442, 7920-00-238-2443, 7920-00-263-9848, 7920-00-292-2366.

C. W. FLETCHER,
Executive Director.

PROCUREMENT LIST 1977

Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Additions to Procurement List.

SUMMARY: The Committee has received a proposal to add to Procurement List 1977 commodities to be produced by workshops for the blind or other severely handicapped.

COMMENTS MUST BE RECEIVED ON OR BEFORE: September 22, 1977.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, 2009 14th Street North, Suite 610, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT:

C. W. Fletcher, 703-557-1145.

SUPPLEMENTARY INFORMATION:

This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77.

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodities listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodities to Procurement List 1977, November 18, 1976 (41 FR 50975):

Class 8430

Shoes, Men's Black Oxford (about 22.5% of requirements):

8430-00-559-4136	8430-00-559-4243
8430-00-559-4137	8430-00-559-4244
8430-00-559-4138	8430-00-559-4245
8430-00-559-4139	8430-00-559-4246
8430-00-559-4140	8430-00-559-4247
8430-00-559-4141	8430-00-559-4248
8430-00-559-4142	8430-00-559-4249
8430-00-559-4143	8430-00-559-4250
8430-00-559-4194	8430-00-559-4251
8430-00-559-4195	8430-00-559-4252
8430-00-559-4196	8430-00-559-4253
8430-00-559-4197	8430-00-559-4254
8430-00-559-4198	8430-00-559-4255

COUNCIL ON ENVIRONMENTAL QUALITY

ENVIRONMENTAL IMPACT STATEMENTS

Availability

The following is a list of environmental impact statements received by the Council on Environmental Quality from August 8 to August 12, 1977. The date of receipt for each statement is noted in the statement summary. Under Council Guidelines the minimum period for public review and comment on draft environmental impact statements is forty-five (45) days from this FEDERAL REGISTER notice of availability. (October 3, 1977.) The thirty (30) day period for each final statement begins on the day the statement is made available to the Council and to commenting parties.

Copies of individual statements are available for review from the originating agency. Back copies are also available at 10 cents per page from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

FOREST SERVICE

Draft

Great Bear Wilderness Proposal, Montana, August 8: Proposed is the addition to the wilderness system of two separate units in northwestern Montana: the 289,400 acre western portion is on the Flathead National Forest and the 9,600 acre eastern portion is on the Lewis and Clark National Forest. Both areas are adjacent to the northern boundary of the Bob Marshall Wilderness. The wilderness quality of the Study Area is very high and although most of the Study Area is suitable for wilderness, 26,440 acres are not recommended because of the need for a more manageable wilderness boundary. (ELR Order No. 70959.)

Silvies-Malheur Unit, Malheur, Ochoco National Forest, several counties in Oregon, August 8: Proposed is a land management plan for the Silvies-Malheur Planning Unit in the Malheur and Ochoco National Forests. Approximately 57% of the unit is in Harney County, 43% in Grant County and 5% in Baker County, with the remainder in Crook and Malheur Counties. The Preferred Alternative calls for the allocation of land for purposes of resource management, recreation, and optimum resource management with timber and range emphasis. (ELR Order No. 70963.)

Lower Minam Wilderness Study Area, Oregon, August 12: This statement recommends that the 34,000 acre Lower Minam Wilderness Study Area in the Minam River Drainage area be allocated to a pattern of use as follows: management to maintain scenic quality; management that emphasizes the primitive nature of the Lower Minam; management that protects the Rocky Mountain elk and cougar habitat; timber management; and management that would preserve the values that caused the Minam River to be included in the State Scenic Waterways System. This plan would preserve the area's potential for inclusion in the National Wild and Scenic River System. (ELR Order No. 70989.)

Naches-Tieton-White River Unit Plan, several counties in Washington, August 8: Proposed is a land management plan for the Naches-Tieton-White River Planning Unit within the Snoqualmie and Gifford Pinchot National Forests in King, Pierce, Lewis, Yakima and Kittitas Counties, Washington. The proposed action recommends the allocation of 12,746 acres as Additional Wilderness Study Area; 58,610 acres as Management Units primarily for dispersed recreation; and 420,024 acres for the production of a full range of commodity and amenity values. Adverse effects may be expected in

V 42 161 AUG 19 77 UM

the areas of potential recreation use, potential mineral utilization, and effect on communities. (ELR Order No. 70967.)

Final

St. Francis Unit Plan, Ozark-St. Francis National Forest, Lee and Phillips Counties, Ark., August 11: The proposed action is to manage the 20,946 acre St. Francis Unit, St. Francis National Forest, in accordance with the 10 year management direction continued in the Unit Plan. It is proposed that this Unit be managed for a wide range of multiple-use benefits, including water, wildlife, recreation, range, minerals, and timber. Adverse environmental effects will include soil movement, temporary increases in stream turbidity, and changes in the characteristic landscape. There will be a slightly increased yield of wood products harvested from the unit. Comments made by: TVA, USDA, COE, DOI, DOT, EPA, State agencies, concerned groups, and individuals. (ELR Order No. 70980.)

DEPARTMENT OF COMMERCE

NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION

Draft

Pacific Billfishes and Sharks—preliminary management plan, August 11: Proposed is a preliminary management plan for Pacific billfishes and sharks to be in effect until superseded by an approved Regional Fisheries Management Council fishery management plan. The proposed action would specify restrictions on the take, possession, and retention of billfishes by foreign fishers fishing in the U.S. Fishery Conservation Zone seaward of the mainland west coast, Hawaii, Guam, and American Samoa. Foreign fishers would be required to obtain from the U.S. a permit for fishing in a manner which could reasonably be expected to result in a taking of billfishes and/or sharks. (ELR Order No. 70978.)

Deletion of Exemption for Harvest of Bowhead Whale, August 11: Proposed is a recommendation by the International Whaling Commission which would delete the native exemption from the Commission's ban on the killing of bowhead whales. Bowhead whales have been completely protected from commercial whaling by the Marine Mammal Protection Act of 1972, the Endangered Species Act of 1973, and Convention on International Trade in Endangered Species of Wild Fauna and Flora. Conventions and Acts have allowed for native harvest of these whales. Deletion of this native exemption was recommended at the 29th Annual Meeting of the commission. This action will allow for the recovery of the species, if recovery is possible. (ELR Order No. 70987.)

Marine Mammals Incidental to Yellowfin Tuna Purse, August 11: Proposed is the promulgation of amendments to the existing marine mammal regulations which would authorize the issuance of a general permit to allow the take of marine mammals incidental to yellowfin tuna purse seine fishing for a three-year period (1978–1980). Individual porpoise species and stock quotas would be established for U.S. vessels in the regulations for 1987, 1979, and 1980 at progressively decreasing levels. An enforcement policy regarding accidental takings of prohibited species is also proposed in the regulations. (ELR Order No. 70988.)

DEPARTMENT OF DEFENSE

ARMY CORPS

Contact: Dr. C. Grant Ash, Office of Environmental Policy Department, Attention: DAEN–CWR–P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue SW., Washington, D.C. 20314, 202–693–6795.

Draft

Kekaha Beach Erosion Control, Kauai, Hawaii, August 8: Proposed is the Kekaha Beach erosion control project, designed to reduce or eliminate erosion of shoreline and damage to the Kaumualii Highway. The alternatives proposed include Protective Beach and Shoreline Revetment. The protective beach plan would provide a beach with berm width of 50 feet and a length of 5,200 feet, and would require using 480,000 cubic yards of sand; the shoreline revetment plan would use 21,500 cubic yards of rock to build a permanent 5,800 foot long revetment. Either alternative would create temporary water turbidity, and traffic and noise inconveniences. (Honolulu District.) (ELR Order No. 70964.)

Bowline Point Generating Station, several counties in New York, August 8: This statement contains an evaluation by the New York District, Corps of Engineers of the environmental impacts of the Bowline Point and Roseton Generating Stations. The District has legal obligations to evaluate the impacts and to determine the appropriate course of action regarding the continued operation of the stations. Alternatives available to the District are 1) to retain unaltered, 2) to modify, 3) to suspend or 4) to revoke the permits issued by the District. Continued operation would result in the release of airborne and waterborne contaminants and the generation of noise and small quantities of solid wastes. (New York District.) (ELR Order No. 70960.)

Arcadia Lake, Deep Fork River (2), Okla., August 9: Proposed is the construction of a multipurpose lake on the Deep Fork River, 1½ miles west of Arcadia, Oklahoma, and six miles east of Edmond. The lake will provide 27,570 acre-feet for conservation storage and 64,430 acre-feet for flood control storage, and after 100 years, 62,510 acre-feet. Water-oriented recreation facilities are also planned. Adverse effects include the acquisition of 6,500 acres in fee which include 3,300 acres in agricultural lands and 3,200 acres of rural homesite lands. (Tulsa District.) (ELR Order No. 70971.)

Final

Little Bay Maintenance Dredging, Aransas County, Tex., August 8: Proposed is the periodic maintenance dredging of the Little Bay, Texas project. The Little Bay project is a shallow draft channel and turning basin in Arkansas Bay adjacent to Fulton, Texas. The project includes a channel 8 feet deep, 200 feet wide, and 1,400 feet long. Adverse effects include the removal or disturbance of mottle and bottom dwelling organisms from the channel, turning basin, and disposal area. (Galveston District.) Comments made by: EPA, DOC, DOI, USDA, DOT, USCG, AHP, State and local agencies. (ELR Order No. 70965.)

DEPARTMENT OF DEFENSE

NAVY

Contact: Mr. Ed Johnson, Head, Environmental Impact Statement/RDT&E Branch, Office of the Chief of Naval Operations, Department of the Navy, Washington, D.C. 20350, 202–697–3689.

Final

AICUZ, NAS Cecil Field OLF Whitehouse Cecil and Clay Counties, Fla. August 10: Proposed is the acquisition in fee of approximately 935 acres of unimproved land and restrictive use easements on approximately 270 acres of land. Both acquisition areas are located adjacent to NAS Cecil Field, north of 103rd St. Also proposed is the acquisition in fee of 97.69 acres of land located within the clear zone at both ends of the runway at OLF Whitehouse. These acquisitions are designed to implement a portion of the Navy's Air Installation Compatible Use Zone Program at NAS Cecil Field and OLF Whitehouse. Comments made by: State and local agencies, concerned groups and individuals. (ELR Order No. 70975.)

DEPARTMENT OF HUD

Contact: Mr. Richard H. Broun, Director, Office of Environmental Quality, Department of Housing and Urban Development, 451 7th Street SW., Washington, D.C. 20410, 202–755–6308.

Final

Kensington Park Apartments, Denver Colo., August 8: Proposed is the sale by HUD of Kensington Park Phases I and II in Denver, Colorado. The project, which consists of 32 buildings containing 628 living units, was constructed under mortgages insured by HUD. Concerns regarding disposition are mainly in regard to the development's location within the Denver Air Quality Control Region, which exceeds State and Federal Standards; the lack of storm drainage in Phase II; and the high incidence of sewer backups in Phase I. Comments made by: FEA, COE, USDA, AHP, EPA, State and local agencies. (ELR Order No. 70968.)

Section 104(h)

The following are Community Development Block Grant statements prepared and circulated directly by applicants pursuant to section 104(h) of the 1974 Housing and Community Development Act. Copies may be obtained from the office of the appropriate local chief executive. (Copies are not available from HUD.)

Draft

Tarrant County Water Project, Tarrant County, Tex., August 11: Proposed is the Trinity River Authority's Tarrant County Water Project designed to serve Bedford, Euless, Colleyville, Grapevine, and North Richland Hills. Implementation of the proposed project will entail expansion of the existing water treatment plant, along with completion of the following items: raw water storage and booster pump facility; 9 miles of raw water transmission line; 11 miles of treated water transmission line; and approximately 110 acres of right-of-way with 28 acres of easements. Adverse environmental effects include alteration of the land use character, erosion, siltation, sedimentation, noise and air pollution, and public inconvenience. (ELR Order No. 70981.)

Final

Stockton, Calif., West End II Redevelopment, San Joaquin County, Calif., August 8: Proposed is the expansion of the West End Redevelopment Area located in central Stockton. The project would consist of property acquisition, demolition, business and residential relocation, and project improvements. The project site is to be made available for commercial, tourist, and recreational uses in compliance with an overall channel plan as adopted by the city. Adverse impacts of the project include the relocation of residents and businesses and the general decline of the channel (water and aesthetic quality) due to overutilization. Comments made by: EPA. (ELR Order No. 70966.)

Great Alamance Creek Water Supply Project, Alamance and Guilford Counties, N.C., August 9: Proposed is the Great Alamance Creek Water Supply Project, which represents a complete new water supply source and treatment facility for the city of Burlington. The project includes an impoundment dam, a raw water intake and pump station, a water filter plant, finished water

storage facilities and pump station, a finished water transmission main, reservoir construction, and highway and bridge relocation. The major impact will result from the inundation of 1,060 acres of land presently used for agricultural purposes, forest resources, wildlife habitat, and residential development. Comments made by: COE, DOI, USDA, HEW, EPA. (ELR Order No. 70969.)

DEPARTMENT OF INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 4256 Interior Bldg., Department of the Interior, Washington, D.C. 20240, 202–343–3891.

BUREAU OF LAND MANAGEMENT

Draft

Proposed Foothills Project, several counties of Colorado, August 11: Proposed is the construction, operation, and maintenance of water diversion facilities on federally managed lands on the South Platte River 25 miles southwest of Denver, Colo. as a part of the proposed Foothills Project. The project would also include a water treatment plant with an ultimate capacity of 500 million gallons per day and a conduit distribution system extending into the Denver metropolitan area. Sources of water would include both the South Platte River and the Blue River via Dillon Reservoir and the Harold D. Roberts Tunne. Adverse effects include the loss of 1.7 miles of free-flowing river. (ELR Order No. 70979.)

INTERSTATE COMMERCE COMMISSION

Contact: Mr. Richard I Chais, Chief, Section of Energy and Environment, Room 3378, 12th and Constitution Ave. NW., Washington, D.C. 20423, 202–275–7692.

Draft

Harrison County RR Line, Southern Mississippi Transportation Co., Harrison County, Miss., August 11: Proposed is the granting of authority to the Southern Mississippi Transportation Co. to construct and operate a line of railroad between a connection to an Illinois Central Gulf RR main-line located approximately 1,500 feet south of Interstate Route 10 in Gulfport, Miss., and property of E. I. du Pont de Nemours, Inc., near De Lisle, Miss., a distance of 13.5 miles. While initially being constructed to serve a new Du Pont chemicals plant the line could potentially provide rail access to an undeveloped area of 20,000 acres. Development of the rail line would require the commitment of approximately 200 acres of rural land. (ELR Order No. 70985.)

NUCLEAR REGULATORY COMMISSION

Contact: Mr. Voss A. Moore, Assistant Director for Environmental Projects, P–518, Washington, D.C. 20555, 301–492–8446.

Draft

Indian Point Unit No. 3, Cooling System, Westchester County, N.Y., August 9: This statement relates to the selection of the preferred closed cycle cooling system at Indian Point Unit No. 3. Proposed is the issuance of an amendment to the Facility Operating License No. DPR–64 for Indian Point Unit No. 3, which is owned by the Power Authority of the State of New York and operated by the Consolidated Edison Co. This statement considers the information provided in an environmental report dated Jan. 1, 1976, and amendments as well as other information developed by the staff in making its independent evaluation and analysis of alternative closed cycle cooling systems. (ELR Order No. 70970.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street SW., Washington, D.C. 20590, 202–426–4357.

FEDERAL AVIATION ADMINISTRATION

Final

Kalamazoo Airport, Runway Extension, Kalamazoo County, Mich., August 8: Proposed is runway extension and associated contruction at Kalamazoo Municipal Airport, Mich. The project calls for extension of the north-south runway to a total length of 6,500 feet by adding 800 feet at the north end and 400 feet at the south end of the existing 5,300 foot runway. Plans also include extension of runway and taxiway lighting system, relocation of Instrument Landing System localizer at the north end of the runway, and construction of parallel taxiways to the extended runway segments. Adverse effects include increased noise and air pollution. (240 pages.) Comments made by: USDA, DOC, HUD, EPA, DOI, DOT, COE, AHP, WRC, State and local agencies, concerned groups and individuals. (ELR Order No. 70986.)

Erie International Airport Runway Extension, Erie County, Pa., August 10: Proposed is the construction of a 500 foot x 150 foot flexible pavement extension of Runway 6–24 to the east, Erie International Airport, Pa. Plans also call for the installation of medium intensity runway lighting along the extension, the realignment of Powell Road, and the relocation of threshold lighting at the 24 end of the runway. Adverse effects include the dislocation of 12 families, and the conversion of approximately 3.6 acres of residential property to commercial airport use. Comments made by: DOT, FPC, COE, USDA, HEW, State and local agencies, and interest groups. (ELR Order No. 70972.)

FEDERAL HIGHWAY ADMINISTRATION

Draft

Ofu-Olosega Vehicular Connection, American Samoa, August 11: Proposed is the construction of a vehicular connection between the Islands of Ofu and Olosega, Manus' Island Group, American Samoa. The connection would cross Asaga Strait between Asagatal Point on Ofu and Tamatupa Point on Olosega, a distance of about five hundred feet. The proposed connection is a 2-lane multi-span structure. Adverse effects include increased air, noise, and water pollution and increased vehicular traffic on Olosega Island. There are presently only two vehicles on Olosega Island. (ELR Order No. 70982.)

Sunshine Skyway (I–275) Upgrade, Manatee, Hillsborough, and Pinellas Counties, Fla., August 11: Proposed is the upgrading of the Sunshine Skyway Causeway and Bridges to standards acceptable for the Interstate System beginning 0.5 miles east of the southern toll plaza in Manatee County northward to the vicinity of the north toll plaza, a distance of approximately 10.7 miles. The Sunshine Skyway (U.S. 19), a four-lane divided toll facility, would be upgraded as a part of Interstate 275 by widening and replacing bridges, limiting access, constructing interchanges, providing frontage roads and upgrading the present rest areas to interstate type rest area facilities. Few adverse effects are anticipated. (Region 4) (ELR Order No. 70976.)

Final

U.S.–36 Improvement, Kansas-Missouri State Line West, Brown and Doniphan Counties, Kans., August 10: Proposed is the improvement of U.S.–36, extending from the Kansas-Missouri State Line at St. Joseph, Missouri, to a point one mile east of the Brown-Doniphan County Line and one mile south of the existing U.S.–36. Adverse effects include the removal of 1,600 acres of cropland from production, the acquisition of private residences with resultant displacement of people, and increases in noise and air pollution. Comments made by: USDA, HEW, EPA, DOI, HUD, COE, and State agencies. (ELR Order No. 70973.)

KY 80 (Somerset-London Road), Pulaski & London Co., Pulaski and Laurel Counties, Ky., August 8: The proposed consruction of KY 80, a 4-lane highway, begins near Rockcastle River (Pulaski County) and terminates 4.3 miles eastward near existing KY 80 and Bernstadt (Laurel County). Adverse effects include increased noise levels along the new route, loss of 140 acres of wildlife habitat and some vegetation, displacement of 4 homes, limited erosion and sedimentation during construction, and the relocation of a 30-grave cemetary, and temporary construction disruption. Comments made by: HEW, EPA, DOC, DOI, USDA, ARC, and State agencies. (ELR Order No. 70962.)

South Knoxville Boulevard, U.S. 441 to State Route 158, Knox County, Tenn., August 10: Proposed is the construction of a multilane freeway from Chapman Highway (U.S. Route 441) near the south city limits of Knoxville that would extend through South Knoxville, cross the Tennessee River and connect into the CBD Loop. Project length is approximately five miles. Adverse effects include the commitment of 35 to 45 acres of undeveloped land for right-of-way, and increased concentrations of automobile-produced air pollutants. The proposed facility will displace 191 households and 12 businesses. Comments made by: HUD, DOI, USDA, DOT, HEW, USCG, COE, local agencies and interest groups. (ELR Order No. 70974.)

Supplement

Interchange at U.S. 280 Business 280 U.S. 431(S–2), Russell County, Ala., August 11: Project F–422 is the improvement of U.S. 280 from Opelika to Phenix City in Lee and Russell Counties, a distance of approximately 23 miles. It is the purpose of this supplement to set forth a proposal to acquire sufficient right-of-way at the Phenix City terminus of the project at the present time in order to construct an interchange at some future date. The interchange would be located at the intersection of U.S. 280, Business 280, and U.S. 431 in Phenix City, Alabama. (Region 4) (ELR Order No. 70983.)

I–275 Construction, St. Petersburg (S–1), Pinellas County, Fla., August 11: This statement supplements a final EIS filed with CEQ in 1972. The proposed project involves the construction of a proposed Interstate I–275 (formerly I–75) in St. Petersburg. The project parallels U.S. 19 (State Road 55) from the vicinity of 54th Avenue South Interchange, a distance of approximately 1.2 miles. An approved final EIS/Section 4(f) statement prepared for I–75 allowed for the taking of 11.7 acres of Maximo Park land. Further design studies have indicated that a location avoiding the park land is possible. The segment of Interstate proposed for realignment is approximately 1 mile and is located in the city of St. Petersburg. (ELR Order No. 70977.)

Louisa-Catlettsburg Road (U.S. 23), Boyd and Lawrence Counties, Ky., August 11: This statement supplements a final EIS filed with CEQ in 1973. The supplement was necessary because the northern 4.45 mile portion of the project was excluded from the original EIS to allow time for the area along the

V 42 161 AUG 19 77 UM

proposed relocation to be surveyed by a professional archaeologist. The project consists of the construction of a 4-lane divided highway (U.S. 23) that begins at the White Creek Road (Ky. 757) and extends northward to a terminal point near the junction of existing U.S. 23 and Ky. 3, two miles south of Cattlettsburg. Adverse impacts include the displacement of families, loss of land suitable for wildlife habitat, and construction-related pollution. (ELR Order No. 70984.)

NICHOLAS C. YOST,
Acting General Counsel.

DELAWARE RIVER BASIN COMMISSION

COMPREHENSIVE PLAN

Public Hearing

Notice is hereby given that the Delaware River Basin Commission will hold a public hearing on Wednesday, August 24, 1977, commencing at 2:00 p.m. The hearing will be held in the Hall of Flags (West) of the Sheraton Hotel, 1725 John F. Kennedy Boulevard, Philadelphia. The subject of the hearing will be applications for approval of the following projects as amendments to the Comprehensive Plan pursuant to Article 11 of the Compact and/or as project approvals pursuant to Section 3.8 of the Compact:

1. *Rohm and Haas Co. (D-75-30).* A cooling water discharge at the company's plant in Philadelphia, Pa. Approximately nine million gallons per day of cooling water will discharge through a series of outfalls to Frankford Creek and directly into the Delaware River.

2. *City of Newark (D-77-15 CP).* A well water supply project to augment public water supplies in the City of Newark, New Castle County, Del. Designated as Wells No. 8 and 9, the two new facilities are expected to produce a combined yield of 198,000 gallons per day.

3. *North Penn Water Authority (D-77-57 CP).* A well water supply project to augment public water supplies in the Authority's service area in Montgomery County, Pa. Designated as NP 14, 42, and 46, one of the new wells is located in Lower Salford Township and two are located in Towamencin Township. The three facilities have an estimated combined yield of 720,000 gallons per day.

4. *Fairmount Park Commission (D-77-40 CP).* Construction of a fishway at Fairmount Dam, Philadelphia, Pa., to provide passage for anadromous and catadromous fish to their natural spawning and rearing areas in the upper Schuylkill River.

5. *The Estaugh T/A Medford Leas (D-77-46).* An increased withdrawal from two existing wells supplying Medford Leas Retirement Community in Medford, Burlington County, N.J. Up to 200,000 gallons per day will be used for irrigation and domestic purposes.

6. *Borough of Bellmawr (D-76-123 CP).* A well water supply project to augment public water supplies in the Borough of Bellmawr, Camden County, N.J. Designated as Well No. 5, the new facility is expected to yield one million gallons per day.

7. *W. L. Wheatley Co., Inc. (D-77-29).* A well water supply project at the company's Campbell Soup plant in Clayton, Kent County, Del. The project involves reconstruction of an existing well that is designed to yield about 500,000 gallons per day.

8. *Artesian Water Co. (D-76-92 CP).* A well water supply project to augment public water supplies in the company's franchise area in Glasgow, New Castle County, Del. Designated as the Caravel Farms well, the new facility is expected to yield 360,000 gallons per day.

9. *Village of Hobart (D-76-94 CP).* A well water supply project to augment public water supplies in the Village of Hobart in Delaware County, N.Y. The new well is expected to yield 190,000 gallons per day.

10. *City of Lewes (D-77-70 CP).* A well water supply project to augment public water supplies in the City of Lewes, Sussex County, Del. Designated as Well No. 1, the new facility is expected to yield 200,000 gallons per day.

11. *West Chester Area Municipal Authority (D-75-19 CP).* An increased surface water withdrawal to augment public water supplies in East Bradford Township and several adjacent municipalities in Chester County, Pa. An average of six million gallons per day will be withdrawn from the East Branch Brandywine Creek.

12. *B. F. Goodrich Co. (D-76-31).* A cooling water discharge at the company's Oaks plant in Upper Providence Township, Montgomery County, Pa. About 3.9 million gallons per day of uncontaminated cooling water is discharged to Perkiomen Creek.

13. *Dow Chemical Company (D-75-128).* A bulk chemical storage and distribution facility proposed to be located on the Delaware River in Bordentown Township, Burlington County, N.J. Construction would involve 65 storage tanks. Pier and marginal berthing facilities would extend a maximum of 500 feet channelward from the existing mean high water line. About 307,000 cubic yards of sand, gravel and river silt would be removed to provide adequate channel depth and berthing area for tankers of up to 36,000 deadweight tons. A draft environmental impact statement on this project has been prepared by the Commission and was released for public review on July 15, 1977. (This project will not be acted upon by the Commission on August 24. It is scheduled for public hearing only.)

Documents relating to the above-listed projects may be examined at the Commission's offices. Persons wishing to testify are requested to notify the Secretary prior to the hearing.

W. BRINTON WHITALL,
Secretary.

AUGUST 10, 1977.

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

LOW-HEAD HYDROELECTRIC ENERGY

Public Meeting

The U.S. Energy Research and Development Administration has awarded a contract to the University of New Hampshire to conduct a workshop to identify and assess constraints to the commercial development of low-head hydroelectric resources. The objective of the workshop is to provide advice to the Division of Geothermal Energy, Energy Research and Development Administration, for use in the formulation of an appropriate program of Federal research, development and demonstration.

The workshop, to be held on September 7, 8, and 9, 1977, at the New England Center for Continuing Education, Durham, New Hampshire, is open to the public on a space available basis. The workshop is organized into the following panels: Resource Assessment; Engineering Development; Institutional and Legal Barriers; Environment and Safety; and, Demonstrations.

AGENDA

TUESDAY, SEPTEMBER 6

3:00 p.m.–9:30 p.m., Registration.

WEDNESDAY, SEPTEMBER 7

8:30 a.m., Call to order.
8:40 a.m., Current status of ERDA program.
9:30 a.m., Background Address—David Lilienthal.
10:00 a.m., Status, Canada and Japan.
10:30 a.m.–3:30 p.m., Panel meetings.
3:15 p.m., Status, Europe.

THURSDAY, SEPTEMBER 8

8:30 a.m., General Discussion.
10:15 a.m.–2:00 p.m., Panel Meetings.
2:00 p.m.–5:00 p.m., Visits to hydroelectric sites.

FRIDAY, SEPTEMBER 9

8:30 am.–1:00 p.m., Panel Meetings.
1:15 p.m.–2:45 p.m., General Sessions—presentation of panel reports.
3:30 p.m.–6:00 p.m., Panel chairmen discussion.

SATURDAY, SEPTEMBER 10

9:00 a.m.–11:30 a.m., Panel chairman discussion of workshop reports.

Practical considerations may dictate alterations to the above agenda. This will be a working meeting and the Workshop Chairman and Panel Chairmen are empowered to conduct the general sessions and panel meetings in a manner that in their judgment will facilitate the orderly conduct of business.

With respect to public participation in agenda items, scheduled above, the following requirements shall apply:

(a) Persons wishing to submit written statements on agenda items may do so by mailing 12 copies thereof, postmarked no later than September 2, 1977, to the Director, Division of Geothermal Energy, U.S. Energy Research and Development Administration, 20 Masachusetts Avenue N.W., Washington, D.C. 20545. Comments shall be directly relevant to the above agenda items.

(b) Information as to whether the meeting has been rescheduled or relocated can be obtained by a prepaid telephone call on September 2, 1977, to Ms. Betty Kitterman on (202) 376-4581 between 8:30 a.m. and 5:00 p.m. (EDT).

(c) Questions at the general session and panel meetings may be raised by the public only when recognized to do so by the general session chairman or panel chairmen.

(d) Seating to the public will be made available on a first-come, first-served basis.

(e) The use of still, movie, and television cameras, the physical installation and presence of which will not interfere with the course of the workshop, will be permitted before and after each day's activities and during any recess. The use of such equipment will not, however, be allowed during the general sessions or panel meetings.

(f) Copies of the final report prepared by the University of New Hampshire will be available at the Energy Research and Development Administration's Public Document Room, 20 Massachusetts Avenue NW., Washington, D.C. 20545, upon payment of all charges required by law.

Dated at Washington, D.C., this 12th day of August 1977.

DONALD A. BEATTIE,
Acting Assistant Administrator for Solar, Geothermal and Advanced Energy Systems.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 779-8 and OPP-42011C]

COMMONWEALTH OF PENNSYLVANIA

State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides; Approval Status

Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136 et seq.), and the implementing regulations of 40 CFR Part 171, require each State desiring to certify applicators to submit a plan for such purpose, subject to approval by the Environmental Protection Agency (EPA). On April 15, 1976, the Pennsylvania State Plan was approved contingent upon promulgation of necessary regulations implementing the legislation. Notice of contingent approval was published in the FEDERAL REGISTER on May 25, 1976 (41 FR 21402). On July 2, 1977, regulations necessary to implement the Pennsylvania legislation were promulgated. Having reviewed these regulations and finding that all requisite legal authorities required by FIFRA and 40 CFR Part 171 are now enacted and promulgated, the Regional Administrator, EPA, Region III, hereby gives notice that the Pennsylvania State Plan is now a fully approved State Plan.

Dated: August 8, 1977.

ALVIN R. MORRIS,
Acting Regional Administrator, Region III.

[FR Doc.77-24121 Filed 8-18-77;8:45 am]

[FRL 779-7 and OPP-40005]

FEDERAL AGENCY CERTIFICATION OF FEDERAL EMPLOYEES TO APPLY RESTRICTED USE PESTICIDES

Intent to Recognize Under Section 4 of the Federal Insecticide, Fungicide, and Rodenticide Act

Notice is hereby given that the Administrator of the Environmental Protection Agency intends to review for approval Federal agency plans for the certification of Federal employees as pesticide applicators. Such plans may be submitted by the heads of Federal agencies pursuant to Section 4(a)(1) of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended [FIFRA] [7 U.S.C. 136b (a)(1)].

I. BACKGROUND

FIFRA, as amended in 1972 and 1975, directs the Administrator to classify certain uses of particularly hazardous pesticides as restricted to use only by "certified" applicators and persons working under their direct supervision. Pesticide products with uses so classified are termed "restricted use pesticides". In addition, the Administrator is directed to establish standards for the "certification" of applicators of restricted use pesticides. Section 4(a)(1) of FIFRA, which requires the Administrator to prescribe these standards, also implicitly authorizes the Administrator to provide for certification of individuals who wish to use restricted use pesticides.

Under Section 4 of FIFRA, the Administrator may approve individal State Plans for the certification of applicators. Similarly, Section 4 may be implemented through Federal certification programs approved by EPA. At this date, the Administrator has approved a number of State certification plans. In addition, the Administrator intends to exercise his authority to review for approval Federal agency plans for certification of Federal employees to use and supervise the use of restricted use pesticides. Such approved certifications, however, will be valid only for Federal employees engaged in the performance of their official duties.

This notice describes the terms and conditions under which EPA will approve the certification programs of other Federal agencies. (For purposes of uniformity of language, such Federal agency certification programs shall be referred to as "Federal agency plans.")

On March 12, 1975, the Agency published in the FEDERAL REGISTER final regulations governing the content of State plans for certification of pesticide applicators (40 FR 11698, codified at 40 CFR 171.7–171.10). Those regulations contain at 40 CFR 171.9 the description of a joint State/Federal mechanism for granting State certification to Federal employees. Under this mechanism, a Government Agency Plan (GAP) was to be developed. Upon completion of the GAP program, a Federal employee would become "qualified." The Federal employee would then use this "qualification" as the basis for State certification, in addition to meeting any other requirements imposed by individual States. Under Section 171.7(e)(4), States with approved certification plans are expected to respond to the GAP within 60 days of its final approval, either by accepting GAP "qualifications" or by describing additional State requirements necessary for State certification.

Although a GAP mechanism was favored under conditions prevailing at the time 40 CFR Part 171 was written, it was nevertheless envisioned that other alternative approaches to Federal employee certification might be developed in the future. The Agency intends to adopt such an alternative approach, partly in response to two Supreme Court decisions which raise questions concerning the Agency's authority under FIFRA to require Federal agency employees to obtain State certification. (*Hancock v. Train*, 426 U.S. 167 (1976), and EPA v. *California*, 426 U.S. 200 (1976).) While Federal employees may still voluntarily obtain a State certification in order to comply with the Federal certification requirement, the Agency now considers it appropriate to accept certifications provided by Federal agencies, provided that the certifying agencies develop certification plans which meet the Federal minimum standards for approval of such programs.

II. APPROVAL CRITERIA FOR FEDERAL AGENCY PLANS TO CERTIFY FEDERAL EMPLOYEES TO USE RESTRICTED USE PESTICIDES

The Administrator, in considering approval of Federal agency plans, or any modification thereof, will weigh the following factors, as well as any additional criteria which may be established in the future.

(a) The standards for determining and attesting to the competence of restricted use pesticide applicators established by the Administrator pursuant to Section 4(a)(1) of FIFRA are codified at 40 CFR 171.1–171.6. These standards apply, as a matter of law, to all applicator certification plans, regardless of whether the certifying authority is the Federal Government or a State. Accordingly, all Federal agency plans for employee certification must satisfy these standards.

(b) It is the position of EPA that requirements for the submission, review and approval of individual Federal agency plans should be essentially equal to, or more stringent than, those requirements which are in effect for review and approval of State plans. Accordingly, the criteria established in 40 CFR Sections 171.7 and 171.8 for submission, approval and maintenance of State plans will be applied, as appropriate, to Federal agency plans.

(c) It is the position of EPA that the Federal government has and should exercise, through its various agencies, the same or equivalent enforcement authorities, in regard to Federal employees, as are expected of States as a condition of State Plan approval under 40 CFR 171.7 (b)(1)(iii)(A)–(E).

In particular, Federal agencies will be expected to exercise the same administrative controls over agency employees as States exercise with regard to private citizens under approved State certification plans. Agencies will be expected, therefore, to give assurances that they will exercise their administrative authority, where appropriate, to deny, suspend or revoke certificates of employees who misuse pesticides, falsify records, or violate relevant provisions of FIFRA.

Similarly, EPA will expect assurances to be given that Federal agency employees will be required to keep and maintain for a period of at least two years routine operational records containing information on kinds, amounts, uses, dates, and places of application of restricted use pesticides.

As Federal agencies will be imposing these administrative controls over agency employees only, no distinct authority, by statute or regulation, is required as

V42161 AUG 1977 UM

in the case of State or Federal regulatory control over private citizens. Such administrative authorities are inherent in the employer-employee relationship.

Such authorities, available to the Federal government in the regulation of Federal employees using restricted use pesticides, are equivalent to those authorities which the Agency expects of States before approving State plans for State regulation of private citizens who use restricted use pesticides. (See 40 CFR 171.7 (b)(1)(iii)(A)-(E)).

(d) Although private contractors who apply restricted use pesticides for Federal agencies are not, as such, Federal employees and do not therefore qualify for certification by Federal agencies, it is expected that Federal agencies will, at the minimum, report instances of pesticide misuse or record falsification to the certifying State agencies for purposes of denial, suspension or revocation of the contractor's State certification, as may be appropriate in each individual case.

(e) In the interest of encouraging cooperative State and Federal efforts toward the control of environmental pollution, EPA restates the policy of Executive Order 11752 as a condition for approval of Federal agency certification plans.

Specifically, under Executive Order 11752, Federal agencies will be expected to adhere to State substantive standards affecting pesticide use. As a condition of EPA approval of agency plans, therefore, other agencies will be asked to provide assurance of their intent to comply with State substantive requirements.

In determining whether a given State requirement is procedural or substantive, EPA will arbitrate any differences of opinion between a State and a certifying agency over the question whether a given State requirement is substantive in nature or merely procedural.

III. Approval Procedures

If any Federal agency, at any time, desires to certify its own employees to apply restricted use pesticides in the conduct of official duties, the head of that Agency may submit a Plan for that purpose to the Administrator of EPA for approval. If the Administrator determines that an agency plan for the certification of its employees as pesticide applicators meets the criteria set forth in this notice, he will publish a notice of intent to approve such an agency plan in the Federal Register. In keeping with Agency policy to give notice and to seek public comment prior to approval of State certification plans, the Administrator also intends to seek public comment prior to final approval of Federal agency plans.

IV. Public Comment

The Administrative Procedure Act [5 U.S.C. 553(b)] provides that the solicitation of comments is not required of Federal agencies for "interpretative rules, general statements of policy, or rules of agency organization, procedure or practice." EPA has determined that this Notice falls within this exemption from the requirement to solicit public comment. Accordingly, the Agency is not soliciting public comment regarding matters published in this notice.

However, interested persons may submit written comments regarding the policy set forth herein to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. Three copies of all comments should be submitted to facilitate the work of the EPA and others interested in inspecting such documents. All comments filed pursuant to this Notice will be available for public inspection in the Federal Register Section, Office of Pesticide Programs, from 8:30 a.m. to 4 p.m., Monday through Friday.

Dated: August 12, 1977.

Douglas M. Costle,
Administrator.

[FR Doc.77-24120 Filed 8-18-77;8:45 am]

FEDERAL COMMUNICATIONS COMMISSION

RADIO TECHNICAL COMMISSION FOR MARINE SERVICES

Meetings

In accordance with Public Law 92-463, "Federal Advisory Committee Act," the schedule of future Radio Technical Commission for Marine Services (RTCM) meetings is as follows:

The 7th meeting of RTCM Special Committee No. 70: "Minimum Performance Standards (MPS)—Marine Loran-C Receiving Equipment" was originally scheduled for Thursday, September 1. A Technical Specifications Working Group meeting had been scheduled for Wednesday, August 31.

Both meetings (September 7 and September 8) have been cancelled. The 7th meeting of Special Committee No. 70 and the Working Group meeting will be held on September 8 and September 7 respectively. Details of these rescheduled meetings follow.

Special Committee No. 70 "Minimum Performance Standards (MPS)—Marine Loran-C Receiving Equipment," notice of 7th meeting, Thursday, September 8, 1977—10 a.m. (all-day meeting), Conference Room (second floor), U.S. Coast Guard Marine Inspection Office, Battery Park Building, Battery Park at South Ferry, New York, New York.

Technical Specs Working Group, full-day meeting, September 7, 10 a.m. Same location as September 1 meeting.

Agenda

1. Call to Order; Chairman's Report.
2. Confirmation of Secretary; Adoption of Agenda.
3. Acceptance of SC-70 Summary Records.
4. Reports on Work Assignments.
5. Approval of Receiver Specifications.
6. Other Business.
7. Establishment of possible meeting date.

Captain Alfred E. Fiore, Chairman, SC-70, U.S. Merchant Marine Academy, Kings Point, New York 11024. Phone: 516-482-8200.

To comply with the advance notice requirements of Public Law 92-463, a comparatively long interval of time occurs between publication of this notice and the actual meeting. Consequently, there is no absolute certainty that the listed meeting room will be available on the day of the meeting. Those planning to attend the meeting should report to the room listed in the notice. If a room substitution has been made, the new meeting room location will be posted at the room listed in this notice.

Agendas, working papers, and other appropriate documentation for the meeting is available at that meeting. Those desiring more specific information may contact either the designated Chairman or the RTCM Secretariat. Phone 202-632-6490.

The RTCM has acted as a coordinator for maritime telecommunications since its establishment in 1947. Problems are studied by Special Committees and the final report is approved by the RTCM Executive Committee. All RTCM meetings are open to the public. Written statements are preferred but by previous arrangement, oral presentations will be permitted within time and space limitations.

Federal Communications Commission,
Vincent J. Mullins,
Secretary.

[FR Doc.77-24071 Filed 8-18-77;8:45 am]

[Docket No. 21310; RM-1847; RM-1984; RM-2742]

FM QUADRAPHONIC BROADCASTING

Order Extending Time for Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: Action taken herein extends the time for filing comments and reply comments to a Notice of Inquiry concerning FM quadraphonic broadcasting. Consumer Electronics Group of the Electronic Industries Association states the additional time is necessary so that it can develop a response to the various questions raised in this proceeding.

DATES: Comments must be filed on or before December 16, 1977, and reply comments must be filed on or before January 16, 1978.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION:

In the Matter of FM Quadraphonic Broadcasting (Docket No. 21310, RM-1847, RM-1984, RM-2742), an *Order extending time for filing comments and reply comments.*

Adopted: August 12, 1977.

Released: August 16, 1977.

By the Chief, Broadcast Bureau:

1. On June 22, 1977, the Commission adopted a Notice of Inquiry in the above-entitled proceeding. The dates for filing comments and reply comments are September 15, and October 17, 1977, respectively.

2. On August 5, 1977, the Consumer Electronics Group of the Electronic Industries Association ("EIA CEG") filed a request seeking a 90-day extension of time for filing comments and reply comments.

3. EIA CEG states that a critical aspect of the response will deal with subjective considerations for quadraphonic sound. EIA/CEG notes that the National Quadraphonic Radio Committee reported the results of subjective listening tests, as did the Commission's Laboratory Division. It adds that because of the relationship of subjective considerations to the initial objective of the Notice, which is to determine if there is sufficient interest to warrant the Commission's adoption of additional standards for quadraphonic broadcasting, preparation of the EIA/CEG response will be extremely difficult to begin until the Commission's report has been evaluated and the test results compared with those of the National Quadraphonic Radio Committee. It states that to develop a response will take a length of time which cannot be predicted with accuracy.

4. We are of the view that the public interest would be served by this extension so that EIA/CEG may file any information which may be helpful to the Commision in resolving the issue before it.

5. Accordingly, it is ordered, That the dates for filing comments and reply comments in Docket 21310 are extended to and including December 16, 1977, and January 16, 1978, respectively.

6. This action is taken pursuant to authority found in Sections 4(i), 5(d)(1) and 303(r) of the Communications Act of 1934, as amedned, and Section 0.281 of the Commission's Rules.

Federal Communications Commission,
Wallace E. Johnson,
Chief, Broadcast Bureau.

[FR Doc.77-24117 Filed 8-18-77;8:45 am]

FEDERAL ENERGY ADMINISTRATION

CASES FILED WITH THE OFFICE OF EXCEPTIONS AND APPEALS

Week of July 29 Through August 5, 1977

Notice is hereby given that during the week of July 29 through August 5, 1977, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Federal Energy Administration's Office of Exceptions and Appeals.

Under the FEA's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the FEA action sought in such cases may file with the FEA written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first.

Eric J. Fygi,
Acting General Counsel.

August 12, 1977.

Appendix.—*List of cases received by the Office of Exceptions and Appeals, week of July 29 through Aug. 5, 1977*

Date	Name and location of applicant	Case No.	Type of submission
July 29, 1977	Beacon Oil Co., Hanford, Calif. (If granted: Beacon Oil Co. would receive an exception from 10 CFR 211.67 and would be permitted to include crude oil blended to fuel at their Hanford Refinery in their runs to stills.	FEE-4458	Allocation exception (211.67).
Do	Damson Oil Corp., Houston, Tex. (If granted: Damson Oil Corp. would receive an extension of the relief granted in the FEA's Feb. 24, 1977, decision and order and Damson Oil Corp. would be permitted to sell 100 bpd of the crude oil produced from the city of Los Angeles lease No. 135 (Venice Beach lease) at upper tier ceiling prices for the benefit of the working interest owners.)	EXE-4461	Extension of the relief granted in *Damson Oil Corp.*, 5 FEA par. 83,073 (Feb. 24, 1977).
Do	Texas Gas Exploration Corp., Houston, Tex. (If granted: Texas Gas Exploration Corp. would receive an exception which would permit the firm to recover in future prices those revenues which it did not recover during the period Jan. 1, 1975, to Feb. 28, 1977, because of its interpretation of the May 15 transaction prices for propane.)	EEE-4440	Price exception (212.54(c)(1)(K)).
Aug. 1, 1977	American Hoeclist Corp., Delaware City, Del. (If granted: American Hoeclist Corp. would be assigned a new, lower priced supplier of propane to replace its base period supplier, Pyrofax Gas Corp.)	EEE-4458	Exception to change suppliers.
Do	Little America Refining Co., Washington, D.C. (If granted: The FEA's June 28, 1977, decision and order would be rescinded and Little America Refining Co. would not be required to purchase entitlements that are equal in value to $73,250 during the period July 1, 1977, through June 30, 1978.)	FXA-1411 FES-1411	Appeal of the FEA's decision and order in *Little America Refining Co.*, 6 FEA par. ------ (June 28, 1977). Stay request.
Do	Little America Refining Co., Washington, D.C. (If granted: Little America Refining Co. would receive an extension of the relief granted in the FEA's Mar. 11, 1977, decision and order and would continue to receive a reduction in the value of entitlements which the firm is required to purchase.)	FXE-4462	Extension of the relief granted in *Little America Refining Co.*, 5 FEA par. 83,063 (Mar. 11, 1977).
Do	M. J. Mitchell, Dallas, Tex. (If granted: The FEA's July 8, 1977, decision and order would be rescinded and M. J. Mitchell would be permitted to sell the crude oil produced from the Mitchell State Mamelsa sand unit in the South Rozet field, Campbell County, Wyo., at upper tier ceiling prices.)	FXA-1410	Appeal of the decision and order in *M. J. Mitchell*, 6 FEA par. ------ (July 8, 1977).
Do	Texaco, Inc., Los Angeles, Calif. (If granted: Texaco, Inc., would be permitted to sell crude oil produced from platform A in the Cook Inlet, Alaska, at exempt prices on a retroactive basis.)	EEE-4457	Price exception (212.73).
Aug. 2, 1977	Berry Holding Co., Fresno, Calif., (If granted: Berry Holding Co. would receive a stay of the refund requirements as stated in the remedial order issued by FEA region IX on June 10, 1977, pending a determination on its appeal.	FRS-1394	Stay of the remedial order issued by FEA region IX on June 10, 1977.
Do	Department of Defense, Washington, D.C. (If granted: The FEA's May 7, 1976, decision and order would be modified to increase the Department of Defense's pricing flexibility with regard to its retail sales of motor gasoline.)	FMR-0118	Modification of the decision and order in *Department of Defense*, 3 FEA par. 87,021 (May 7, 1976).
Do	Joint Venture (Grand Coulee field), Atlanta, Ga. (If granted: Joint Venture would be permitted to sell the crude oil produced from the Lester Reed unit, Grand Coulee field in Acadia Parish, La., at upper tier ceiling prices.)	FEE-4465	Price exception (sec. 212.73).
Do	MacKellar, Inc., Oklahoma City, Okla. (If granted: MacKellar, Inc., would receive an extension of time in which to fulfill the requirements of the FEA's June 8, 1977, decision and order.)	FEX-0179	Supplemental order in *MacKellar, Inc.*, 5 FEA par. ------ (June 8, 1977).
Do	P&M Petroleum Management, Denver, Colo. (If granted: P&M Petroleum Management would be permitted to sell crude oil produced from the Track lease, Tule Creek south field in Roosevelt County, Mont., at upper tier ceiling prices.)	FEE-4464	Price exception (sec. 212.73).
Do	San Joaquin Refining Co., Newport Beach, Calif. (If granted: The FEA would review the entitlements exception relief which was granted to San Joaquin Refining Co. during its 1977 fiscal year in order to determine whether the level of exception relief approved was appropriate.)	FEX-0180	Entitlements review.
Do	Sun Gas Co., Dallas, Tex. (If granted: The FEA's June 30, 1977, decision and order would be rescinded and Sun Gas Co. would receive an additional increase in its prices to reflect nonproduct cost increases in excess of $0.0635/gal for natural gas liquid products produced at its Mayfield plant.)	FXA-1412	Appeal of the FEA's decision and order in *Sun Gas Co.*, 6 FEA par. ------ (June 30, 1977).
Aug. 3, 1977	Coline Gasoline Corp. (If granted: Coline Gasoline Corp. would receive an extension of the exception relief approved in the FEA's Mar. 22, 1977, decision and order and would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005/gal for natural gas liquid products produced at its Rincon plant.)	FXE-4463	Extension of the relief granted in *Coline Gasoline Corp.*, case No. FXE-3895 (decided Mar. 22, 1977) (unreported decision).

V 42 161 AUG 19 77 UM V

Date	Name and location of applicant	Case No.	Type of submission
Aug. 4, 1977	Barber Oil Exploration, Inc., Houston, Tex. (If granted: Barber Oil Exploration, Inc., would be permitted to sell crude oil produced from the Condon-Federal lease located in Mae field, Campbell County, Wyo., at upper tier ceiling prices for the benefit of the working interest owners.)	FEE-4469	Price exception (sec. 212.-73).
Do	El Paso Natural Gas Co., El Paso, Tex. (If granted: El Paso Natural Gas Co. would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005/gal for natural gas liquid products produced at its Jal, Midkiff, and San Juan processing plants.)	FEE-4466—FEE-4468	Price exception (sec. 212.-169).
Aug. 5, 1977	Temneco Oil Co., Houston, Tex. (If granted: The FEA's July 15, 1977, decision and order would be modified and the Temneco Oil Co. would be permitted to sell additional quantities of crude oil at upper tier ceiling prices.)	FEX-0181	Supplemental order.
Do	Colonial Oil Co., Jacksonville, Fla. (If granted: The FEA's July 8, 1977, decision and order would be rescinded and the Colonial Oil Co. would receive an extension of relief granted in an Apr. 7, 1977, decision and order which would permit the firm to be assigned a new, lower priced supplier of motor gasoline to replace its base period supplier, American Petrolina, Inc.)	FXA-1409	Appeal of decision and order in *Colonial Oil Co.*, 6 FEA par. ——— (July 8, 1977).

ENERGY SUPPLY AND ENVIRONMENTAL COORDINATION ACT

Issuance of Notice of Effectiveness To Make Effective Previously Issued Prohibition Order

Pursuant to Section 2 of the Energy Supply and Environmental Coordination Act of 1974, as amended (ESECA), 15 U.S.C. 791 et seq., and 10 CFR 303.37(d), the Federal Energy Administration (FEA) hereby gives notice that on August 5, 1977, it issued a Notice of Effectiveness making effective the Prohibition Order previously issued on June 30, 1975 (40 FR 28430, July 3, 1975), to the below listed powerplants. The Notice of Effectiveness was issued under the authorities granted to FEA by Section 2 of the Energy Supply and Environmental Coordination Act of 1974, as amended, and pursuant to 10 CFR Parts 303 and 305.

Docket No.	Owner	Powerplant number	Generating station	Location
OFU-020 OFU-021 OFU-022	Kansas Power and Light Co.	3, 4, and 5	Lawrence	Lawrence, Kans.

The Prohibition Order issued by FEA on June 30, 1975, to the above listed powerplants prohibits the powerplants from burning natural gas or petroleum products as their primary energy source. In accordance with the requirements of 10 CFR Parts 303 and 305, however, the order provided it would not become effective until FEA had considered the environmental impact of the order and until FEA had served the affected powerplants with a Notice of Effectiveness.

Subsequent to issuance of the Prohibition Order, FEA performed an analysis pursuant to 10 CFR 305.9 and 208.3, of the environmental impact of the issuance of the Notice of Effectiveness, including an assessment of the EPA Certification dated November 19, 1976, pursuant to Section 119(d)(1)(B) of the Clean Air Act, that December 31, 1977, was the earliest date that powerplants Number 3 and 5 could burn coal and comply with the applicable regional limitation, and that November 30, 1977, was the earliest date that powerplant Number 4 could burn coal and comply with the applicable regional limitation. That analysis resulted in a determination that it is clear that issuance of the Notice of Effectiveness making this Prohibition Order effective is not a "major Federal action significantly affecting the quality of the human environment" within the meaning of Section 102(2)(C) of the National Environmental Policy Act, 42 U.S.C. 4332(2)(C). Public notice of the negative determination and of the availability for inspection of this analysis was given in the FEDERAL REGISTER published July 1, 1977, in accordance with 10 CFR 208.4(c) and 208.15(a).

Upon completion of this environmental analysis, FEA issued a Notice of Effectiveness of the June 30, 1975, Prohibition Order to the above listed powerplants and served the Notice on the powerplants by registered mail on the same day. The Notice makes effective the Prohibition Order prohibiting the powerplants from burning natural gas or petroleum products as their primary energy source.

Any person aggrieved by the now effective Prohibition Order may file an appeal with the FEA Office of Exceptions and Appeals in accordance with 10 CFR Part 303, Subpart H. The appeal shall be filed within 30 days after service of the Notice of Effectiveness. There has not been an exhaustion of administrative remedies until an appeal has been filed pursuant to Subpart H of Part 303, and the appellate proceeding is completed by the issuance of an order granting or denying the appeal.

Application may be made for modification or rescission of the Prohibition Order in accordance with the provisions of 10 CFR Part 303, Subpart J. An application for modification or rescission of a Prohibition Order based on "significantly changed circumstances," which circumstances occurred during the interval between issuance of the order and service of the Notice of Effectiveness, shall be filed within 30 days of service of such Notice. An application for modification or rescission of a Prohibition Order based on significantly changed circumstances occurring after that interval may be filed at any time after service of the Notice of Effectiveness.

All terms and conditions of the Prohibition Order and the Notice of Effectiveness may be the subject of either an appeal or an application for modification or rescission.

The order made effective by this Notice of Effectiveness is effective against any persons that, as of the date of service of such Notice, own, lease, operate, or control the above listed powerplants and against any successors-in-interest or assignees of such persons.

The above listed powerplants have been served the Notice of Effectiveness by registered mail. In addition, copies of the document will be available for inspection by any interested members of the public at the FEA public docket room located in Room B-120, 2000 M Street NW., Washington, D.C., from 1-5 p.m., Monday-Friday. Copies will also be available in the appropriate FEA regional office. The negative determination and environmental analyses are available upon request from the FEA National Energy Information Center, Room 1404, 12th Street and Pennsylvania Avenue NW., Washington, D.C. 20461. Copies of the documents are also available for public review in the FEA Freedom of Information Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C.

Any questions regarding this notice should be directed to the Director, Office of Coal Utilization, Federal Energy Administration, 12th Street and Pennsylvania Avenue, NW., Washington, D.C. 20461. (202) 566-7941.

Issued in Washington, D.C., August 15, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

ENERGY SUPPLY AND ENVIRONMENTAL COORDINATION ACT

Issuance of Notice of Effectiveness To Make Effective Previously Issued Prohibition Order

Pursuant to Section 2 of the Energy Supply and Environmental Coordination Act of 1974, as amended (ESECA), 15 U.S.C. 791 et seq., and 10 CFR 303.37(d), the Federal Energy Administration (FEA) hereby gives notice that on August 5, 1977, it issued a Notice of Effectiveness making effective the Prohibition Order previously issued on June 30, 1975 (40 FR 28430, July 3, 1975), to the below listed powerplants. The Notice of Effectiveness was issued under the authorities granted to FEA by Section 2 of the Energy Supply and Environmental Coordination Act of 1974, as amended, and purusant to 10 CFR Parts 303 and 305.

Docket No.	Owner	Powerplant number	Generating station	Location
OFU-005 OFU-006	Iowa Power and Light Co.	11 and 10	Des Moines	Des Moines, Iowa.

The Prohibition Order issued by FEA on June 30, 1975, to the above listed powerplants prohibits the powerplants from burning natural gas or petroleum products as their primary energy source. In accordance with the requirements of 10 CFR Parts 303 and 305, however, the order provided it would not become effective until FEA had considered the environmental impact of the order and until FEA had served the affected powerplants with a Notice of Effectiveness.

Subsequent to issuance of the Prohibition Order, FEA performed an analysis pursuant to 10 CFR 305.9 and 208.3, of the environmental impact of the issuance of the Notice of Effectiveness, including an assessment of the EPA Notifications dated December 22, 1975, for Number 11 and March 9, 1976, for Number 10 pursuant to Section 119(d)(1)(B) of the Clean Air Act, that these powerplants could burn coal immediately and comply with all applicable air pollution requirements. That analysis resulted in a determination that it is clear that issuance of the Notice of Effectiveness making this Prohibition Order effective is not a "major Federal action significantly affecting the quality of the human environment" within the meaning of Section 102(2)(C) of the National Environmental Policy Act, 42 U.S.C. 4332(2)(C). Public notice of the negative determination and of the availability for inspection of this analyis was given in the FEDERAL REGISTER published May 6, 1977, in accordance with 10 CFR 208.4(c) and 208.15(a).

Upon completion of this environmental analysis, FEA issued a Notice of Effectiveness of the June 30, 1975, Prohibition Order to the above listed powerplants and served the Notice on the powerplants by registered mail on the same day. The Notice makes effective the Prohibition Order prohibiting the powerplants from burning natural gas or petroleum products as their primary energy source.

Any person aggrieved by the now effective Prohibition Order may file an appeal with the FEA Office of Exceptions and Appeals in accordance with 10 CFR Part 303, Subpart H. The appeal shall be filed within 30 days after service of the Notice of Effectiveness. There has not been an exhaustion of administrative remedies until an appeal has been filed pursuant to Subpart H of Part 303, and the appellate proceeding is completed by the issuance of an order granting or denying the appeal.

Application may be made for modification or rescission of the Prohibition Order in accordance with the provisions of 10 CFR Part 303, Subpart J. An application for modification or rescission of a Prohibition Order based on "significantly changed circumstances," which circumstances occurred during the interval between issuance of the order and service of the Notice of Effectiveness, shall be filed within 30 days of service of such Notice. An application for modification or rescission of a Prohibition Order based on significantly changed circumstances occurring after that interval may be filed at any time after service of the Notice of Effectiveness.

All terms and conditions of the Prohibition Order and the Notice of Effectiveness may be the subject of either an appeal or an application for modification or rescission.

The order made effective by the Notice of Effectiveness is effective against any persons that, as of the date of service of such Notice, own, lease, operate, or control the above listed powerplants and against any successors-in-interest or assignees of such persons.

The above listed powerplants have been served the Notice of Effectiveness by registered mail. In addition, copies of the document will be available for inspection by any interested members of the public at the FEA public docket room located in Room B-120, 2000 M Street NW., Washington, D.C., from 1-5 p.m., Monday-Friday. Copies will also be available in the appropriate FEA regional office. The negative determination and environmental analyses are available upon request from the FEA National Energy Information Center, Room 1404, 12th Street and Pennsylvania Avenue NW., Washington, D.C. 20461. Copies of the documents are also available for public review in the FEA Freedom of Information Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C.

COSTA LINE, INC. AND ITALIA CROCIERE INTERNAZIONALI S.P.A.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Filed Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California and San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573 by September 8, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement, (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed for Approval by:

Mr. R. J. Lanzoni, Costa Line, Inc., 245 Park Avenue, New York, New York 10017.

Agreement No. 10074 between Costa Line, Inc. and Italia Crociere Internazionali S.p.A. provides for the appointment by Italia Crociere Internazionali S.p.A. of Costa Line, Inc. as its General Passenger Agent in the United States, Canada and Mexico, for its vessel, the T/S *Leonardo da Vinci*, to perform services enumerated in the Agreement under covenants, conditions and terms set forth in the Agreement. Among other things, the Agreement provides for the spacing of sailings of their passenger vessels from the United States and foreign ports and publication of sailing schedules, rate sheets, advertising and promotional material relating to the *Leonardo da Vinci* in her service.

By order of the Federal Maritime Commission.

Dated: August 15, 1977.

JOSEPH C. POLKING,
Acting Secretary.

CITY OF RICHMOND, CALIF. AND MATSON TERMINALS, INC.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, by September 8, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

Captain Thomas R. Eddy, Port Director, City of Richmond, City Hall, Richmond, California 94804.

Agreement No. T-3501, between the City of Richmond, California, (Port) and Matson Terminals, Inc., (Matson) provides for Matson to operate and manage the Port's container terminal to be constructed and equipped by the Port at the south end of 10th Street, Richmond, California. The agreement provides for a term of ten years (with an additional 10-year renewal option). Matson will collect and pay the Port all charges assessed in accordance with the Port's container terminal tariff. All expenses incurred in and revenues derived from the operation of the container terminal shall be shared by the Port and Matson as outlined in the agreement.

Matson will collect and pay to the Port revenues derived from: (1) Tariff charges assessed against vessel and merchandise for facilities, equipment, and services provided or performed by the Port and Matson as outlined in the agreement; (2) terminal tariff charges for wharfage, dockage, wharf demurrage, wharf storage and charges for equipment used to provide terminal services; (3) container handling charges, including charges for equipment used in container handling; and (4) investment income earned from investment by Matson of amounts received from customers under paragraph 2.b(3)(f) of the agreement. If container handling expenses exceed container handling revenues under the agreement, the Port will reimburse Matson for the excess expenses.

The rates named by the Port in the tariff shall be published after consultation with Matson and shall be established from time-to-time at levels intended to cover the expenses and the management fee designated in the agreement. Agreement No. T-3501 supersedes FMC Agreement No. T-3379, as amended by T-3379-1.

By Order of the Federal Maritime Commission.

Dated: August 16, 1977.

JOSEPH C. POLKING,
Acting Secretary.

Deputy Secretary of the Board.

[FR Doc.24049 Filed 8-18-77;8:45 am]

UNITED MISSOURI BANCSHARES, INC.

Proposed Acquisition of United Missouri Insurance Company

United Missouri Bancshares, Inc., Kansas City, Missouri, has applied, pursuant to § 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to acquire voting shares of United Missouri Insurance Company, Phoenix, Arizona, a proposed de novo subsidiary. Notice of the application was published on July 3, 1977, in The Kansas City Star, a newspaper circulated in Kansas City, Missouri.

Applicant states that the proposed subsidiary would engage in the activity of underwriting, as reinsurer, credit life and credit disability insurance in connection with extensions of credit by the bank holding company's subsidiaries in Missouri. Such activity has been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statemcnt summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 12, 1977.

Board of Governors of the Federal Reserve System, August 15, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

FEDERAL TRADE COMMISSION

CIGARETTE TESTING RESULTS

Tar and Nicotine Content

Correction

In FR Doc. 23362 appearing at page 41180 in the issue for Monday, August 15, 1977 in the table, in the column for milligrams per cigarette of nicotine, the entry for "Kent, 100mm, filter, menthol" now reading "1.2" should read "1.1".

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposals

The following requests for clearance of reports intended for use in collecting information from the public were received by the Regulatory Reports Review Staff, GAO, on August 11 and 12, 1977 (FCC), and August 15, 1977 (FMC). See 44 U.S.C. 3512 (c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipts.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed FCC and FMC requests are invited from

all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before September 6, 1977, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5033, 441 G Street NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

FEDERAL COMMUNICATIONS COMMISSION

The FCC requests clearance of an extension no change reinstatement of Form 336, Report of Overseas Telecommunications Circuit Traffic. Form 336 is required by Section 43.61 of the Commission's Rules and Regulations. Common carriers engaged in furnishing telecommunications service between the United States and overseas points must file this form annually. The FCC estimates there are approximately nine respondents and that burden averages 30 hours per response.

The FCC requests clearance of an extension no change reinstatement of Form 349-L, Application for an FM Booster Station License. Form 349-L is required by Section 325(a) of the Communications Act of 1934, as amended, and Section 1.536 of the FCC Rules and Regulations. The form is used by applicants applying for an FM Broadcast Booster Station. FM radio broadcast stations are authorized only to licensees or permittees of FM radio broadcast stations whose signals the booster station will rebroadcast. A license for an FM broadcast translator station may be issued to any qualified individual, organized group of individuals, broadcast station licensee, or local civil government body. The FCC estimates approximately two applications are received anually and that reporting budden averages one and one-half hours per response.

The FCC requests clearance of an extension no change reinstatement of Form 349-P, Application for Authority to Construct or Make Changes in an FM Booster Station. Form 349-P is required by Sections 1.531 and 1.533 of the Commission's Rules and Regulations. The form is used by applicants applying for authority to construct or make changes in an FM Booster Station. The FCC estimates approximately two applications are filed annually and that reporting burden averages 14 hours per application.

The FCC requests an extension no change reinstatement of Form 349-R, Application for Renewal of FM Booster Station License. Form 349-R is required by Section 1.539 of the Commission's Rules and Regulations. The form is used for renewing FM Booster Station Licenses. The FCC estimates approximately one application is received annually and that reporting burden averages seven hours per application.

FEDERAL MARITIME COMMISSION

The FMC requests an extension without change clearance of General Order 15 (46 CFR 533). Filing of Tariffs by Terminal Operators, which requires every person performing marine terminal services in connection with common carriers by water to file with the Commission a schedule or tariff showing all its rates, charges, rules, and regulations relating to or connected with the receiving, handling, storing, and/or delivering of property at its terminal facilities.

The information is used by the Commission to fulfill its regulatory responsibility by keeping informed of the practices, rates and charges instituted by terminal operators, and by keeping the public informed of such practices. The FMC estimates that there is a universe of approximately 570 respondents filing 11 tariff pages per year, with an estimated reporting burden of 15 minutes per page.

NORMAN F. HEYL,
Regulatory Reports Review Officer.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

ADVISORY COMMITTEES

Notice of Meetings

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory bodies scheduled to assemble during the month of September 1977:

MENTAL HEALTH SMALL GRANT COMMITTEE

Date and time: September 22-24, 1 p.m.
Place: The Oak Room and Parlor A, Burlington Hotel, 1120 Vermont Avenue, NW., Washington, D.C.
Type of Meeting: Open—September 22, 4-5 p.m. Closed—Otherwise.
Contact: Mary E. Enyart, Room 10C-14, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-4337.
Purpose: The Committee is charged with the initial review of small grant applications for Federal assistance in all disciplines relevant to the National Institute of Mental Health and for small grant projects submitted for support to the other Institutes of the Alcohol, Drug Abuse, and Mental Health Administration, and makes recommendations to the National Advisory Councils of the respective Institutes for final review.
Agenda: From 4 p.m. to 5 p.m., on September 22, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Acting Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of Section 552b(c)(6), Title 5 U.S. Code and Section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

SOCIAL SCIENCES TRAINING REVIEW COMMITTEE

Date and time: September 29-30; 9 a.m.
Place: Conference Room B, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.
Type of meeting: Open—September 29, 9-11 a.m. Closed—Otherwise.
Contact: Barbara Friedland, Room 9C-09, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-3857.
Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to social science training and makes recommendations to the National Advisory Mental Health Council for final review.
Agenda: From 9 a.m. to 11 a.m., September 29, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Acting Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of Section 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

Substantive program information may be obtained from the contact person listed above. The NIMH Information Officer who will furnish upon request summaries of the meeting and rosters of the committee members is Mr. Edwin Long, Deputy Director, Division of Scientific and Public Information, NIMH, Room 15-105, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-3600.

Dated: August 12, 1977.

CAROLYN T. EVANS,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

Food and Drug Administration

[Docket No. 77N-0188; DESI 5597]

COMBINATION DRUG CONTAINING MEPROBAMATE AND ASPIRIN

Drugs for Human Use; Drug Efficacy Study Implementation

AGENCY: Food and Drug Administration (FDA).

ACTION: Notice.

SUMMARY: This notice states the conditions for marketing the combination drug product containing meprobamate 200 milligrams and aspirin 325 milligrams for the indication for which it is regarded as effective, and allows for the submission of abbreviated new drug applications.

V42161 AUG 19 77 UM

DATE: Supplements to approved new drug applications due on or before October 18, 1977.

ADDRESSES: Communications forwarded in response to this notice should be identified with the reference number DESI 5597, directed to the attention of the appropriate office named below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857.

Supplements (identify with NDA number): Division of Neuropharmacological Drug Products (HFD-120), Rm. 10B-34, Bureau of Drugs.

Original abbreviated new drug applications or supplements thereto (identify as such): Division of Generic Drug Monographs (HFD-530), Bureau of Drugs.

Requests for opinion of the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs.

Other communications regarding this notice: Drug Efficacy Study Implementation Project Manager (HFD-501), Bureau of Drugs.

FOR FURTHER INFORMATION CONTACT:

William R. Durbin, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857. (301-443-3650).

SUPPLEMENTARY INFORMATION: In a notice (DESI 5597) published in the FEDERAL REGISTER of July 10, 1974 (39 FR 25375), the Director of the Bureau of Drugs announced the agency's conclusion that the following reformulated product is effective in providing additional relief of pain not obtained when aspirin is administered alone, and additional relief of anxiety or tension.

NDA 11-702; that part pertaining to Equagesic-M Tablets containing meprobamate and aspirin; Wyeth Laboratories, Division of American Home Products Corp., P.O. Box 8299, Philadelphia, Pa. 19101.

Wyeth Laboratories had supplemented its new drug application to provide for reformulated Equagesic-M Tablets containing meprobamate 200 milligrams and aspirin 325 milligrams. This product was approved on April 22, 1975, through the supplemental new drug application procedures. Based on all data and information available, the Director concludes that an abbreviated new drug application is acceptable for such a product, as stated below.

Other notices concerning ethoheptazine citrate alone and in combination with meprobamate and aspirin will be published in the FEDERAL REGISTER at a later date.

The notice that follows pertains only to the combination product containing meprobamate 200 milligrams and aspirin 325 milligrams.

Such drugs are regarded as new drugs (21 U.S.C. 321(p)). Supplemental new drug applications are required to revise the labeling in and to update previously approved applications providing for such drugs. An approved new drug application is a requirement for marketing such drug products.

In addition to the holder(s) of the new drug application(s) specifically named above, this notice applies to all persons who manufacture or distribute a drug product, not the subject of an approved new drug application, that is identical to the drug product named above. It is the responsibility of every drug manufacturer or distributor to review this notice to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product he manufacturers or distributes that may be identical to the drug product named in this notice by writing to the Food and Drug Administration, Division of Drug Labeling Compliance (address given above).

A. *Effectiveness classification.* The Food and Drug Administration has reviewed all available evidence and concludes that the drug is effective for the indication in the labeling conditions below.

B. *Conditions for approval and marketing.* The Food and Drug Administration is prepared to approve abbreviated new drug applications and abbreviated supplements to previously approved new drug applications under conditions described herein.

1. *Form of drug.* The drug is in tablet form suitable for oral administration.

2. *Labeling conditions.* (a) The label bears the statement, "Caution: Federal law prohibits dispensing without prescription."

(b) The drug is labeled to comply with all requirements of the act and regulations, and the labeling bears adequate information for safe and effective use of the drug. The Indication is as follows:

As an adjunct in the short-term treatment of pain accompanied by tension and/or anxiety in patients with musculoskeletal disease. Clinical trials have demonstrated that in these situations, relief of pain is somewhat greater than with aspirin alone.

3. *Marketing status.* (a) Marketing of such drug products that are now the subject of an approved or effective new drug application may be continued provided that, on or before October 18, 1977, the holder of the application submits, if he has not previously done so, (i) a supplement for revised labeling as needed to be in accord with the labeling conditions described in this notice, and complete container labeling if current container labeling has not been submitted, (ii) a supplement to provide updating information with respect to items 6 (components), 7 (composition), and 8 (methods, facilities, and controls) of new drug application form FD-356H (21 CFR 314.1(c)) to the extent required in abbreviated applications (21 CFR 314.1(f)), and (iii) bioavailability/bioequivalence data obtained from dissolution testing of the product using the U.S.P. XIX method for meprobamate tablets.

(b) Approval of an abbreviated new drug application (21 CFR 314.1(f)) must be obtained prior to marketing such product. Such abbreviated new drug application is required to contain data obtained from dissolution testing of the product using the U.S.P. XIX method for meprobamate tablets. Marketing prior to approval of a new drug application will subject such products, and those persons who caused the products to be marketed, to regulatory action.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050-1053, as amended (21 U.S.C. 352, 355)) and under the authority delegated to the Director of the Bureau of Drugs (21 CFR 5.70).

Dated: August 5, 1977.

CARL M. LEVENTHAL,
Acting Director Bureau of Drugs.

[FR Doc.77-23851 Filed 8-18-77;8:45 am]

[Docket No. 76N—0211; DESI 13295]

MEGLUMINE IOTHALAMATE AND SODIUM IOTHALAMATE INJECTIONS

Drugs for Human Use; Drug Efficacy Study Implementation; Announcement

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice classifies meglumine iothalamate and sodium iothalamate injections as effective for their labeled indications, and sets forth the conditions for marketing the drugs for those indications. The drugs are used as diagnostic agents.

DATES: Supplements to approved NDA's due on or before October 18, 1977.

ADDRESSES: Communications forwarded in response to this notice should be identified with the reference number DESI 13295, directed to the attention of the appropriate office named below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857.

Supplements (identify with NDA number): Division of Oncology and Radiopharmaceutical Drug Products (HFD-150), Rm. 17B-34, Bureau of Drugs.

Original abbreviated new drug applications and supplements thereto (identify as such): Division of Generic Drug Monographs (HFD-530), Bureau of Drugs.

Requests for opinion of the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs.

Other communications regarding this notice: Drug Efficacy Study Implementation Project Manager (HFD-501), Bureau of Drugs.

FOR FURTHER INFORMATION CONTACT:

Herbert Gerstenzang, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, (301-443-3350).

SUPPLEMENTARY INFORMATION: In a notice published in the FEDERAL REGISTER of July 9, 1966 (31 FR 9426), each holder of a new drug application that became effective prior to October 10, 1962, was requested to submit to the Food and Drug Administration reports containing the best data available in support of the effectiveness of each such product for the claimed indications. That information was needed to facilitate a determination by the Food and Drug Administration, with the assistance of the National Academy of Sciences-National Research Council (NAS-NRC), whether each claim in the labeling is supported by substantial evidence of effectiveness, as required by the Drug Amendments of 1962. The sponsor of Conray and Angio-Conray described below, submitted clinical data in support of effectiveness prior to the July 9, 1966 notice but did not respond to that notice and thus these products were not reviewed by NAS-NRC. The data were reviewed by FDA and found to provide substantial evidence of effectiveness.

NDA 13-295; Conray Injection, containing meluminе iothalamate 60 percent; and

NDA 13-319; Angio-Conray Injection, containing sodium iothalamate 80 percent; both marketed by Mallinckrodt Pharmaceuticals, Division Mallinckrodt Inc., 2nd and Mallincrodt Sts., St. Louis, Mo. 63147.

Such drugs are regarded as new drugs (21 U.S.C. 321(p)). Supplemental new drug applications are required to revise the labeling in and to update previously approved applications providing for such drugs. An approved new drug application is a requirement for marketing such drug products.

In addition to the holder(s) of the new drug application(s) specifically named above, this notice applies to all persons who manufacture or distribute a drug product, not the subject of an approved new drug application, that is identical, related, or similar to a drug product named above, as defined in 21 CFR 310.6. It is the responsibility of every drug manufacturer or distributor to review this notice to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product he manufacturers or distributes that may be identical, related, or similar to a drug product named in this notice by writing to the Division of Drug Labeling Compliance at the address given above.

A. *Effectiveness classification.* The Food and Drug Administration has reviewed all available evidence and concludes that the drugs are effective for the indications in the labeling conditions below.

B. *Conditions for approval and marketing.* The Food and Drug Administration is prepared to approve abbreviated new drug applications and supplements to previously approved new drug applications under conditions described herein.

1. *Form of drug.* The drugs are in sterile aqueous solution form suitable for parenteral administration.

2. *Labeling conditions.* (a) The labels bears the statement. "Caution: Federal law prohibits dispensing without prescription."

(b) The drugs are labeled to comply with all requirements of the act and regulations, and the labeling bears adequate information for safe and effective use of the drug. The indications are as follows:

Meglumine iothalamate: For use in intravenous urography, cerebral angiography, peripheral arteriography, and venograph.

Sodium iothalamate: For use in angiocardiography and aortography.

3. *Marketing status.* (a). Marketing of such drug products which are now subject of an approved or effective new drug application may be continued provided that, on or before October 18, 1977, the holder of the application submits, if he has not previously done so, (i) a supplement for revised labeling as needed to be in accord with the labeling conditions described in this notice, and complete container labeling if current container labeling has not been submitted, and (ii) a supplement to provide full updating information with respect to items 6 (components), 7 (composition), and 8 (methods, facilities, and controls) of new drug application form FD-356H (21 CFR 314.1(c)).

(b) Approval of an abbreviated new drug application (21 CFR 314.1(f)), must be obtained prior to marketing such products. The applications shall contain full information with respect to items 6 (components), 7 (composition) and 8 (methods, facilities, and controls) of new drug application form FD-356H (31 CFR 314.1(c)). Marketing prior to approval of a new drug application will subject such products, and those persons who caused the products to be marketed, to regulatory action.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050-1053, as amended (21 U.S.C. 352, 355)) and under the authority delegated to the Director of the Bureau of Drugs (21 CFR 5.70).

Dated: August 8, 1977.

CARL M. LEVENTHAL,
Acting Director Bureau of Drugs.

[FR Doc.77-23852; Filed 8-18-77;8:45 am]

[Docket No. 75N-0184; DESI 597 et al.]

CERTAIN DRUG PRODUCTS CONTAINING AN ANTICHOLINERGIC/ANTISPASMODIC IN COMBINATION WITH A SEDATIVE/TRANQUILIZER; ANTISPASMODIC DRUGS ALONE

Notice of Opportunity For Hearing on Proposal To Withdraw Approval of New Drug Applications

AGENCY: Food and Drug Administration (FDA).

ACTION: Notice.

SUMMARY: The Director of the Bureau of Drugs proposes to withdraw approval of certain drug products for which the sponsors have neither provided substantial evidence of effectiveness nor complied with the conditions for continued marketing while additional studies are undertaken.

DATES: Any request for a hearing must be submitted on or before September 19, 1977. In support of such request, all data and information relied upon to justify a hearing must be submitted on or before October 18, 1977.

ADDRESSES: Communications forwarded in response to this notice should be identified with the appropriate DESI number, directed to the attention of the appropriate office named below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857.

Request for Hearing (identify with Docket number appearing in the heading of this notice): Hearing Clerk, Food and Drug Administration (HFC-20), Rm. 4-65.

Request for opinion of the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs.

FOR FURTHER INFORMATION CONTACT:

Robert H. Hahn, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20852, (301-443-3650).

SUPPLEMENTARY INFORMATION: In a notice published in the FEDERAL REGISTER of November 11, 1975 (40 FR 52644), the Commissioner of Food and Drugs specified the conditions under which certain drug products containing an anti-spasmodic drug alone and certain drug products containing an anticholinergic/antispasmodic in combination with a sedative tranquilizer, may remain on the market pending completion of scientific studies to determine effectivness. The notice required that protocols for studies to determine effectiveness be submitted to the Division of Cardio-Renal Drug Products (HFD-110), Bureau of Drugs on or before February 9, 1976. The notice stated that failure of any manufacturer or distributor of such drug products, whether or not his drug is the subject of a new drug application, to comply with the requirements of the notice or to progress satisfactorily toward completion of his studies will result in regulatory action to remove the drug from the market.

The holders of the new drug applications listed below under the respective DESI notices with which they are associated are not in compliance with the notice of November 11, 1975 in that they either failed to submit the required protocols or later decided not to pursue the studies further. Accordingly, these products are no longer eligible to remain on the market pending completion of scientific studies to determine effectiveness.

V 42 16 1 AUG 19 77 UM

DESI 597 (37 FR 15026; JULY 27, 1972)

The notice of July 27, 1972, classified these products as lacking substantial evidence of effectiveness for certain indications and possibly effective for their other labeled indications. No data supporting effectiveness having been submitted, all indications now lack substantial evidence of effectiveness. The notice below offers opportunity for a hearing concerning them.

NDA 8-910; Tricoloid and Phenobarbital Tablets, containing tricyclamol chloride 50 mg and phenobarbital 16 mg; formerly marketed by Burroughs Wellcome & Co., Inc., 3030 Cornwallis Rd., Research Triangle Park, NC 27709.

NDA 0-597; Phenobarbital and Atropine Tablets, containing phenobarbital ¼ grain and atropine sulfate 1/150 grain; The Vale Chemical Co., Inc., 1201 Liberty St., Allentown, PA 18102.

NDA 9-427; That part of the NDA pertaining to Piptal-PHB Tablets, containing pipenzolate bromide 5 mg and phenobarbital 16 mg; Merrell-National Laboratories, Division of Richardson-Merrell, Inc., Cincinnati, OH 45215.

NDA 8-919; That part of the NDA pertaining to Co-Elorine 100 Pulvules containing tricyclamol chloride 100 mg and amobarbital 16 mg; formerly marketed by Eli Lilly & Co., P.O. Box 618, Indianapolis, IN 46206.

NDA 9-288; Centrine Tablets with Phenobarbital, containing aminopentamide sulfate 0.5 mg and phenobarbital 15 mg; formerly marketed by Bristol Laboratories, Division of Bristol-Myers Co., P.O. Box 657, Syracuse, NY 13201.

NDA 8-885; Centrine Elixir with Phenobarbital, containing in each 5 cc, aminopentamide sulfate 0.5 mg and phenobarbital 20 mg; formerly marketed by Bristol Laboratories.

NDA 7-390; That part of the NDA pertaining to Banthine with Phenobarbital Tablets containing methantheline bromide 50 mg and phenobarbital 15 mg; formerly marketed by G. D. Searle & Co., P.O. Box 5110, Chicago, IL 60680.

NDA 9-032; Monomeb Tablets, containing penthienate bromide 5 mg and mephobarbital 32 mg; formerly marketed by Winthrop Laboratories, 90 Park Ave., New York, NY 10016. The firm has requested that approval of the application be withdrawn.

NDA 4-298; Metropine with Phenobarbital Tablets, containing methylatropine nitrate 1 mg and phenobarbital 15 mg; formerly marketed by Pennwalt Prescription Products Division; 755 Jefferson Rd., Rochester, NY 14623. The firm has requested that approval of the application be withdrawn.

NDA 12-741; Nactisol Tablets, containing poldine methylsulfate 4 mg and sodium butabarbital 15 mg; formerly marketed by McNeil Laboratories, Inc., Camp Hill Rd., Fort Washington, PA 19034.

NDA 6-471; That part of the NDA pertaining to Profenil Phenobarbital Tablets, containing alverine citrate 120 mg and phenobarbital 15 mg; Chemical Management Services, Division of Chemetron Corp., 111 E. Wacker Dr., Chicago, IL 60601.

NDA 8-492; That part of the NDA pertaining to Antrenyl-Phenobarbital Tablets, containing oxyphenonium bromide 5 mg and phenobarbital 15 mg; Ciba Pharmaceutical Co., Division of Ciba-Geigy Corp., 556 Morris Ave., Summit, NJ 07901.

NDA 10-599; That part of the NDA pertaining to Tral with Phenobarbital Tablets, containing hexocyclium methylsulfate 25 mg and phenobarbital 15 mg; Abbott Laboratories, 14th and Sheridan Rd., N. Chicago, IL 60064.

NDA 8-942; That part of the NDA pertaining to Pamine PB Tablets, containing methscopolamine bromide 2.5 mg and phenobarbital 15 mg; The Upjohn Co., 7171 Portage Rd., Kalamazoo, MI 49002.

NDA 6-098; That part of the NDA pertaining to Trocinate with Phenobarbital Tablets, containing thiphenamil hydrochloride 100 mg and phenobarbital 16 mg; formerly marketed by Wm. P. Poythress & Co., Inc., Box 26946, Richmond, VA 23261.

DESI 4681 (35 FR 16422; OCTOBER 21, 1970)

The notice of October 21, 1970, classified this product as lacking substantial evidence of effectiveness for certain indications and possibly effective for its other labeled indications. No data support effectiveness having been submitted, all indications now lack substantial evidence of effectiveness. The notice below offers the opportunity for a hearing concerning them.

NDA 8-829; Prantal with Phenobarbital Tablets, containing diphemanil methylsulfate 100 mg and phenobarbital 16 mg; Schering Corp., 1011 Morris Ave., Union, NJ 07083.

DESI 10837 (36 FR 11875; JUNE 22, 1971)

The notice of June 22, 1971, classified this product as possibly effective for certain indications and lacking substantial evidence of effectiveness for its other labeled indications. No data supporting effectiveness having been submitted, all indications now lack substantial evidence of effectiveness. The notice below offers the opportunity for hearing concerning them.

NDA 12-070; Daritran Tablets, containing oxyphencyclimine hydrochloride 5 mg and meprobamate 250 mg; formerly marketed by Pfizer Laboratories, Division Pfizer, Inc., 235 E. 42d St., New York, NY 10017. The firm has requested that approval of the application be withdrawn.

DESI 3265 (INITIAL NOTICE PUBLISHED JUNE 18, 1971; 36 FR 11754; AND FOLLOWUP NOTICE PUBLISHED NOVEMBER 11, 1975; 40 FR 52649)

Both of the notices offered opportunity for hearing concerning the indications classified therein as lacking substan evidence of effectiveness. With one exception, no person requested a hearing and those indications are no longer allowable in labeling, and the notice of opportunity for hearing below does not concern those indications. Knoll Pharmaceutical Co. requested a hearing concerning the migraine headache indication for Octin (NDA 6-420) and may continue to use that indication in labeling pending resolution of the request for hearing. In that no data were submitted supporting the effectiveness of following drugs for the indications classified as probably effective in the followup notice of November 11, 1975, those indications now lack substantial evidence of effectiveness. (One study of the effectiveness of thiphenamil in diarrhea was submitted. This was not, however, a study of the irritable bowel syndrome; moreover, the results did not show a statistically significant benefit of thiphenamil and cannot be used to support effectiveness.) The notice below offers the opportunity for a hearing concerning them.

NDA 5-695; That part of the NDA pertaining to Profenil Tablets, containing alverine citrate 120 mg; Chemical Management Services, Division of Chemetron Corporation.

NDA 6-098; That part of the NDA pertaining to Trocinate Tablets, containing thiphenamil hydrochloride 100 mg; Wm. P. Poythress and Co., Inc.

NDA 6-420; Octin Tablets, containing isometheptene mucate 2 gr, and Octin Solution, containing isometheptene hydrochloride 100 mg per cc; Knoll Pharmaceutical Co., 30 North Jefferson Rd., Whippany, NJ 07981.

ANDA 80-634; Spacolin Tablets, containing alverine citrate 120 mg; Philips Roxane Laboratories, Inc., 330 Oak St., Columbus, OH 43216.

ANDA 83-179; Dicyclomine Hydrochloride Capsules, 10 mg; Bolar Pharmaceutical Co., Inc., 130 Lincoln St., Copiaqui, NY 11726.

ANDA 84-361; Dicyclomine Hydrochloride Tablets, 20 mg; Bolar Pharmaceutical Co., Inc.

ANDA 83-860; Dicyclomine Hydrochloride Capsules, 10 mg; J. Davis Laboratories, Inc., 433 Commercial Ave., Palisades Park, NJ 07650.

ANDA 83-924; Dicyclomine Hydrochloride Tablets, 20 mg; J. Davis Laboratories, Inc.

ANDA 84-285; Dicyclomine Hydrochloride Capsules, 10 mg; The Lannett Co., Inc., 9000 State Rd., Philadelphia, PA 19136.

ANDA 84-600; Dicyclomine Hydrochloride Tablets, 20 mg; Barr Laboratories, Inc., Northvale, NH 07647.

ANDA 84-505; Dicyclomine Hydrochloride Capsules, 10 mg; Barr Laboratories, Inc.

ANDA 85-082; Dicyclomine Hydrochloride Capsules, 10 mg; Chelsea Laboratories, Inc., Inwood, NY 11696.

ANDA 85-223; Dicyclomine Hydrochloride Tablets, 20 mg; Chelsea Laboratories, Inc.

ANDA 84-347; Dicyclomine Hydrochloride Capsules, 10 mg; Danbury Pharmacal, Inc., 131 West St., Danbury CN 06810.

ANDA 84-479; Dicyclomine Hydrochloride Syrup, 10 mg per 5 cc; National Pharmaceutical Manufacturing Co., Inc., 4128 Hayward Ave., Baltimore, MD 21215.

On the basis of all of the data and information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111(a)(5) and 21 CFR 300.50 demonstrating the effectiveness of the drugs.

Therefore, notice is given to the holders of the new drug applications and to all other interested persons that the Director of the Bureau of Drugs proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the new drug applications (or, if indicated above, those parts of the applications providing for the drug products or indications listed above) and all amendments and supplements thereto on the ground that new information before him with respect to the drug products, evaluated together with the evidence available to him at the time of approval of the applications, shows there is a lack of substantial evidence that the drug products will have the effect they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

The persons who are subject to this notice are not only the holders of the new drug applications named above, but also all persons who manufacture or distribute a drug product, not the subject of an approved new drug application, that is identical, related, or similar to a drug product named above, as defined in 21 CFR 310.6, for which the requirements for continued marketing provided for in the notice of November 11, 1975 were not met. It is the responsibility of every drug manufacturer or distributor to review this notice of opportunity for hearing to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product he manufactures or distributes that may be identical, related, or similar to a drug product named in this notice by writing to the Food and Drug Administration, Bureau of Drugs, Division of Drug Labeling Compliance (HFD-310), 5600 Fishers Lane, Rockville, MD 20857.

In addition to the ground for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it, e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201(p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962; or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicants and all other persons subject to this notice are hereby given an opportunity for a hearing to show why approval of the new drug applications should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of a drug product named above and of all drug products subject to this notice.

If an applicant or any other person subject to this notice elects to avail himself of the opportunity for a hearing, he shall file (1) on or before September 19, 1977, a written notice of appearance and request for hearing, and (2) on or before October 18, 1977, the data, information, and analyses on which he relies to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this notice. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of an applicant or any other person subject to this notice to file timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by such person not to avail himself of the opportunity for a hearing concerning the action proposed with respect to such drug product and a waiver of any contentions concerning the legal status of any such drug product. Any such drug product may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions, denying a hearing.

All submissions pursuant to this notice shall be filed in quintuplicate. Such submissions except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk between the hours of 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-1053, as amended (21 U.S.C. 355)), and under authority delegated to the Director of the Bureau of Drugs (21 CFR 5.82).

Dated: August 9, 1977.

CARL M. LEVENTHAL,
Acting Director,
Bureau of Drugs.

[Docket No. 77N-0098; DESI Nos. 9238 and 11839]

PHYSICIAN LABELING AND PATIENT LABELING FOR PROGESTATIONAL DRUG PRODUCTS; WARNINGS AND CONTRAINDICATIONS; AMENDMENT

Drugs for Human Use; Drug Efficacy Study Implementation

AGENCY: Food and Drug Administration.

ACTION: Amendment.

SUMMARY: This document amends a notice (DESI 9238 and 11839) published in the FEDERAL REGISTER of July 22, 1977 (42 FR 37646), by stating where in the physician labeling of progestational drug products the box warning and references are to be placed.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Herbert Gerstenzang, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: The notice of July 22, 1977 (Docket No. 77N-0098), "Physician Labeling and Patient Labeling for Progestational Drug Products," did not state where in the physician labeling the box warning and references should be placed. It is therefore amended to specify that the box warning is to be placed at the beginning of the labeling, before the Description section, and that the references are to be placed after the Dosage and Administration section.

The date for submitting supplements containing appropriate revision of the physician labeling is not changed by this amendment; supplements are to be submitted on or before September 20, 1977.

The July 22, 1977 notice stated that it was issued under the authority of sections 502 and 503 of the Federal Food, Drug, and Cosmetic Act. The reference to section 503 was in error and the citation is hereby corrected by changing "503" to "505."

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050-1053, as amended (21 U.S.C. 352, 355)) and under the authority delegated to the Director of the Bureau of Drugs (21 CFR 5.82).

Dated: August 9, 1977.

CARL M. LEVENTHAL,
Acting Director,
Bureau of Drugs.

Food and Drug Administration

[Docket No. 77C-0233]

COSMETIC, TOILETRY, AND FRAGRANCE ASSOCIATION, INC.

Filing of Color Additive Petition

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Cosmetic, Toiletry, and Fragrance Association has filed a petition proposing that the color additive regulations be amended to provide for the safe use of bismuth oxychloride as a color additive in drugs and cosmetics.

FOR FURTHER INFORMATION CONTACT:

Gerad McCowin, Bureau of Foods (HFF-334), Food and Drug Administration, Department of Health, Education, and Welfare, 200 C St. SW., Washington, D.C. 20204, (202-472-5740).

SUPPLEMENTARY INFORMATION: Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 706 (d), 74 Stat. 402 (21 U.S.C. 376(d)), notice is given that a color additive petitition (CAP 6C0119) has been filed by the Cosmetic, Toiletry, and Fragrance Association, Inc., 1133 15th St. NW., Washington, D.C. 20005, proposing the issuance of color additive regulations under Part 73 (21 CFR Part 73) to provide for the safe use and exemption from certification of the color additive bismuth oxychloride to be used in coloring externally applied drugs and in cosmetics generally, including those intended for use in the area of the eye.

The petition proposes the "permanent" listing of a color that is currently provisionally listed. The agency has previously reviewed such actions and has determined under § 25.1(f)(6) (21 CFR 25.1(f)(6)) that they will not have a significant environmental impact.

Dated: August 10, 1977.

HOWARD R. ROBERTS,
Acting Director, Bureau of Foods.

ANTI-HUMAN SERUM LABELING, ETC.

Availability of Guidelines

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This document announces the availability of guidelines for Anti-Human Serum labeling, recommended laboratory test procedures, and lot release requirements.

DATE: Written comments by September 19, 1977.

ADDRESS: Requests for a copy of the guidelines may be addressed to the Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Al Rothschild, Bureau of Biologics (HFB-620), Food and Drug Administration, Department of Health, Education, and Welfare, 8800 Rockville Pike, Bethesda, MD 20014, (301-443-1920).

SUPPLEMENTARY INFORMATION: Notice is hereby given that guidelines for labeling, laboratory test procedures, and lot release requirements for Anti-Human Serum are on display at the office of the Hearing Clerk, Food and Drug Administration. Copies of the guidelines are being furnished to persons known to be interested in manufacturing blood products. Other persons interested in obtaining copies of the guidelines may contact the office of the Hearing Clerk, Food and Drug Administration.

Interested persons may, on or before submit written comments (preferably in quadruplicate and identified with the Hearing Clerk Docket Number found in brackets in the heading of this document) regarding these guidelines.

Dated: August 12, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

[Docket No. 77N-0204; DESI 11723]

COMBINATION DRUG PRODUCT CONTAINING MEPROBAMATE AND PROMAZINE HYDROCHLORIDE

Withdrawal of Approval of New Drug Application

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice withdraws approval of the new drug application (NDA 11-723) for Prozine Capsules containing meprobamate and promazine hydrochloride. The drug product has been used for the relief of anxiety and tension.

DATE: Effective August 29, 1977.

ADDRESSES: Requests for opinion of the applicability of this notice to a specific product should be directed to: Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Ronald L. Wilson, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, (301-443-3650).

SUPPLEMENTARY INFORMATION: In a notice of opportunty for hearing (DESI 11723; Docket No. FDC-D-624 (now Docket No. 77N-0204)) published in the FEDERAL REGISTER of April 25, 1973 (38 FR 10170), the Commissioner of Food and Drugs proposed to issue an order withdrawing approval of the new drug application for Prozine Capsules containing meprobamate and promazine hydrochloride. The basis of the proposed order was that the drug lacks substantial evidence of effectiveness for its labeled indications. In response to the April 25, 1973 notice, Wyeth Laboratories requested a hearing, but subsequently withdrew that request, stating that marketing of the product had been discontinued. Approval of the following new drug application is now being withdrawn:

NDA 11-723; Prozine Capsules containing meprobamate and promazine hydrochloride; formerly marketed by Wyeth Laboratories, Division of American Home Products Corp., Box 8299, Philadelphia, PA 19101.

Any drug product that is identical, related, or similar to the drug product named above, not the subject of an approved new drug application, is covered by the new drug application reviewed and is subject to this notice (21 CFR 310.6). Any person who wishes to determine whether a specific product is covered by this notice should write the Division of Drug Labeling Compliance (address given above).

No other person filed a written appearance of election as provided by the April 25, 1973 notice. The failure to file an appearance constitutes election by such persons not to avail themselves of the opportunty for a hearing.

The Director of the Bureau of Drugs, under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052-1053, as amended (21 U.S.C. 355)), and under authority delegated to him (21 CFR 5.82), finds that on the basis of new information before him with respect to the drug product, evaluated together with the evidence available to him when the application was approved, there is a lack of substantial evidence that the drug product will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in its labeling.

Therefore, pursuant to the foregoing finding, approval of new drug application 11-723, and all amendments and supplements applying thereto, is withdrawn, effective August 29, 1977.

Shipment in interstate commerce of the above product or of any identical, related, or similar product, not the subject of an approved new drug application, will then be unlawful.

Dated: August 8, 1977.

CARL M. LEVENTHAL,
Acting Director, Bureau of Drugs.

[FR Doc.77-24140 Filed 8-18-77;8:45 am]

PHILIPS ROXANE, INC.

Hexederm and Pets' Best Fun-Jex Ointments; Withdrawal of Approval of New Animal Drug Application

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration withdraws approval of a new animal drug application (NADA) providing for use of certain anti-infective ointments as an aid in the treatment of dogs, cats, and horses for certain skin disorders. This action is taken at the request of the applicant.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Louis L. Nangeroni, Bureau of Veterinary Medicine (HFV-216), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-4093.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 512(e), 82 Stat. 345-347 (21 U.S.C. 360b(e))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), the following notice is issued:

NADA 12-914V held by Philips Roxane, Inc., 2621 North Belt Highway, St. Joseph, Mo. 64502, provides for the use Hexederm and Pets' Best Fun-Jex Ointments on dogs, cats, and horses as an aid in the treatment of ringworm, otitis externa, primary and secondary skin infections caused by or complicated by susceptible bacteria and fungi, as well as nonspecific skin infections. These ointments contain the drug hexetidine.

Philips Roxane, Inc., has requested, by letter dated February 10, 1977, that approval of the NADA be withdrawn and has waived an opportunity for a hearing because the product is no longer being marketed.

Therefore, in accordance with § 514.-115 (21 CFR 514.115), notice is given that approval of NADA 12-914V and all supplements thereto are hereby withdrawn, effective August 19, 1977.

Dated August 15, 1977.

FRED J. KINGMA,
Acting Director, Bureau of Veterinary Medicine.

[Docket No. 77N-0187; DESI 7663]

POTASSIUM AMINOBENZOATE ORAL PREPARATIONS

Drugs for Human Use; Drug Efficacy Study Implementation; Followup Notice and Opportunity for Hearing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice reclassifies the drug potassium aminobenzoate to lacking substantial evidence of effectiveness and offers an opportunity for a hearing on a proposal to withdraw approval of the new drug application. The drug has been used as a antifibrotic.

DATES: Hearing requests due on or before September 19, 1977.

ADDRESSES: Communications forwarded in response to this notice should be identified with the reference number DESI 7663, directed to the attention of the appropriate office named below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, Md. 20857.

Requests for Hearing (identify with Docket number appearing in the heading of this notice): Hearing Clerk, Food and Drug Administration (HFC-20), Rm. 4-65.

Requests for opinion of the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFD-310), Bureau of Drugs.

FOR FURTHER INFORMATION CONTACT:

Herbert Gerstenzang,
Bureau of Drugs (HFD-32),
Food and Drug Administration,
Department of Health, Education, and Welfare,
5600 Fishers Lane,
Rockville, Md. 20857,
301-443-3650.

SUPPLEMENTARY INFORMATION: In a notice (DESI 7663) published in the FEDERAL REGISTER of August 28, 1970 (35 FR 13756), the Food and Drug Administration announced its conclusion that the drug products described below containing potassium aminobenzoate are possibly effective in the treatment of scleroderma, dermatomyositis, morphea, linear scleroderma, pemphigus, and Peyronie's disease, and lacking substantial evidence of effectiveness for their other labeled indications.

NDA 7-663; Potaba Tablets, Capsules, Powder, and Envules containing potassium aminobenzoate; Glenwood Laboratories, 83 Summit St., Tenafly, N.J. 07676.

A notice of opportunity for hearing on the proposal to withdraw approval of the new drug application (Docket No. FDC-D-413 (now Docket No. 77N 0137)) was published in the FEDERAL REGISTER of February 4, 1972 (37 FR 2689). A notice published in the FEDERAL REGISTER of December 14, 1972 (37 FR 26623) stated that the drug could remain on the market pending completion of scientific studies to determine effectiveness, thus rendering moot the notice of opportunity for hearing of February 4, 1972.

Data providing substantial evidence of effectiveness from at least two adequate and well-controlled studies have not been provided. Glenwood Laboratories had submitted reprints from the literature, and a report of an animal study. That information contributed nothing new in support of the drug and, on its face, failed to meet the requirements for adequate and well-controlled clinical studies required by 21 CFR 314.111(a)(5)(ii). The firm also submitted a brief abstract of a controlled study by Dr. Walter J. Bushnell, "The Treatment of Progres-

V 42 161 AUG 19 77 UM

sive Systemic Sclerosis: A Comparison of Para-Aminobenzoate and Placebo in a Double Blind Study", with a brief evaluation of the study by Dr. C. J. D. Zarafonetis of the University of Michigan, who is a consultant for Glenwood Laboratories, and various other communications. Glenwood Laboratories was requested to submit the detailed protocol and patient records for the Bushnell study. Such information was not submitted.

On October 22, 1976, Dr. Zarafonetis made an oral and slide presentation to the FDA Arthritis Advisory Committee on his experience with the use of Potaba in the treatment of scleroderma. This evidence and previous material submitted were evaluated and, with the exception of the Bushnell study, which involved only 12 patients, were determined to be mostly anecdotal. The committee concluded that the information presented did not provide substantial evidence of effectiveness.

No other person has submitted data or protocols or has expressed an intention to perform clinical studies on potassium aminobenzoate. Accordingly, in a notice appearing elsewhere in this issue of the FEDERAL REGISTER, the Commissioner of Food and Drugs is revoking the exemption granted in the December 14, 1972 notice for continued marketing of the drug. The drug is now reclassified to lacking substantial evidence of effectiveness.

On the basis of all of the data and information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355) and 21 CFR 314.111(a)(5), demonstrating the effectiveness of the drug.

Therefore, notice is given to the holder of the new drug application and to all other interested persons that the Director of the Bureau of Drugs proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)), withdrawing approval of the new drug application and all amendments and supplements thereto on the ground that new information before him with respect to the drug products, evaluated together with the evidence available to him at the time of approval of the application, shows there is a lack of substantial evidence that the drug products will have the effect they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in the labeling.

In addition to the holder of the new drug application specifically named above, this notice of opportunity for hearing applies to all persons who manufacture or distribute a drug product which is identical, related, or similar to a drug product named above, as defined in 21 CFR 310.6. It is the responsibility of every drug manufacturer or distributor to review this notice of opportunity for hearing to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product he manufactures or distributes that may be identical, related, or similar to a drug product named in this notice by writing to the Food and Drug Administration, Division of Drug Labeling Compliance (address given above).

In addition to the ground(s) for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6) e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201 (p) of the act, or pursuant to section 107 (c) of the Drug Amendments of 1962; or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR Parts 310, 314), the applicant(s) and all other persons subject to this notice pursuant to 21 CFR 310.6 are hereby given an opportunity for a hearing to show why approval of the new drug application(s) should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of a drug product named above and of all identical, related, or similar drug products.

If an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 elects to avail himself of the opportunity for a hearing, he shall file (1) on or before September 19, 1977, a written notice of appearance and request for hearing, and (2) on or before October 17, 1977, the data, information, and analyses on which he relies to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this notice. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of an applicant or any other person subject to this notice pursuant to 21 CFR 310.6 to file timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by such person not to avail himself of the opportunity for a hearing concerning the action proposed with respect to such drug product and a waiver of any contentions concerning the legal status of any such drug product. Any such drug product may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions, denying a hearing.

All submissions pursuant to this notice shall be filed in quintuplicate. Such submissions, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk between the hours of 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–1053, as amended (21 U.S.C. 355)), and under the authority delegated to the Director of the Bureau of Drugs (21 CFR 5.82).

Dated: August 2, 1977.

CARL M. LEVENTHAL,
Acting Director,
Bureau of Drugs.

[Docket No. 77N-0187; DESI 7663]

POTASSIUM AMINOBENZOATE ORAL PREPARATIONS

Drugs for Human Use; Drug Efficacy Study Implementation; Revocation of Exemption

AGENCY: Food and Drug Administration.

ACTION: Revocation notice.

SUMMARY: This notice revokes the exemption that allowed potassium aminobenzoate to remain on the market beyond the time limit established for implementation of the Drug Efficacy Study to allow for its continued study.

EFFECTIVE DATE: August 19, 1977.

FOR FURTHER INFORMATION CONTACT:

Herbert Gerstenzang, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: In a notice appearing elsewhere in this issue of the FEDERAL REGISTER, the Food and Drug Administration is reclassifying the possibly effective indications for potassium aminobenzoate (DESI 7663) to lacking substantial evidence of effectiveness and offering an opportunity for hearing on a proposal to withdrawal approval of the new drug application for it.

The drug, described below, has been allowed to remain on the market beyond the time limit established for implementation of the Drug Efficacy Study on the condition that additional clinical studies be undertaken to determine its effectiveness. The temporary exemption to permit continued marketing was announced in a notice published in the FEDERAL REGISTER of December 14, 1972 (37 FR 26623).

NDA 7-663; Potaba Tablets, Capsules, Powder, and Envules containing potassium aminobenzoate; Glenwood Laboratories, 83 Summit St., Tenafly, N.J. 07676.

Since the required additional studies have not been undertaken, the exemption granted by the December 14, 1972 notice is hereby revoked.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050–1053, as amended (21 U.S.C. 352, 355)) and under authority delegated to the Commissioner of Food and Drugs, (21 CFR 5.1).

Dated: August 12, 1977.

JOSEPH P. HILE,
Associate Commissioner for Compliance.

PROFESSIONAL STANDARDS REVIEW ORGANIZATION

Physicians Regarding Intention to Enter Into Agreement Designating Professional Standards Review Organization for PSRO Area II of the State of Arizona

Notice is hereby given, in accordance with Section 1152(f) of the Social Security Act (42 U.S.C. 1320c-1(f)) and 42 CFR 101.104, that the Secretary of the Department of Health, Education, and Welfare proposes, subject to satisfactory completion of the contract negotiation process, and completion of required changes in the organizational structure and formal plan, to enter into an agreement with the Greater Southern Arizona PSRO, Inc. for PSRO Area II of the State of Arizona, which area is designated a Professional Standards Review Organization area in 42 CFR 101.5.

The Secretary has determined that the Greater Southern Arizona PSRO, Inc., is qualified to assume the duties and responsibilities of a Professional Standards Review Organization as specified in Title XI, Part B of the Social Security Act. The aforementioned organization is incorporated, according to the laws of the State of Arizona, as a nonprofit professional organization whose membership is voluntary and comprises at least 25 percentum of the licensed doctors of medicine or osteopathy engaged in active practice in PSRO Area II of the State of Arizona.

As stipulated in its Articles of Incorporation, the principal officers of the Greater Southern Arizona PSRO, Inc. are:

NAME AND OFFICE HELD

1. Lloyd S. Epstein, M.D., Chairman
2. Clifford J. Hoffman, M.D. Vice Chairman
3. Joseph S. Whaley, M.D., Secretary
4. Seymour I. Shapiro, M.D., Treasurer

The official address of the corporation is 2343 East Broadway, Suite 204, Tucson, Arizona 85719.

Any licensed doctor of medicine or osteopathy engaged in active practice in PSRO Area II of the State of Arizona who objects to the Secretary entering into an agreement with the Greater Southern Arizona PSRO, Inc., on the grounds that this organization is not representative of the doctors in such area may, on or before September 19, 1977, mail such objection in writing to the Secretary of the Department of Health, Education, and Welfare, P.O. Box 1588, FDR Station, New York, New York 10022. All such objections must include the physician's address, the location(s) of his office(s), his signature, and a certification that such physician is engaged in the active practice of medicine or osteopathy (i.e., direct patient care and related clinical activities, administrative duties in a medical facility, or other health related institutions, and/or medical or osteopathic teaching or research activity).

Pursuant to 42 CFR 101.103, the Secretary has determined that 1,295 doctors of medicine and/or osteopathy are engaged in active practice in PSRO Area II of the State of Arizona. In the event that more than 10 percentum of the doctors express objections as described in the preceding chapter, the Secretary will, in accordance with 42 CFR 101.106, conduct a poll of all such doctors of medicine or osteopathy in such area to determine whether the Greater Southern Arizona PSRO, Inc. is representative of such doctors in the area; Provided that pursuant to Section 108(b) of Pub. L. 94-182, the provisions of Section 1152(f) (42 U.S.C. 1320c-1(f)), relating to notification and polling, as described above, shall not apply where: (1) The membership association or organization representing the largest number of doctors of medicine in such area, or in the State in which such area is located if different, has adopted by resolution or other official procedure a formal policy position of opposition to or noncooperation with the established program of professional standards review; or (2) the organization proposed to be designated by the Secretary under Section 1152 of such Act has been negatively voted upon in accordance with the provisions of subsection (f)(2) thereof.

Dated: August 12, 1977.

ROBERT A. DERZON,
Administrator, Health Care Financing Administration.

PROFESSIONAL STANDARDS REVIEW ORGANIZATION

Physicians Regarding Intention to Enter Into Agreement Designating Professional Standards Review Organization for PSRO Area VII of the State of North Carolina

Notice is hereby given, in accordance with Section 1152(f) of the Social Security Act (42 U.S.C. 1320c-1(f)) and 42 CFR 101.104, that the Secretary of the Department of Health, Education, and Welfare proposes, subject to satisfactory completion of the contract negotiation process, and completion of required changes in the organizational structure and formal plan, to enter into an agreement with the Metrolina Medical Peer Review Foundtion, Inc. for PSRO Area VII of the State of North Carolina, which area is designated a Professional Standards Review Organization area in 42 CFR 101.37.

The Secretary has determined that the Metrolina Medical Peer Review Foundation, Inc. is qualified to assume the duties and responsibilities of a Professional Standards Review Organization as specified in Title XI, Part B of the Social Security Act. The aforementioned organization is incorporated, according to the laws of the State of North Carolina, as a nonprofit professional organization whose membership is voluntary and comprises at least 25 percentum of the licensed doctors of medicine or osteopathy engaged in active practice in PSRO Area VII of the State of North Carolina.

As stipulated in its Articles of Incorporation, the principal officers of the Metrolina Medical Review Foundation, Inc. are:

NAME AND OFFICE HELD

1. Edwin M. Tomlin, M.D., President
2. T. Reginald Harris, M.D., Vice President
3. J. Dewey Dorsett, Jr., M.D., Secretary
4. William H. Kouri, M.D., Treasurer

The official address of the corporation is 1 Charlottetown Center, Suite 150, Charlotte, North Carolina 28204.

Any licensed doctor of medicine or osteopathy engaged in active practice in PSRO Area VII of the State of North Carolina who objects to the Secretary entering into an agreement with the Metrolina Medical Peer Review Foundation, Inc., on the grounds that this organization is not representative of the

V 42 161 AUG 19 77 UM

doctors in such area may, on or before September 19, 1977, mail such objection in writing to the Secretary of the Department of Health, Education, and Welfare, P.O. Box 1588, FDR Station, New York, New York 10022. All such objections must include the physician's address, the location(s) of his office(s), his signature, and a certification that such physician is engaged in the active practice of medicine or osteopathy (i.e., direct patient care and related clinical activities, administrative duties in a medical facility, or other health related institutions, and/or osteopathic teaching or research activity).

Pursuant to 42 CFR 101.103, the Secretary has determined that 1178 doctors of medicine and/or osteopathy are engaged in active practice in PSRO Area VII of the State of North Carolina. In the event that more than 10 percentum of the doctors express objections as described in the preceding chapter, the Secretary will, in accordance with 42 CFR 101.106, conduct a poll of all such doctors of medicine or osteopathy in such area to determine whether the Metrolina Medical Peer Review Foundation, Inc. is representative of such doctors in the area; Provided that pursuant to Section 108(b) of Pub. L. 94–182, the provisions of Section 1152(f) (42 U.S.C. 1320c–1(f)), relating to notification and polling, as described above, shall not apply where: (1) The membership association or organization representing the largest number of doctors of medicine in such area, or in the State in which such area is located if different, has adopted by resolution or other official procedure a formal policy position of opposition to or noncooperation with the established program of professional standards review; or (2) the organization proposed to be designated by the Secretary under Section 1152 of such Act has been negatively voted upon in accordance with the provisions of subsection (f) (2) thereof.

Dated: August 12, 1977.

ROBERT A. DERZON,
Administrator, Health Care Financing Administration.

PROFESSIONAL STANDARDS REVIEW ORGANIZATION

Physicians Regarding Intention to Enter Into Agreement Designating Professional Standards Review Organization for PSRO Area V of the State of Pennsylvania

Notice is hereby given, in accordance with Section 1152(f) of the Social Security Act (42 U.S.C. 1320c–1(f)) and 42 CFR 101.104, that the Secretary of the Department of Health, Education, and Welfare proposes, subject to satisfactory completion of the contract negotiation process, and completion of required changes in the organizational structure and formal plan, to enter into an agreement with the Midwestern Pennsylvania PSRO for PSRO Area V of the State of Pennsylvania, which area is designated a Professional Standards Review Organization area in 42 CFR 101.42.

The Secretary has determined that the Midwestern Pennsylvania PSRO is qualified to assume the duties and responsibilities of a Professional Standards Review Organization as specified in Title XI, Part B of the Social Security Act. The aforementioned organization is incorporated, according to the laws of the State of Pennsylvania, as a nonprofit professional organization whose membership is voluntary and comprises at least 25 percentum of the licensed doctors of medicine or osteopathy engaged in active practice in PSRO Area V of the State of Pennsylvania.

As stipulated in its Articles of Incorporation, the principal officers of the Midwestern Pennsylvania PSRO are:

NAME AND OFFICE HELD

1. Raymond J. Salcom, D. O., Chairman
2. L. C. Lippert, M.D., Vice Chairman

The official address of the corporation is 118½ South Broad Street, Grove City, Pennsylvania 16127.

Any licensed doctor of medicine or osteopathy engaged in active practice in PSRO Area V of the State of Pennsylvania who objects to the Secretary entering into an agreement with the Midwestern Pennsylvania PSRO, on the grounds that this organization is not representative of the doctors in such area may, on or before September 19, 1977, mail such objection in writing to the Secretary of the Department of Health, Education, and Welfare, P.O. Box 1588, FDR Station, New York, New York 10022. All such objections must include the physician's address, the location(s) of his office(s), his signature, and a certification that such physician is engaged in the active practice of medicine or osteopathy (i.e., direct patient care and related clinical activities, administrative duties in a medical facility, or other health related institutions, and/or medical or osteopathic teaching or research activity).

Pursuant to 42 CFR 101.103, the Secretary has determined that 813 doctors of medicine and/or osteopathy are engaged in active practice in PSRO Area V of the State of Pennsylvania. In the event that more than 10 per centum of the doctors express objections as described in the preceding chapter, the Secretary will, in accordance with 42 CFR 101.106, conduct a poll of all such doctors of medicine or osteopathy in such area to determine whether the Midwestern Pennsylvania PSRO is representative of such doctors in the area; Provided that pursuant to Section 108(b) of Pub. L. 94–182, the provisions of Section 1152(f) (42 U.S.C. 1320c–1(f)), relating to notification and polling, as described above, shall not apply where: (1) the membership association or organization representing the largest numbers of doctors of medicine in such area, or in the State in which such area is located if different, has adopted by resolution or other official procedure a formal policy position of opposition to or noncooperation with the established program of professional standards review; or (2) the organization proposed to be designated by the Secretary under Section 1152 of such Act has been negatively voted upon in accordance with the provisions of subsection (f) (2) thereof.

Dated: August 12, 1977.

PROFESSIONAL STANDARDS REVIEW ORGANIZATION

Physicians Regarding Intention to Enter Into Agreement Designating Professional Standards Review Organization for PSRO Area I of the State of Virginia

Notice is hereby given, in accordance with Section 1152(f) of the Social Security Act (42 U.S.C. 1320c–1(f)) and 42 CFR 101.104, that the Secretary of the Department of Health, Education, and Welfare proposes, subject to satisfactory completion of the contract negotiation process, and completion of required changes in the organizational structure and formal plan, to enter into an agreement with the Shenandoah PSR Foundation for PSRO Area I of the State of Virginia, which area is designated a Professional Standards Review Organization area in 42 CFR 101.52.

The Secretary has determined that the Shenandoah PSR Foundation is qualified to assume the duties and responsibilities of a Professional Standards Review Organization as specified in Title XI, Part B of the Social Security Act. The aforementioned organization is incorporated, according to the laws of the State of Virginia, as a nonprofit professional organization whose membership is voluntary and comprises at least 25 percentum of the licensed doctors of medicine or osteopathy engaged in active practice in PSRO Area I of the State of Virginia.

As stipulated in its Articles of Incorporation, the principal officers of the Shenandoah PSR Foundation are:

NAME AND OFFICE HELD

1. John C. Hortenstine, M.D. President.
2. George E. Broman, Jr., M.D. Vice President.
3. Beverly J. Loesch, M.D. Secretary.
4. Thomas H. Bain, M.D. Treasurer.

The official address of the corporation is Towers Office Building, Suite 500, 1224 West Main Street, Charlottesville, Virginia 22903.

Any licensed doctor of medicine or osteopathy engaged in active practice in PSRO Area I of the State of Virginia who objects to the Secretary entering into an agreement with the Shenandoah PSR Foundation, on the grounds that this organization is not representative of the doctors in such area may, on or before September 19, 1977, mail such objection in writing to the Secretary of the Department of Health, Education, and Welfare, P.O. Box 1588, FDR Station, New York, New York 10022. All such objections must include the physicians address, the location(s) of his office(s), his signature, and a certification that such physician is engaged in the active practice of medicine or osteopathy (i.e., direct patient care and related clinical activities, administrative duties in a medical facility, or other health related institutions, and/or medical or osteopathic teaching or research activity).

Pursuant to 42 CFR 101.103, the Secretary has determined that 1270 doctors of medicine and/or osteopathy are engaged in active practice in PSRO Area I of the State of Virginia. In the event that more than 10 per centum of the doctors express objections as described in the preceding chapter, the Secretary will, in accordance with 42 CFR 101.106, conduct a poll of all such doctors of medicine or osteopathy in such area to determine whether the Shenandoah PSR Foundation is representative of such doctors in the area; Provided that pursuant to Section 108(b) of Pub. L. 94–182, the provisions of Section 1152(f) (42 U.S.C. 1320c–1(f)), relating to notification and polling, as described above, shall not apply where: (1) The membership association or organization representing the largest number of doctors of medicine in such area, or in the State in which such area is located if different, has adopted by resolution or other official procedure a formal policy position of opposition to or noncooperation with the established program of professional standards review; or (2) the organization proposed to be designated by the Secretary under Section 1152 of such Act has been negatively voted upon in accordance with the provisions of subsection (f) (2) thereof.

Dated: August 12, 1977.

Health Services Administration

ADVISORY COMMITTEE

Notice of Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory body scheduled to meet during the month of September 1977:

INTERAGENCY COMMITTEE ON EMERGENCY MEDICAL SERVICES

Date and Time: September 14, 1977, 9:00 a.m.

Place: Conference Rooms G & H, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857.

Open for entire meeting.

Purpose: The Committee will provide for the communication and exchange of information necessary to maintain the coordination and effectiveness among such Federal programs and activities and make recommendations to the Secretary respecting the administration of grants and contracts under Title XII, including making regulations for the emergency medical services systems program.

Agenda: Proposed agenda items for this meeting include: Report on grant awards—Title XII and 789, revision of Emergency Medical Services regulations, report of Mississippi EMS Satellite Communication Experiment, and potential training of handicapped as control dispatchers.

The meeting is open to the public for observation. Anyone wishing to attend, obtain the roster of members, minutes of meeting, or other relevant information should contact Mr. Lee Shuck, Division of Emergency Medical Services, Bureau of Medical Services, Suite #320, 6525 Belcrest Road, Hyattsville, Md. 20782, Telephone (301) 436–6290. Public seating is limited to forty (40). Please contact at least 72 hours before the meeting.

Agenda items are subject to change as priorities dictate.

Dated: July 29, 1977.

WILLIAM H. ASPDEN, Jr.,
Associate Administrator for Management.

HEALTH MAINTENANCE ORGANIZATIONS

Notice

The Department has, in the past, published Notices announcing the availability of Federal financial assistance for the development and initial operation of Maintenance Organizations pursuant to Title XIII of the Public Health Service Act (42 U.S.C. 300 et seq.) and setting deadlines for submission of applications. The last Notice was published in the FEDERAL REGISTER (40 FR 29916) on July 16, 1975.

This notice establshes the date for submission of new grant applications to expand the geographic distribution of health maintenance organizations, establishes procedures for expansion grant applications from qualified health maintenance organizations and repeats the modified procedures for previously funded projects.

NEW GRANT APPLICATIONS

Based on the assumption that funds will be available for fiscal year 1978, new applications may be submitted to the appropriate Department of Health, Education, and Welfare (DHEW) Regional Office by organizations meeting the requirements of sections 1303 and 1304 of the Act and 42 CFR Part 110.

Deadline for Submission of Application	*Anticipated Date of Award*
Feasibility, Planning and Initial Development — 90 days after publication.	90 days after deadline for submission of applications.

It is anticipated that a 90-day review period will be required between receipt of such applications and final action on their disposition.

EXPANSION APPLICATIONS FROM QUALIFIED HMOS

Organizations qualified under Title XIII of the Public Health Service Act may submit applications as soon as possible for funding for significant expansion of their operation. Applications may be made irrespective of whether the health maintenance organization previously received financial support under the Health Maintenance Organization Act. Individual application requests will be accepted for grant or loan guarantee support. It is estimated that a 90-day period will be required between the receipt of such applications and final action on their disposition. Expansion grants will be considered for feasibility and planning and initial development while loan guarantees are available for planning and initial development by private (other than nonprofit private) qualified health maintenance organizations which intend to serve medically underserved areas.

OFFICE OF MANAGEMENT AND BUDGET CIRCULAR NO. A–95 REQUIREMENT

It should be noted that applicants requesting Federal financial assistance under Title XIII of the Public Health Service Act are subject to the Office of Management and Budget Circular No. A–95 requirements. Any agency of State or local government or any organization or individual undertaking to apply for assistance to a project or major substantive modification thereto under a Federal program covered by the OMB Circular A–95 will be required to notify both the State and areawide planning and development clearinghouse in the jurisdiction of which the project is to be located, of its intent to apply for assistance at such time as it determines it will develop an application. Clearing-

V 42 161 AUG 19 77 UM

houses may take a total of 60 days to consider the applicant's notification of intent or completed application or both. All health maintenance organization applications must contain clearinghouse comments before a competitive review is made by DHEW of the application. Applicants are advised to submit such notification and completed application at the earliest possible date in order to be able to meet the schedule for grant review.

Dated: August 15, 1977.

JOHN H. KELSO,
Acting Administrator,
Health Services Administration.

FOLLOW THROUGH PROGRAM

Closing Date for Receipt of Applications (By Invitation Only) for Additional Fiscal Year 1977 Funds

Correction

In the document appearing at page 41326 in the issue for Tuesday, August 16, 1977, designated as FR Doc. 77-23570, the FR Doc. number was incorrect and should have read "FR Doc. 77-23524".

Also, in the second column, in the third line of the first full paragraph, the date given as "September 12, 1977" should have been "September 7, 1977".

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

CALIFORNIA DESERT CONSERVATION AREA ADVISORY COMMITTEE; ORGANIZATION SUBCOMMITTEE

Meeting

Notice is hereby given in accordance with Pub. L. 92-463 and 92-579 that the ad hoc subcommittee on organization of the California Desert Conservation Area Advisory Committee to the Bureau of Land Management, U.S. Department of the Interior, will meet in Riverside, California, September 12, 1977. The purpose of the meeting is to consider whether the charter of the advisory committee should be amended to provide for standing subcommittees, to review the charter for any other possible amendments, and to consider the number, dates and locations of committee meetings for calendar year 1978.

The meeting will be held at 2 p.m. in the Conference Room, Desert Planning Staff, Bureau of Land Management, 1695 Spruce Street, Riverside, California 92507. The meeting will be open to the public, and public participation is invited.

Dated: August 10, 1977.

ED HASTEY,
State Director.

[M 21218]

MONTANA

Opportunity For Public Hearing and Republication of Notice of Proposed Withdrawal

AUGUST 11, 1977.

The Department of Agriculture filed application, Serial No. M 21218, on April 21, 1972, for a withdrawal in relation to the following described lands:

PRINCIPAL MERIDIAN, MONTANA

LOLO NATIONAL FOREST

Blue Slide Campground

T. 23 N., R. 30 W.,
Sec. 27, Lots 5 and 6, SW¼ and W½SE¼.

All those parts of the above subdivisions which lie northwesterly of the Northern Pacific Railway right-of-way and southwesterly of the following described line:

Beginning at a point on the west line of Section 27 lying N. 0°13' W. 3,446.1 feet from the southwest corner of said Section 27; thence; S. 56°33' E. 250.6 feet; thence S. 78°10' E. 191.0 feet; thence S. 87°35' E. 116.7 feet; thence N. 79°38'E.193.8 feet; thence S. 83°09' E. 283.0 feet; thence N. 73°43' E. 151.7 feet; thence N. 73°43' E. 147.9 feet; thence S. 75°13' E. 263.1 feet; thence S. 68°51' E. 197.8 feet; thence S. 39°10' E. 548.3 feet; thence S. 35°37' E. 488.1 feet; thence S. 51°26' E. 469.6 feet; thence S. 46°50' E. 208.7 feet; thence S. 35°26' E. 216.7 feet; thence S. 11°37' E. 199.9 feet; thence S. 0°08' E. 711.2 feet; thence S. 3°43' E. 361.0 feet; thence S. 19°58' E. 550.3 feet to a point on the south line of said Section 27 lying N. 89°36' E. 577.3 feet from the south quarter corner of said Section 27.

The area described contains 122.6 acres in Sanders County, Montana.

The applicant desires that the land be reserved for a public compground.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on May 17, 1972, Volume No. 37, Page No. 9791, Document No. 72-7469.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, P.O. Box 30157, Billings, Montana 59107, on or before September 21, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 21, 1977.

The above-described lands are temporarily segregated from the operation of the public land laws, including the mining laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, P.O. Box 30157, Billings, Montana 59107.

EDGAR D. STARK,
Acting Chief, Branch of
Lands and Minerals Operations.

[M 20510]

MONTANA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

AUGUST 10, 1977.

The Department of Agriculture filed application, Serial No. M 20510, on January 5, 1972, for a withdrawal in relation to the following described lands:

PRINCIPAL MERIDIAN, MONTANA

LOLO NATIONAL FOREST

White Mountain Lookout

T. 12 N., R. 24 W.,
Sec. 20, W½SW¼SW¼NE¼ and E½SE¼SE¼NW¼.

Baldy Lookout

T. 22 N., R. 25 W.,
Sec. 32, W½NE¼NW¼SE¼ and E½NW¼NW¼SE¼.

Patrick's Knob Lookout

T. 19 N., R. 26 W.,
Sec. 25, E½NE¼SW¼SW¼ and W½NW¼SE¼SW¼.

Big Hole Peak Lookout

T. 21 N., R. 27 W.,
Sec. 4, NE¼SW¼SW¼.

Eddy Mountain Lookout

T. 21 N., R. 28 W.,
Sec. 33, W½NW¼NE¼NE¼ and E½NE¼NW¼NE¼.

Priscilla Peak Lookout

Unsurveyed, but which probably will be when surveyed:

T. 22 N., R. 28 W.,
Sec. 2, SW¼SW¼SW¼.

Clark Mountain Lookout

T. 21 N., R. 29 W.,
Sec. 28, S½SE¼SE¼SE¼; and
Sec. 33, N½NE¼NE¼NE¼.

Cougar Peak Lookout

T. 23 N., R. 30 W.,
Sec. 24, W½NE¼NW¼NE¼ and E½NW¼NW¼NE¼.

Driveway Peak Lookout

Unsurveyed, but which probably will be when surveyed:

T. 21 N., R. 31 W.,
Sec. 9, SW¼NE¼SW¼SE¼, SE¼NW¼SW¼SE¼, NE¼SW¼SW¼SE¼, and NW¼SE¼SW¼SE¼.

The areas described aggregate 90 acres located in Sanders and Mineral Counties, Montana.

The applicant desires that the lands be reserved for fire lookout towers.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on January 28, 1972, Volume No. 37, Page No. 1413, Document No. 72-1273.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, P.O. Box 30157, Billings, Montana 59107, on or before September 21, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 21, 1977.

The above-described lands are temporarily segregated from the operation of the public land laws, including the mining laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, P.O. Box 30157, Billings, Montana 59107.

[NM 31276]

NEW MEXICO

Application

AUGUST 12, 1977.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Company has applied for one 12¾-inch natural gas pipeline right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 29 N., R. 8 W.,
Sec. 8, SW¼SE¼;
Sec. 15, S½SW¼;
Sec. 17, N½NE¼ and SE¼NE¼.

This pipeline will convey natural gas across 1.156 miles of public land in San Juan County, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, New Mexico 87107.

FRED E. PADILLA,
Chief, Branch of Lands
and Minerals Operations.

[FR Doc.77-23972 Filed 8-18-77;8:45 am]

[NM 31249, 31251, 31253, 31266, 31267, 31269, 31271, and 31274]

NEW MEXICO

Applications

AUGUST 10, 1977.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Company has applied for eight 4½-inch natural gas pipeline rights-of-way across the following lands:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 25 N., R. 7 W.,
Sec. 28, E½SW¼ and SW¼SW¼;
Sec. 33, N½NW¼.
T. 27 N., R. 8 W.,
Sec. 25, SW¼NE¼ and SW¼SE¼;
Sec. 35, N½NE¼ and SW¼NE¼.
T. 29 N., R. 8 W.,
Sec. 6, lots 8 and 9.
T. 30 N., R. 8 W.,
Sec. 31, lot 18.
T. 32 N., R. 8 W.,
Sec. 12, lots 5, 6, 11, 12, and 14.
T. 31 N., R. 10 W.,
Sec. 24, lots 4 and 5.
T. 26 N., R. 12 W.,
Sec. 19, NE¼NE¼;
Sec. 20, N½NW¼.

These pipelines will convey natural gas across 2.236 miles of public lands in Rio Arriba and San Juan Counties, New Mexico.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the applications should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, New Mexico 87107.

FRED E. PADILLA,
Chief, Branch of Lands
and Minerals Operations.

OREGON

Temporary Closure of Lands to Motorized Vehicle Use

Notice is hereby given that certain public lands under the administration of the Bureau of Land Management described below are closed to off-road motorized vehicles and motor vehicle use in accordance with provisions of 43 CFR 6010.4. This closure does not apply to emergency, law enforcement and federal or other government vehicles while being used for official or emergency purposes, or to any vehicle whose use is expressly authorized by permit, lease, license, agreement, or contract issued by the authorized officer of the Bureau of Land Management.

The area affected by this closure is located approximately nine air miles north of Marcola, Oregon and is known as Horse Rock Ridge. The area is more specifically described as:

WILLAMETTE MERIDIAN

T. 15 S., R. 2 W.,
Sec. 1, SW¼ Lot 3, S½ Lot 4, S½NW¼, W½SW¼NE¼, E½NE¼SW¼, W½E½NW¼SE¼, W½NW¼SE¼, NW¼SW¼SE¼.

The described area aggregates approximately 190 acres in Linn County, Oregon.

The use of motorized vehicles on this public land is damaging the shallow soil mantle and fragile vegetative resources and threatens damage to rare and endangered plant species as well as an identified archeological site. It is concluded that closure of the area is necessary to prevent further damage to the soil and vegetation and to protect rare and endangered plants as well as the aforementioned archeological site.

The closure shall become effective on August 19, 1977. A decision as to whether the closure shall be permanent will be made through the Bureau of Land

Management land use planning process. Public comment will be accepted through scheduled public participation in the formulation of those land use plans.

Common points of vehicular access to the area will be posted. Maps showing the area described above are available for examination at the Bureau of Land Management, Eugene District Office, 1255 Pearl Street, Eugene, Oregon.

DWIGHT L. PATTON,
District Manager.

AUGUST 11, 1977.

[AA-6661-C]

ALASKA NATIVE CLAIMS SELECTIONS

Notice

On July 17, 1974, Eklutna, Inc. filed selection application AA-6661-C under the provisions of section 12(a) (1) of the Alaska Native Claims Settlement Act of December 18, 1971, (85 Stat. 688, 701; 43 U.S.C. 1601, 1613 (Supp. V, 1975)), hereinafter ANCSA, for the surface estate of lands located in the vicinity of Eagle River, Alaska which included lands in the W½ of section 36, T. 15 N., R. 2 W., Seward Meridian.

On February 23, 1909, Presidential Proclamation 852 reserved lands including the W½ of section 36, T. 15 N., R. 2 W., Seward Meridian as part of the Chugach National Forest. This townships was surveyed July 14, 1917, and excluded from the national forest by Proclamation 1741 of May 29, 1925. These lands were reserved for the War Department on March 12, 1943, by Public Land Order (PLO) 95. That order was revoked in part by PLO 689 of November 20, 1950, which withdrew the land for use of the Alaska Railroad for explosives storage.

On March 4, 1915, the State land grant was enacted by Congress, reserving sections 16 and 36 in support of an agricultural college and school of mines. 38 Stat. 1214–1215; 48 U.S.C. 353. This reservation did not attach to the lands in the W½ section 36, T. 15 N., R. 2 W., Seward Meridian upon its exclusion from the national forest in 1925 because the lands were appropriated for national forest purposes at the time the land was surveyed. The 1915 act did not provide for the attachment of any right upon extinguishment of an appropriation. In this act, *supra.*, Congress provided for lieu selections:

• • • where the same may have been sold or otherwise appropriated • • • other lands may be designated and reserved in lieu thereof • • •.

Although the 1915 act, supra, was amended by the act of March 5, 1952, 66 Stat. 14, that provided for the attachment of the State's right upon cancellation of an appropriation, the lands in the W½ section 36, T. 15 N., R. 2 W., Seward Meridian were reserved by PLO 689, at the time ANCSA was enacted.

On January 12, 1973, the Alaska Railroad filed a Notice of Intent to Relinquish a portion of the lands withdrawn by PLO 689, including those lands herein described for conveyance to Eklutna, Inc. These lands have been determined to be public lands as defined by section 3(e) of ANCSA.

Therefore, the village selection application AA-6661-C for the lands described below was properly filed and has been found to meet the requirements of the Departmental regulations issued pursuant to ANCSA. The lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface estate of the following described lands is considered proper for acquisition by Eklutna, Inc., subject to valid existing rights, and is hereby approved for interim conveyance pursuant to section 14(a) of ANCSA.

T. 15 N., R. 2 W., SEWARD MERIDIAN (UNSURVEYED)

A tract of land situated in the W½ of section 36, T. 15 N., R. 2 W., Seward Meridian, Alaska and more particularly described as follows:

Beginning at the southwest corner of said section 36; thence northerly along the westerly line of said section 36, 589.79 feet to the westerly right-of-way line of the Eagle River to Peters Creek Highway; thence along said right-of-way line N. 44°56'35" E., 2,951.06 feet to a point of curve; thence along a 2°09'00" curve to the left (radius equals 2,664.79 feet) through an arc of 21°45'47" a distance of 1,012.19 feet to a point on the easterly line of the W½ of said section 36; thence southerly along said easterly line a distance of 3,524.24 feet more or less to the south line of said section 36; thence westerly along said south line, 2,640 feet more or less to the point of beginning, except Tracts "A" and "B" as described below:

Tract A—Beginning at the northeast corner of the SW¼SW¼ of said section 36, T. 15 N., R. 2 W., Seward Meridian; thence easterly along the northerly line of the SE¼SW¼ of said section 36, a distance of 662.85 feet to the northwesterly right-of-way line of the old existing Glenn Highway; thence S. 37°28'47" W. along last said line a distance of 664.13 feet; thence along a 1°54'02" curve to the left (radius equals 3,014.79 feet) through an arc of 9°24'52" a distance of 495.37 feet; thence N. 60°55'25" W. a distance of 727.26 feet; thence N. 2°56'29" E. a distance of 102.90 feet to the southeasterly right-of-way line of said Alaska Highway Project F-042-1(1); thence N. 44°56'35" E. along the last said line a distance of 819.38 feet; thence southerly along the easterly line of NW¼SW¼ of said section 36 a distance of 171.70 feet to the point of beginning. Containing 14.131 acres, more or less.

Tract B—Beginning at the southwest corner of said section 36, T. 15 N., R. 2 W., Seward Meridian; thence S. 89°56'13" E. along the south line of said section 36 a distance of 1,137.25 feet to the northwesterly right-of-way line of the old existing Glenn Highway; thence N. 27°23'47" E. along the last said line a distance of 312.81 feet; thence N. 60°55'25" W. a distance of 732.92 feet; thence S. 88°13'51" W. a distance of 180.17 feet to the southeasterly right-of-way line of said Alaska Highway Project F-042-1(1); thence S. 44°56'35" W. along the last said line a distance of 651.47 feet to the west line of said section 36; thence S. 0°07'50" W. along the last said line a distance of 166.04 feet to the point of beginning. Containing 13.041 acres, more or less.

The tract to be conveyed contains 71.95 acres, more or less.

The interim conveyance to Eklutna, Inc. for the surface estate of the lands described above shall contain the following reservations to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States. Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945.

2. A right-of-way thereon for the construction of railroads, telegraph and telephone lines as prescribed and directed by the act of March 12, 1914, 38 Stat. 305; 43 U.S.C. 975d.

3. The subsurface estate therein, and all rights, privileges, immunities, and appurtenances, of whatsoever nature, accruing unto said subsurface estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971, 85 Stat. 688, 704; 43 U.S.C. 1601, 1613 (Supp. V, 1975).

4. A right-of-way, AA-2559, Parcel A-27, for a Federal Aid Highway. Act of August 27, 1958, as amended, 23 U.S.C. 317.

5. Pursuant to section 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971, 85 Stat. 688, 708; 43 U.S.C. 1601, 1616 (Supp. V, 1975), the following easements, referenced by easement identification number (EIN) on the easement map in case file AA-6661-EE, are reserved to the United States and subject to further regulation thereby:

a. (EIN 3 C1, D9, D1, L) An easement for a historic access trail twenty-five (25) feet in width for the Iditarod Trail as it crosses the selected lands between Eagle River and Eklutna. The usage of roads and trails will be controlled by applicable State or Federal law or regulation.

b. (EIN 52 C) The right of the United States to enter upon the lands herein granted for cadastral, geodetic, or other survey purposes is reserved together with the right to do all things necessary in connection therewith.

c. (EIN 53 C) Easements for the transportation of energy, fuel, and natural resources which are the property of the United States or which are intended for delivery to the United States or which are produced by the United States. These easements also include the right to build any related facilities necessary for the exercise of the right to transport energy, fuel, and natural resources including those related facilities necessary during periods of planning, locating constructing, operating, maintaining or terminating transportation systems. The specific location of these easements shall be determined only after consultation with the owner of the servient estate. Whenever the use of such easements will require removal or relocation of any structure owned or authorized by the owner of the servient estate, such use shall not be initiated without the consent of the owner of such improvement; provided, however, that the United States may exercise the right of eminent domain if such consent is not given. Only those portions of these easements that are actually in use or that are expressly authorized on March 3, 1996, shall continue to be in force.

The grant of the above-described lands is subject to:

1. Issuance of a patent confirming the boundary description of the lands hereinabove granted after approval and filing by the Bureau of Land Management of the official plat of survey covering such lands.

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under section 6(g) of the Alaska Statehood Act, 72 Stat. 339, 341; 48 U.S.C. 11719, 11720), contract, permit, right-of-way, or easement, and the right of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him.

3. The easement as established by Public Land Order 1613 (23 F.R. 2376), pursuant to the act of August 1, 1956, 70 Stat. 898, for highway purposes, including appurtenant protective, scenic and service areas.

4. Requirements of section 14(c) of the Alaska Native Claims Settlement Act, 85 Stat. 688, 703; 43 U.S.C. 1601, 1613(c) (Supp. V, 1975), that the grantee hereunder convey those portions, if any, of the land hereinabove granted, as are prescribed in said section.

5. The terms and conditions of the agreement dated January 18, 1977, between the Secretary of the Interior, Cook Inlet Region, Inc., Eklutna, Inc., and other Cook Inlet Region village corporations. A copy of the agreement shall be attached to and become a part of the conveyance document and shall be recorded therewith. A copy of the agreement is located in Bureau of Land Management easement case file, AA-6661-EE. Any person wishing to examine the agreement may do so at the Bureau of Land Management, Alaska State Office, 555 Cordova Street, Anchorage, Alaska 99501.

There is excepted and reserved any element of ownership from the lands hereby conveyed, including but not restricted to any estate or interest in property, or permit, or other right, transferred by the United States pursuant to the Alaska Communications Disposal Act approved November 14, 1967 (81 Stat. 441–444; 40 U.S.C. 771–792).

Conveyance of the remaining entitlement to Eklutna, Inc. will be made at a later date. Interim conveyance of the subsurface estate of the land described above will be simultaneously granted to Cook Inlet Region, Inc., pursuant to sections 14(f) and 22(j) of ANCSA, and will be subject to the same conditions as the surface conveyance.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the FEDERAL REGISTER and once a week, for four (4) consecutive weeks, in the Anchorage Daily Times. Any party claiming a property interest in land affected by this decision may appeal the decision to the Alaska Native Claims Appeal Board, P.O. Box 2433, Anchorage, Alaska 99510, with a copy served upon both the Bureau of Land Management, Alaska State Office, 555 Cordova Street, Anchorage, Alaska 99501, and the Regional Solicitor, Office of the Solicitor, 510 L Street, Suite 408, Anchorage, Alaska 99501, also:

1. Any party receiving service of this decision by mail shall have 30 days from the receipt of this decision to file an appeal.

2. Any unknown parties, any parties unable to be located after reasonable efforts have been expended to locate, and any parties who failed or refused to sign the return receipt shall have until September 19, 1977 to file an appeal.

3. Any party known or unknown who may claim a property interest which is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Alaska Native Claims Appeal Board.

4. If Eklutna, Inc., or Cook Inlet Region, Inc., objects to any easement which is identified herein for reservation in the conveyance and which is subject to the discretion of the State Director and not reserved pursuant to an express Secretarial directive, a petition for reconsideration must be filed within 30 days from receipt of service with the State Director, Bureau of Land Management, 555 Cordova Street, Anchorage, Alaska 99501. A copy of the petition should be served upon the Regional Solicitor, Office of the Solicitor, 510 L Street, Suite 408, Anchorage, Alaska 99501. If a petition for reconsideration is not filed, it will be deemed that the right to contest any such easement has been waived.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeal.

Further information on the manner of, and requirements for, filing an appeal may be obtained from the Bureau of Land Management, 555 Cordova Street, Anchorage, Alaska 99501.

SUE R. WOLF,
Acting Chief, Branch of Lands, and Minerals Operations.

[A-057388 and AA-6701-A]

ALASKA NATIVE CLAIMS SETTLEMENT ACT

Notice

On February 11, 1974, Seldovia Native Association, Inc. filed selection application AA-6701-A under the provisions of section 12(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 701; 43 U.S.C. 1601, 1611, (Supp. V, 1975)), for the surface estate of lands located in T. 8 S., R. 14 W., Seward Meridian.

The village application described lands withdrawn by sections 11(a)(1) and 11(a)(2) of the Alaska Native Claims Settlement Act. Section 11(a)(2) of the act, supra., specifically withdrew, subject to valid existing rights, all lands within the townships withdrawn by section 11(a)(1) that have been selected by, or tentatively approved to, but not yet patented to the State of Alaska under the Alaska Statehood Act of July 7, 1958 (72 Stat. 339–343; 48 U.S.C. Ch. 2, Sec. 6(g) (1970)). Section 26 of the Alaska Native Claims Settlement Act further provides that to the extent that there is a conflict between any provisions of that act and any other Federal laws applicable to Alaska, the provisions of the Alaska Native Claims Settlement Act shall govern.

Therefore, in view of the above, selection application A-057388, filed by the State of Alaska on June 13, 1962, as amended, under the provisions of section 6(b) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 340; 48 U.S.C. Ch. 2, Sec. 6(b) (1970)), is rejected as to the lands described below:

T. 8 S., R. 14 W., Seward Meridian, Alaska (Surveyed),
Sec. 20, SE¼SW¼SE¼, W½SE¼SE¼, W½E½SE¼SE¼, NE¼NE¼SE¼SE¼, SE¼SE¼SE¼SE¼.
U.S. Survey 3378, lot 2.
U.S. Survey 4651, lots 1, 3, and 7.
U.S. Survey 4601, lot 1.

By decision dated January 3, 1964, the State of Alaska received tentative approval to approximately 6,917 acres of unsurveyed lands in T. 8 S., R. 14 W., Seward Meridian. This decision is hereby rescinded in part and the State selection application A-057388 is hereby rejected as to the following lands described in said decision as follows:

T. 8 S., R. 14 W., Seward Meridian, Alaska (Unsurveyed),
Sec. 13, all, excluding A-049072, A-048910, A-049123, A-049101, A-051263, A-042197, A-032845, A-030919, A-048909;
Sec. 14, all;
Sec. 15, all, excluding U.S. Survey 3378, A-048864;
Sec. 16, all;
Sec. 21, all;
Sec. 22, all, excluding U.S. Survey 3378;
Sec. 23, all;
Sec. 24, all, excluding patented U.S. Surveys 3373, 3907, 3253, A-051258, A-032427, A-030919, A-032845;
Secs. 25 to 28, all;
Sec. 30, all unsurveyed portion, excluding patented U.S. Survey 3108;

V 42 161 AUG 19 77 UM

Sec. 31, all unsurveyed portion, excluding patented U.S. Survey 3374, A–052282;
Secs. 34, 35 and 36, all.

The selection applications of Seldovia Native Association, Inc. as to the lands described below are properly filed and meet the requirements of the act and of the regulations issued pursuant thereto. These lands do not include any lawful entry perfected under or being maintained in compliance with laws leading to acquisition of title.

In view of the foregoing, the surface estate of the following described lands, aggregating approximately 7,061.73 acres is considered proper for acquisition by Seldovia Native Association, Inc. and is hereby approved for conveyance pursuant to section 14(a) of the Alaska Native Claims Settlement Act:

T. 8 S., R. 14 W., Seward Meridian, Alaska (Surveyed),
Sec. 20, SE¼SW¼SE¼, W½SE¼SE¼, W½E½SE¼SE¼, NE¼NE¼SE¼SE¼, SE¼SE¼SE¼SE¼.
U.S. Survey 4651, lots 1, 3 and 7, located on MacDonald Spit on the southerly shore of Kachemak Bay.
U.S. Survey 3378, lot 2, located at Barbara Point on the southerly shore of Kachemak Bay, approximately 4 miles northeast of Seldovia.
U.S. Survey 4601, lot 1, located on the southerly shore of Kasitsna Bay.
T. 8 S., R. 14 W., Seward Meridian, Alaska (Unsurveyed),
Sec. 14 (fractional), excluding Native allotments AA–5945 and AA–7361;
Sec. 15 (fractional), excluding Native allotment AA–5945, U.S. Survey 3378 lots 1 and 2, and U.S. Survey 4751;
Sec. 16 (fractional), all;
Sec. 21 (fractional), all;
Sec. 22, all;
Sec. 23, excluding Native allotment AA–7361;
Sec. 24 (fractional), excluding U.S. Surveys 3253 lots 1 and 2, 3373, 3906, 3907, 4530 lots 1 and 2, 4601 lots 1 and 2;
Secs. 25 to 28, inclusive, all;
Sec. 30 (fractional), W½, excluding U.S. Survey 3108 lots 1 and 2;
Sec. 31 (fractional), W½ excluding U.S. Survey 3374;
Secs. 34, 35 and 36, all.

The conveyance issued for the surface estate of the lands described above shall contain the following reservations to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States, as prescribed and directed by the act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945;

2. A right-of-way thereon for the construction of railroads, telegraph and telephone lines, as prescribed and directed by the act of March 12, 1914, 38 Stat. 305; 43 U.S.C. 975d;

3. The subsurface estate therein, and all rights, privileges, immunities, and appurtenances, of whatsoever nature, accruing unto said estate pursuant to the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 704; 43 U.S.C. 1601, 1613 (Supp. V, 1975)); and,

4. Pursuant to section 17(b) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 688, 708; 43 U.S.C. 1601, 1616 (Supp. V, 1975)), the following public easements referenced by easement identification number (EIN) on the easement map in case file AA–6701–EE are reserved to the United States and subject to further regulation thereby:

(a) (EIN 1 D9 (D9 1)) An easement sixty (60) feet in width for the existing Seldovia to Windy Bay road from section 20 easterly to the east boundary of section 24, T. 8 S., R. 14 W., Seward Meridian. The usage of roads and trails will be controlled by applicable State or Federal law or regulation.

(b) (EIN 3 D9 (D9 3)) An easement for an existing access trail twenty-five (25) feet in width from section 21, T. 8 S., R. 14 W., Seward Meridian, easterly along the coast to section 19, T. 8 S., R. 13 W., Seward Meridian. The usage of roads and trails will be controlled by applicable State or Federal law or regulation. This trail provides access from Seldovia to public lands and waters.

(c) (EIN 7 D9 (D9 33)) An easement for a proposed access trail twenty-five (25) feet in width generally following the left bank of Barbara Creek within section 15, T. 8 S., R. 14 W., Seward Meridian. The usage of roads and trails will be controlled by applicable State or Federal law or regulation. This trail provides access from road EIN 1 D9 (D9 1) to the coastline and public waters.

(d) (EIN 8 C7 (L1 3)) A stream gaging site easement in the SW¼ of section 15, T. 8 S., R. 14 W., Seward Meridian.

(e) (EIN 9 C7 (L1 3)) An easement for an existing access trail twenty-five (25) feet in width from EIN 1 D9 (D9 1) to the stream gaging site easement EIN 8 C7 (L1 3). The usage of roads and trails will be controlled by applicable State or Federal law or regulation.

(f) (EIN 10 C7 (L2 1)) An easement for an existing seismic site in sec. 24, T. 8 S., R. 14 W., Seward Meridian. Reserved is the right of access by a twenty-five (25) foot trail to the site and of operating and maintaining the site and improvements on the site for seismological data collection and research.

(g) (EIN 11 D9 (D9 39)) A continuous linear easement twenty-five (25) feet in width upland of and parallel to the mean high tide line in order to provide access to and along the marine coastline and use of such shore for purposes such as beaching of watercraft or aircraft, travel along the shore, recreation, and other similar uses. Deviations from the waterline are permitted when specific conditions so require, i.e., impassable topography or waterfront obstruction. This easement is subject to the right of the owner of the servient estate to build upon such easement a facility for public or private purposes, such right to be exercised reasonably and without undue or unnecessary interference with or obstruction of the easement. When access along the marine coastline easement is to be obstructed, the owner of the servient estate will be obligated to convey to the United States an acceptable alternate access route, at no cost to the United States, prior to the creation of such obstruction.

(h) (EIN 12 C (C 42)) The right of the United States to enter upon the lands herein granted for cadastral, geodetic or other survey purposes is reserved together with the right to do all things necessary in connection therewith.

(i) (EIN 13 C (C 43)) Easements for the transportation of energy, fuel, and natural resources which are the property of the United States or which are intended for delivery to the United States or which are produced by the United States. These easements also include the right to build any related facilities necessary for the exercise of the right to transport energy, fuel, and natural resources, including those related facilities necessary during periods of planning, locating, constructing, operating, maintaining, or terminating transportation systems. The specific location of these easements shall be determined only after consultation with the owner of the servient estate. Whenever the use of such easement will require removal or relocation of any structure owned or authorized by the owner of the servient estate, such use shall not be initiated without the consent of the owner of such improvement; provided, however, that the United States may exercise the right of eminent domain if such consent is not given. Only those portions of these easements that are actually in use or that are expressly authorized on March 3, 1996, shall continue to be in force.

The grant of lands shall be subject to:

1. Issuance of a patent confirming the boundary description of the lands hereinabove granted after approval and filing by the Bureau of Land Management of the official plat of survey covering such lands;

2. Valid existing rights therein, if any, including but not limited to those created by any lease (including a lease issued under section 6(g) of the Alaska Statehood Act of July 7, 1958 (72 Stat. 339, 341; 48 U.S.C. Ch. 2, Sec. 6(g) (1970))), contract, permit, right-of-way, or easement, and the right of the lessee, contractee, permittee, or grantee to the complete enjoyment of all rights, privileges, and benefits thereby granted to him;

3. Requirements of section 14(c) of the Alaska Native Claims Settlement Act (85 Stat. 688, 703; 43 U.S.C. 1601, 1613 (Supp. V, 1975)), that the grantee hereunder convey those portions, if any, of the lands hereinabove granted, as are prescribed in said section;

4. The terms and conditions of the agreement dated January 18, 1977, between the Secretary of the Interior, Cook Inlet Region, Inc., Seldovia Native Association, Inc. and other Cook Inlet village corporations. A copy of the agreement shall be attached to and become a part of the conveyance document and shall be recorded therewith. A copy of the agreement is located in the Bureau of Land Management easement case file for Seldovia Native Association, Inc., serialized AA–6701–EE. Any person wishing to examine this agreement may do so at the Bureau of Land Management, Alaska State Office, 555 Cordova Street, Anchorage, Alaska 99501.

5. The following third party interests, created and identified by the State of Alaska, as provided by section 14(g) of ANCSA, all of which are located in T. 8 S., R. 14 W., Seward Meridian:

(a) Open-to-entry leases, each approximately 5 acres in size.
(1) ADL 46883, located in NW¼SW¼ of section 15.
(2) ADL 41022, located in SE¼SW¼ of section 14 and NE¼NW¼ of section 23.
(3) ADL 42103, located in NW¼NE¼ of section 23 and SW¼SE¼ of section 14.
(4) ADL 42910 located in NW¼NE¼ of section 23.
(5) ADL 47663 located in NE¼NE¼ of section 23.
(6) ADL 47154 located in NE¼NE¼ of section 23.
(7) ADL 50791 located in NE¼NE¼ of section 23 and NW¼NW¼ of section 24.
(8) ADL 50863 located in NW¼NW¼ of section 24.
(9) ADL 46402 located in NW¼NW¼ of section 24.
(10) ADL 46398 located in SE¼SW¼ of section 14.
(11) ADL 41023 located in SE¼SW¼ of section 14 and NE¼NW¼ of section 23.

(b) Right-of-way-permits:
(1) ADL 25085 traversing selected lands in sections 15, 20, 21, 22, 23 and 24.
(2) ADL 57987 (section 15 and U.S. Survey 3378).

(c) Letter permit ADL 39789 for entry to construct Pioneer Access Road.
(d) Water appropriations:
(1) ADL 40037 located in SE¼SW¼ of section 28.
(2) ADL 40034 located in NW¼NW¼ of section 24.
(3) ADL 62282, ADL 44802, ADL 40038, and ADL 59302 located in NE¼NW¼ of section 24.
(e) Borough approvals:
(1) ADL 46806 located in sections 14, 15, 16, 21, 22 and 23.
(2) ADL 54619 located in U.S. Survey 4651, lot 3.

There are no inland water bodies considered to be navigable within the lands described.

Conveyance of the remaining entitlement to Seldovia Native Association, Inc. shall be made at a later date. When conveyance is granted to Seldovia Native Association, Inc. for the surface estate, conveyance of the subsurface estate of the lands described above shall be granted to Cook Inlet Region, Inc., pursuant to section 14(f) of ANCSA, and shall be subject to the same conditions as the surface conveyance.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice of this decision is being published once in the FEDERAL REGISTER and once a week, for four (4) consecutive weeks, in the Anchorage Daily Times. Any party claiming a property interest in lands affected by this decision may appeal the decision to the Alaska Native Claims Appeal Board, P.O. Box 2433, Anchorage, Alaska 99510 with a copy served upon both the Bureau of Land Management, 555 Cordova Street, Anchorage, Alaska 99501, and the Regional Solicitor, Office of the Solicitor, 510 L Street, Suite 408, Anchorage, Alaska 99501; also:

1. Any party receiving service of this decision shall have 30 days from the receipt of this decision to file an appeal.

2. Any unknown parties, any parties unable to be located after reasonable efforts have been expended to locate, and any parties who failed or refused to sign the return receipt shall have until September 19, 1977, to file an appeal.

3. Any party known or unknown who may claim a property interest which is adversely affected by this decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Alaska Native Claims Appeal Board.

4. If Seldovia Native Association, Inc. or Cook Inlet Region, Inc. objects to any easement which is identified herein for reservation in the conveyance which is subject to the discretion of the State Director and not reserved pursuant to an express Secretarial directive, a petition for reconsideration must be filed within 30 days with the State Director, Bureau of Land Management, 555 Cordova Street, Anchorage, Alaska 99501. A copy of the petition should be served upon the Regional Solicitor, Office of the Solicitor, 510 L Street, Suite 408, Anchorage, Alaska 99501. If a petition for reconsideration is not filed, it will be deemed that the right to contest any such easement has been waived.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeal. Further information on the manner of, and requirements for, filing an appeal may be obtained from the Bureau of Land Management, 555 Cordova Street, Anchorage, Alaska 99501.

SUE A. WOLF,
Acting Chief, Branch of Lands and Minerals Operations.

[Wyoming 60314]

WYOMING

Application

AUGUST 11, 1977.

Notice is hereby given that pursuant to Section 28 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 185), the Cities Service Gas Company of Oklahoma City, Oklahoma filed an application for a right-of-way to construct a 4 inch pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 18 N., R. 94 W.,
sec. 6, lots 16, 21, 22, 23.

The pipeline will transport natural gas from a point in section 5, T. 18 N., R. 94 W., to the existing pipeline in section 6, T. 18 N., R. 94 W., Sweetwater County, Wyoming.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyoming 82301.

HAROLD G. STINCHCOMB,
Chief, Branch of Lands and Minerals Operations.

Bureau of Reclamation

[INT FES 77–29]

SAN JUAN POWERPLANT, NEW MEXICO

Availability of Final Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a final environmental statement for the proposed expansion of the San Juan Powerplant and associated coal mines and transmission systems in New Mexico.

The Public Service Company of New Mexico and Tucson Gas and Electric Company plan to complete construction and to operate three additional operating units at the existing San Juan Powerplant, 12 miles northwest of Farmington, New Mexico.

Copies are available for inspection at the following locations:

Office of Assistant to the Commissioner, Ecology, Room 7622, Bureau of Reclamation, Department of the Interior, Washington, D.C. 20240, telephone 202–343–4991.
Division of Engineering Support, Technical Services Branch, E&R Center, Denver Federal Center, Denver, Colorado 80225, telephone 303–234–3022.
Office of the Regional Director, Bureau of Reclamation, Federal Building, 125 South State Street, Salt Lake City, Utah 84147, telephone 801–524–5580.
Project Construction Engineer, P.O. Box 28, 1006 Municipal Drive, Farmington, New Mexico 87401, telephone 505–325–1704.

Single copies of the final statement may be obtained on request from the Commissioner of Reclamation or the Regional Director. Please refer to the statement number above.

Dated: August 16, 1977.

LARRY E. MEIEROTTO,
Deputy Assistant, Secretary of the Interior.

DEPARTMENT OF JUSTICE

ACTION TO ENFORCE COMPLIANCE WITH TERMS OF NPDES PERMIT AND TO IMPOSE PENALTIES FOR VIOLATION OF THAT PERMIT

Proposed Consent Decree

In accordance with Departmental Policy, 28 CFR § 50.7, 38 FR 10029, notice

V42161 AUG 19 77 UM V

is hereby given that on August 1, 1977, a proposed consent decree in *United States* v. *Tennneco Oil Company*, was lodged with the United States District Court for the Eastern District of Louisiana. The proposed decree would require defendant to comply with the terms of its NPDES permit by January 1, 1978, and would impose a civil penalty of $140 per day for each day that the permit limitations are violated between July 1, 1977 and January 1, 1978.

The Department of Justice will receive for a period of thirty (30) days from the date of the notice written comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *"United States* v. *Tennneco Oil Company"*, D.J. Ref. 90-5-1-1-803.

The proposed consent decree may be examined at the office of the United States Attorney, Hale Boggs Federal Building, 500 Camp Street, New Orleans, Louisiana 70130, at the Region VI Office of the Environmental Protection Agency, Enforcement Division, 1600 Patterson Street, Dallas, Texas 75201; and at the Pollution Control Section, Land and Natural Resources Division of the Department of Justice, Room 2625, Ninth Street and Pennsylvania Avenue, NW., Washington, D.C. 20530. A copy of the consent decree may be obtained in person or by mail from the Pollution Control Section, Land and Natural Resources Division of the Department of Justice.

JAMES W. MOORMAN,
Acting Assistant Attorney General, Land and Natural Resources Division.

DEPARTMENT OF LABOR

Employment and Training Administration

EMPLOYMENT TRANSFER AND BUSINESS COMPETITION DETERMINATIONS UNDER THE RURAL DEVELOPMENT ACT

Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 U.S.C. 1924(b), 1932, or 1942(b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there s not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75. In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice to: Deputy Assistant Secretary for Employment and Training, 601 D St. NW., Washington, D.C. 20213.

Signed at Washington, D.C., this 15th day of August 1977.

ERNEST G. GREEN,
Assistant Secretary for Employment and Training.

Applications received during the week ending Aug. 12, 1977

Name of applicant	Location of enterprise	Principal product or activity
Skylands Farm Corp.	West Milford, N.J.	Breeding farm for registered quarter horses with boarding facilities and ancillary services.
Colonial Farms, Inc.	Norma, N.J.	Processing of chicken and chicken products.
White's Inc.	Glendenin, W.Va.	Grocery store.

Employment and Training Administration

INDIAN AND NATIVE AMERICAN ECONOMIC STIMULUS PROGRAM

Plans for Allocating Funds—Supplemental Information

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: This notice provides application procedures for eligible nonprofit organizations under the Fiscal Year 1977 Indian and Native American Economic Stimulus Program. This program was announced earlier in the FEDERAL REGISTER.

DATES: Proposals must be received in the manner indicated below, by 4:45 p.m. on September 12, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Alexander S. MacNabb, Director, Division of Indian and Native American Programs, Room 6402, 601 D Street NW., Washington, D.C. 20213.

SUPPLEMENTARY INFORMATION: Basic plans for the Indian and Native American Economic Stimulus Program were announced on Tuesday, July 26, 1977, at 42 FR 38022. As stated in that announcement, fully accredited nonprofit medical institutions may submit proposals for paramedical training funds, fully accredited nonprofit law schools may submit proposals for paralegal training funds and nonprofit management organizations may submit proposals for management training funds.

Eligible nonprofit organizations may request in writing or by telephone that copies of the Solicitation for Grant Applications (SGA) be mailed to them. The SGA contains instructions for completing the grant application package, and also contains evaluation criteria and individual Statements of Work. Telephone requests should be made to Eric Rudert on 202-376-7620.

The deadline for proposal reciept in all six program areas, including the three for which certain nonprofit organizations are eligible to apply, is 4:45 p.m. on September 12, 1977. This deadline also affects other eligible applicants, which are Division of Indian and Native American Programs prime sponsors who are eligible for Comprehensive Employment and Training Act funds under title VI. The September 12, 1977, date supersedes the deadline of August 31, 1977, which is contained in the SGA.

Signed in Washington, D.C. this 16th day of August, 1977.

LAMOND GODWIN,
Administrator, Office of National Programs.

SKILL TRAINING IMPROVEMENT PROGRAM

Correction

AGENCY: Employment and Training Administration, Labor.

ACTION: Correction.

SUMMARY: This notice revises the notice which announced the plans of the Department of Labor for implementing the Skill Training Improvement Program.

CORRECTION: In FR 38022, Vol., 42 No. 143—Tuesday, July 26, 1977, the date by which applications for funding must be received is revised to October 17, 1977.

Signed in Washington, D.C., this 12th day of August 1977.

ROBERT J. MCCONNON,
Deputy Assistant Secretary for Employment and Training.

[FR Doc.77-24118 Filed 8-18-77;8:45 am]

Office of the Secretary

ADVISORY COUNCIL ON EMPLOYEE WELFARE AND PENSION BENEFIT PLANS

Announcement of Vacancies; Request for Nominations

Section 512 of the Employee Retirement Income Security Act of 1974 (ERISA, 88 Stat. 895, 29 U.S.C. 1142) provides for the establishment of an "Advisory Council on Employee Welfare and Pension Benefit Plans" (the Council) which is to consist of 15 members to be appointed by the Secretary of Labor (the Secretary) as follows: three representatives of employee organizations (at least one of whom shall be representative of an organization whose members are participants in a multiemployer plan); three representatives of employers (at least one of whom shall be representative of employers maintaining or contributing to multiemployer plans); one representative each from the fields of insurance, corporate trust, actuarial counseling, investment counseling, investment management, and accounting; and three representatives from the general public (one of whom shall be a person representing those receiving benefits from a pension plan). Not more than eight members of the Council shall be members of the same political party.

Members shall be persons qualified to appraise the programs instituted under ERISA. Appointments are for terms of three years.

The prescribed duties of the Council are to advise the Secretary with respect to the carrying out of his functions under ERISA, and to submit to the Secretary recommendations with respect thereto. The Council will meet at least four times each year, and recommendations of the Council to the Secretary will be included in the Secretary's annual report to the Congress on ERISA.

The terms of five members of the Council expire on November 14, 1977. The groups or fields represented are as follows: Employee organizations, employers, insurance, accounting, and the general public. Also, due to the resignation of the Council member representing the general public (those receiving benefits from a pension plan) who was appointed on November 15, 1976 to a three-year term, a vacancy exists to represent this group for the remainder of that term.

Accordingly, notice is hereby given that any person or organization desiring to recommend one or more individuals for appointment to the ERISA Advisory Council on Employee Welfare and Pension Benefit Plans to represent any of the groups or fields specified in the preceding paragraph may submit recommendations to the Secretary of Labor, New Department of Labor Building, 200 Constitution Avenue NW., Washington, D.C. 20210. Recommendations must be delivered or mailed by October 5, 1977. Recommendations may be in the form of a letter, resolution, or petition, signed by the person making the recommendation, or, in the case of a recommendation by an organization, by an authorized

V42N161 AUG 19 77 UM

representative of the organization. Each recommendation shall identify the candidate by name, occupation or position, and address. It shall include a brief description of the candidate's qualifications and shall specify the group or field which the candidate would represent for the purposes of section 512 of ERISA, the candidate's political party affiliation, and whether the candidate is available and would accept.

Signed at Washington, D.C., this 8th day of August 1977.

IAN D. LANOFF,
Administrator of Pension and Welfare Benefit Programs.

ANACONDA CO., ET AL.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to Section 221 (a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 29, 1977.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 29, 1977.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C. this 2nd day of August 1977.

HAROLD A. BRATT,
Acting Director, Office of Trade Adjustment Assistance.

[TA-W-1984]

APOLLO DYEING AND FINISHING CO., INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1984: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on April 18, 1977 in response to a worker petition received on April 18, 1977 which was filed by the Machine Printers and Engravers Association on behalf of workers and former workers printing and dyeing fabric at the Paterson, New Jersey plant of Apollo Dyeing and Finishing Company, Incorporated.

The notice of investigation was published in the FEDERAL REGISTER on April 29, 1977 (42 FR 21872). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Apollo Dyeing and Finishing Company, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Company employment increased 13 percent from 1974 to 1975 and increased 7 percent from 1975 to 1976. Employment declined 7 percent in the last six months of 1976 and declined 25 percent in the first quarter of 1977 when compared to the like periods of the previous year.

SALES, PRODUCTION, OR BOTH HAVE DECREASED ABSOLUTELY

Sales of printed fabric, adjusted for price changes, increased 165 percent from 1974 to 1975 and then declined 29 percent from 1975 to 1976. Sales declined 57 percent in the last six months of 1976 and declined 78 percent in the first quarter of 1977 when compared to the like period of the previous year.

Sales of dyed fabric, adjusted for price changes, declined 6 percent from 1974 to 1975 and then increased 8 percent from 1975 to 1976. Sales declined 3 percent in the last quarter of 1976 and declined 16 percent in the first quarter of 1977 when compared to the like quarters of the previous year.

Apollo finishes fabric on a commission basis. Therefore, production is equivalent to sales.

INCREASED IMPORTS

Imports of cotton broadwoven printcloth declined absolutely from 1972 to 1973, increased from 1973 to 1974, declined 10.5 percent from 1974 to 1975 and then increased 55.6 percent from 1975 to 1976. Imports declined in the first quarter of 1977 compared to the first quarter of 1976. The ratios of imports to domestic production and consumption increased from 13.5 percent and 12.9 percent, respectively, in 1975 to 20.6 percent and 19.8 percent, respectively, in 1976.

Imports of man-made woven printed fabric declined absolutely from 1972 to 1973, increased from 1973 to 1974, declined 0.8 percent from 1974 to 1975 and then increased 23.5 percent from 1975 to 1976. The ratios of imports to domestic production and consumption remained less than one percent from 1972 through 1976.

Imports of bleached and dyed man-made woven fabrics declined absolutely from 1972 to 1973 and from 1973 to 1974. Imports then increased from 1974 to 1975 and increased 8 percent from 1975 to 1976. The ratios of imports to domestic production and consumption declined from 3.9 percent for each in 1975 to 3.7 percent for each in 1976.

CONTRIBUTED IMPORTANTLY

Customers of Apollo Dyeing and Finishing Company are fabric converters who buy greige goods and commission Apollo to finish the fabric, by dyeing and printing it in accordance with apparel manufacturers' specifications. During the course of the investigation it was established that some domestic converters purchase imports of finished fabric. Approximately 50 percent of Apollo's customers, who were surveyed, purchase imported finished (dyed or printed) fabric. In general, the converters maintained that orders with Apollo were reduced because the converters were experiencing declining sales.

The Department's survey of apparel manufacturers, who are customers of the converters, revealed that manufacturers are importing printed or finished fabric for use in the production of men's and women's wearing apparel. The converters reported a growing trend toward manufacturers bypassing converters and purchasing finished fabric offshore or purchasing the imported finished fabric domestically, through foreign trading companies.

CONCLUSION

After careful review of the facts obtained in the investigation I conclude that increases of imports like or directly competitive with dyed and printed fabric produced at Apollo Dyeing and Finishing Company, Incorporated, Paterson, New Jersey contributed importantly to the total or partial separation of the workers of the plant. In accordance with the provisions of the Act, I make the following certification:

All workers at Apollo Dyeing and Finishing Company, Incorporated, Paterson, New Jersey and the company sales office in New York, New York who became totally or partially separated from employment on or after June 1, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Signed at Washington, D.C. this 4th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-23780 Filed 8-18-77;8:45 am]

[TA-W-2023]

BELLE-MOC, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2023: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on April 25, 1977 in response to a worker petition received on that date which was filed by the Lewiston Auburn Shoeworkers Protective Association on behalf of workers and former workers producing men's footwear at Belle-Moc., Inc., Lewiston, Maine.

The Notice of Investigation was published in the FEDERAL REGISTER on May 10, 1977 (42 FR 23656). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Belle-Moc., Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations; or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a caues which is important but not necessarily more important than any other cause.

The Department's investigation revealed that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment at Belle-Moc, Inc. declined 30.6 percent in 1976 compared to 1975 and declined 44.6 percent in the first three months of 1977 compared to the same period in 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Production at Belle-Moc, Inc. declined by 49.5 percent in 1976 compared to 1975 and declined 53.0 percent in the first three months of 1977 compared to the same period in 1976.

Sales at Belle-Moc, Inc. declined 52.6 percent in 1976 compared to 1975 and declined 44.1 percent in the first three months of 1977 compared to the same period in 1976.

INCREASED IMPORTS

Imports of men's dress and casual footwear increased both in absolute terms and relative to domestic production and consumption from 1972 to 1973, decreased from 1973 to 1974 and increased again from 1974 to 1975. Imports rose from 47.5 million pairs in 1975 to 58.7 million pairs in 1976, an increase of 23.6 percent. The ratio of imports to domestic production increased from 58.7 percent in 1975 to 68.5 percent in 1976. Imports rose from 15.2 million pairs in the first quarter of 1976 to 15.7 million pairs in the first quarter of 1977. The ratio of imports to domestic production increased from 63.9 percent in the first quarter of 1976 to 76.6 percent in the first quarter of 1977.

CONTRIBUTED IMPORTANTLY

Customers surveyed indicated either that purchases from Belle-Moc decreased while purchases of imports increased, or that purchases from Belle-Moc decreased relative to purchases of imports.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's dress and casual nonrubber footwear produced by Belle-Moc, Inc. contributed importantly to the total or partial separations of the workers at that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of Belle-Moc, Inc., Lewiston, Maine who became totally or partially separated from employment on or after April 18, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 3rd day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-23781, Filed 8-18-77,8:45 am]

[TA-W-1847]

HARRIS CORP.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1847: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 22, 1976 in response to a worker

V 42 161 AUG 19 77 UM

petition received on that date which was filed on behalf of workers and former workers producing matrices for hot-metal typesetting machines at the Winchester, Virginia facility of Harris Composition Systems Division.

The Notice of Investigation was published in the FEDERAL REGISTER on April 5, 1977 (42 FR 18156). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Harris Composition Systems Division, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Total employment of workers at the Winchester, Virginia facility of Harris Composition Systems Division declined 18 percent in 1976 from 1975 and declined 8 percent during January–April 1977 compared to January–April 1976. Employment of workers engaged in the production of typesetting matrices declined 15 percent in 1976 from 1975 and declined 13 percent during the first quarter of 1977 compared to the first quarter of 1976. The Winchester facility operated on a shortened work week from January through mid-March 1977.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Total dollar sales by the Winchester facility declined two percent in 1976 from 1975 and declined 9 percent during January–March 1977 compared to January–March 1976. Production of typesetting matrices declined 50 percent in 1975 from 1974 and declined one percent in 1976 from 1975.

Company officials at Harris Composition Systems Division have announced their intention to close the Winchester manufacturing facility by the fall of 1977.

INCREASED IMPORTS

Imports of matrices for hot-metal type setting machines amounted to 82.2 percent of U.S. production in 1974, 154.4 percent of U.S. production in 1975, and 136.3 percent of production in 1976. Imports increased 60 percent in value during the first quarter of 1977 compared to the same period in 1976.

CONTRIBUTED IMPORTANTLY

From January 1975 to March 1977 the number of major domestic manufacturers of matrices for hot-metal typesetting machines has declined from five to one. During the past several years many domestic firms have transferred their manufacturing facilities from the United States to Europe. The majority of the U.S. matrix market is currently being supplied by European manufacturing facilities.

Company officials of Harris Composition Systems Division plan to close the manufacturing operations at the Winchester facility in August 1977. Production of matrices for hot-metal typesetting machines will be transferred to the Harris manufacturing facility in Slough, England. Production of glass discs will be transferred to Melbourne, Florida in August, 1977. Company officials stated that this transfer would not have taken place had production of matrices (80 percent of total plant production in 1976) not been transferred abroad.

Customers of the Winchester, Virginia facility indicate that the majority of their suppliers produce matrices at foreign manufacturing facilities.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with matrices for hot-metal typesetting machines produced at the Winchester, Virginia facility of Harris Composition Systems Division contributed importantly to the total or partial separations of workers of that facility. In accordance with the provisions of the Act, I make the following certification:

All workers of the Winchester, Virginia facility of Harris Composition Systems Division who became totally or partially separated from employment on or after March 16, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 4th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-23782 Filed 8-18-77;8:45 am]

[TA-W-2067]

IRVING WENGER, INC.

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2067: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on May 11, 1977 in response to a worker petition received on May 11, 1977 which was filed on behalf of workers and former workers producing women's dresses at Irving Wenger, Inc., Philadelphia, Pennsylvania.

The Notice of Investigation was published in the FEDERAL REGISTER on May 24, 1977 (42 FR 26481). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Irving Wenger, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether the other criteria have been met, criterion (4) has not been met.

Evidence developed in the investigation revealed that Irving Wenger is a contractor producing women's dresses primarily for two clothing manufacturers. Sales by the manufacturer accounting for 70 percent of Irving Wenger's sales increased in both 1975 and 1976. Customers of that manufacturer who were surveyed either increased purchases from the manufacturer or indicated that they do not purchase imported dresses. The manufacturer accounting for 15–20 percent of Irving Wenger's sales did not purchase imported garments.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with women's dresses produced by Irving Wenger, Inc. did not contribute importantly to the decline in sales or production or separations of workers of that firm.

Signed at Washington, D.C. this 3rd day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1819]

OPTEL CORP.

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-1819: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 21, 1977 in response to a worker petition received on March 16, 1977 which was filed on behalf of workers and former workers producing electronic digital watches at Optel Corporation, Princeton, New Jersey.

The Notice of Investigation was published in the FEDERAL REGISTER on April 5, 1977 (42 FR 18158). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from Optel Corporation, its customers, the U.S. International Trade Commission, the U.S. Department of Commerce, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met for electronic digital watches. Furthermore, without regard to whether any of the other criteria have been met, criterion (2) has not been met with regard to liquid crystal display (LCD) readouts.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers increased 42.0 percent in 1975 compared to 1974 but declined 36.7 percent in 1976 compared to 1975. Employment for the first quarter 1977 was 69.0 percent less than the same period in 1976. Optel employed 4.8 percent more salaried workers in 1975 than 1974. Salaried employment declined 17.4 percent in 1976 compared to 1975. Optel's decision to discontinue production of electronic digital watches resulted in permanent layoffs beginning March 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

A. ELECTRONIC DIGITAL WATCHES

Sales of digital watches in terms of value increased 118.8 percent in 1975 compared to 1974 but decreased 55 percent in 1976 compared to 1975.

B. LIQUID CRYSTAL DISPLAY READOUTS

Optel began sales of the LCD units exclusively in 1976.

Sales of LCD's in terms of quantity increased 39.3 percent in the first quarter of 1977 compared to the fourth quarter of 1976, the first quarter for which LCD sales data were available. Company officials stated that production of LCD's closely parallels sales.

INCREASED IMPORTS

Imports of nonconventional watches increased from 29,000 units in 1973 to 134,000 units in 1974, an increase of 362.1 percent. Imports increased 1066.4 percent in 1975 to 1,563,000 units from 1974. United States imports increased again in 1976 to 5,158.000 units, an increase of 230 percent. The ratio of import to domestic production increased from 11.3 percent in 1974 to 60.4 percent in 1975 and decreased 55.7 percent in 1976.

CONTRIBUTED IMPORTANTLY

Customers indicated that they did switch purchases of digital watches from Optel to foreign sources. Customers cited price as the most important factor in purchasing decisions. The low price of imports and their availability make them desirable to domestic watch manufacturers.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with electronic digital watches produced at the three plants at Optel Corporation contributed importantly to the separations of workers of that firm.

In accordance with the provisions of the Act, I make the following certification:

All workers engaged in employment related to the production of electronic digital watches at the three plants of Optel Corporation located in Princeton, New Jersey and the sales offices in New York, New York and Stamford, Connecticut who became totally or partially separated from employment on or after March 14, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

I further conclude that sales or production, or both, of LCD readouts at the Princeton plants of Optel Corporation did not decrease absolutely and therefore employees engaged in production of LCD readouts should not be certified as eligible to apply for adjustment assistance under the Trade Act of 1974.

Signed at Washington, D.C. this 4th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1821]

R&M FASHIONS

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1821: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 18, 1977 in response to a worker petition received on March 18, 1977 which was filed by the International Ladies' Garment Workers Union on behalf of workers and former workers producing women's dresses and sportswear at R & M Fashions, Wilkes-Barre, Pennsylvania.

The notice of investigation was published in the FEDERAL REGISTER on April 5, 1977 (42 FR 18158). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of R & M Fashions, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether the other criteria have been met, criterion (4) has not been met.

The Department's investigation has revealed that the only apparel manu-

V42161 AUG 19 77 UM

facturer for which R & M Fashions produced women's dresses and sportswear (which includes blouses and shirts, skirts, slacks and shorts) does not import finished products for sale to its retail customers and does not contract with firms outside the United States. This manufacturer increased contracts with R & M Fashions from 1975 to 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that imports of articles like or directly competitive with women's dresses, blouses and shirts, skirts and slacks and shorts produced by R & M Fashions have not contributed importantly to the decline in sales or production of the firm or to the total or partial separations of workers of that firm as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 3rd day of August 1977.

JAMES F. TAYLOR,
Director, Office Management, Administration, and Planning.

[TA-W-1492, 1493, and 1488]

REPUBLIC STEEL CORP. AND CANTON STEEL

Notice of Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1492, 1493, and 1488: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 15, 1976 in response to worker petitions received on December 15, 1976 which were filed by the United Steelworkers of America on behalf of workers and former workers producing various steel products at the Canton Steel, Canton South Division, and Massillon, Ohio plants of the Central Alloy District of Republic Steel Corporation, Cleveland, Ohio.

The notice of investigation was published in the FEDERAL REGISTER on January 11, 1977 (42 FR 2378 and 2379). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Republic Steel Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974, must be met:

(1) that a significant number or proportion of the workers in the workers' firm, or appropriate subdivision thereof, have become totally or partially separated;

(2) that sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) that articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) that such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to any of the other criteria, criterion three (3) was not met for carbon steel bars and criterion four (4) was not met for alloy steel bars.

FINDINGS OF THE INVESTIGATION

Republic Steel Corporation was incorporated in New Jersey in 1899 as the Republic Iron and Steel Company. The name was changed in 1930. Republic, a major integrated steel company in the United States, produces a diversified line of steel mill products and a variety of fabricated steel products. Republic operates within six districts and a number of divisions with plants throughout the country.

The Central Alloy District includes the Canton Steel, Canton South Division, and Massillon, Ohio plants (Massillon plants 1 and 3). The Central Alloy District produces carbon and alloy steel bars.

Imports of carbon hot and cold rolled steel bars declined both absolutely and relative to domestic shipments in each year from 1972 through 1976. The ratio of imports to domestic shipments declined from 7.7 percent in 1975 to 6.6 percent in 1976.

Customers of the Central Alloy District were surveyed regarding their purchases of alloy steel bars. Over 85 percent of the customers contacted did not purchase imported alloy steel bars in 1976. From 1973 through 1976 the ratio of imports of alloy steel bars to domestic shipments did not exceed the 1972 level of 3.4 percent.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that imports like or directly competitive with carbon steel bars produced at the Canton Steel, Canton South Division, and Massillon, Ohio, plants (plants 1 and 3) of the Central Alloy District of Republic Steel Corporation did not increase as required for certification under Section 222 of the Trade Act of 1974.

I further conclude that increases of imports like or directly competitive with alloy steel bars produced at the Canton Steel, Canton South Division and Massillon, Ohio plants (plants 1 and 3) of the Central Alloy District of Republic Steel Corporation did not contribute importantly to the total or partial separation of workers of those plants.

Signed at Washington, D.C. this 4th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1468, 1469, 1471]

WHEELING-PITTSBURGH STEEL CORP.

Notice of Negative Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1468, 1469 and 1471: investigations regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 15, 1976 in response to a worker petition received on that date which was filed by the United Steelworkers of America on behalf of workers and former workers producing carbon steel hot and cold rolled sheets at the Steubenville, Ohio plant of Wheeling-Pittsburgh Steel Corporation, which includes facilities in Steubenville and Mingo Junction, Ohio and Follansbee, West Virginia.

The notice of investigations was published in FEDERAL REGISTER on January 7, 1977 (42 FR 1543 and 1544). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Wheeling Pittsburgh Steel Corporation, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analyst, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigations have revealed that without regard as to whether or not any of the other criteria have been met, criterion two (2) has not been met.

Production, in quantity and value, of carbon steel hot and cold rolled sheets at the Steubenville, Ohio plant of Wheeling-Pittsburgh Steel Corporation, which includes facilities in Steubenville and Mingo Junction, Ohio and Follansbee, West Virginia increased 25 and 43 percent, respectively, in 1976 from 1975. Production increased in each quarter of 1976 compared to the same quarter of 1975.

Sales, in quantity and value, of carbon steel hot and cold rolled sheets at the Steubenville, Ohio plant of Wheeling-Pittsburgh Steel Corporation, which includes facilities in Steubenville and Mingo Junction, Ohio and Follansbee, West Virginia increased 26 percent and 42 percent, respectively, in 1976 from 1975. Sales increased in each quarter of 1976 compared to the same quarter of 1975.

CONCLUSION

After careful review of the facts obtained in the investigations, I conclude that sales and production at the Steubenville, Ohio plant of Wheeling-Pittsburgh Steel Corporation, which includes facilities in Steubenville and Mingo Junction, Ohio and Follansbee, West Virginia have not declined as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 4th day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.23787 Filed 8-18-77;8:45 am]

[TA-W-1983]

WHITE PINE SCHOOL DISTRICT, WHITE PINE, MICHIGAN

Negative Determination Regarding Eligibility To Apply for Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1983: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on April 13, 1977 in response to a worker petition received on April 11, 1977 which was filed by the Michigan Education Association on behalf of workers and former workers of the White Pine School District, White Pine, Michigan.

The Notice of Investigation was published in the FEDERAL REGISTER on April 29, 1977 (42 FR 21874). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the White Pine School District and from officials of the Michigan Education Association. In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

If any of the above criteria is not satisfied, a negative determination must be made.

The White Pine School District, White Pine, Michigan, does not produce an "article" within the meaning of Section 222 (3) of the Act, and this Department has already determined that the performance of services is not covered by the adjustment assistance program. See Notice of Determination in Pan American World Airways, Incorporated (TA-W-153, 40 FR 54639). The only question in this case is whether the White Pine Copper Company, i.e., a firm which produced an article, namely refined copper, and for whom the services are provided, can be considered the "workers' firm." The Department has also previously determined that an independent firm for whom such services are provided cannot be considered the "workers' firm." See Notice of Determination in Nu-Car Driveaway, Incorporated (TA-W-393, 41 FR 12749).

The White Pine School District is a public school system, is run by an elected board of private area citizens, and is completely financed by public tax revenues. White Pine School District does not produce any finished goods. Workers of the White Pine School District are engaged in employment related to teaching students from kindergarten through high school. Workers are employed on a contract basis with and can be discharged from such employment by the White Pine School District. Neither the White Pine School District nor its workers has any direct relationship with the White Pine Copper Company.

CONCLUSION

After careful review of the issues and facts involved, I have determined that services of the kind provided by White Pine School District, White Pine, Michigan, are not "articles" within the meaning of Section 222 (3) of the Trade Act of 1974, and that the White Pine Copper Company cannot be considered the "workers' firm." The petition for trade adjustment assistance is, therefore, denied.

Signed at Washington, D.C., this 3rd day of August 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration and Planning.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on August 15, 1977 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division within OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503, 202-395-4529, or from the reviewer listed.

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. 9891]

CUMULO ALTERNATE FUND, INC.

Filing of Application For Order Declaring That Company Has Ceased to Be An Investment Company

AUGUST 12, 1977.

In the matter of Cumulo Alternate Fund, Inc., 523 West Sixth Street, Los Angeles, Calif. 90014 (811–1945).

Notice is hereby given that Cumulo Alternate Fund, Inc. ("Applicant"), an open-end, diversified, management investment company registered under the Investment Company Act of 1940 ("Act"), filed an application on June 10, 1977, and and amendment thereto on July 18, 1977, pursuant to Section 8(f) of the Act for an order of the Commission declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the facts and representations contained therein, which are summarized below.

Applicant was incorporated under the laws of the State of California on August 28, 1969 and registered with the Commission under the Act on September 29, 1969.

Applicant states that on February 3, 1977, its shareholders approved a plan of liquidation and dissolution ("Plan"). A cash reserve of $1,425.51 was established in accordance with the Plan to discharge any unpaid liabilities and to pay the expenses of dissolution. All remaining assets were liquidated and distributed to Applicant's shareholders pro rata on May 2, 1977. At the time of liquidation Applicant had net assets of $74,136.25 and 15,243.72 shares outstanding. Applicant represents that any monies remaining in the reserve will be distributed to former shareholders pro rata in January 1978.

Applicant states that on May 24, 1977, a Certificate of Dissolution was filed with the Secretary of State of California and that Applicant has ceased to be an investment company.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the taking effect of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than September 6, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon the Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.77-24076 Filed 8-18-77;8:45 am]

[Rel. No. 9892]

CUMOLO FUND, INC.

Filing of Application for Order Declaring That Company Has Ceased To Be an Investment Company

AUGUST 12, 1977.

In the matter of Cumulo Fund, Inc., 523 West Sixth Street, Los Angeles, Calif. 90014 (811–1708).

Notice is hereby given that Cumulo Fund, Inc. ("Applicant"), an open-end, diversified, management investment company registered under the Investment Company Act of 1940 ("Act"), filed an application on June 10, 1977, and an amendment thereto on July 18, 1977, pursuant to Section 8(f) of the Act for an order of the Commission declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the facts and representations contained therein, which are summarized below.

Applicant was incorporated under the laws of the State of Delaware on July 22, 1968, and registered with the Commission under the Act on August 9, 1968.

Applicant states that on February 3, 1977, its shareholders approved a plan of liquidation and dissolution ("Plan"). A cash reserve of $1,294.09 was established in accordance with the Plan to discharge any unpaid liabilities and to pay the expenses of dissolution. All remaining assets were liquidated and distributed to Applicant's shareholders pro rata on May 2, 1977. At the time of liquidation Applicant had net assets of $161,720.03 and 47,325.17 shares outstanding.

Applicant represents that in June of 1977, $622.26 was returned to Applicant by a bank acting as agent for a shareholder in settlement of an outstanding claim. This amount and any additional such assets that may be recovered, together with any monies remaining in the reserve, will be distributed to former shareholders pro rata in January 1978.

Applicant states that on May 26, 1977, a Certificate of Dissolution was filed with the Secretary of State of Delaware and that Applicant has ceased to be an investment company.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the taking effect of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than September 6, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon the Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 13859]

MIDWEST STOCK EXCHANGE INC.

Order Approving Proposed Rule Change

AUGUST 15, 1977.

In the matter of Midwest Stock Exchange, Incorporated, 120 South LaSalle Street, Chicago, Illinois 60603, (SR–MSE–77–19).

On June 22, 1977, the Midwest Stock Exchange, Incorporated filed with the Commission, pursuant to Section 19(b) of the Securities Exchange Act of 1934 (the "Act"), as amended by the Securities Acts Amendments of 1975, and Rule 19b–4 thereunder, copies of a proposed rule change to require that the Chairman of the Committee on Specialist Assignment and Evaluation not be affiliated with a broker-dealer and to delete the requirement that such Chairman be a public governor of the Exchange.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 13702 (June 29, 1977)) and by publication in the FEDERAL REGISTER (42 FR 35718 (July 11, 1977)).

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered national securities exchanges, and in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change filed with the Commission on June 22, 1977, be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 34–13860]

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC.

Filing of Proposed Rule Change

AUGUST 15, 1977.

In the matter of the National Association of Securities Dealers, Inc., 1735 K Street NW., Washington, D.C. 20006 SR–NASD–77–10.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78(s)(b)(1) (the "Act"), as amended by Pub. L. No. 94–29, § 16 (June 4, 1975), notice is hereby given that the National Association of Securities Dealers, Inc. (the "NASD") filed with the Commission on June 20, 1977, copies of a proposal to amend Section 1(a) of Schedule G under Article XVIII of the NASD By-Laws. That proposal, as amended by a letter dated July 8, 1977 (the "Proposal"), is to permit any member of the NASD to become a so-called "Designated Reporting Member" upon request, provided the member executes over-the-counter transactions in listed securities required to be reported on the Consolidated Tape and maintains transaction reporting capability through the NASDAQ Transaction Reporting System.

Interested persons are invited to submit written data, views and arguments concerning the Proposal within 30 days of the date of this publication. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549. Reference should be made to File No. SR–NASD–77–10.

Copies of the submission and of all written comments will be available for inspection at the Securities and Exchange Commission's Public Reference Room, 1100 L Street NW., Washington, D.C. Copies of the filing will also be available at the principal office of the NASD.

The Commission finds that the Proposal is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered national securities associations and, in particular, the requirements of Section 15A of the Act and the rules and regulations thereunder.

The Commission finds good cause for approving the Proposal prior to the thirtieth day after the date of publication of notice of filing thereof. Adoption of the Proposal would eliminate a burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the Proposal be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 9890]

SIGMA TAX-FREE INCOME FUND, INC.

Filing of Application for an Order Declaring That Company Has Ceased To Be an Investment Company

AUGUST 12, 1977.

In the matter of Sigma Tax-Free Income Fund, Inc., Greenville Center, 3801 Kennett Pike, Wilmington, Delaware, 19807 (811–2724).

Notice is hereby given that Sigma Tax-Free Income Fund, Inc. ("Applicant"), an open-end, diversified management investment company registered under the Investment Company Act of 1940 ("Act"), filed an application on May 26, 1977, and an amendment thereto on August 4, 1977, pursuant to Section 8(f) of the Act for an order of the Commission declaring that the Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant was organized as a corporation under the laws of Delaware on January 25, 1977. On that same date, Applicant registered under the Act as an investment company and filed a Form S–5 under the Securities Act of 1933 to register 500,000 shares of its common stock. Since the date of its incorporation, Applicant has engaged in no business activity, has had no stockholders, has never raised its initial capital pursuant to Section 14 of the Act, and has never had any assets. The application contends that after consideration of existing market conditions and for other business reasons, Applicant's board of directors decided to seek an order providing that Applicant's registration as an investment company shall cease to be in effect. On June 16, 1977, a Certificate of Dissolution was filed with the Secretary of State of Delaware, and, pursuant to Rule 477 promulgated under the Securities Act of 1933, an application requesting withdrawal of Form S–5 was filed on May 26, 1977.

Section 8(f) of the Act provides in part that whenever the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and upon the taking effect of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than September 6, 1977, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant(s) at the address(es) stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether

V 42 161 AUG 19 77 UM

a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

DEPARTMENT OF STATE

Agency for International Development

BOARD FOR INTERNATIONAL FOOD AND AGRICULTURAL DEVELOPMENT

Meeting

Pursuant to Executive Order 11769 and the provisions of Section 10(a), (2), Pub. L. 92-463, Federal Advisory Committee Act, notice is hereby given of the eleventh meeting of the Board for International Food and Agricultural Development on September 12, 1977.

The purpose of this meeting is: To receive a progress report on prior Board requested actions including actions taken to strengthen American Universities capabilities in agricultural development and in the development of guidelines for the Joint Research Committee; to consider expansion of the provisional roster of American Universities eligible for participation in Title XII programs; to receive reports from the chairmen of the Joint Research Committee and Joint Committee on Agricultural Development; and to receive a briefing on the study on Food and Nutrition by the National Academy of Sciences, National Research Council.

The meeting will begin at 8:30 a.m. and will adjourn at 4:30 p.m. and will be held in Room 1107 in the State Department Building, 21st and C Streets NW., Washington, D.C. The meeting is open to the public. Any interested person may attend, may file written statements with the Board before or after the meeting, or may present oral statements in accordance with procedures established by the Board, and to the extent the time available for the meeting permits.

Dr. Erven J. Long, Associate Assistant Administrator, Technical Assistance Bureau, is designated as A.I.D. Advisory Committee Representative at the meeting. It is suggested that those desiring further information write to him in care of the Agency for International Development, State Department, Washington, D.C. 20523, or telephone him at (703) 235-9001.

Dated: August 10, 1977.

ERVEN J. LONG,
A.I.D. Advisory Committee Representative, Joint Research Committee, Board for International Food and Agricultural Development.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

CONSTRUCTION ZONE SAFETY

Meeting

AGENCY: Federal Highway Administration, DOT.

ACTION: Notice.

SUMMARY: Officials of the Federal Highway Administration (FHWA) will meet with interested parties on August 26, 1977, to discuss the subject of construction zone safety. Interested individuals and groups are invited to attend and participate in the discussion.

DATE: August 26, 1977.

TIME: 9:30 a.m.

PLACE: Room 3200, Department of Transportation, 400 Seventh Street SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Paul Oyler, Contract Administration and Safety Branch, Office of Highway Operations 202-426-4847, or Stan Abramson, Office of the Chief Counsel 202-426-0791, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: Representatives of various interested parties, including the Building and Construction Trades Department, AFL-CIO, and the Center for Auto Safety, have requested a meeting with FHWA officials to discuss the status of ongoing agency activities relating to safety in work zones on Federal-aid highway projects. The FHWA has decided that it is in the public interest to provide all interested parties an opportunity to attend and participate in this discussion.

FHWA expects that a number of its ongoing activities will be discussed including: The current rulemaking proceeding on construction zone safety (Docket No. 76-14, 41 FR 41712); training in proper traffic control techniques sponsored by FHWA; reviews of traffic safety conditions at highway construction sites; modifications of regulations, directives and standards relating to carrying traffic safely through construction zones; and FHWA-sponsored research on traffic control devices for use in construction zones.

Issued on: August 16, 1977.

WILLIAM M. COX,
Federal Highway Administrator.

[FR Doc.77-24130 Filed 8-18-77;8:45 am]

DEPARTMENT OF THE TREASURY

Customs Service

INDEX TO THE CUSTOMS REGULATIONS

AGENCY: United States Customs Service, Department of the Treasury.

ACTION: General Notice.

SUMMARY: This notice informs the public that the Customs Service has recently revised the index to its regulations A single copy of the revised index may be obtained free of charge by writing to the Customs Service.

EFFECTIVE DATE: August 19, 1977.

ADDRESS: Requests for a copy of the revised index should be addressed to the United States Customs Service, P.O. Box 7188, Washington, D.C. 20044.

FOR FURTHER INFORMATION CONTACT:

Norman W. King, Attorney, Regulations and Legal Publications Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, 202-566-8237.

SUPPLEMENTARY INFORMATION: To assist both the public and Government personnel, the Customs Service has recently revised the index to its regulations. The revised index will be included in the April 1, 1978, printing of Title 19, Code of Federal Regulations, available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

A copy of the revised index is being distributed as part of the 164th set of revised pages to the loose-leaf reprint of the Customs Regulations of the United States, which is available from the Superintendent of Documents on a subscription basis only. Present subscribers to this publication, including Depository Libraries, will automatically receive a copy of the revised index.

For those persons who use the Customs Regulations and are not now subscribers to the loose-leaf reprint, the Customs Service has printed a limited quantity of extra copies of the revised index. As a public service, a single copy may be obtained free of charge by writing to Headquarters, United States Customs Service, P.O. Box 7188, Washington, D.C. 20044. Once this limited supply is exhausted, the only source for the index will be the Superintendent of Documents by purchase of Title 19, Code of Federal Regulations, or by subscription to the loose-leaf reprint.

LEONARD LEHMAN,
Assistant Commissioner, Regulations and Rulings.

WATER RESOURCES COUNCIL

WATER RESOURCE POLICY STUDY

Extension of Public Comment Date

Secretary Cecil D. Andrus, in his capacity as Chairman of the Water Resources Council, announced on August 4, 1977 that the time for completion of the water resources policy review ordered by the President in his environmental message of May 23 has been extended 90 days. (See previous issues: July 6 (42 FR 34563); July 15 (42 FR 36788); July 25 (42 FR 37940); and July 28 (42 FR 38463)). The extension was granted in response to comments made at the nine hearings throughout the Nation and at the request of U.S. Senators, Congressmen, and Governors who said insufficient time had been provided for proper consideration of the issues and options. Pursuant to the decision to extend the time of the review, the closing date for public comment on the option papers published in the FEDERAL REGISTER on July 15 and 25, 1977 is now September 15, 1977.

GUY R. MARTIN,
Alternate to the Chairman, Water Resources Council Chairman, Water Resources Policy Committee.

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

[Notice No. 103TA]

AUGUST 15, 1977.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

FOURTH SECTION APPLICATION FOR RELIEF

AUGUST 16, 1977.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the Federal Register.

FSA No. 43412—*Joint Water-Rail Container Rates—A. P. Moller-Maersk Line.* Filed by A. P. Moller-Maersk Line, (No. 7), for itself and interested rail carriers.

Rates on general commodities, from Persian Gulf and Red Sea ports, to rail terminals on the U.S. Pacific Coast, by way of U.S. Atlantic Coast ports, and U.S. Gulf Coast ports in Louisiana and Texas.

Grounds for relief—Water competition.

By the Commission.

H. G. HOMME, JR.,
Acting Secretary.

[No. 36574]

DEMURRAGE CHARGES CAUSED BY SEVERE WINTER WEATHER

Petition of Railroads Seeking Authorization to Waive

AUGUST 12, 1977.

At a Session of the Interstate Commerce Commission, Division 2, held at its office in Washington, D.C., on the 3rd day of August 1977.

Last winter, severe weather and fuel shortages affected certain areas of the country. Because of these adverse conditions, shippers and consignees were allegedly unable to load or unload railroad cars, industries were closed down, and railroad service in certain areas was curtailed. The National Industrial Traffic League (NITL), in late January 1977, initiated discussions with the Operating-Transportation Division, Operations to Maintenance Department, Association of American Railroads, with the objective of preventing the imposition of a portion of demurrage charges on railroad cars detained because of these unusual circumstances. As a result of these discussions, the 17 petitioner railroads (see Appendix A), all of which are parties to Freight Tariff 4–J, Car Demurrage Rules and Charges, et al., J. F. Doyle, Agent, I.C.C. H–59, in their petition filed April 28, 1977, submitted the following proposal to the Commission for approval:

1. Only those shippers and receivers directly affected by the weather disability or fuel shortage can claim demurrage relief and for this emergency only;

2. Each shipper or receiver must pay his demurrage as rendered and then file for reclaim;

3. Each shipper or receiver must file individual claims at each location supported by justification, i.e., dates and reasons;

4. The claims will be processed informally, but will require ICC approval on each individual claim the exact procedure to be determined;

5. The relief requested due to this emergency will be limited to demurrage subject to the 4-series tariff rules;

6. Adjustments for demurrage subject to other than the 4-series tariff will be handled separately, i.e., unit trains, volume shipments, coal, etc.;

7. With respect to the 4-series tariff, after the expiration of free time and the four $10 debit days, the penalty rate of $20 will be reduced to $10 per day and the penalty rate of $30 will be reduced to $15 per day thereafter; and

8. Fuel shortage relief will be applicable as follows: allowance will be given for any cars on hand at time such interference began, but would not apply to inbound cars forwarded four days after the beginning of such interference.

During the involved period, demurrage charges, after the expiration of free-time would have otherwise accrued at the rate of $10 per day for the first 4 days, $20 per day for each of the next 2 days, and $30 per day thereafter. According to petitioners, the $20 and $30 charges in the tariff have been considered in the nature of penalty charges.[1] These charges, it is argued, should not be imposed upon shippers and receivers in the areas affected by the extreme and unusual weather conditions or fuel shortages, if these conditions prevented the loading or unloading of cars. In addition, to facilitate the instant relief from these penalty charges, it is requested that the claims under the proposal be filed with the carrier within 90 days after the date of service of the Commission's order approving the proposal.

NITL in its reply filed May 9, 1977, supports the proposal, however, it contends that it sould be modified to specify the emergency period when the reclaim will apply and that it should be extended to include claims for additional demurrage charges on trainload, unit trains and multiple car movements. NITL also requests that the order entered by the Commission indicate that other railroads will be granted leave to participate in the proposal upon notifying the Commission in writing.

Republic Steel Corporation, in its reply filed May 18, 1977, supports the concept of the proposal yet, it objects to certain of its procedures and the limited nature of the relief proposed. It suggests that (1) the Commission's order specify that the procedures and standards specified in the proposal are not exclusive; (2) a time period defining the period of the emergency conditions should be given; (3) the entire demurrage charge should be reclaimed; and (4) prepayment of the demurrage charges should not be required as a prerequisite to filing a claim.[2] Eastern Associated Coal Corp., in its reply filed July 5, 1977, requests that the emergency period should include December 1976 through March 1977, and submits graphs of temperature readings at Fairmont, Virginia for December through February.

The record in this proceeding and the general knowledge of the extreme and unusual weather conditions and shortages of energy support the approval of the petitioners' proposal to waive portions of the arbitrary demurrage charge. If other carriers, which are partly to the specified tariff, desire to participate in the proposal, they will be permitted to do so upon notifying the Commission in writing of their intent.

The extension of the proposal to demurrage charges not named in the involved tariff or in an amount greater than that specified has not been substantiated. However, the approval of the instant proposal does not prejudice the filing of such proposals by the carriers or the filing of additional claims for

[1] It is noted that in Ex Parte No. 289, Remittance of Demurrage Charges of Common Carriers of Property By Rail, 353 I.C.C. 567 (1977), a $10 demurrage charge was generally sufficient to cover per diem, administrative and other expenses incurred by the delivering road.

[2] Unde the Commission's credit regulations the applicable charge must be paid promptly within a specified period and there is no justification for waiving that requirement.

greater relief by the shippers.[3] Furthermore, shippers or receivers will have the option of applying for the claim under the involved proposal, filing a claim under the proposal and in the event no binding settlement is made subsequently seeking relief from alleged unjust and unreasonable demurrage charges under the Commission's regular procedures, or by initially seeking relief from the Commission under its regular procedures.[4] Therefore, it is not unreasonable to require claims under the proposal to be filed with the carrier within a specific period of time. The time period in which claims should be filed is fixed at 90 days after date of publication in the FEDERAL REGISTER, of notice of this permissive order.

Certain modifications in the proposal are necessary, however, to insure that false claims will not be filed by shippers or receivers and that there will be no potentially discriminatory treatment by the carriers. Shipper or receivers will therefore be required to verify the justification statement and to indicate briefly therein, what efforts were taken to minimize the delay in the release of the cars subject to the claim. The period of severe weather and fuel shortages will also be limited to the period of December 28, 1976 through March 15, 1977, to eliminate the filing of claims for demurrage charges not caused by the emergency conditions.[5] Copies of claims granted or denied under the proposal are to be filed by the carrier with the Commission, and on the rejected claims, an explanatory note as to the reason for the denial should be given.[6] Certain other clarifying modification in the proposal have also been made to avoid ambiguity, as set forth in Appendix B.

Approval of each of the filed claims will not be given by the Commission as suggested by petitioners since it would not be practical to verify each claim. However, the filing requirements ordered herein and the modifications in the proposal will minimize the possibilities of discriminatory or arbitrary treatment. Shippers and receivers are also encouraged to report to the Commission any discriminatory application of the proposal by the carriers.

It is ordered, That the carriers listed in Appendix A be, and they are hereby, authorized to adjust demurrage charges which accrued on cars held during the period specified to $10 or $15 a day, as set forth in Appendix B; that other carriers participating in the involved tariff, 4–J, I.C.C. H–59, upon notifying the Commission in writing of their intent to do so, may also participate in the modified proposal.

And it is further ordered, That the above-referred to carriers shall promptly file with the Commission copies of the claims upon which adjustments were made under authority of this order and those which were denied, with a brief explanation as to the reason for the denial.

By the Commission, Division 2, Commissioners Hardin, Murphy, and Clapp.

H. G. HOMME, JR.,
Acting Secretary.

Grand Trunk Western Railroad
Indiana Harbor Belt Railroad Company
Manufacturers' Junction Railway Company
Monongehela Connecting Railroad Company
Norfolk and Western Railway Company
Richmond, Fredericksburg and Potomac Railroad Company
Southern Railway System
Union Railroad Company

APPENDIX B

APPROVED PROPOSAL

1. Only those shippers and receivers directly affected by the weather disability or fuel shortage during the period of December 28, 1976 through March 15, 1977, can claim demurrage relief; (see Note).

2. Each shipper or receiver must pay his demurrage as rendered and then file for reclaim;

3. Each shipper or receiver must file individual verified claims at each location supported by justification, i.e., date of detention, reasons therefore, and whether efforts were made to minimize the delay;

4. The relief requested due to this emergency will be limited to demurrage applicable, in accordance with Freight Tariff 4–J, J. F. Doyle, Agent, I.C.C. H–59;

5. Adjustments for demurrage subject to other than the above-specified tariff will be handled separately, i.e., unit trains, volume shipments, coal, etc.;

6. With respect to the above-specified tariff, after the expiration of free time and the four $10 debit days, the demurrage charge of $20 will be reduced to $10 per day and the demurrage charge of $30 will be reduced to $15 per day thereafter;

7. Fuel shortage relief will be applicable as follows: allowance will be given for any cars on hand at the time such interference began or on inbound cars on which forwarding directions were given within 3 days after the beginning of such interference;

8. Claims under this proposal must be filed with the carrier within 90 days after publication of notice of this permissive order in the FEDERAL REGISTER.

NOTE.—Shippers and receivers can elect to file a claim under this proposal or a formal docket with the Interstate Commerce Commission. The filing of a claim under this proposal also does not prevent the shipper from seeking addition relief from the Commission. In addition, special-docket applications can be filed by the carrier.

[FR Doc.77-24110 Filed 8-18-77;8:45 am]

[3] Shippers and receivers are encouraged to file claims initially with the carrier. The procedures adopted and standards applied for settlement under the claim procedures will be strictly voluntary and will not bind individual shippers who either do not qualify for settlement thereunder or do not invoke the claim procedures under the proposal.

[4] The period will encompass the full period of extreme weather and energy shortages which occurred last winter, as noted in our order served April 18, 1977, in *Request for Certain Railroads for Authority to Waive Demurrage Charges.*

[5] The carrier is only required to indicate briefly its reasons for denying the claim, for example, insufficient information, demurrage accrued outside the emergency period, etc.

[6] The waiver or reparation of the penalty portion of demurrage charges has been approved when neither the carrier nor shipper is at fault. *Ford Motor Co. v. Chesapeake & O. R. Co.*, 311 I.C.C. 559 (1960); *Kalmbach-Burkett Co. Inc., v. Illinois Central R. Co.*, 289 I.C.C. 532 (1953); and *Myers, Myers & Goen v. Chicago, R. I. & P. Ry. Co.*, 259 I.C.C. 51 (1944) The shipper, however, is required to make efforts if possible, to minimize the detention of the cars Waiver of all of the applicable demurrage charges (including the compensatory portion), is generally not approved.

[7] The Family Lines include the Atlanta and West Point Railroad Company, Clinchfield Railroad Company, Durham and Southern Railway Company, Gainesville Midland Railroad Company, Georgia Railroad, Louisville Railroad, Seaboard Coast Line Railroad, and The Western Railway of Alabama.

FEDERAL RESERVE SYSTEM.

TIME AND DATE: 10 a.m., Wedesday, August 24, 1977.

PLACE: 20th Street and Constitution Avenue NW., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Possible amendments to Section 23A of the Federal Reserve Act to be submitted to the Congress. This matter was originally scheduled for a meeting on August 17, 1977.

2. Any agenda items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION:

Mr. Joseph R. Coyne, Assistant to the Board, 202-452-3204.

Dated: August 17, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

9

INTERNATIONAL TRADE COMMISSION.

TIME AND DATE: 9:30 a.m., Tuesday, August 23, 1977.

PLACE: Room 117, 701 E Street NW., Washington, D.C. 20436.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Portions open to the public:
1. Reorganization.
2. Agenda.
3. Minutes.
4. Ratifications.
5. Petitions and complaints (if necessary).
6. Investigation TA-201-25 (Cattle and Beef)—briefing.
7. Investigation AA1921-167 (Pressure-Sensitivve Plastic Tape from Italy)—vote.
8. Any items left over from previous agenda.

Portions closed to the public:
1. Reorganization (portions regarding the selections of personnel).

CONTACT PERSON FOR MORE INFORMATION:

Kenneth R. Mason, Secretary, 202-523-0161.

10

SECURITIES AND EXCHANGE COMMISSION.

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94-409, that the Securities and Exchange Commission will hold the following meetings during the week of August 22, 1977, in Room 825, 500 North Capitol Street, Washington, D.C.

Closed meetings will be held on Wednesday, August 24, 1977, at 3 p.m. and on Thursday, August 25, 1977, after the open meeting schduled for 2:30 p.m. Open meetings will be held on Tuesday August 23, 1977, at 9 a.m. and on Thursday, August 25, 1977, at 10 a.m. and at 2:30 p.m.

The Commissioners, their legal assistants, the Secretary of the Commission, and recording secretaries will attend the closed meetings. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meetings may be so considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4) (8) (9) A and (10) and 17 CFR 200.402 (a) (4) (8) (9) (i) and (10).

Chairman Williams, Commissioners Loomis, Evans, and Pollack voted to hold the aforesaid meetings in closed session.

The subject matter of the closed meeting scheduled for Wednesday, August 24, 1977, at 3 p.m. will be:

Formal orders of investigation.

Institution of injunctive actions.

Institution of administrative proceedings.

Settlement of administrative proceedings.

Simultaneous institution and settlement of injunctive action and administrative proceeding.

Referral of investigative files to Federal, State or Self Regulatory authorities.

Regulatory matter arising from or bearing enforcement implications.

Dismissal of injunctive action.

Freedom of Information Act Appeal.

Consideration of amicus curiae matter.

Other litigation matters.

The subject matter of the closed meeting scheduled for Thursday, August 25, 1977, after the open meeting at 2:30 p.m. will be:

Post-oral argument discussion.

The subject matter of the open meeting scheduled for Tuesday, August 23, 1977, at 9 a.m. will be:

1. Consideration of an interpretive release concerning the bearing of distribution expenses by mutual funds.

The subject matter of the open meeting scheduled for Thursday, August 25, 1977, at 10 a.m. will be:

1. Consideration of an application filed by Lakelands Racing Association, Inc. for an exemption from certain reporting requirements under Section 12(g) of the Securities Exchange Act of 1934.
2. Consideration of an extension of the comment period regarding the offer and sale of certain contractual arrangements issued by life insurance companies.
3. Consideration of a request by Citicorp Person-to-Person Investments, Inc. for an exemption from Rule 15b10-9, the self-underwriting rule for SECO broker-dealers, under the Securities Exchange Act of 1934.
4. Consideration of the adoption of proposed rules to conform the Commission's lease accounting and disclosure requirements to those standards recently adopted by the Financial Accounting Standards Board.
5. Consideration of a release to proposed rules and amendments relating to the accounting practices of producers of oil and gas, which would incorporate provisions of the Financial Accounting Standards Board's exposure draft, "Financial Accounting and Reporting in the Extractive Industries".
6. Consideration of proceedings in the matter of Todd and Company, Inc., et al. regarding an Opinion of Court of Appeals for the Third Court directing remand of proceedings to the Board of Governors of the National Association of Securities Dealers, Inc.

The subject matter of the open meeting scheduled for Thursday, August 25, 1977, at 2:30 p.m. will be:

1. Oral argument on an application filed by William E. Brandow for a review of the disciplinary action taken against him by the National Association of Securities Dealers, Inc.

FOR FURTHER INFORMATION CONTACT:

Linda Jarett at 202-755-1183 or Kathy Malfa at 202-755-1977.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

MEDICAL DEVICES

Establishment of Procedures to Make a Device a Banned Device

V 42 161 AUG 19 77 UM

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 895]

[Docket No. 77N-0144]

DEVICES

Establishment of Procedures to Make a Device a Banned Device

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: This proposed rule prescribes the procedures by which the Commissioner of Food and Drugs may institute proceedings to make a device intended for human use that presents substantial deception or an unreasonable and substantial risk of illness or injury a banned device. This proposal is issued pursuant to expanded authority of the Commissioner to protect the American public from dangerous or fraudulent medical devices.

DATES: Written comments to the Hearing Clerk by October 17, 1977. It is proposed that the final regulation based on this proposal become effective 60 days after the date of its publication in the FEDERAL REGISTER. In the interim, this proposal would be used as a guideline for making a device a banned device under the provisions of section 516 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360f).

ADDRESS: Hearing Clerk (HFC-20), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Dan R. Beardsley, Bureau of Medical Devices (HFK-114), Food and Drug Administration, Department of Health, Education, and Welfare, 8757 Georgia Ave., Silver Spring, MD 20910 (301-427-7218).

SUPPLEMENTARY INFORMATION: Section 516 of the act authorizes the Commissioner to ban, by regulation, and after opportunity for informal regulatory hearing, any device intended for human use if he finds, based on all available data and information, and after consultation with the appropriate classification panel, that such device presents a substantial deception or an unreasonable and substantial risk of illness or injury. If the Commissioner determines that the deception or risk presents an unreasonable, direct, and substantial danger, he may, after notifying the manufacturer, distributor, importer, or owner of such a device, declare a proposed regulation banning the device effective upon its publication in the FEDERAL REGISTER pending informal regulatory hearing and final action on the proposed regulation. If the Commissioner determines that the deception or risk can be corrected by labeling or changes in labeling, he must first provide written notice to the device manufacturer, distributor, importer, or owner specifying the labeling changes necessary. If the labeling or changes in labeling are not made within a reasonable time after such notice, the Commissioner may institute a proceeding to ban the device.

STATUTORY BACKGROUND

Section 516 of the act (21 U.S.C. 360f) provides:

(a) Whenever the Secretary finds, on the basis of all available data and information and after consultation with the appropriate panel or panels under section 513, that—

(1) A device intended for human use presents substantial deception or an unreasonable and substantial risk of illness or injury; and

(2) In the case of substantial deception or an unreasonable and substantial risk of illness or injury which the Secretary determined could be corrected or eliminated by labeling or change in labeling and with respect to which the Secretary provided written notice to the manufacturer specifying the deception or risk of illness or injury, the labeling or change in labeling to correct the deception or eliminate or reduce such risk, and the period within which such labeling or change in labeling was to be done, such labeling or change in labeling was not done within such period; he may initiate a proceeding to promulgate a regulation to make such device a banned device. The Secretary shall afford all interested persons opportunity for an informal hearing on a regulation proposed under this subsection.

SPECIAL EFFECTIVE DATE

(b) The Secretary may declare a proposed regulation under subsection (a) to be effective upon its publication in the FEDERAL REGISTER and until the effective date of any final action taken respecting such regulation if (1) he determines, on the basis of all available data and information, that the deception or risk of illness or injury associated with the use of the device which is subject to the regulation presents an unreasonable, direct, and substantial danger to the health of individuals, and (2) before the date of the publication of such regulation, the Secretary notifies the manufacturer of such device that such regulation is to be made so effective. If the Secretary makes a proposed regulation so effective, he shall, as expeditiously as possible, give interested persons prompt notice of his action under this subsection, provide reasonable opportunity for an informal hearing on the proposed regulation, and either affirm, modify, or revoke such proposed regulation.

The purpose of this provisions is to expand the Commissioner's authority to protect the American public from dangerous or fraudulent medical devices. Before enactment of this section, the Commissioner's formal statutory authority was limited to initiating injunction and seizure actions, as provided in sections 302 and 304 of the act (21 U.S.C. 332 and 334), respectively. To sustain an action against such devices under the injunction or seizure provisions of the act, the government has the burden of proving in court each of the elements necessary to show that the device is misbranded or adulterated and throughout the usually lengthy court proceeding the device manufacturer, distributor, importer, or owner may continue to market his product.

The provisions of section 516 of the act enable the Commissioner to move expeditiously to remove fraudulent or hazardous medical devices from commerce. Once the Commissioner makes a device a banned device in accordance with section 516 of the act, in subsequent regulatory proceedings to remove the device from commerce the government need only show that the device has been banned; the Commissioner is not required to participate in further evidentiary proceedings in court to establish any of the elements usually required to prove that the device is adulterated or misbranded. Although this provision does not cover devices intended for animal use that present deception or risk of illness or injury, manufacturers, distributors, importers, or owners of a device that is banned cannot avoid the ban by relabeling the device for veterinary use.

SECTION-BY-SECTION ANALYSIS OF PROPOSED REGULATION

SCOPE

Proposed § 895.1 describes the scope of the regulation. The regulation would only apply to a device, as defined in section 201(h) of the act (21 U.S.C. 321(h)), that is intended for human use and presents substantial deception or an unreasonable and substantial risk of illness or injury. A device that is made a banned device would be considered to be adulterated under section 501(g) of the act (21 U.S.C. 351(g)) and subject to regulatory action to remove it from commerce.

PROCEDURE FOR BANNING A DEVICE

Proposed § 895.21 is the principal provision in the regulation. This section sets out the procedures by which the Commissioner makes the determinations to begin proceedings to make a device a banned device, and the procedures by which the banning is accomplished.

Proposed § 895.21(a) provides that before initiating a proceeding to make a device a banned device, the Commissioner must find that the continued marketing of a medical device presents a substantial deception or an unreasonable and substantial risk of illness or injury. The legislative history of section 516 indicates that in determining whether the deception or risk of illness is substantial, Congress intended that the Commissioner would make a determination that the deception or risk incurred through continued marketing of the device is important, material, or significant. Also, in determining whether the device is deceptive, it is not necessary for the Commissioner to find that there was an intent to mislead or to otherwise harm users of the device, and the question of deception is to be determined independent of the motives of the manufacturer, distributor, importer, or owner. Nor is actual proog of deception or injury to an individual required. In determining whether a device presents deception or risk of illness or injury, the Commissioner shall consider, among other

things, all available data and information, including information which the Commissioner may obtain under other provisions of the act, and information which may be supplied by the manufacturer, distributor, importer, or owner. The procedures involved are considered in the discussion of proposed § 895.22.

Proposed § 895.21(b) provides that the Commissioner, before proposing a banned-device regulation, would consult with the appropriate panel or panels that have expertise with respect to the type of device proposed to be banned. The panels in question are those established under section 513 of the act (21 U.S.C. 360c) to review all devices and to make recommendations to the Commissioner with respect to classification. Although consultation with a panel is a prerequisite to initiating proceedings to ban a device, Congress did not intend the consultation to delay the banning process. Thus, section 516 of the act does not establish a timetable for panel review or a requirement that a panel approve a proposed action. The intent of section 516 of the act is that the Commissioner solicit the expertise of panel members on the question and that the panel members be provided an opportunity to respond to a proposal to ban a device. Generally, the consultation with the panel would occur at a regularly scheduled panel meeting that is announced in the FEDERAL REGISTER in accordance with the agency's regulations relating to advisory committees (21 CFR Part 14). The Commissioner could, however, call a special panel meeting to consider the matter or he could consult with the panel by mail or by telephone to obtain the views of the panel members on the pending action. The Commissioner could request that the panel present its views in writing and the Commissioner could record oral communications made with the panel or its members.

Proposed § 895.21(c) provides that the Commissioner could, in lieu of initiating a proceeding to ban the device, require the manufacturer, distributor, importer or owner to institute labeling or make changes in labeling for the device. The requirements with respect to labeling or change in labeling are considered in the discussion of proposed § 895.25.

Proposed § 895.21(d) establishes the procedures the Commissioner would follow if he decides to initiate a proceeding to make a device a banned device. This would be done after his determinations with respect to deception and risk as provided in proposed § 895.21(a), the consultation with the panel as provided in proposed § 895.21(b), and the labeling or any change in labeling as provided in proposed §§ 895.21(c) and 895.25.

A notice of proposed rule making to make a device a banned device would be published in the FEDERAL REGISTER. This notice would include a reference to the following: The findings required with respect to risk and deception, the reasons that the Commissioner initiated the proceeding, evaluation of data and information submitted by the manufacturer, distributor, importer, or owner, the consultation with the panel, and a determination with respect to labeling. The notice would afford all interested persons an opportunity to submit written comments and an opportunity to request an informal regulatory hearing before the Food and Drug Administration within 30 days after the date of publication of the proposed regulation. If a request for a regulatory hearing is granted, such hearing shall be held pursuant to Part 16 of the agency's regulations relating to administrative functions, practices and procedures (21 CFR Part 16). This informal hearing would generally occur after the publication of the notice of proposed regulation and before final action on the regulation, and the device would not be removed from the market until the effective date of the final regulation. As discussed in proposed § 895.30, expedited proceedings to make a device a banned device would be conducted only if the Commissioner determines that deception or risk of illness or injury associated with the use of the device presents an unreasonable, direct, and substantial danger to the health of individuals. In such instances, the Commissioner could require that the device be removed from the market upon publication of the proposed regulation and before the informal hearing.

Proposed § 895.21(e) provides that if after reviewing the administrative record of the regulatory hearing, if any, any written comments received on the proposed regulation, and any additional available data or information, the Commissioner determines to ban a device he would issue a final regulation to this effect in the FEDERAL REGISTER. When issuing a final regulation to make a device a banned device, the device and or a description of the device would be added to the list of banned devices in proposed Subpart B. If the Commissioner determined, after the conclusion of the requisite preliminary proceedings, that the device should not be banned, he would publish in the FEDERAL REGISTER a notice of withdrawal and termination of rule making proceedings, including the reasons therefor.

Proposed § 895.21(f) provides that the effective date of a final regulation to make a device a banned device generally would be the date of publication of the final regulation in the FEDERAL REGISTER. The Commissioner could, for reasons stated in the FEDERAL REGISTER notice, determine that a later effective date should be adopted. The FEDERAL REGISTER notice announcing the final regulation also would specify whether the banning of the device applied to devices already in commercial distribution and/or sold to ultimate users.

Proposed § 895.21(g) provides that a final regulation issued pursuant to proposed § 895.21(e) constitutes final agency action subject to judicial review in accordance with section 517 of the act (21 U.S.C. 360g).

Proposed § 895.21(h) provides that the Commissioner could institute proceedings to amend or revoke a regulation making a device a banned device if he finds that the conditions that constituted the basis for the regulation banning the device are no longer applicable. Any interested person could request that the Commissioner institute such procedings by filing a petition in accordance with the provisions of § 10.30 (21 CFR 10.30) of the agency's regulations relating to administrative functions, practices and procedures. In his consideration of a request to amend or revoke a regulation to make a device a banned device, the Commissioner would employ the procedures in proposed § 895.21 to the extent that they were applicable and to the extent that they could be applied in an expeditious manner.

SUBMISSION OF DATA AND INFORMATION BY THE MANUFACTURER, DISTRIBUTOR, IMPORTER, OR OWNER

Proposed § 895.22(a) would require a manufacturer, distributor, or importer of a device to submit any available data and information to the Commissioner that are necessary to assist him in determining whether the device presents substantial deception, an unreasonable and substantial risk of illness or injury, an unreasonable and direct and substantial danger to the health of individuals, or is otherwise adulterated or misbranded. This requirement is authorized by section 519 of the act (21 U.S.C. 360i), which provides that the Commissioner, by regulation, may require every person who is a manufacturer, importer, or distributor of a device intended for human use to establish and maintain records and to submit such reports or information as the Commissioner may require to assure that the device is not adulterated or misbranded, or to assure its safety and effectiveness. The data and information required by the Commissioner may include scientific or test data, reports, records, or other information, including data and information on whether the device is safe and effective for its intended use and/or when used as directed, whether the device performs according to the claims made for it by the manufacturer, distributor, importer, or owner.

Proposed § 895.22(b) provides that those persons required to submit such also advise the person of the purpose for data would be notified in writing by FDA. The written notification would the request and would, when possible, identify with specificity the required data and information.

Proposed § 895.22(c) provides that the data and information would be required to be submitted to FDA no more than 30 days after the date of receipt of the written notification unless the Commissioner establishes some other date of submission, in which instance the person would be advised.

Proposed § 895.22(d) provides that if the data and information submitted to FDA are sufficient to persuade the Commissioner that the deception or risk presented by the device could be corrected or eliminated by labeling or change in labeling, he shall proceed in accordance with the provisions of § 895.25.

Proposed § 895.22(e) provides that if the data or information submitted pursuant to a request from the Commissioner is insufficient to show that the

V 42 161 AUG 19 77 UM V

device does not present a substantial deception or an unreasonable and substantial risk of illness or injury or an unreasonable, direct, and substantial danger to the health of individuals, or if the person required to submit the information fails to submit it, this insufficiency or failure to submit the required information could be considered by the Commissioner in his determination to initiate a proceeding to make the device a banned device, including the determination to make such ban effective upon publication in accordance with proposed § 895.30.

LABELING

Under section 516 of the act, the Commissioner must make a positive determination that labeling changes would not be sufficient to correct or eliminate the substantial deception or an unreasonable and substantial risk of illness or injury, or the unreasonable, direct, and substantial danger to the health of individuals associated with the use of the device. As provided in proposed § 895.-25(a), if he determined that labeling changes would be sufficient, the Commissioner would notify the manufacturer, distributor, importer, or owner of the device in writing specifying the deception or risk of illness or injury or danger to the health of individuals involved and the labeling or change in labeling necessary to correct the deception or eliminate or reduce the risk or danger and the period in which such labeling or change in labeling is to be done. If the manufacturer does not take the required action within the specified time, the Commissioner could initiate a proceeding to make the device a banned device.

If the device in question is a restricted device within the meaning of section 520(e) of the act (21 U.S.C. 360j(e)), the Commissioner could also require that advertising relating to the restricted device be changed to correct the deception or eliminate or reduce the risk involved with the use of the device. Section 502(r) of the act (21 U.S.C. 352(r)) authorizes the Commissioner to take corrective action with respect to advertisements involving restricted devices when such action is necessary to protect the public health and where necessary to prevent the device being misbranded. This authority extends to a requirement that any advertisement contain a statement of the intended use of the device and relevant warnings, precautions, side effects, and contraindications. Proposed § 895.25(b) implements this authority.

The Commissioner, in accordance with proposed § 895.25(c), would allow a reasonable time, considering the deception, risk, or danger presented by the device, within which the required labeling, change in labeling, and, if the device is a restricted device, any change in advertising is to be accomplished by the manufacturer, distributor, importer, or owner. The Commissioner could, however, require that no additional devices be introduced into commerce until the labeling, change in labeling, or change in advertising is accomplished by such person. The Commissioner, in accordance with proposed § 895.25(d), may consider the failure of a manufacturer, distributor, importer, or owner to accomplish the required labeling, change in labeling, or change in advertising as a basis for initiating a proceeding to make the device a banned device or to establish a special effective date as provided in proposed § 895.30.

SPECIAL EFFECTIVE DATE

The Commissioner may immediately invoke the banned device provisions of section 516 of the act to remove a device from the market if the deception or risk represents an unreasonable, direct, and substantial danger to the health of individuals. Under proposed § 895.30(a), the Commissioner may declare a proposed regulation under proposed § 895.-21(d) to be effective upon its publication in the FEDERAL REGISTER and until the effective date of any final action taken with respect to such regulation if: (1) He determines, on the basis of all available data and information, that the deception or injury associated with the device presents the requisite danger to the health of the individuals; and (2) before the date of publication of such regulation, he notifies the manufacturer, distributor, importer, or owner that the regulation is to be made effective upon its publication as a proposed regulation in the FEDERAL REGISTER.

Proposed § 895.30(b) provides that this procedure may be used when the Commissioner determines that the actual or potential injury involved is a serious one that he believes will endanger the health of individuals who have been, or will be, exposed to the device. While the injury involved must be a serious one and one the Commissioner believes will endanger the health of individuals exposed to the device, the danger need not be imminent, and may involve a serious long-term risk. The relevant consideration is the degree of danger, not whether injury is likely to occur immediately.

Proposed § 895.30(c) provides that if the Commissioner determined that the deception or risk involved is so serious that the device should be removed from the market effective upon the date of publication of the proposed regulation banning the device, he would as expeditiously as possible give interested persons prompt notice of his action by publication in the FEDERAL REGISTER and would provide an opportunity for an informal regulatory hearing.

Proposed § 895.30(d) provides that after the hearing, if any, and after considering any written comments submitted on the proposal and any additional available data and information, the Commissioner shall either affirm, modify, or revoke the proposed regulation making the device a banned device.

Proposed § 895.30(e) provides that the Commissioner could use the special date procedures of proposed § 895.30 in proceedings that were initiated under the normal banning procedures set out in proposed § 895.21(d). This would likely occur when the Commissioner, based on new information or reconsideration of existing information, determines that a device under consideration for banning is subjecting persons to unnecessary risks and the accelerated effective date is now necessary to protect public health. In such circumstances, the Commissioner would make the determinations and provide notice in accordance with proposed § 895.30 (a) and (b).

Proposed § 895.30(f) provides that these devices that have been named banned devices under § 895.30, which have already been sold to the public, may be subject to relabeling by the manufacturer, distributor, importer, or owner and/or may be subject to the provisions of section 518(a) and/or 518(b) of the act relating to notification, repair, replacement, or refund concerning devices that are determined to present an unreasonable risk of substantial harm to the public health.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 502(r), 516, 519, 701, 52 Stat. 1055–1056 as amended, 90 Stat. 560, 564–565, 577–578 (21 U.S.C. 352(r), 360f, 360i, 371)) and under authority delegated to the Commissioner (21 CFR 5.1), it is proposed that new Part 895 be added to Subchapter H of Chapter I of Title 21 of the Code of Federal Regulations, to read as follows:

PART 895—BANNED DEVICES

Subpart A—General Provisions

Sec.

895.1 Scope.
895.20 General.
895.21 Procedure for banning a device.
895.22 Submission of data and information by the manufacturer, distributor, importer, or owner.
895.25 Labeling.
895.30 Special effective date.

Subpart B—Listing of Banned Devices [Reserved]

AUTHORITY: Secs. 502(r), 516, 519, 701, 52 Stat. 1055–1056 as amended, 90 Stat. 560, 564–565, 577–578 (21 U.S.C. 352(r), 360f, 360i, 371).

Subpart A—General Provisions

§ 895.1 Scope.

(a) This part describes the procedures by which the Commissioner may institute proceedings to make a device intended for human use that presents substantial deception or an unreasonable and substantial risk of illness or injury a banned device.

(b) This part applies to any device, as defined in section 201(h) of the Federal Food, Drug, and Cosmetic Act, that is intended for human use.

(c) A device that is made a banned device in accordance with this part is regarded as an adulterated device that is subject to regulatory action.

(d) Although this part does not cover devices intended for animal use that present substantial deception or an unreasonable and substantial risk of illness or injury, the manufacturer, distributor, importer, or owner of a device that is banned cannot avoid the ban by relabeling the device for veterinary use.

§ 895.20 General.

The Commissioner may initiate a proceeding to make a device a banned device whenever he finds, on the basis of all available data and information, and after consultation with the appropriate device panel, that the device presents substantial deception or an unreasonable and substantial risk of illness or injury, which the Commissioner determined could not be, or has not been, corrected or eliminated by labeling or by a change in labeling.

§ 895.21 Procedures for banning a device.

(a) Before initiating a proceeding to make a device a banned device, the Commissioner must find that the continued marketing of the device presents a substantial deception or an unreasonable and substantial risk of illness or injury.

(1) In determining whether the deception or risk of injury or illness is substantial, the Commissioner shall consider whether the deception or risk posed by continued marketing of the device, or continued marketing of the device as presently labeled, is important, material, or significant in relation to the benfit to the public health from its continued marketing.

(2) In determining whether a device is deceptive, the Commissioner shall consider whether users of the device may be deceived or otherwise harmed by the device. The Commissioner is not required to determine that there was an intent on the part of the manufacturer, distributor, importer, or owner of the device to mislead or otherwise harm users of the device or that there exists any actual proof of deception of, or injury to, an individual.

(3) In determining whether a device presents deception or risk of illness or injury, the Commissioner shall consider, among other things, all available data and information, including information which the Commissioner may obtain under other provisions of the act, and information which may be supplied by the manufacturer, distributor, importer, or owner pursuant to § 895.22.

(b) Before initiating a proceeding to make a device a banned device, the Commissioner shall consult with the classification panel established under section 513 of the act that has expertise with respect to the type of device under consideration. The consultation with the panel may occur at a regular or specially scheduled panel meeting or may be accomplished by correspondence or telephone conversation with panel members. The Commissioner may request that the panel submit in writing any advice on the device under consideration. The Commissioner may record in written memoranda any oral communications with the panel or its members.

(c) The Commissioner may, in lieu of initiating a proceeding to ban a device, require labeling or change in the labeling for the device in accordance with § 895.-25.

(d) If the Commissioner decides to initiate a proceeding to make a device a banned device, a notice of proposed rulemaking shall be published in the FEDERAL REGISTER to this effect. Such notice shall reference:

(1) The Commissioner's finding under paragraph (a) of this section that the device presents substantial deception or an unreasonable and substantial risk of illness or injury;

(2) The reasons that the Commissioner initiated the proceeding;

(3) The evaluation of data and information obtained under other provisions of the act, or submitted by the manufacturer, distributor, importer, or owner of a device pursuant to paragraph (a)(3) of this section, if any;

(4) The consultation with the classification panel pursuant to paragraph (b) of this section;

(5) The determination of whether the required labeling or change of labeling, if any, has been made in accordance with paragraph (c) of this section.

The notice shall afford all interested persons an opportunity to submit written comments and an opportunity to request an informal regulatory hearing before the Food and Drug Administration within 30 days after the date of publication of the proposed regulation. If a request for a regulatory hearing is granted, such hearing shall be held pursuant to Part 16 of this chapter.

(e) (1) If, after reviewing the administrative record of the regulatory hearing before the Food and Drug Administration, if any, the written comments received on the proposed regulation, and any additional available data and information, the Commissioner determines to ban a device, a final regulation to this effect shall be published in the FEDERAL REGISTER. Such final regulation shall amend Subpart B by adding the device and/or the description of the device to the list of banned devices.

(2) If the Commissioner determines not to ban the device, a notice of withdrawal and termination of rulemaking proceedings and reasons therefor shall be published in the FEDERAL REGISTER.

(f) The effective date of a final regulation to make a device a banned device promulgated pursuant to paragraph (e) of this section shall be the date of publication of the final regulation in the FEDERAL REGISTER unless the Commissioner, for reasons stated, determines that such effective date should be later than the date of such publication and specifies that date in the notice. Each such regulation shall specify whether devices already in commercial distribution and/or sold to ultimate users are banned.

(g) A regulation promulgated pursuant to paragraph (e) of this section is final agency action, subject to judicial review pursuant to section 517 of the act.

(h) Upon petition of any interested person submitted in accordance with § 10.30 of this chapter, or at his own discretion, the Commissioner may institute proceedings to amend or revoke a regulation that made a device a banned device if he finds that the conditions that constituted the basis for the regulation banning the device are no longer applicable. Where appropriate, the procedures in this section shall be employed in such proceedings.

§ 895.22 Submission of data and information by the manufacturer, distributor, importer, or owner.

(a) A manufacturer, distributor, or importer of a device may be required to submit to the Food and Drug Administration all available data and information to enable the Commissioner to determine whether the device presents substantial deception; and unreasonable and substantial risk of illness or injury; and unreasonable, direct, and substantial danger to the health of individuals; or is otherwise adulterated or misbranded. The data and information required by the Commissioner may include scientific or test data, reports, records, or other information, including data and information on whether the device is safe and effective for its intended use and/or when used as directed, whether the device performs according to the claims made for the device.

(b) A manufacturer, distributor, importer, or owner of a device required to submit data and information as provided in paragraph (a) of this section shall be notified in writing by the Food and Drug Administration that such data and information shall be submitted. The written notification shall advise the manufacturer, distributor, importer, or owner of the device that the purpose for the request is to enable the Commissioner to determine if any of the conditions listed in paragraph (a) of this section or § 895.30(a)(1) exist with respect to the device such that a proceeding should be initiated to make the device a banned device. When the required data and information can be identified by the Food and Drug Administration at the time of such notification, the manufacturer, distributor, importer or owner of the device shall be so informed.

(c) The required data and information shall be submitted to the Food and Drug Administration no more than 30 days after the date of receipt of the request, unless the Commissioner determines that the data and information must be submitted by some other date and so informs the manufacturer, distributor, importer, or owner.

(d) If the data or information submitted to the Food and Drug Administration are sufficient to persuade the Commissioner that the deception or risk presented by a device could be corrected or eliminated by labeling or change in labeling, the Commissioner shall proceed in accordance with § 895.25.

(e) If the data or information submitted to the Food and Drug Administration are insufficient to show that the device does not present a substantial deception or an unreasonable and substantial risk of illness or injury or an unreasonable, direct, and substantial danger to the health of individuals, or if the manufacturer, distributor, importer, or owner fails to submit the required information, the Commissioner may rely upon this insufficiency or failure to submit the required information as a basis

V 42 161 AUG 19 77 UM V

for initiating a proceeding to make the device a banned device pursuant to § 895.21(d) and, where appropriate, to make such ban effective upon publication in accordance with § 895.30. The Commissioner also may initiate other regulatory action as provided in the act and this chapter.

§ 895.25 Labeling.

(a) If the Commissioner determines that the substantial deception or unreasonable or substantial risk of illness or injury, or the unreasonable, direct, and substantial danger to the health of individuals presented by a device can be corrected or eliminated by labeling or change in labeling, the Commissioner shall provide written notice to the manufacturer, distributor, importer, or owner specifying the deception or risk of illness or injury or the danger to the health of individuals, the labeling, change in labeling, or change in advertising if the device is a restricted device, necessary to correct the deception or eliminate or reduce such risk or danger; and the period of time within which such labeling, change in labeling, or change in advertising must be done.

(b) In specifying the labeling or change in labeling to correct the deception or eliminate or reduce the risk or danger, the Commissioner may require the manufacturer to include in labeling for a device, and in advertising if the device is a restricted device, a statement acknowledging that the device is previously labeled had been found by the Food and Drug Administration to present substantial deception or an unreasonable and substantial risk of illness or injury, or an unreasonable, direct, and substantial danger to the health of individuals, or otherwise to be in violation of the act, and that the labeling was changed pursuant to the direction of the Food and Drug Administration.

(c) The Commissioner shall allow a manufacturer, distributor, importer, or owner a reasonable time, considering the deception or risk presented by the device, within which to accomplish the required labeling, change in labeling, and, if the device is a restricted device, any change in advertising. The Commissioner may, however, require that no additional devices be introduced into commerce until the labeling, change in labeling, or change in advertising is accomplished by the manufacturer, distributor, importer, or owner.

(d) The Commissioner may consider the failure of a manufacturer, distributor, importer, or owner to accomplish the required labeling, change in labeling, or change in advertising in accordance with this section as a basis for initiating a proceeding to make a device a banned device in accordance with § 895.21(d) or to establish a special effective date in accordance with § 895.30.

§ 895.30 Special effective date.

(a) The Commissioner may declare a proposed regulation under § 895.21(d) to be effective upon its publication in the FEDERAL REGISTER and until the effective date of any final action taken respecting such regulation if (1) he determines, on the basis of all available data and information, that the deception or risk of illness or injury associated with use of the device which is subject to the regulation presents an unreasonable, direct, and substantial danger to the health of individuals; and (2) before the date of the publication of such regulation, he notifies the manufacturer, distributor, importer, or owner of such device that such regulation is to be made so effective.

(b) This procedure may be used when the Commissioner determines that the potential or actual injury involved is a serious one that he believes will endanger the health of individuals who have been, or will be, exposed to the device. In assessing the degree of danger, the Commissioner need not find that the danger is imminent, and it shall be sufficient for the Commissioner to determine that the danger may involve a serious long-term risk.

(c) If the Commissioner makes a proposed regulation effective in accordance with this section, he shall, as expeditiously as possible, give interested persons prompt notice of his action in the FEDERAL REGISTER and shall provide an opportunity to request an informal regulatory hearing in accordance with Part 16 of this chapter.

(d) After the hearing, if any, and after considering any written comments submitted on the proposal and any additional available information and data, the Commissioner shall either affirm, modify, or revoke the proposed regulation making the device a banned device. If the Commissioner decides to affirm or modify the proposed regulation to make a device a banned device, he shall amend Subpart B by adding the device and/or description of the device to the list of banned devices. If the Commissioner decides to revoke a regulation making a device a banned device, a notice of termination of rulemaking proceedings and reasons therefor shall be published in the FEDERAL REGISTER.

(e) The Commissioner may declare the special effective date provided by this section to be in effect subsequent to the publication of a proposed regulation under § 895.21(d), if, based on new information, or reconsideration of existing information, the Commissioner makes the determinations and provides notice in accordance with paragraphs (a) and (b) of this section.

(f) Those devices that have been named banned devices under § 895.30, which have already been sold to the public, may be subject to relabeling by the manufacturer, distributor, importer, or owner and/or may be subject to the provisions of section 518(a) and/or 518(b) of the act.

Subpart B—Listing of Banned Devices
[Reserved]

Interested persons may, on or before October 18, 1977, submit to the Hearing Clerk (HFC–20), Food and Drug Administration, Room 4–65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

NOTE.—The Food and Drug Administration has determined that this document does not contain a major proposal requiring preparation of an inflation impact statement under Executive Order 11821 and OMB Circular A–107. A copy of the inflation impact assessment is on file with the Hearing Clerk, Food and Drug Administration.

Dated: August 12, 1977.

DONALD KENNEDY,
Commissioner of Food and Drugs.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

INDOCHINESE REFUGEE CHILDREN

Grants to State Educational Agencies to Provide Educational Services

V 42 161 AUG 19 77 UM

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 122a—STATE ADMINISTERED PROGRAMS—GRANTS TO STATE EDUCATIONAL AGENCIES TO PROVIDE EDUCATIONAL SERVICES TO INDOCHINESE REFUGEE CHILDREN

AGENCY: Office of Education, HEW.

ACTION: Final regulation.

SUMMARY: The Commissioner is issuing a regulation establishing rules and procedures to implement Title II of "The Indochina Refugee Children Assistance Act of 1976." Title II establishes a program for Federal grants to State educational agencies. The purpose of that program is to assist local educational agencies in providing public educational services for Indochinese refugee children.

EFFECTIVE DATE: Pursuant to section 431(d) of the General Education Provisions Act, as amended (20 U.S.C. 1232 (d)), this regulation has been transmitted to the Congress concurrently with its publication in the FEDERAL REGISTER. That section provides that rules subject thereto shall become effective on the 45th day following the date of such transmission, subject to the provisions therein concerning Congressional action and adjournment.

FOR FURTHER INFORMATION CONTACT:

Mr. James H. Lockhart, Acting Director, Indochinese Refugee Assistance Program, USOE, Room 2189, 400 Maryland Avenue SW., Washington, D.C. 20202. (Telephone 202-245-3081).

SUPPLEMENTARY INFORMATION:

A. PUBLIC PARTICIPATION

On November 23, 1976, the Commissioner of Education published in the FEDERAL REGISTER (41 FR 51652) a notice of intent to publish regulations. This notice described the program, identified some potential issues and problems in administering the program and invited interested persons to submit comments or suggestions to the Office of Education on or before December 23, 1976. The Office of Education received and considered several written comments submitted in response to the notice of intent.

Subsequently, on June 3, 1977, a notice of proposed rulemaking was published in the FEDERAL REGISTER (42 FR 28706–28713) proposing a regulation governing the operation of the program. The Commissioner invited interested persons to submit comments concerning the proposed regulations. Additionally, meetings were held in July, 1977 in various locations throughout the country for the purpose of soliciting comments and discussion from State and local personnel who are concerned with the administration and operation of the program.

B. BACKGROUND

The following discussion may help readers to better understand the program and certain provisions of the proposed regulations.

1. *Scope of program.* The program enacted by Title II of Pub. L. 94–405 is essentially a continuation of the program enacted on May 23, 1975, by Pub. L. 94–23, "The Indochina and Migration Refugee Assistance Act of 1975," and implemented by the regulations in 45 CFR Part 122. That program provided for grants by the Commissioner directly to local educational agencies to defray the cost of providing public educational services to Indochinese refugee children. It was designed as a transition measure to assist local educational agencies to absorb Indochinese refugee children into their regular educational program, and in addition to enable them to meet the supplementary educational needs of these children while these needs were particularly acute. Public Law 94–23 authorized grants for Federal fiscal year 1976 and fiscal year 1977. Congress appropriated funds to implement Pub. L. 94–23 in fiscal year 1976. Congress has appropriated $18.5 million to implement Title II of Pub. L. 94–405, the program to which these regulations are addressed.

Title II of Pub. L. 94–405 establishes a program for the period from July 1, 1976, through September 30, 1977. The paramount differences between this new program and the program established by Pub. L. 94–23 are:

(a) The program is State administered, whereas under Pub. L. 94–23 program funds were granted directly by the Commissioner to local educational agencies;

(b) In this program, each participating State educational agency is entitled to funds for the costs of administering the program in an amount not to exceed one percent of the amount to which it is entitled to receive for making funds available to local educational agencies in that State for carrying out the program. Under Pub. L. 94–23, each State educational agency, although not charged with administering the program, was entitled to an amount not to exceed five percent of the total of the amounts to which local educational agencies in that State were entitled.

(c) In this program, participation of non-public school children is mandatory, and the enabling statute authorizes the Commissioner to arrange to serve the children if the State is prohibited by law from providing public educational services for children enrolled in non-public schools. Under Pub. L. 94–23, local educational agencies were permitted, but were not required, to serve children enrolled in non-public schools.

2. *Entitlement.* The regulations provide for grants to be made by the Commissioner of Education to State educational agencies, and through them to local educational agencies which are providing public educational services for Indochinese refugee children. These grants are non-discretionary. A local educational agency will qualify for a subgrant if, during the grant period, it is providing public educational services to at least one Indochinese refugee child aged 5 through 17, and if, during the period for obligation of funds, it makes available public educational services for all refugee children for whom it receives funds.

It should be noted that local educational agencies may provide services to children who meet the definitions of "child" and "Indochinese refugee child" under § 122a.3. In regard to providing services, "child" may include a broader age range than is used in reference to "Indochinese refugee child" in the statute and the regulations for computing entitlements. For the purpose of computing entitlements, the counting of refugee children is limited to the age range of 5 through 17.

In this program, funds will be "flowed through" State educational agencies to local education agencies based on the same formula which was provided under Pub. L. 94–23, i.e.:

(a) $300 per child for the first 100 Indochinese refugee children aged 5 to 17 enrolled in the schools of the school district, or for the number of such children comprising one percent of the agency's total enrollment, whichever is less; and

(b) $600 for each such child in excess of 100 or in excess of a number of such children comprising one percent of the agency's total enrollment, as the case may be. (Although the statutory language in Pub. L. 94–405 prescribing the formula is somewhat different from the language used in 45 CFR Part 122 governing the program under Pub. L. 94–23, the formula is the same.)

Funds are generated by children enrolled in schools in the State during the period from July 1, 1976, through September 30, 1977, who received or will receive public educational services from local educational agencies during the period from July 1, 1976, through September 30, 1978. There is one exception: Grant applicants must count non-public school children who would be provided services, but for a State law prohibiting the applicant from serving those children. This exception enables non-public school children who are not served by the local educational agencies because of a legal prohibition, to generate funds so that they may be served by arrangement by the Commissioner. Without this type of provision, it will be difficult to give effect to the statutory requirement that the Commissioner arrange for services to non-public school children in the event that the State is prohibited by law from serving the children.

(3) *Use of funds.* Generally, funds provided under this program may be used by local educational agencies for providing both basic and supplementary educational services to Indochinese refugee children. However, in keeping with the customary Congressional understanding of legislation such as section 205(a)(6) of Pub. L. 94–405, the use of funds for non-public school children is limited to supplementary services.

(4) *Accountability.* Grant recipients are not required to obtain Federal approval for proposed educational projects as they are in the various existing programs of categorical aid for elementary and secondary education, and they are not required to account for the use of Federal funds by relating them to specific expenditure items. (However, Pub. L. 94–405 does prohibit commingling of funds provided for the use of non-public school children with State and local funds.) The regulation provides that, during the period for obligation of funds (July 1, 1976–September 30, 1978), a subgrant recipient is required to make public educational services available to the same number of children which it counted for purposes of entitlement to a subgrant.

This provision is designed to ensure proper accountability, i.e., that the grant funds are used to provide public educational services to Indochinese refugee children.

(5) *Comparable services for children enrolled in public schools.* A local educational agency must, as a condition of eligibility, make public educational services available to Indochinese refugee children enrolled in public schools on a basis comparable to that which it provides other children residing in the areas where the Indochinese refugee children are being served. This is another requirement intended to ensure that all of the funds received by subgrantees are used to serve Indochinese refugee children.

(6) *Periods for obligation of funds.* Funds for this program must be obligated at the Federal level no later than September 30, 1977. The authorization for this program expires at the end of September 30, 1977. (Congress has specified that section 414 of the General Education Provisions Act (20 U.S.C. 1226a), which automatically extends for an additional year the duration or authorization for Federal education programs which otherwise would terminate, does not apply to this program (Pub. L. 94–482, section 327, October 10, 1976)). State educational agencies and local educational agencies may reimburse themselves for expenses incurred during the period from July 1, 1976, through September 30, 1977, for providing public educational services for Indochinese refugee children. The "Tydings Amendment" (section 412(b) of the General Education Provisions Act (20 U.S.C. 1225(b)), which applies to this program, extends the period of obligation for State and local educational agencies through September 30, 1978.

C. DISCUSSION OF MAJOR COMMENTS

SECTION 122a.7 REDUCTION FOR AMOUNTS RECEIVED UNDER 1975 ACT

Comment. Several commenters indicated that this section was confusing because it appeared to require State entitlements to be offset by amounts received for the fiscal year 1975 under Pub. L. 94–23. A related comment questioned the necessity for § 122a.19, pointing out that the duplication of funding to which these provisions are addressed has not occurred.

Response. Sections 122a.7 and 122a.19 have been modified, and a comment added, to make it clear that the intended offset was for any amounts appropriated and received under Pub. L. 94–23 for the period July 1, 1976 through September 30, 1977. As the comment explains, Congress has appropriated nothing under Pub. L. 94–23 for that period. It is, therefore, not expected that the section will affect entitlements under this part, unless Congress should extend Pub. L. 94–23 and appropriate funds under the statute for the period now covered by Pub. L. 94–405.

SECTION 122a.10 STATE ENTITLEMENT FOR ADMINISTRATION

Comment. A commenter questioned why State entitlement for administration is limited to one percent of the State's program entitlement, despite the fact that the State's administrative role is larger than it was under Pub. L. 94–23.

Response. The State's entitlement for administration is mandated by the enabling statute. This provision was therefore a matter of Congressional judgment, which the Commissioner lacks authority to modify.

SECTION 122a.12 STATE APPLICATION FOR USE OF UNOBLIGATED FUNDS

Comment. A commenter questioned the necessity for a separate application for the use of carry-over funds, and suggested that the grant award expressly state a termination date of September 30, 1978, rather than requiring another application by the State.

Response. Section 122a.12 has been modified to make it clear that the State application for use of carry-over funds is not required to contain entitlement data pertaining to numbers of children enrolled in and being served by local educational agencies.

One legal consequence of the fact that this program is State-administered is that applications are governed by section 434(b) of the General Education Provisions Act. That section requires that in the case of "any State which applies for participation in any applicable program in which Federal funds are made available for assistance to local educational agencies through, or under the supervision of the State educational agency of that State" the State must submit to, and have approved by the Commissioner an annual program plan, which means an application for each fiscal year in which the program is operated. Furthermore, the enabling statute contemplates grants to States by the Commissioner "for the period beginning July 1, 1976 and ending September 30, 1977." The grant for the latter period would not cover use of funds by the States during the carry-over period. Although the Tydings Amendment permits carry-over of these funds, the States would not be accountable to the Commissioner for their use of funds during the carry-over period unless a separate document is submitted covering the time period during which the funds are proposed to be used, stating the purpose for which funds are to be used during that period, and repeating the assurances pertaining to use of the funds, which were made in the State's 1976–1977 application.

It should be noted that the State may, in its application for use of carry-over funds, incorporate by reference the assurances and purpose statements made in its 1976–1977 application. See § 100b.18 (c) of the Office of Education General Provisions Regulations, 45 CFR 100b.18 (c).

SECTION 122a.17 ELIGIBILITY OF LOCAL EDUCATIONAL AGENCIES FOR SUBGRANTS

Comment. A commenter recommended that the regulation be changed to permit a combination of local educational agencies to apply for a subgrant.

Response. Section 122a.17 has been modified to permit a combination of local educational agencies to apply for a subgrant. However, language has been added to § 122a.18 to the effect that local educational agencies may not augment their entitlements (under § 122a.18(a)(2)) by combining to apply for a subgrant.

SECTIONS 122a.18 AND 122a.21 COUNTING CHILDREN FOR THE PURPOSE OF LOCAL EDUCATIONAL AGENCY ENTITLEMENTS

Comment. Several commenters asked whether a child must be enrolled in the school of a local educational agency for any prescribed time period in order for that child to be counted for the purpose of computing entitlement. A related question was whether one local educational agency could count the same child more than once, e.g., if the child were enrolled during the regular school year and again in a summer school. Another related question was whether the same child could be counted by different local educational agencies, in the case of a child which was enrolled in more than one local educational agency during the period July 1, 1976 through September 30, 1977. In this connection, it was suggested that the regulation require that the count for all local educational agencies be based on enrollments as of a single date, e.g., May 1, 1977.

Response. Section 122a.18 has been modified to state clearly that no local educational agency may count the same child more than once. The regulation imposes no minimum period of time during which a child must be enrolled and does not establish a single date for counting purposes. The relevant statutory language permits "double counting," in the sense of permitting different local educational agencies in a State to count the same child if that child is enrolled in different local educational agencies during the relevant period. The proposed single date could be unfair, because a local educational agency which had enrolled that child at a different time would not be able to count that child, even though that local educational agency has served that child for a much longer period than had the local educational agency which had enrolled the child at that particular date.

A new § 122a.18a has been added to emphasize that the entitlement defined

VOL 42 NO 161 AUG 19 1977 UM

by § 122a.18 is a maximum entitlement, and that, if a local educational agency does not need funds for all children counted, it should not aply for or retain funds it does not need. The allowance for counting the same child by different local educational agencies within a State is not an authorization for any local educational agency to apply for or spend more funds than it can reasonably use for Indochinese refugee children to whom it has provided or will provide public educational services.

A new § 122a.20a has been added, which authorizes reallocation of funds by a State educational agency among local educational agencies within a State, when a local educational agency or agencies, because of an underestimate of the number of children to be served, would otherwise be deprived of payments to which they would be entitled.

SECTION 122a.21(b) APPLICATION PROCEDURE—COUNTING NON-PUBLIC SCHOOL CHILDREN FOR THE PURPOSE OF COMPUTING LOCAL EDUCATIONAL AGENCY ENTITLEMENT

Comment. A commenter questioned how the information required by § 122a.21(b)(2) differed from that of § 122a.21(b)(4), and suggested that the intent of the regulation would be more clearly expressed by eliminating the words "Indochinese refugee" from § 122a.21(b)(4).

Response. The regulation has not been changed. The purpose of paragraph (b)(2) of the section is to enable the State educational agency to determine whether the local educational agency will serve Indochinese refugee children "to the extent consistent with the number of Indochinese refugee children enrolled in the elementary or secondary non-public schools within the district served by a local educational agency" (Section 205(a)(6)(1) of Title II). The information required by § 122a.21(b)(4) of the regulation is the data which is essentially the basis for the local educational agency's requesting funds to serve non-public school children, i.e., data on the numbers of Indochinese children in non-public schools who will be served by the agency.

SUBPART G USE OF FUNDS

Comment. A commenter suggested that Congress intended that funds made available under Pub. L. 94-405, Title II, be used only to pay for providing supplemental services, and that this restriction should therefore apply equally to the use of funds for public school children as well as for non-public school children.

Response. The regulation has not been changed. The Office of Education considers that Congress intended that funds under Title II be used in essentially the same manner that funds under Pub. L. 94-23 were used, i.e., to assist local educational agencies to absorb the impact of Indochinese refugee enrollment by assisting those agencies to provide basic or supplemental programs for those children. The services to non-public school children must be supplemental, in keeping with customary Congressional understanding of legislation such as section 205(a)(6) of Pub. L. 94-405.

SECTION 122a.31 USE OF FUNDS FOR NON-PUBLIC SCHOOL CHILDREN

Comment. A commenter asked whether the prohibition against commingling of funds referred to in Title II of Pub. L. 94-405, section 205(a)(6), applies only to those funds to be used for the benefit of non-public school children, or whether it applies to all funds made available under Title II.

Response. The applicable prohibition against commingling of funds applies only to funds to be used for the benefit of non-public school children.

OBLIGATION PERIOD—COMMENT ON NOTICE OF INTENT

Comment. A comment on the notice of intent published November 23, 1976, asked at what time obligations at the local level occur in a case where a local subgrant recipient contracts for services. In the introduction to the notice of proposed rulemaking published June 3, 1977, it was stated that this question would be discussed more fully in the introduction to the final regulation.

Response. Under the Office of Education General Provisions Regulations, 45 CFR 100b.55(c), which governs this program, where work is performed by an independent contractor rather than by employees of the grant or subgrant recipient, the obligation takes place at the time the contract is entered into. When personal services are performed by employees of a grant or subgrant recipient, the obligation takes place at the time the services are performed.

OTHER CHANGES

The only other changes to the regulation have been minor technical or clarifying changes.

NOTE.—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(Catalog of Federal Domestic Assistance Program No. 13.596, Educational Services for Indochinese Refugee Children.)

Dated: August 1, 1977.

ERNEST L. BOYER,
Commissioner of Education.

Approved: August 15, 1977.

HALE CHAMPION,
Acting Secretary of Health, Education and Welfare.

Part 122a of Title 45 of the Code of Federal Regulations is amended to read as follows:

Subpart A—General

Sec.
122a.1 Scope of part.
122a.2 Applicability of General Provisions Regulations for Office of Education Programs.
122a.3 Definitions.

Subpart B—Eligibility of State Educational Agencies for Grants and Amount of Entitlement

Sec.
122a.4 Eligibility.
122a.5 Maximum entitlement; States other than American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.
122a.6 Entitlements for American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.
122a.7 Reduction for amounts received under 1975 Act.
122a.8 Allocation of appropriations.
122a.9 Data for computing State entitlements.
122a.10 State entitlement for administration of programs.

Subpart C—State Educational Agency Applications

122a.11 Application procedure.
122a.12 State application for use of unobligated funds.
122a.13 Approval by the Commissioner of State applications.
122a.14 Amendments to State applications for the period July 1, 1976 through September 30, 1977 based on a net increase or redistribution in number of children.
122a.15 State administration.
122a.16 Withholding payments for noncompliance.

Subpart D—Eligibility of Local Educational Agencies for Subgrants and Amounts of Entitlement

122a.17 Eligibility.
122a.18 Maximum entitlements.
122a.18a Wasteful obligation of funds prohibited.
122a.19 Reductions for amount received under Pub. L. 94-23.
122a.20 Ratable reduction.
122a.20a Reallocation of funds among local educational agencies.

Subpart E—Local Educational Agency Applications

122a.21 Application procedure.
122a.22 Non public elementary and secondary school children to be counted.
122a.23 State educational agency's review of applications.

Subpart F—Records and Reports Required by the Commissioner

122a.24 Records required of State and local educational agencies.
122a.25 Retention of records.
122a.26 Annual performance report by State educational agency.

Subpart G—Use of Funds

122a.27 General.
122a.28 Public educational services to be provided during period of obligation.
122a.29 Use of funds for public school children.
122a.30 Comparable services required for children enrolled in public schools.
122a.31 Use of funds for nonpublic school children.
122a.32 Waiver of requirement for participation of nonpublic school children.

AUTHORITY: Title II, Pub. L. 94-405, unless otherwise noted.

Subpart A—General

§ 122a.1 Scope of part.

This part governs projects for which funds are provided under Title II of the Indochina Refugee Children Assistance Act of 1976, Pub. L. 94-405, Sections 201-208 (hereafter referred to as Title II).

for financial assistance made available through State educational agencies to local educational agencies to be used for public educational services for Indochinese refugee children. (The text of Title II is contained in full in the appendix to this part.)

(Pub. L. 94-405, Title II)

§ 122a.2 Applicability of general provisions regulations for Office of Education programs.

The following provisions contained in Subchapter A of this Chapter apply to assistance under this part:

(a) Part 100, § 100.1 (except as otherwise provided in this section); and

(b) Part 100b (except § 100b.35(b), and Subparts H, L and M).

(Pub. L. 94-405, Title II; 20 U.S.C. 1221e-3(a)(1); 1232c (a) and (b); 1232d; 31 U.S.C. 200; 42 U.S.C. 2000d)

§ 122a.3 Definitions.

As used in this part:

"Child" means any child who is within the age limits for which the applicable State is required or permitted to provide free public elementary and secondary school education in grades kindergarten through 12, except that "child" does not include a person enrolled only in adult education courses.

(Pub. L. 94-405, Sections 201, 203)

"Free public education" means education which is provided at public expense, under public supervision and direction without tuition charge, and which is provided as elementary or secondary school education in grades kindergarten through 12 in the applicable State.

(Pub. L. 94-405, Section 203)

"Public educational services" means:

(a) Free public education in the case of children enrolled in elementary or secondary public schools, and

(b) Publicly supported educational services in the case of children enrolled in elementary or secondary non-public schools.

(Pub. L. 94-405, Sections 203, 205)

As used in this part, the following terms have the meaning given to them in section 201(b) of Pub. L. 94-405 (see Appendix):

Commissioner
Elementary school
Indochinese refugee children
Local educational agency
Secondary school
State
State educational agency
Elementary or secondary nonpublic schools

(Pub. L. 94-405, Section 201(b))

Subpart B—Eligibility of State Educational Agencies for Grants and Amount of Entitlement

§ 122a.4 Eligibility.

A State educational agency of any State is eligible to apply for a grant under this part for the period from July 1, 1976 to September 30, 1977, if the Commissioner determines that during that period there are or were one or more Indochinese Refugee children aged 5 to 17 receiving public educational services under the supervision of a local educational agency or local educational agencies in that State.

(Pub. L. 94-405, Section 202)

§ 122a.5 Maximum entitlement: States other than American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

The maximum amount to which a State educational agency of each State other than American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands is entitled under this part is the amount prescribed by section 202(b) of Pub. L. 94-405.

(Pub. L. 94-405, Section 202(b))

§ 122a.6 Entitlements for American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

The maximum amount to which each of the jurisdictions of American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands is entitled is the same as the amount prescribed for other States by section 202(b) of Pub. L. 94-405. However, the aggregate entitlements for these jurisdictions may not exceed an amount equal to 1 percent of the aggregate entitlements of other States under § 122a.5. If the aggregate maximum entitlements for these jurisdictions exceeds the 1 percent limitation, the entitlement of each of those jurisdictions is reduced proportionately until that aggregate entitlement of those jurisdictions does not exceed the 1 percent limitation.

(Pub. L. 94-405, Section 202(c))

§ 122a.7 Reduction for amounts received under 1975 Act.

Despite any other provision of this subpart, no State educational agency is entitle to receive a grant for any period in excess of the amount to which that agency would otherwise be entitled under this subpart minus the sum of the amounts received by the local educational agencies of that State and by that State educational agency from an appropriation made for that same period under the Indochina Migration and Refugee Assistance Act of 1975 (Pub. L. 94-23).

Comment. This section is not expected to affect State entitlement under this part. Congress has not appropriated any funds under the 1975 Act for the period covered by Title II of Pub. L. 94-405 (e.g., July 1, 1976 through September 30, 1977).

(Pub. L. 94-405, Section 202(a), 202(b))

§ 122a.8 Allocation of appropriations.

The Commissioner allocates sums appropriated for payments under Title II in accordance with the provisions of section 204 of Title II governing ratable reductions and increases necessitated by appropriations.

(Pub. L. 94-405, Section 204)

§ 122a.9 Data for computing State entitlements.

The Commissioner determines State educational agency entitlements under this subpart in accordance with the data requirements of section 202(a) of Title II.

(Pub. L. 94-405, Section 202(e))

§ 122a.10 State entitlement for administration of programs.

The Commissioner is authorized to pay to each State educational agency an additional amount equal to the amount expended by it for the proper and efficient administration of its functions. However, the total of these payments for any period may not exceed 1 percent of the amount which that State educational agency is entitled to receive for that period.

(Pub. L. 94-405, Section 206(b))

Subpart C—State Educational Agency Applications

§ 122a.11 Application procedure.

(a) *Required submittals.* Any State wishing to participate in Title II shall submit through its State educational agency to the Commissioner no later than August 15, 1977;

(1) The general application required by section 434(b)(1)(A) of the General Education Provisions Act and Part 100b, § 100b.17 of this chapter; and

(2) The application required by section 205 of Title II. The application required by section 205 of Title II (hereinafter referred to as "State application") constitutes the annual program plan required by section 434(b) of the General Education Provisions Act and by Part 100b, § 100b.18 of this chapter.

(b) *Content of State application.* The State educational agency shall include in its State application:

(1) The information and assurances required by section 205(a) of Title II;

(2) An assurance that the State educational agency will comply with Title II, the regulations in this part and the applicable provisions of Part 100b of this chapter;

(3) A statement describing the purpose for which Federal funds will be expended under Title II during the fiscal year for which the State application is submitted;

(4) A certificate by the appropriate State legal officer to the effect that the agency submitting the application has the authority under State law to perform the duties and functions of a State educational agency; and

(5) Information showing, for each local educational agency which has applied or is expected to apply to the State educational agency for a subgrant under Subpart D of this part:

(i) The name of the local educational agency;

(ii) The total number of children enrolled in the public elementary and secondary schols of that agency;

(iii) The number of Indochinese refugee children age 5 to 17 enrolled in the elementary and secondary schools in that agency who have received, or who will receive, public educational services under the supervision of that agency in the period from July 1, 1976 through September 30, 1978 (including children en-

rolled in elementary and secondary non-public schools who are counted by the local educational agency under §§ 122a.21 (b) (5) and 122a.22(b)); and

(iv) The amount of funds which the State educational agency is requesting for use in each local educational agency.

The State educational agency shall base the information required by (ii), (iii), and (iv) on actual satisfactory data, to the extent that this data is available at the time the State educational agency submits its application. If this data is not available at the time the State educational agency submits its application, it may base its information on reliable estimates.

(Pub. L. 94-405, Sections 202(b), 205(a); 20 U.S.C. 1232(b))

§ 122a.12 State application for use of unobligated funds.

In cases where the entire amount of funds made available to a State educational agency under this part for the period July 1, 1976 through September 30, 1977, have not been obligated by educational agencies in that State by the end of September 30, 1977, those funds may be obligated during the period from October 1, 1977, through September 30, 1978, but only if the State educational agency submits to the Commissioner a separate State application for the use of those funds, no later than October 30, 1977, and the Commissioner approves that application. The State educational agency shall conform this application to all the requirements of this part governing State applications, except that the State educational agency is not required to include the information required by § 122a.11(b)(5).

(Pub. L. 94-405, Sections 202(b), 205(a); 20 U.S.C. 1225(b)); 20 U.S.C 1232c(b))

§ 122a.13 Approval by the Commissioner of State applications.

(a) *General.* The Commissioner shall approve a State application submitted under this part if the Commissioner determines that the application meets the requirements of Title II, the regulations of this part, and applicable regulations of Part 100b of this chapter.

(Pub. L. 94-405, Section 205(b); 20 U.S.C. 1221e-3(a)(1))

(b) *Notice and opportunity for hearing.* The Commissioner may not finally disapprove (in whole or in part) a State application of a State educational agency submitted under this part, except after reasonable notice and opportunity for a hearing on the record to that agency.

(Pub. L. 94-405, Section 205(b))

(c) *Effective date of State application.* A State application approved by the Commissioner under this part is effective from the first day on which an Indochinese refugee child or children received public educational services under the supervision of a local educational agency or agencies in that State except that no State application approved under this part is effective earlier than July 1, 1976.

(Pub. L. 94-405, Section 202(a); 20 U.S.C. 1221e-3(a)(1))

§ 122a.14 Amendments to State applications for the period July 1, 1976 through September 30, 1977 based on a net increase or redistribution in number of children.

The State educational agency shall no later than August 15, 1977 amend its State application for the period July 1, 1976 through September 30, 1977 for the following purposes:

(a) To provide actual data for the purpose of computing entitlements under this subpart in cases where its original State application had provided estimates, or

(b) To provide appropriate data reflecting a new increase in the number of Indochinese refugee children aged 5 to 17 which have received, or will receive, public educational services under the supervision of the local educational agencies of that State, or a redistribution of those Indochinese refugee children in the State.

(Pub. L. 94-405, Section 202; 20 U.S.C. 1221e-3(a)(1))

§ 122a.15 State administration.

The State educational agency for a State for which the Commissioner has approved a State application under this part is responsible for the proper and efficient performance of the duties of that agency under Title II, including compliance with its assurances to the Commissioner, and the review and approval of local educational agency applications in accordance with Subparts D and E of this part.

(Pub. L. 94-405, Section 205(a))

§ 122a.16 Withholding payments for noncompliance.

The Commissioner shall, subject to the requirements of section 207 of Pub. L. 94-405, withhold payments under this part to any State educational agency if the Commissioner finds that there has been a failure to meet the requirements of Title II.

(Pub. L. 94-405, Section 207)

Subpart D—Eligibility of Local Educational Agencies for Subgrants and Amounts of Entitlement

§ 122a.17 Eligibility.

A local educational agency or combination of local educational agencies in any participating State is eligible to apply for a subgrant under this part for a fiscal year if the State educational agency determines on the basis of satisfactory information that:

(a) The local educational agency is providing public educational services to at least one Indochinese refugee child aged 5 to 17; and

(b) The local educational agency (except as provided in § 122a.22 (b)) is providing or will provide in the period of obligation for State and local funds, public educational services to the same number of Indochinese refugee children who are counted under § 122a.21(b) for the purpose of computing its entitlement.

(Pub. L. 94-405, Sections 202(b)(1) and 205(a)(3))

§ 122a.18 Maximum entitlements.

(a) The maximum amount of the subgrant to which a local educational agency is entitled under this part for the period beginning July 1, 1976, and ending September 30, 1977, is equal to the sum of:

(1) The number of Indochinese refugee children aged 5 to 17 inclusive who have received, or who will receive, public educational services under the supervision of that local educational agency in the period from July 1, 1976 through September 30, 1978; multiplied by the lesser of:

(i) $300 for each of the first one hundred of these children who are furnished public educational services under the supervision of that agency; or

(ii) If the number of these children equals or exceeds 1 percent of the total number of children enrolled in the schools of that agency, $300 for each child in that 1 percent who is furnished such services under the supervision of that agency; and

(2) $600 for each additional child in excess of one hundred such children, or in excess of such 1 percent, as the case may be, being furnished public educational services under the supervision of that agency.

(b) No local educational agency may count the same child more than once under this section.

(c) If an applicant for a subgrant is a combination of local educational agencies, then that applicant's entitlement under this section is the aggregate of what the entitlements of each local educational agency covered by the application would be if each such local educational agency applied separately for a subgrant.

(Pub. L. 94-405, sections 202(b)(1) and 205(a)(3))

§ 122a.18a Wasteful obligation of funds prohibited.

No local educational agency may obligate funds under this subpart in an amount which is more than it can reasonably use for the purposes described in Subpart G of this part.

(Pub. L. 94-405, section 203)

§ 122a.19 Reductions for amounts received under Pub. L. 94-23.

Despite the provisions of § 122a.18, no local educational agency is entitled to receive a grant for any period in excess of the amount equal to the amount to which that agency would otherwise be entitled under this subpart for that period minus the sum of the amount received by that agency from an appropriation made for that same period under the Indochina Migration and Refugee Assistance Act of 1975 (Pub. L. 94-23).

Comment. This section is not expected to affect local educational agency entitlements under this part. See comment for § 122a.7.

(Pub. L. 94-405, Sections 202(b)(1), 202(d), and 205(a)(3).)

§ 122a.20 Ratable reduction.

The State educational agency shall ratably reduce the amounts to which local educational agencies are entitled under § 122a.18 to the extent necessary to bring the aggregate of those amounts within the limits of the State educational agency's entitlement.

(Pub. L. 94-405, Sections 202(b)(1), 202(c)(2) and 205(a)(3))

§ 122a20a Reallocation of funds among local educational agencies.

A State educational agency may reallocate funds to eligible local educational agencies in the State (consistent with the rules in this subpart governing local educational agency entitlements), when it appears that a local educational agency or agencies in the State would otherwise, because of an underestimate of the number of children to be counted under § 122a.18, be deprived of payments to which it is entitled. A State educational agency may reallocate funds to a local educational agency only pursuant to an application (or an amendment to an application) which satisfies the requirements of Subpart E of this Part.

(Pub. L. 94-405, Section 202(b)(1) and 205(a)(3))

Subpart E—Local Educational Agency Applications

§ 122a.21 Application procedure.

(a) *General.* A local educational agency which wishes to receive a subgrant under this part shall file an application for a subgrant with the State educational agency.

(b) *Content of application.* The State educational agency shall require each local educational agency applying for a subgrant under this part to include in its application sufficient information and assurances to enable the State educational agency to make the assurances required by section 434(b)(1)(A) of the General Education Provisions Act and assurances required by section 205(a) of Pub. L. 94-405. In addition the State educational agency shall require the local educational agency to include in its application the following data:

(1) The total number of children enrolled in the public elementary and secondary schools of that agency;

(2) The total number of Indochinese refugee children aged 5 to 17 in the applicant's district who are enrolled in non-public elementary and secondary schools;

(3) The total number of Indochinese refugee children aged 5 to 17 enrolled in the public elementary and secondary schools of that agency to whom the agency is providing, or will provide, public educational services in the period from July 1, 1976 through September 30, 1978;

(4) The total number of Indochinese refugee children enrolled in elementary and secondary non-public schools in the applicant's district to whom that agency has provided or will provide public educational services during the period July 1, 1976 through September 30, 1978; and

(5) The number of Indochinese refugee children (including nonpublic school children) for whom funds are being requested pursuant to this section.

(Pub. L. 94-405, Sections 202 (b), (c), and (e) and 205(a) (3) and (6); 20 U.S.C. 1232 c(b)(1)(A))

§ 122a.22 Nonpublic elementary and secondary school children to be counted.

(a) For the purpose of § 122a.21(b)(5), a local educational agency shall include those children enrolled in the elementary and secondary non-public schools of its agency:

(1) For whom it is required by section 205(a)(6) of Pub. L. 94-405 to provide an opportunity to receive services under this part; and

(2) For whom the local educational agency has planned after consultation with appropriate officials of non-public schools to actually provide these services in the period from July 1, 1976 through September 30, 1978.

(b) If the local educational agency is prohibited by law from providing for public educational services for children enrolled in elementary and secondary non-public schools, as required by section 205(a)(6) of Pub. L. 94-405, the local educational agency shall include under § 122a.21(b)(5) those children to whom it would actually provide these services but for the legal prohibition. The local educational agency shall clearly state on its application the number of non-public school children referred to in the preceding sentence, and shall state that it is prohibited by law from providing these services to those children.

(Pub. L. 94-405, Sections 205(a)(6) and 206(c).)

§ 122a.23 State educational agency's review of applications.

(a) *Approval of applications.* The State educational agency shall approve an application from a local agency only if it determines that the application satisfies the requirements of Pub. L. 94-405, the regulations in this part and in Part 100b of this chapter.

(b) *Effective date of approved applications.* A local educational agency application approved by a State educational agency under this part is effective from the first day on which:

(1) Any Indochinese refugee child received public educational services under the supervision of the applicant agency; and

(2) The State educational agency's application to the Commissioner under this part was effective.

(c) *Notice and opportunity for hearing.* The State educational agency may not finally disapprove a local educational agency's application in whole or in part without first affording the local educational agency reasonable notice and opportunity for a hearing with respect to its action in accordance with the requirements of section 425(a) of the General Education Provisions Act. The State educational agency shall include in its notice the reasons for the proposed disapproval. The State educational agency shall hold a hearing within 30 days after it receives a written request from the local educational agency. If the State educational agency decides not to rescind its final action, it shall give notice of the decision to the local educational agency in writing, stating its reasons and indicating the local educational agency's right to appeal to the Commissioner under section 425(b) of the General Education Provisions Act within 20 days of the receipt of the notice.

(Pub. L. 94-405, Section 202(a); 20 U.S.C. 1231b-2.)

Subpart F—Records and Reports Required by the Commissioner

§ 122a.24 Records required of State and local educational agencies.

(a) *State educational agencies.* A State educational agency which has received a grant under this part shall maintain adequate written records showing that it has satisfied the requirements of § 122a.10 regarding the use of funds paid to it for the administration of the program.

(b) *Local educational agencies.* The State educational agency shall require each local educational agency which has received a subgrant under this part to maintain adequate written records to substantiate that it has satisfied the requirements governing eligibility, entitlement, and use of funds, which are contained in Subparts D and G, including those requirements arising from the assurances given. These records must document on an individual basis that each Indochinese refugee child counted and served under this part is an Indochinese refugee child as defined in Pub L. 94-405, Title II. The records must reflect the identity of the children by name, address and alien registration number or copy of the immigration document displaying this number.

(20 U.S.C. 1232c(a).)

§ 122a.25 Retention of records.

State and local educational agencies receiving payments under this part are required to keep all records supporting the application until the completion of the administrative reviews which are regularly conducted by Federal agencies, or for five years following the fiscal year to which the application relates. The records involved which have been questioned must be further maintained until necessary adjustments have been made, and the adjustments have been reviewed and cleared by the Federal agencies making these reviews.

(20 U.S.C. 1232c(a).)

§ 122a.26 Annual performance report by State educational agency.

Each State educational agency receiving financial assistance under this part shall make the annual performance report as required by § 100b.432 of Part

V 42 N 161 AUG 19 77 UM

100b of this chapter to the Commissioner, within 90 days after the end of the grant period. The State educational agency, in its report shall include (in addition to the information required by Part 100b) information showing:

(a) The number of Indochinese refugee children who during the grant period, received public educational services in each local educational agency in the State, including both public and non-public school children;

(b) A description of the services provided by the local educational agencies to Indochinese refugee children through the use of funds received under this part; and

(c) Other information the Commissioner may require.

(20 U.S. 1232c(b)(1)(A)(III).)

Subpart G—Use of Funds

§ 122a.27 General.

Each educational agency shall use payments made to it under this part in accordance with an application approved under Pub. L. 94-405 section 205 for public educational services for Indochinese refugee children enrolled in the schools of the local educational agency and enrolled in elementary and secondary non-public schools within the district served by that local educational agency.

(Pub. L. 94-405, Sections 203 and 205.)

§ 122a.28 Public educational services to be provided during period of obligation.

Each application by a local educational agency to a State educational agency for a subgrant under this part must contain an assurance that the applicant has or will (as a condition of receiving the grant) in the period from July 1, 1976 through September 30, 1978 make available public educational services to all Indochinese refugee children who are counted under § 122a.21(b)(5), including the non-public school children who are counted.

(Pub. L. 94-405, Section 203.)

§ 122a.29 Use of funds for public school children.

The public educational services provided under this part to Indochinese refugee children enrolled in public elementary and secondary schools may include basic educational services and such supplementary English language instruction and other educational services as are necessary to enable the children to achieve a satisfactory level of educational performance.

(Pub. L. 94-405, Section 203.)

§ 122a.30 Comparable services required for children enrolled in public schools.

The State educational agency shall require a local educational agency, as a condition of entitlement to payments under this part, to assure the State educational agency in its application that all Indochinese refugee children to whom it provides public educational services under this part have access during the grant period to all publicly funded instructional services provided by that agency on a basis comparable to that which the local educational agency provides to other children residing in the area or areas where the Indochinese refugee children are being served.

(Pub. L. 94-405, Section 203; 20 U.S.C. 1232c(b)(1)(A)(IV).)

§ 122a.31 Use of funds for non-public school children.

(a) *Supplemental services authorized.* The public educational services provided under this part to Indochinese refugee children enrolled in non-public schools must consist of such supplemental English language instruction and other supplemental educational service as are necessary to enable those children to achieve a satisfactory level of educational performance.

(b) *Restrictions on use of funds.* The use of funds provided under this part for children enrolled in non-public schools is subject to the restrictions set forth in section 205(a)(6) of Pub. L. 94-405, and in addition to the following restrictions:

(1) The use of these funds may not include financing the basic level of instruction which is provided by the non-public school to its students, but is limited to financing the supplemental services referred to in paragraph (a) of this section;

(2) The use of these funds may not include the payment of salaries for teachers or other employees of non-public schools except for services performed outside their regular hours of duty and under public supervision and control;

(3) The use of these funds may not include acquisition or use of equipment other than mobile or portable equipment on non-public school premises, or the construction of non-public school facilities.

(Pub. L. 94-405, Section 205(a)(6); *Lemon v. Kurtzman*, 403 U.S. 602 (1971).)

§ 122a.32 Waiver of requirement for participation of non-public school children.

(a) *Conditions for waiver.* If a State is prohibited by law from providing public educational services to Indochinese refugee children enrolled in elementary and secondary non-public schools, as required by Pub. L. 94-405, section 205(a)(6) and the relevant provisions of this part, the Commissioner may waive this requirement and shall arrange for the provision of services to those children through arrangements which are subject to the requirements of Title II of Pub. L. 94-405, and of this part. For the purpose of determining whether a State is prohibited by law from providing public educational services for Indochinese refugee children enrolled in non-public schools, the Commissioner may require the State educational agency to furnish an opinion of the Attorney General of the State with regard to the status of State law governing participation.

(b) *Cost of arrangements by Commissioner.* When the Commissioner arranges for services pursuant to this section, the Commissioner may after consultation with the appropriate public and non-public school officials, use to defray the cost of the arrangement, the amount to which the State educational agency of that State would have been entitled to obligate under this part if the children to be served by the arrangement had been counted and afforded the opportunity to be served by the local educational agencies of that State in accordance with the requirements of Pub. L. 94-405, section 206(c).

(Pub. L. 94-405, Section 206(c).)

APPENDIX—TITLE II—PROGRAM FOR THE TRANSITION PERIOD AND THE 1977 FISCAL YEAR

APPLICABILITY; DEFINITIONS

Sec. 201. (a) The provisions of this title shall be applicable for the period beginning July 1, 1976, and ending September 30, 1977.

(b) As used in this title—

(1) The term "Commissioner" means the Commissioner of Education.

(2) The term "elementary schools" means a day or residential school which provides elementary education, as determined under State law.

(3) The term "Indochinese refugee children" means children who are refugees within the meaning of that term as defined in section 3 of the Indochina Migration and Refugee Assistance Act of 1975.

(4) The term "local educational agency" means a public board of education or other public authority legally constituted within a State for either administrative control or direction of, or to perform a service function for, public elementary or secondary schools in a city, county, township, school district, or other political subdivision of a State, or such combination of school districts or counties as are recognized in a State as an administrative agency for its public elementary or secondary schools. Such term also includes any other public institution or agency having administrative control and direction of a public elementary or secondary school.

(5) The term "secondary school" means a day or residential school which provides secondary education, as determined under State law.

(6) The term "State" includes, in addition to the several States of the Union, the Commonwealth of Puerto Rico, the District of Columbia, Guam, American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

(7) The term "State educational agency" means the State board of education or other agency or officer primarily responsible for the State supervision of public elementary and secondary schools, or if there is no such officer or agency, an officer or agency designated by the Governor or by State law.

(8) The term "elementary or secondary nonpublic schools" means schools which comply with the compulsory education laws of the State and which are exempt from taxation under section 501(c)(3) of the Internal Revenue Code.

STATE ENTITLEMENTS

Sec. 202. (a) The Commissioner shall, in accordance with the provisions of this title, make payments to State educational agencies for the period July 1, 1976, through September 30, 1977, for the purposes set forth in section 203.

(b)(1) Expect as provided in subsection (d) of this section, the maximum amount of the grant to which a State educational agency is entitled under this title, for the period beginning July 1, 1976, and ending September 30, 1977, shall be equal to the sum of—

(A) The number of Indochinese refugee children aged 5 to 17, inclusive, receiving public educational services under the supervision of each local educational agency within that State during the period for which the determination is made; multiplied by—

(B) The lesser of—

(i) $300 for each of the first one hundred such children who are furnished such services under the supervision of each local educational agency within such State, or

(ii) If the number of such children equals or exceeds 1 per centum of the total number of children enrolled in the schools of that agency, $300 for each such child in such 1 per centum who is furnished such services under the supervision of each local educational agency within such State; and

(C) $600 for each additional such child in excess of one hundred such children, or in excess of such 1 per centum, as the case may be, being furnished such services under the supervision of that agency.

(2) For the purpose of this subsection, the term "State" does not include American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

(c) (1) The jurisdictions to which this subsection applies are American Samoa, the Virgin Islands, and the Trust Territory of the Pacific Islands.

(2) Each jurisdiction to which this subsection applies shall be entitled to a grant for the purposes set forth in section 203 in an amount equal to an amount determined by the Commissioner in accordance with criteria established by him, except that the aggregate of the amount to which such jurisdictions are so entitled for any period shall not exceed an amount equal to 1 per centum of the aggregate of the amounts to which all States are entitled under subsection (b) of this section for that period. If the aggregate of hte amounts, determined by the Commissioner pursuant to the preceding sentence, to be so needed for any period exceeds an amount equal to such 1 per centum limitation, the entitlement of each such jurisdiction shall be reduced proportionately until such aggregate does not exceed such 1 per centum limitation.

(d) Notwithstanding any other provision of this section, no State educational agency shall be entitled to receive a grant for any period in excess of the amount equal to the amount to which such agency would otherwise be entitled under this section for that period minus the sum of the amounts received by the local educational agencies of that State and by that State educational agency for that period under the Indochina Migration and Refugee Assistance Act of 1975.

(e) Determinations with respect to the number of Indochinese refugee children by the Commissioner under this section for any period shall be made, whenever actual satisfactory data are not available, on the basis of estimates. No such determination shall operate, because of an underestimate, to deprive any State educational agency of its entitlement to any payment (or the amount thereof), under this section to which such agency would be entitled had such determination been made on the basis of accurate data.

USES OF FUNDS

Sec. 203. Payments made under this title to any State may be used in accordance with applications approved under section 205 for public educational services for Indochinese refugee children in the schools of the local educational agencies of that State and in elementary and secondary nonpublic schools of that State.

ALLOCATION OF APPROPRIATIONS

Sec. 204. (a) If the sums appropriated for the period from July 1, 1976, to September 30, 1977, for making the payments provided for in this title are not sufficient to pay in full the total amounts which State educational agencies are entitled to receive under this title for such period, the allocations to such State educational agencies shall be ratably reduced to the extent necessary to bring the aggregate of such allocations within the limits of the amount so appropriated.

(b) In the event that funds become available for making payments under this title for such period after allocations have been made under subsection (a) for that period, the amounts reduced under subsection (a) shall be increased on the same basis as they were reduced.

APPLICATIONS

Sec. 205. (a) No State educational agency shall be entitled to any payment under this title for any period unless that agency submits an application to the Commissioner at such time, in such manner, and containing or accompanied by such information, as the Commissioner may reasonably require. Each such application shall—

(1) Provide that the educational programs, services, and activities for which payments under this title are made will be administered by or under the supervision of the agency;

(2) Provide that payments under this title will be used for purposes set forth in section 203;

(3) Provide assurances that such payments will be distributed among local educational agencies within that State in accordance with sections 202(b)(1) and 202(d);

(4) Provide assurances that the State educational agency will not finally disapprove in whole or in part any application for funds received under this title without first affording the local educational agency submitting an application for such funds reasonable notice and opportunity for a hearing;

(5) Provide for making periodic reports to the Commissioner evaluating the effectiveness of the payments made under this title, and such other reports as the Commissioner may reasonably require to perform his functions under this title; and

(6) Provide assurances—

(i) That to the extent consistent with the number of Indochinese refugee children enrolled in the elementary or secondary nonpublic schools within the district served by a local educational agency, such agency, after consultation with appropriate officials of such schools, shall provide for the benefit of these children secular, neutral, and nonideological services, materials, and equipment necessary for the education of such children;

(ii) That the control of funds provided under this paragraph and title to materials, equipment, and property repaired, remodeled, or constructed therewith shall be in a public agency for the uses and purposes provided in this title, and a public agency shall administer such funds and property; and

(iii) That the provision of services pursuant to this paragraph shall be provided by employees of a public agency or through contract by such public agency with a person, association, agency, or corporation who or which, in the provision of such services, is independent of such elementary or secondary nonpublic school and of any religious organization; and such employment or contract shall be under the control and supervision of such public agency, and the funds provided under this paragraph shall not be commingled with State or local funds.

(b) The Commissioner shall approve an application which meets the requirements of subsection (a). The Commissioner shall not finally disapprove an application of a State educational agency except after reasonable notice and opportunity for a hearing on the record to such agency.

PAYMENTS

Sec. 206. (a) The Commissioner shall pay to each State educational agency having an application approved under section 205 the amount which that State is entitled to receive under this title.

(b) The Commissioner is authorized to pay to each State educational agency amounts equal to the amounts expended by it for the proper and efficient administration of its functions under this title, except that the total of such payments for any period shall not exceed 1 per centum of the amounts which that State educational agency is entitled to receive for that period under this title.

(c) If a State is prohibited by law from providing public educational services for children enrolled in elementary and secondary nonpublic schools, as required by section 205(a)(6), the Commissioner may waive such requirement and shall arrange for the provision of services to such children through arrangements which shall be subject to the requirements of this title.

WITHHOLDING

Sec. 207. Whenever the Commissioner, after reasonable notice and opportunity for a hearing to any State educational agency, finds that there is a failure to meet the requirements of this title, the Commissioner shall notify that agency that further payments will not be made to the agency under this title, or in his discretion, that the State educational agency shall not make further payments under this title to specified local educational agencies (whose actions cause or are involved in such failure) until he is satisfied that there is no longer any such failure to comply. Until he is so satisfied, no further payments shall be made to the State educational agency under this title or payments by the State educational agency under this title shall be limited to local educational agencies whose actions did not cause or were not involved in the failure, as the case may be.

AUTHORIZATION OF APPROPRIATIONS

Sec. 208. There are authorized to be appropriated for the period beginning July 1, 1976, and ending September 30, 1977, such sums as may be necessary to make payments to which State educational agencies are entitled under this title and payments for administration under section 206(b).

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 166—STATE ADULT EDUCATION PROGRAMS

Emergency Adult Education Program for Indochina Refugees

AGENCY: Office of Education, HEW.

ACTION: Final regulation.

SUMMARY: This regulation amends regulations under the Adult Education Act and governs the award of grants to State and local educational agencies for the purpose of operating special adult education programs for adult Indochina refugees to facilitate their integration into American society and to contribute to their employability.

EFFECTIVE DATE: Pursuant to section 431(d) of the General Education Provisions Act, as amended (20 U.S.C. 1232 (d)), these regulations have been transmitted to the Congress concurrently with the publication of this document in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning congressional action and adjournment.

FOR FURTHER INFORMATION CONTACT:

Paul V. Delker, U.S. Office of Education, 7th and D Streets, SW., Room 5056, Washington, D.C. (202–245–2278).

SUPPLEMENTARY INFORMATION:

(a) BACKGROUND

Section 315 of the Adult Education Act, as added by section 301 of Pub. L. 94–405, the Indochina Refugee Children Assistance Act, authorizes a one-year program of discretionary grants to State and local educational agencies to provide emergency adult education programs and educational support services for Indochina refugees.

The special adult education services provided under this subpart are to be delivered to the area of greatest need to assist in the resettlement and integration of the refugees into American society. The purpose of providing direct application by both State and local educational agencies, as indicated in the legislative history, is to assure rapid implementation of the special programs uniquely designed to meet the needs of adult Indochina refugees and to allow flexibility to the local educational agencies (S. Rept. No. 94–432, 94th Cong., 2d Sess. at 7).

The Congress has appropriated $10,250,000 to carry out the Emergency Adult Education Program for Indochina Refugees in Fiscal Year 1977. The Commissioner will issue grants by September 30, 1977 to operate the following types of programs for adult Indochina refugees during Fiscal Year 1978:

(1) Programs of instruction in English as a second language, basic reading, mathematics, the promotion of language and literacy skills in English, and the development and enhancement of necessary skills;

(2) Special adult education projects operating in conjunction with Federal and non-Federal occupational programs to develop occupational and related skills;

(3) Educational support services, including tutoring in geographically isolated areas, counseling, job placement, and followup; and

(4) Any combination of programs and services described in (1), (2), and (3) above.

The goals of the special adult Indochina refugee program to be funded under this subpart are to:

(1) Facilitate the integration of adult Indochina refugees into American society; and

(2) Contribute to the employability of adult Indochina refugees through development of basic educational and occupational skills.

With regard to the suggested combined adult educational-occupational program, it is evident that many adult Indochina refugees have received basic skills instruction but could benefit from adult education instruction as a component of an occupational training program which teaches new occupational skills and/or the transferability of existing skills to the new work environment. For example, adult Indochina refugees who were auto mechanics in Cambodia might attend an adult education course through which they could acquire literacy and adaptive skills to greatly enhance their chances of securing employment as mechanics.

Adult education programs related to occupational skills could be an integral component of existing Federal or non-Federal occupational training programs, such as the Comprehensive Employment and Training Act of 1973, as amended, and the Vocational Education Act of 1963, as amended. However, where it is documented in the application that occupational education and training for refugees is unavailable or insufficient, a program funded under this subpart may provide a combined occupational-adult education program to enable refugees to acquire necessary job and language skills to obtain employment.

(b) PUBLIC COMMENT TO THE NOTICE OF PROPOSED RULEMAKING

A notice of proposed rulemaking was published on May 2, 1977, in 42 FR 22336–22339. Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed rule. Also, copies of the notice of proposed rulemaking were distributed to State Directors of Adult Education and local educational agencies which were recipients of grants under the Indochina Refugee and Immigration Assistance Act.

Written comments were received from 12 respondents, all of whom were in general agreement with the purpose of the one-year program. Several commenters, while agreeing in principle with the proposed rule, raised questions or made suggestions that convinced the Commissioner of Education that changes from the proposed rule are warranted. Each of the comments is summarized below with a response setting forth the changes which have been made in the rule or the reasons why no change is necessary. The comments are grouped based on the subject areas.

Certain minor changes are made in order to correct omissions and typographical errors printed in the proposed rule. Any significant change is noted under item (14) *Other Changes*.

SUMMARY OF COMMENTS AND CHANGES

(1) APPLICANT ELIGIBILITY

Comment. One commenter stated that grants should be made to State educational agencies with provisions for subgrants to local educational agencies.

In contrast, one commenter expressed a preference to have all grants under this program made directly to local educational agencies without State involvement.

A third respondent expressed a desire to expand the field of eligible applicants to include organizations which have already been involved with educating adult Indochina refugees.

Response. No change has been made in the proposed rule. Section 315(a) of the authorizing legislation clearly provides that State and local educational agencies are the only eligible applicants, and that the grants must be direct. Thus, the Commissioner is unable to expand the eligible applicants or to transform this direct grant program into a State-operated program. To allow for coordination and leadership by the State, § 166.74(b) of the regulation provides that a State and one or more local educational agencies may submit a joint application to operate a program under this subpart.

With regard to participation of private organizations or agencies, § 166.75 (a) provides that a State or local educational agency may enter into a service contract for a portion of program activities.

(2) SERVICE CONTRACTS

Comment. One commenter expressed concern that a service contract to carry out only "a portion" of the grant is too limiting. Often, private organizations have more expertise in carrying out a program, for example, the provision for guidance and placement services.

Response. In accordance with the statute, § 100a.30(b) of the General Educational Provisions Regulations, and § 166.75(c) of this regulation, the State and local educational agencies as direct grantees must retain full responsibility for the operation of the program and cannot transfer significant portions of their responsibilities. Thus, no change has been made in the regulation.

(3) ELIGIBLE PARTICIPANTS

Comment. One commenter noted that, in communities where there are not many refugees, non-Indochinese should be allowed to participate in the programs under this subpart.

Response. Section 315 of the Adult Education Act, as amended, provides for special adult education programs for Indochina refugees. The purpose of the programs to be funded under this authorization is to provide special services to adult Indochinese. Thus, the target population of programs under this subpart is the Indochinese and, in describing the need for the program, only the target population is to be taken into consideration. However, participation of a very limited number of adults other than Indochina refugees is not precluded where the special needs of the Indochinese as set forth in the application are being met. Section 166.76 has been changed accordingly.

(4) COMBINED PROGRAMS

Comment. One commenter expressed concern that provisions of specialized services solely for adult Indochina refugees fosters segregation of the refugees from the society. This commenter urged that these refugees be integrated into ongoing, regular adult education programs.

Response. There is no intention to segregate the Indochina refugees from the rest of society. Rather, the whole thrust of this special temporary program is to provide the refugees with basic skills to facilitate their assimilation into American society. Legislative history indicates that the Congress intended this one-year program to meet the special emergency needs of these refugees, with regular federally and non-federally supported adult education programs meeting the longer range needs after the one-year period (S. Rept. No. 94–432, 94th Cong., 2d Sess. at 6). It is expected that, to a great extent, these special programs for Indochinese will be operated in coordination with existing State, local, and private programs, specifically aimed at assisting Indochina refugees in resettlement, or regular adult education, employment training programs. The authorizing statute and implementing regulation, § 166.77(b), specifically require coordination with occupational programs. Further, § 166.78(g) requires that each application describe its plans for coordination with other Federal and non-Federal programs and agencies.

It should be noted that, where Indochina programs under this subpart are operated in conjunction with other programs, independent accountability shall be made of funds used under this subpart, and § 166.76 of the regulation has been changed to reflect this requirement.

(5) ENGLISH LANGUAGE SKILLS

Comment. One commenter noted that the use of the term "literacy" in the preamble and in § 166.77 was unclear and suggested that "English as a second language" be substituted for this term.

Response. The Commissioner agrees that the term "literacy" is misleading, as many adult Indochina refugees are literature in their own language, but not in English. Accordingly, this section has been amended to provide that a grantee may use funds for programs which promote "literacy and language skills in English." Also "English as a second language" has been added to the types of permissible instructional programs under this subpart.

(6) BILINGUAL INSTRUCTION AND MATERIALS

Comment. Two comments were received covering the absence of specific reference to bilingual instruction in the proposed rule. One of these commenters also suggested the need for continued production of bilingual educational materials.

Response. The authorizing legislation provides programs of instruction for the purpose of enabling refugees to become productive members of American society and emphasizes the development of literacy and language skills in the English language. Bilingual instruction is not explicitly required in the legislation and thus is not required in the regulation. However, the regulations do not prohibit the use of bilingual instruction where this instruction is essential to learning English or to acquiring skills which will make adult refugees more employable. The limitation on costs for developing curriculum materials, including those for bilingual instruction, is covered in this preamble under paragraph, Curriculum Materials.

(7) PROFESSIONAL AND TECHNICAL RETRAINING

Comment. One comment was received favoring programs which aim to utilize the existing skills and knowledge of Indochina refugees; and which train refugees in skills marketable in the relevant labor market.

Response. It is expected that applicants, guided by the application requirements of § 166.78(c), identification of needs of the target population, and (d), description of objectives and design of program in relation to these needs, as well as the criteria set forth in § 166.80 (a), (b), and (c), will develop a program which will build on the skills and aptitudes of the Indochinese target population and also provide marketable occupational training for the refugees. No change has been made in the regulation.

(8) COORDINATION OF PROGRAMS WITH UNIONS

Comment. One commenter called attention to the absence of labor union participation in local training programs for Indochina refugees, and urged that unions be included as a source of cooperative programs in § 166.78(g).

Response. To maximize the impact of the program and to ensure non-duplication, the proposed rule provided for coordination of services and resources with Federal and non-Federal occupational skill training programs and other community programs providing services to the refugees. In light of this comment, §§ 166.78(g) and 166.80(f) are revised to include labor unions in the suggested listing of sources of coordination.

(9) STATE REVIEW

Comment. A commenter agreed with the regulation requiring State review and assurance of non-duplication of program efforts. However, that commenter did not agree with the provision for disqualifying an applicant because of late response from the State or mail delays.

Response. The Commissioner is required under the statute to obtain the State's review of a local educational agency's application. In the event no comments are received from the State, the Division of Adult Education, Office of Education, before eliminating a local educational agency application, will contact the appropriate State educational agency to check on the status of the application review. The Commissioner believes that his procedure will insure that a local educational agency application will receive every consideration and safeguard against disqualification because of late response from the State or mail delays. No change in the regulation is necessary.

(10) COOPERATIVE ARRANGEMENTS

Comment. One commenter pointed out the need for cooperative arrangements to provide higher quality services for the refugees, and that these cooperative arrangements should not be made a complicated issue.

Response. The Commissioner agrees that entering into cooperative arrangements with both public and private community organizations and agencies at State and local levels is an efficient and valuable means of providing educational services and will award up to 15 points to applicants who submit proposals which promise effective implementation of these cooperative arrangements.

(11) CHILD CARE COSTS

Comment. Section 166.81(c) of the proposed rule stated that the cost of child care would not be allowable, and that grantees were encouraged to use the services of volunteers or other community agencies for child care services. Several commenters requested that the Commissioner reconsider this rule, as the lack of available child care is a serious deterrent to regular class attendance for many adult Indochina refugees.

Response. In light of these comments, § 166.81(c) is amended to include child care as an allowable cost in special cases where need is demonstrated, but not to exceed 5 percent of the total grant award.

(12) TRANSPORTATION COSTS

Comment. One comment was received suggesting that a flat rate for transportation be allowed for each participant in a program under this subpart.

Response. Section 166.81(d) of the proposed rule provided that transportation costs are allowable only where need is demonstrated. The final regulation does not provide for a flat rate per par-

V 42161 AUG 19 77 UM

ticipant for transportation. However, it has been determined that up to one percent of the grant award may be used for transportation of participants without justification in the application. If more than one percent is necessary, an applicant must include a justification of this need in its application. The regulation, as changed, does not prevent an applicant from proposing a justification for a flat rate or other method of payment of transportation costs where need is demonstrated.

(13) CURRICULUM MATERIALS

Comment. Two commenters took exception to § 166.81(e) of the proposed rule, which provided that the development of curriculum materials is not a priority for this one-year emergency program and represented an allowable cost only where need is demonstrated.

Response. It has been determined that up to one percent of the grant award may be used for the development of curriculum materials without justification in the application. If more than one percent is needed, a justification demonstrating that necessary materials do not exist or cannot be obtained from existing sources shall be contained in the application. Section 166.81(e) of the regulation has been amended to reflect this change.

(14) OTHER CHANGES

(i) Section 166.80(f), Cooperative arrangements, is changed to add Federal educational, employment, and training programs to the types of program which should be coordinated, and for which an applicant will receive points in the criteria. This language was inadvertently omitted in the proposed rule. The change will bring the criteria into conformity with the application requirements under § 166.78(g).

(ii) Section 166.81(g), Independent accountability. Programs combining funds under this subpart with other State, Federal, or local adult education funds shall contain provisions of independent accountability.

(iii) Section 166.81(f), Pre-service or in-service training. No public comment was received concerning allowable costs for pre-service or in-service training of personnel. However, it has been determined that up to one percent of the grant award may be used for pre-service or in-service training without justification in the application. If more than one percent is to be used for this training, an applicant must demonstrate that the required competence is not otherwise available on a cost-effective basis. Section 166.81(f), which addresses the issue of pre-service and in-service training as an allowable cost, has been amended to reflect this change.

NOTE.—The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

AUTHORITY: Pub. L. 94-405, 20 U.S.C. 1211b.

Subpart H—Emergency Adult Education Program for Indochina Refugees

§ 166.71 Scope and purpose.

(a) *Scope.* The regulations in this subpart govern the Emergency Adult Education Program for Indochina Refugees for which Federal funds are authorized by section 315 of the Adult Education Act (20 U.S.C. 1211b), as added by section 301 of Pub. L. 94-405, the Indochina Refugee Children Assistance Act of 1976, 20 U.S.C. 1211b. These funds are authorized for the period beginning July 1, 1976, and ending September 30, 1977.

(b) *Purpose.* The purpose of this program is to provide grants to State and local educational agencies to operate special adult education programs for adult Indochina refugees, as defined in section 3 of the Indochina Migration and Refugee Assistance Act of 1975, as amended.

(20 U.S.C. 1211b(a); 22 U.S.C. 2601 note.)

§ 166.72 Applicability of General Education Provisions Regulations.

(a) Subchapter A of this Chapter, entitled "General Provisions for Office of Education Programs" and commonly referred to as the General Education Provisions Regulations, pertains to fiscal, administrative, property management and other matters. Parts 100 and 100a of the General Education Provisions Regulations (45 CFR Parts 100 and 100a) apply to assistance under this subpart except for the following provisions which do not apply:

(1) Section 100a.16 (relating to project description);

(2) Section 100a.19(b) (relating to cooperative management); and

(3) Section 100a.26(b) (relating to criteria for review of applications).

(b) The General Education Provisions Regulations are referred to in this subpart as "GEPR".

(20 U.S.C. 1211b; 45 CFR Parts 100, 100a.)

§ 166.73 Definitions.

(a) The terms "adult education", "local educational agency", "State", and "State educational agency", as used in this subpart, are defined in section 303 of the Adult Education Act (20 U.S.C. 1202).

(b) "Adult" means any individual who has attained the age of sixteen.

(c) The term "Indochina Refugee", as defined in the Indochina Migration and Refugee Assistance Act of 1975, as amended by Pub. L. 94-313 and used in this subpart, means an alien who:

(1) Because of persecution or fear of persecution on account of race, religion, or political opinion, fled from Cambodia, Vietnam, or Laos;

(2) Cannot return there because of fear of persecution on account of race, religion, or political opinion; and

(3) Is in urgent need of assistance for the essentials of life.

(20 U.S.C. 1201, 1211b; 22 U.S.C. 2601 note.)

§ 166.74 Eligible applicants.

(a) *General.* Only the following are eligible to apply for grants under this subpart:

(1) State educational agencies; and

(2) Local educational agencies.

(b) *Joint applications.* Two or more local educational agencies or a State educational agency and one or more local educational agencies may submit a joint application under § 100a.19(a) of the GEPR to provide programs of adult education to meet the needs of adult Indochina refugees.

(20 U.S.C. 1211b(a); 20 U.S.C. 1221c(b)(1), 1232c(b)(1).)

§ 166.75 Grantee responsibilities.

(a) A State or local educational agency which applies for a grant under this subpart must establish that it is prepared to operate the programs of adult education for adult Indochina refugees for which it requests assistance.

(b) A recipient of a grant under this subpart may not award a sub-grant to another entity or person.

(c) A recipient of a grant under this subpart may, in accordance with § 100a.30 of the GEPR, enter into a service contract to carry out a portion of the grant activities, subject to the provisions of § 100a.30(b) of the GEPR (prohibiting transfer of responsibility) and subpart I of Part 100a of the GEPR (relating to procurement by grantees).

(d) No State or local cost sharing is required.

(Implements 20 U.S.C. 1211b.)

§ 166.76 Eligible participants.

(a) Only adult Indochina refugees who possess a form (I.N.S. Form I-94) issued by the United States Immigration and Naturalization Service, indicating that they have been paroled into the United States or have been granted voluntary departure status may participate in a program assisted under this subpart, except as provided in paragraph (b) of this section.

(b) Participation of a very limited number of adults other than Indochina refugees is not precluded where the special needs of the Indochina refugees as set forth in the application are being met. This participation of non-Indochina adults shall not result in dilution of services to the target population as described in paragraph (a) of this section.

(Implements 20 U.S.C. 1211b; 22 U.S.C. 2601 note.)

§ 166.77 Eligible activities.

A grantee may use funds under this subpart only for:

(a) Programs of instruction (including administrative costs of planning and operating these programs) for adult Indochina refugees in English as a second language, basic reading, mathematics, the promotion of language and literacy skills in English, and the development and enhancement of necessary skills (such as consumer, social, survival, occupational, and communication skills) for the purpose of enabling the adult refugees to become employable and productive members of the American society.

(b) (1) Adult education programs designed to operate in conjunction with existing Federal and non-Federal programs and activities to develop occupational and related skills for adult Indochina refugees, particularly programs authorized under the Comprehensive Employment and Training Act of 1973 (20 U.S.C. 801) or under the Vocational Education Act of 1963, as amended (20 U.S.C. 1241).

(2) Where occupational skills programs are otherwise unavailable or insufficient, combined occupational-adult education programs to provide adult Indochina refugees with skills necessary to their obtaining employment;

(c) Programs providing educational support services which meet the needs of adult refugees, including but not limited to (1) tutoring (in the case of geographically isolated refugees) and (2) guidance and counseling with regard to educational, career, and employment opportunities (such as job placement and job follow-up services); or

(d) Any combination of programs described in paragraphs (a), (b), and (c) of this section.

(Implements 20 U.S.C. 1211b(a).)

§ 166.78 Application requirements.

(a) *General.* To receive consideration for assistance under this subpart, an applicant (as described in § 166.74) must submit to the Commissioner an application which meets the requirements of paragraphs (b) through (h) of this section. The Commissioner does not consider applications proposing a program of more than 12 months in duration.

(b) *Nature and purpose of program.* An application under this section must contain information sufficient to satisfy the Commissioner that the proposed program will serve, through activities described in § 166.77, the special adult education needs of adult Indochina refugees who are in or near the area served by the applicant.

(c) *Need for program; assurance of participation.* An application under this section must:

(1) Identify the needs of the target population to be addressed by the proposed program, and supply documentation of those needs; and

(2) Provide reasonable assurance that the adult Indochina refugees to whom the program is addressed will participate in the program if it is available.

(d) *Program description.* An application under this section must:

(1) Describe the objectives and design of the program in relation to the needs set forth under paragraph (c) of this section;

(2) In the case of a joint application, specify the parts of the program to be carried out by each of the applicants.

(e) *Budget.* An application under this section must:

(1) Set forth a detailed budget by program component showing any non-Federal sources of funds; and

(2) Include separate budgets in the case of joint applications corresponding to programs, services, and activities of each of the applicants.

(f) *Applicant qualifications.* An application under this section must contain sufficient information to enable the Commissioner to determine qualifications of the applicant for receiving an award. The application must include information about key professional personnel regarding such matters as their education, training, and experience in areas of adult and/or occupational education and qualifications for the proposed position, together with a description of the applicant's available facilities and other resources for the program.

(g) *Coordination.* An application under this section must describe plans for coordination of services and resources under the proposed program with Federal or non-Federal employment training programs such as those carried out under the Comprehensive Employment and Training Act of 1973, as amended, or the Vocational Education Act of 1963, as amended. The application must also describe plans for such coordination with programs carried out by voluntary agencies, sponsor groups, public assistance agencies, social/vocational rehabilitation services, labor unions, business and industry, social organizations, health services, legal aid, and with other Federal, State and local educational activities.

(h) *Additional information.* An application under this section should include other information which is responsive to the applicable criteria set forth in § 166.80 in sufficient detail to permit review of the application in accordance with these criteria. Information which relates to a particular criterion should identify that criterion.

(Implements 20 U.S.C. 1211b(c).)

§ 166.79 State review of applications.

(a) The Commissioner may not approve an application under this subpart from a local educational agency unless the State educational agency (for the State in which that local educational agency is located) assures the Commissioner that the program proposed in the application will not duplicate existing and available (Federal and non-Federal) adult education programs which meet the needs of adult Indochina refugees.

(b) To facilitate review by the State educational agency, a local educational agency applying for assistance under this subpart shall:

(1) Send a copy of its application to the State educational agency at the same time that it sends the application to the Commissioner, and

(2) Notify the Commissioner that it has sent the application to the State educational agency by furnishing the Commissioner a copy of its transmittal letter.

(c) The State educational agency has 30 days from the receipt of the application from the local educational agency to notify the Commissioner in writing whether the application duplicates existing and available programs. If the Commissioner does not, within that period, receive this notification, the Commissioner need not give further consideration to the application.

(Implements 20 U.S.C. 1211b(b).)

§ 166.80 Criteria for evaluation of applications.

The Commissioner evaluates applications which meet the requirements of this subpart only according to the following criteria. Each criterion is weighted and includes the maximum score that can be given for that criterion with the total number of points equaling 100. Applications will be judged on the basis of the extent to which each criterion is met. An application which receives a score of less than 30 points will not be approved.

(a) *Need.* (Maximum 10 points.) The application:

(1) Describes the need for the proposed adult Indochina educational program;

(2) Provides specific evidence of the need; and

(3) Describes, where appropriate, ongoing and planned activities in the community relative to the need.

(b) *Objectives.* (Maximum 10 points.) The objectives:

(1) Are significant and meet clearly identified needs of adult Indochina refugees;

(2) Clearly describe the proposed project outcomes; and

(3) Are capable of being measured and attained.

(c) *Program design.* (Maximum 15 points.) The application clearly describes how:

(1) The overall design relates to the objectives; and

V 42 N 161 AUG 19 77 UM

(2) Each segment of the design relates to one or more objectives.

(d) *Applicant's staff competencies and experience.* (Maximum 25 points.) The application clearly describes:

(1) The names and qualifications (including project management qualifications) of the project director and key professional staff and the qualifications and, to the extent feasible, the names of consultants and advisory groups;

(2) Time commitments planned for the project director, staff, advisory groups, and any consultants;

(3) Past and successful experiences of the proposed project director and key staff members in similar or related projects; and

(4) Staff competencies that are essential to understand the cultures of the adult Indochina refugees and to assist them in becoming self-sufficient members of the American society.

(e) *Evaluation plan.* (Maximum 5 points.) The application includes valid and reliable procedures for assessing and documenting the progress of participants.

(f) *Cooperative arrangements.* (Maximum 15 points.) The application clearly describes arrangements and support services to be provided by existing agencies in order to maximize the impact of the proposed program. The types of agencies with which cooperative arrangements are encouraged include but are not limited to voluntary agencies, sponsor groups, public assistance agencies, social vocational rehabilitation service, labor unions, business and industry, social organizations, health services, legal aid, and existing Federal, State, and local education, employment, and training programs.

(g) *Budget and cost effectiveness.* (Maximum 5 points.) The application provides a justifiable and itemized statement of cost which is substantiated by line items in the proposed budget and is cost effective.

(h) *Facilities and equipment.* (Maximum 5 points.) The application describes adequate facilities, equipment, and materials for the operation of the proposed program.

(i) *Reaching the geographically isolated.* (Maximum 5 points.) The application provides for meeting the educational needs of previously unserved adult Indochina refugees living in isolated geographic areas.

(j) *Support services.* (Maximum 5 points). The application provides for support services for adult Indochina refugees, including but not limited to guidance and counseling.

(Implements 20 U.S.C. 1211b.)

§ 166.81 Allowable costs.

(a) Allowable costs under grants awarded under this subpart are determined in accordance with the applicable cost principles subject to the limitations in this section. See § 100a.81 of the GEPR.

(b) Stipends and/or dependency allowances are not allowable.

(c) The cost of child care, not to exceed 5 percent of the grant award, may be allowed only if the applicant can demonstrate that (1) the absence of this service is a barrier to providing effective educational services, and (2) the services of volunteers or other community agencies are not available for this purpose. Under no circumstances shall payments for child care be made directly to participants.

(d) Transportation costs of participants are allowable up to one percent of the grant award. If more than one percent is necessary, a justification demonstrating need shall be contained in the application.

(e) The development of curriculum materials is allowable up to one percent of the grant award. If more than one percent is necessary, a justification demonstrating that appropriate materials do not exist or cannot be obtained from existing sources shall be contained in the application.

(f) The cost of pre-service or in-service training of personnel is allowable up to one percent of the grant award. If more than one percent is necessary, a justification demonstrating that the required competence is not otherwise available on a cost-effective basis shall be contained in the application.

(g) Programs combining funds under this subpart with other Federal, State, or local adult education funds shall contain provisions for independent accountability.

(Implements 20 U.S.C. 1211b.)

§ 166.82 Records and reports.

(a) Each grantee shall report to the Commissioner on all programs and services provided adult Indochina refugees from Federal funds granted under this subject.

(b) A grantee shall submit these reports as part of the financial and narrative reporting requirements set forth in subparts P and Q of Part 100a of the GEPR.

(c) In addition to reporting the information required under §100a.432 of the GEPR, a grantee shall include the following in the performance report:

(1) Total number of adult Indochina refugees that participated in adult education programs which were funded from a Federal grant awarded under this subpart by:

(i) Type of program (basic skills program of instruction, adult education program operating in conjunction with occupational skills program, and support services program); and

(ii) Nature of instruction (English as a second language, bilingual education, adult education, and occupational training);

(2) Total number of participants under this subpart who:

(i) Gained employment;

(ii) Obtained a better job; and

(iii) Were removed from public assistance; and

(3) A list of those agencies and resources that participated in meeting the objectives of this grant and the extent of their participation.

(Implements 20 U.S.C. 1211b.)

PART V

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

PROCEDURAL REGULATIONS

Notice of Proposed Rulemaking

V 42 161 AUG 19 77 UM

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

[29 CFR Part 1601]

PROCEDURAL REGULATIONS

Notice of Proposed Rulemaking

AGENCY: Equal Employment Opportunity Commission.

ACTION: Proposed Rulemaking.

SUMMARY: The Equal Employment Opportunity Commission is publishing its proposed procedural regulations for notice and comment by the public. The Commission is planning a major reorganization and has decided it would be useful to obtain public comment. The reorganization will improve the agency's administration and enforcement of Title VII of the Civil Rights Act of 1964, as amended.

DATES: Comments on the proposed regulations must be received on or before September 8, 1977. The Commission proposes to consider the submissions for a period of at least ten days and thereafter to adopt final regulations.

ADDRESSES: Interested persons are invited to submit written comments regarding the proposed revisions to Eleanor Holmes Norton, Chair, Equal Employment Opportunity Commission, 2401 E Street, NW., Washington, D.C. 20506. Copies of the comments submitted by the public will be available for review at the Social Sciences Library, Room 3024, EEOC, 2401 E Street, NW., Washington, D.C. 20506, between the hours of 9:30 a.m. and 5:00 p.m. from Monday, August 29, 1977, until such time as the Commission adopts final regulations.

FOR FURTHER INFORMATION CONTACT:

Constance L. Dupre, Associate General Counsel, Legal Counsel Division, Office of the General Counsel, room 2224, EEOC, 2401 E Street, N.W., Washington, D.C. 20506, area code (202) 634-6460.

SUPPLEMENTARY INFORMATION: Section 713(a) of Title VII of the Civil rights Act of 1964, as amended, gives the Equal Employment Opportunity Commission authority to "issue, amend, or rescind suitable procedural regulations to carry out the provisions of (Title VII)."

At this time the Commission intends to promulgate major amendments to Part 1601 of its regulations. This Part contains the Commission's procedures for administering and enforcing Title VII.

The amendment of Part 1601 is the culmination of a major intra-agency review of this part. This review was made with reference to (1) a program for the reorganization of the agency and its functions outlined in a resolution adopted by the Commission on July 20, 1977, and published herein as Appendix A. This reorganization plan was explicated in the statement of Eleanor Holmes Norton, Chair, before the House Subcommittee on Employment Opportunities on July 27, 1977, published herein as Appendix B; and (2) other changes in the regulations deemed necessary or desirable by the Commission.

The reorganization plan, developed to improve the enforcement of Title VII, includes the following features: (1) Introduction of a new Rapid Case Processing System with emphasis on expanded intake procedures, face-to-face fact-finding and early settlement; (2) a separate backlog case processing system to give systematic and priority attention to presently backlogged cases; (3) direct, service, consumer-oriented structure patterned after the National Labor Relations Board, introduced through model offices in three locations: Baltimore, Chicago and Dallas; (4) integration of investigation, conciliation and litigation functions; (5) establishment of a program to deal with systemic discrimination addressing first those whose actions have demonstrated clear disregard for the purposes of Title VII; (6) a new Program Office to place the Commission in an affirmative posture for administering Title VII through guidelines, interpretations, and other rulings; (7) a new management accountability and information system to insure that the above programs are fully implemented; (8) national training programs and standards, centrally managed to assure that the staff will effectively administer the new systems.

This plan will be fully implemented initially in the above identified three Model Offices. Such offices, reporting directly to Commission Headquarters, will operate under special new procedures to be incorporated in the agency's Compliance Manual, and will be staffed by both equal opportunity specialists and by attorneys. The Commission contemplates the later implementation by all District Offices of new procedures. Upon implementation of the Model Office procedures by each District Office, notice will be published in the FEDERAL REGISTER.

The Commission anticipates that it will further reorganize its operations. Pending such reorganization, these regulations allocate responsibility and authority to certain officers of the Commission, including the General Counsel and the Director, Office of Compliance Programs. These functions may be reassigned and redelegated by the Commission if it adopts further reorganization proposals.

Because the Commission's Regulations are procedural in nature, the notice and comment provisions of the public rulemaking process are not required. Because the Commission believes that it would be useful to solicit public comment with regard to some of the contemplated changes, the Commission chooses to utilize the notice and comment procedure in this instance.

The precise nature of the proposed changes to the Commission's Procedural Regulations is described below.

1. Section 1601 is amended to reflect that the Act itself was amended in 1972 (by the Equal Employment Opportunity Act, PL 92-261, approved March 24, 1972).

2. Section 1601.2 is republished without change.

3. Section 1601.3 is amended to delete the words "as amended" which are surplusage and to add definitions for the terms "706 Agency" and "verified." The Commission intends to establish units for the processing of charges under Sec. 707 of Title VII in the model offices. In addition, further Commission reorganization may affect the processing of Sec. 707 charges. Sections 1601.3 and 1601.5 are therefore amended to provide for the processing of Sec. 707 charges by the model offices.

4. Section 1601.4 is former § 1601.3a, republished without change.

5. Section 1601.5 is former § 1601.4 which was revised and published at 41 FR 34745 (August 7, 1976). The section is amended to indicate that the Commission's model offices are not subject to the authority of the regional offices.

6. Section 1601.6, formerly § 1601.5 is amended to change "will" to "shall" in the first and second sentences in order to make explicit the Commission's position that it is mandatory that the Commission accept information concerning alleged violations and render assistance in the filing of a charge where the information discloses that the person claiming to be aggrieved is entitled to file a charge. In addition, the section indicates that persons of organizations may request the issuance of Commissioner charges.

7. Section 1601.7 is former § 1601.6 amended to reflect that the person claiming to be aggrieved may request that his or her identity be kept confidential; however such request shall not prevent the Commission from disclosing the identity to any federal, state or local agency which has agreed to keep the identity of that person confidential. The section is further amended to delete the last sentence of the present regulation as unnecessary, and to add a new subpart (b) which requires the person claiming to be aggrieved to keep the Commission informed of his/her current address.

8. Section 1601.8 is former § 1601.7 amended to reflect that charges may be made either in person or by mail. Field offices are designated as district and regional offices to conform with the current practice of the Commission. A cross reference to 29 CFR 1610.4 (listing Commission district and regional offices) is added.

9. Section 1601.9 is former § 1601.8 amended to reflect that charges may be either sworn to or affirmed, or supported by a statement under penalty of perjury as permitted by Pub. L. 94-550. This change accords with the language of Sec. 706(b) of Title VII. The Section is further amended by the deletion of information regarding the availability of charge forms, as unnecessary, and information regarding assistance in the submission of information, since this now appears in § 1601.6.

10. Section 1601.10 is former § 1601.9 amended to reflect a delegation of authority to District Directors and the Director of the Office of Compliance Programs to consent, on behalf of the Commission, to the withdrawal of a charge other than Commissioner charges in appropriate circumstances, where to do so would not be detrimental to the purposes of Title VII.

11. Section 1601.11 is the first sentence of former § 1601.10 amended to reflect that charges filed by Commissioners must be signed and sworn to or affirmed, or supported by a statement under penalty of perjury as permitted by Pub. L. 94-550.

12. Section 1601.12 is former § 1601.11 amended to reflect that subsection (a) (1) provides for confidentiality in "on behalf of" charges in conformance with § 1601.7. Subsection (b) is amended to reflect that an amended charge need not be redeferred.

13. Section 1601.13 contains portions of § 1601.12 incorporated as published at 40 FR 3210 M (Jan. 20, 1975). Subsection (a) is added to clarify that charges are filed for purposes of Sec. 706(e) of Title VII when received. Previous regulations failed to state this proposition expressly. Subsection (b)(1) is former § 1601.12(a) and subsections (b)(2) and (b)(3) are new. These provisions describe the deferral process and state that it is applicable when the State or local law prohibits the practice alleged to be unlawful. The provisions are intended to apply to any basis of discrimination or employer covered by State or local law, even though that law does not cover all bases of discrimination or employers covered by Title VII. Subsection (c) contains the provisions of former § 1601.12(b), and provides for deferral of a complaint perfected in accordance with the requirements of § 1601.12(a). A new subsection (c)(2) is intended to clarify the instances in which a charge is filed with the Commission for the purposes of Sec. 706(c) of Title VII. These instances were not expressly addressed in former § 1601.12(b).

Subsection (d) is new. This provision restates current Commission practice in entering into contracts and cooperative agreements with State and local agencies. In accordance with new Commission procedures, these contracts and agreements are intended to achieve maximum utilization and integration of Commission efforts with State and local agencies' efforts. One major innovation, which is stated in this provision, is a worksharing agreement which, where appropriate, will provide for processing of charges by either the Commission or by the State or local agency as to avoid duplicative efforts. Subsetcion (e) in former § 1601.12(d) is unchanged.

Subsection (f) is the second and third sentence of former § 1601.10, providing for deferral of Commissioner charges where appropriate. The word "refer" has been deleted and the word "defer" inserted in its place. Reference to Sec. 704 (a) was deleted because of the amendment to former § 1601.11.

14. Section 1601.14 remains unchanged as revised and published at 41 FR 34745 (August 17, 1976) as § 1601.13. It was, at that time, amended to provide for service on the respondent charged with an unlawful employment practice of a copy of the charge itself within 10 days of filing of the charge. Where the Commission determines that such service within the 10-day notice period provided by Sec. 706(b) of Title VII would impede the law enforcement function of the Commission, it will, instead, serve only a notice of the charge. Subsection (b) clarifies the delegation of authority to serve the notice described in subsection (a). Prior to amendment, § 1601.13 provided that the Commission furnish the respondent only notice of the charge (including the date, place and circumstances of the alleged unlawful employment practice) within the 10-day period.

15. Section 1601.15 is former § 1601.14 amended to reflect the fact that, as part of each investigation, the Commission will accept any information proffered by the parties. The section clarifies that the investigators and other representatives designated by the Commission are authorized to make investigations of charges. The section is further amended by new subsections (b), (c) and (d) to provide for major innovations in Commission charge processing procedures: (b) outlines the specificity requirements imposed on charging parties; (c) authorizes fact-finding conferences; (d) reserves other investigative means to the Commission.

16. Section 1601.16 is derived from former § 1601.15. Section 1601.16(a) is revised to permit a subpoena to issue to obtain access to evidence for the purpose of examination and the right to copy. This subsection was amended to make explicit the authority of the Commission to conduct on-site inspections. The amendment is intended to conform the language of the regulations to Sec. 709 of Title VII of the Civil Rights Act of 1964 as amended, 42 U.S.C. 2000e-8, and the investigatory powers under the National Labor Relations Act which apply to the Equal Employment Opportunity Commission pursuant to Section 710 of Title VII, 42 U.S.C. 2000e-9. This subsection is also amended to provide for issuance of a subpoena by a member of the Commission, a District Director or any representative designated by the Commission. Prior to amendment, the regulations provided for issuance of a subpoena by a member of the Commission, the District Director or the Deputy District Director. This amendment is intended to facilitate the issuance of a subpoena where the charge is being investigated by an office other than a District Office.

Section 1601.16(b) is amended to specify that the 5-day period for requesting revocation or modification of a subpoena excludes Saturdays, Sundays, and holidays. This conforms with the Federal Rules of Civil Procedure. This amendment is intended to conform the regulations to the present practice. The period within which the Director of the Office of Compliance Programs should submit a recommended determination has been changed from 5 to 8 days to conform with the time period of § 1601.56.

Former Sec. 1601.15(c) is unchanged but renumbered § 1601.16(c). Section 1601.16(d) is amended to provide that witnesses subpoenaed pursuant to the section shall be entutled to the payment of fees and mileage.

17. Section 1601.17 is derived from § 1601.16 and is amended to permit any Commissioner, upon approval of the Commission, to summon a person to appear and testify at a public hearing. Prior to amendment, the section provided that a demand for appearance and testimony would come from the Commission. The amendment is intended to clarify that the section shall be used to compel testimony at a public hearing. Section 1601.16 may be used for the same purpose although it will generally be used to compel testimony for the purpose of investigating a charge of discrimination.

Section 1601.17(b) is former § 1601.17 and applies only to § 1601.17. A comparable section has been added as § 1601.16(d). Prior to the revision § 1601.17 was ambiguous as to its application.

18. Section 1601.18 remains as § 1601.18. The content of the section is unchanged.

19. Section 1601.19 has been revised. All procedures relating to the dismissal of charges are now contained in Section 1601.19. Prior to amendment, dismissals and reasonable cause determinations were intertwined in §§ 1601.19 and 1601.19b.

Subsection 1601.19(a) specifies that charges may be dismissed either before or after investigation when the charge is not timely filed or fails to raise a claim under Title VII. Charges raising a claim under Section 717 of Title VII, which relates to federal employers, will be dismissed. The amended section requires that a charge on its face or as amplified by the statements of the charging party need only raise a claim under Title VII. This is intended to eliminate any legalistic standard, which might have been inferred from prior language, that a charging party properly had to plead a claim rather than merely allege or raise a claim of discrimination. This conforms the regulation to actual practice of the Commission.

Subsection 1601.19(b) provides that where the Commission determines after investigation that there is not reasonable cause to believe that Title VII has been violated, the charge will be dismissed. This is a change from the current language which indicates that a charge will be dismissed when there is not reasonable cause to believe the charge is true. The change conforms to the current practice of not dismissing a charge when nonalleged violations are discovered although a finding of no reasonable cause is found on the specific allegations in the charge.

Subsection 1601.19(c) adds a provision to the regulations to authorize dismissal of a charge when the charging party

VOL 42 NO 161 AUG 19 1977 UM

fails or refuses to provide requested information, to be available for interviews, to attend a fact-finding conference or otherwise refuses to cooperate to the extent that the Commission is unable to resolve the charge. Additionally, the section provides that the Commission must give charging party 30 days in which to respond before dismissal of the charge for failure to cooperate can be effected. This change will allow the Commission to grapple with the situation of a charging party who will not cooperate with the Commission, but who is also unwilling to withdraw his or her charge.

The subsection does not extend to those cases in which the charging party cannot be located.

Section 1601.19(d) provides that the Commission may dismiss the charge when the person claiming to be aggrieved cannot be located after reasonable efforts have been made. The dismissal may be effected 30 days after the mailing of a notice to the party's last known address.

Section 1601.19(e) provides that the Commission may dismiss a charge upon the refusal of the person claiming to be aggrieved to accept an offer from the respondent which provides full relief for each harm alleged.

Section 1601.19(f) provides that the person claiming to be aggrieved or the person making the charge on beh..lf of a person claiming to be aggriev. l and the respondent, if notice of the charge has been served, will be notified when a charge is dismissed pursuant to §§ 1601.-19 (a), (b), (c), (d) or (e). The section adds to the current regulations by providing that a Notice of Right to Sue will be issued to the person claiming to be aggrieved pursuant to § 1601.28. This is intended to clarify that a Notice of Right to Sue will issue for charges when they are dismissed by the Commission. This conforms to Section 706(f)(1) of Title VII and the current practice as specified in Section 40 of the "EEOC Compliance Manual."

Section 1601.19(g) clarifies the delegation of authority from the Commission to the District Directors and the Director of the Office of Compliance Programs to dismiss charges and issue notices of Right to Sue pursuant thereto. The subsection also restates inherent Commission review authority, i.e., to review dimissals just as it may review determinations under § 1601.21.

20. Section 1601.20 replaces former § 1601.19a to confer authority on Commission officials to sign any settlement agreement acceptable to the parties, but retains Commission authority to process all similar charges. This section also indicates withdrawal of a charge as an alternative.

21. Section 1601.21 contains a part of former § 1601.19b, and is amended to add that a reasonable cause determination is limited to matters addressed. That portion of former § 1601.19b which relates to the dismissal of a charge was transferred to § 1601.19. Section 1601.21 (a) clarifies the second sentence of former § 1601.19b. This subsection provides that a reasonable cause determination is made after the Commission's investigative efforts where a charge has not been settled or dismissed, and is limited to the allegations addressed in the determination.

Section 1601.21(b) clarifies what is presently stated in former § 1601.19(b). The subsection provides that the Commission shall promptly notify the respondent, the person claiming to be aggrieved or where applicable, the person making the charge on behalf of the person claiming to be aggrieved of the determination as to reasonable cause. In the case of a Commissioner charge, the Commission will notify the person or persons named in the charge or third party certificate and the respondent.

The subsection further clarifies that the Commission when exercising its reconsideration authority will notify the concerned parties after a decision or determination has been amended, revoked or altered.

The subsection contains a change in language to specify that amendment, alteration, and revocation are the types of reconsideration action which trigger notice to the parties.

Implicit in the right to reconsider a determination is the right to reinvestigate a charge.

This subsection does not change the inherent right and the current practice of the Commission, on its own motion, to reconsider letters of determination issued by authorized delegates as well as Commission decisions. The section does not provide a right to invoke Commission review by a person claiming to be aggrieved or a respondent.

Subsection 1601.21(c) is unchanged from revised § 1601.19b(c) published at 42 FR 10315 (Feb. 22, 1977) which substituted the word "abstain" for "not participate." This change was intended to make clearer that a Commissioner's presence could be counted for quorum purposes although such Commissioner did not vote on the particular charge because of having been the one who filed such charge.

Section 1601.21(d) clarifies the delegation of authority from the Commission to the District Directors and the Director of the Office of Compliance Programs to dismiss a charge, make a determination, issue a letter of determination and serve a copy thereof upon the parties, in those cases in which the Commission or previous Commission Decisions serve as authority or as precedent.

The reconsideration portion of the subsection is substantially unchanged from former § 1601.19b(d) except that the Director of the Office of Compliance Programs has been substituted for "other designated officers." Reference to the words "amend, alter, or revoke" were added to conform to the new language in § 1601.21(b). See comment to that subsection, supra. Delegation of authority to discuss conciliation and sign conciliation agreements has been removed to § 1601.24.

Section 1601.21(e) is substantially unchanged from former § 1601.19b(e). The references in § 1601.19(e)(1) to public hearings and enforceability in court of consent decrees entered into by a 706 agency are deleted from the definition of final findings and orders to which substantial weight will be accorded. This comports with the requirements envisioned by 706 (b), (c), and (d) of Title VII. Subsection 1601.21(e)(2) is amended to state that substantial weight will be accorded the final findings of a 706 agency when the proceedings were fair and regular, the practices prohibited by the federal law, and the findings serve the interest of effective enforcement of Title VII. Giving substantial weight does not include according weight to the agency's conclusion of law. The requisites for according substantial weight are the same as those prior to amendment except comparability of the practices prohibited is substituted for comparability of the remedies and relief granted to make clear that the Commission accords substantial weight in instances when no relief is appropriate.

22. Section 1601.22 is unchanged from former Sec. 1601.20 except that the attorneys representing the charging party and respondent are specifically included as persons to whom disclosure of information prior to the institution of litigation may be permitted where such disclosure is deemed necessary for securing appropriate relief. In this revision interested Federal and State agencies are discussed in a separate sentence. Disclosures to governmental agencies serve similar but not identical purposes.

23. Section 1601.23 incorporates the provisions of former § 1601.25a. The section sets forth the procedures to be followed by the Commission in seeking preliminary relief pursuant to Sec. 706(f)(2) of Title VII. The delegation of authority provision formerly appearing at § 1601.25a is included in this section and is amended to provide authority to the Director of the Office of Compliance Programs to propose preliminary relief actions. Pursuant to Sec. 705(b)(1) of Title VII the General Counsel is authorized to initiate such actions. A sentence has been added in recognition of the private right of individuals to seek injunctive relief on their own motion. It is implicit in this section that no Notice of Right to Sue is required when preliminary relief is sought.

24. Section 1601.24 is derived from former § 1601.22 and has been revised and reorganized into paragraph format. Paragraph (a) incorporates the provisions of the second sentence of former § 1601.19b(a) and former § 1601.22 covering conciliation efforts and the requirement that settlement agreements be in writing. A sentence has been added to require that copies of the conciliation agreement be sent to all signatories thereto. Although this was Commission practice, the former provision appeared to require only notice to the parties that settlement had been effected.

New paragraph (b) provides a delegation of authority to conciliate and sign settlement agreements. A sentence has been added to authorize the General Counsel to negotiate and sign conciliation agreements when proceedings in a

suit brought by the Commission are stayed, pursuant to Section 706 (f)(1) of Title VII, pending further Commission efforts towards voluntary compliance. This provision is added to ensure expedited efforts towards settlement rather than sending the charge back to the District Office for conciliation.

Paragraph (c) contains provisions from former §§ 1601.22 and 1601.25b(a) covering the rights of aggrieved persons when settlement is reached in a case.

25. Section 1601.25 derives from former § 1601.23. As revised, the section requires issuances of notice of failure of conciliation only to the respondent. Such notice will be sent where the Commission is unable to obtain voluntary compliance and where the Commission has determined that further efforts to do so would be futile or non-productive. The final sentence of former § 1601.23 has been deleted as being an unnecessary procedural step. This revised section as well as revised § 1601.26 resolves misunderstandings arising from former §§ 1601.23 and 1601.25 concerning the controversy over the "two letter" problem. See *Tuft* v. *McDonnel Douglas Corp.*, 517 F. 2d 1301 (8th Cir. 1975).

26. Section 1601.26(a) carries over, without change, former § 1601.24. New paragraph (b) provides that investigative information which the Commission could obtain under Sec. 709 of Title VII, even if obtained during informal endeavors, is to be treated for disclosure purposes under the provisions of § 1601.22.

27. Section 1601.27 contains all of the first sentence of former § 1601.25b(a) but is amended to add a clause clarifying that the Commission may seek injunctive relief under Sec. 706(f)(2) of Title VII. A cross-reference to § 1601.23 has been added.

28. Section 1601.28 contains the provisions for issuing Notices of Right to Sue and conditions under which such notices shall be given. Subsection (a)(1) corresponds to former § 1601.25b(c) except that dismissals are removed to § 1601.28 (b)(2). Additionally, subsection (a)(1) states more simply that a person claiming to be aggrieved may request a right to sue notice 180 days after any period of reference described in Sec. 706(d) of Title VII rather than "180 days after filing." No change in meaning is intended.

Subsection (a)(2) is new. It provides that a person claiming to be aggrieved may request a Notice of Right to Sue prior to the expiration of 180 days from the date of filing when the appropriate Commission official attaches a written certification that the Commission will be unable to complete its administrative processing of the charge within 180 days from filing. This interpretation of Sec. 706(f)(1) of Title VII accords with recent case law which has sanctioned such interpretation. See, e.g., *Bauman* v. *Union Oil Corp.*, 400 F. Supp. 1021 (N.D. Calif. 1973).

Subsection (a)(3) corresponds to former § 1601.25(D) except that the section has been amended to delete the authority of the parties concerned, other than the Commission, to require the Commission to continue processing a charge after a notice of right to sue has been issued. Continued processing of a charge will be within the sole discretion of a Commission official, such as the appropriate District Director, or in appropriate cases the Director of the Office of Compliance Programs or the General Counsel. Any one of these officials may, at any time, reopen any file closed or set aside or otherwise commence the further investigation or reprocessing of any charge.

Subsection (a)(4) is added to make explicit that the Commission reserves the right to render assistance consistent with the effective enforcement of Title VII to any person who receives a Notice of Right to Sue. Such assistance might include, for example, amicus curiae participation.

Subsection (b)(1) adds a new provision to the regulations. It requires the Commission to issue a notice of right to sue after the Commission has completed the administrative processing of a charge, i.e., has decided not to file a civil action after failure of consiliation. Further, subsection (b)(1) includes portions of the requirements of former § 1601.25c (a) and (c) regarding notices of right to sue for Commissioner charges. Notices will be issued to any person who is actually named in a charge, identified by a Commissioner in a third-party certificate or otherwise identified by the Commission as a member of the class. The section is not intended to require the Commission to give notice, as former § 1601.25c (c) and (d) appeared to require, to all possibly identifiable members but only to those who are actually identified when a Commissioner charge is filed or during a Commission investigation.

Subsection (b)(2) states that notices of right to sue will be issued when a charge is dismissed under § 1601.19. Notice will be issued to the same members of a class as under § 1601.28(b)(1).

Subsection (b)(3) parallels subsection (a)(4) and makes explicit that the Commission reserves the right to render certain kinds of assistance even in instances where the Commission has found no cause.

Subsection 1601.28(c) corresponds to the delegation of authority approved by the Commission in former regulation § 1601.25(b).

Subsection 1601.28(d) provides that notices of right to sue in cases involving respondent governments or governmental agencies will be referred to the Attorney General.

Subsection 1601.28(e) is derived from former § 1601.25(a) and describes the contents of a Notice of Right to Sue. The times at which such notices issue are contained in § 1601.28 (a)(1), (a)(2), (b)(1), and (b)(2). This will avoid confusion regarding the "notice of notice" problem.

29. Section 1601.29 derives from former § 1601.26. References to referral of Sec. 707 cases to the Department of Justice has been deleted because of the transfer of Sec. 707 authority, except for suits against governments, to the Commission under the Equal Employment Opportunity Act of 1972. The reference in § 1601.26 to "making public" was deleted.

30. Section 1601.30 is former § 1601.27 amended by changing the Commission's street address and adding the former poster footnote to the text.

31. Former §§ 1601.28 through 1601.33 have been renumbered and are now §§ 1601.31 through 1601.36, respectively, of the revised regulations. Section 1601.-31 has been amended to indicate issuance of interpretations or opinions is discretionary.

32. Sections 1601.50 through 1601.55 of the former regulations are unchanged in number or content except as explained below:

(a) A phrase defining the five-day period for petitions to revoke or modify a subpoena as exclusive of Saturdays, Sundays and Holidays, has been added to § 1601.56(b) and parallels the amended definition of the five-day period appearing at § 1601.16 of the revised regulations.

(b) Section 1601.59 of the former regulations, covering cases designated for processing under Section 707 of Title VII, has been amended by deletion of the provision requiring notification to persons who have filed charges on behalf of the aggrieved persons. Cross-references to former §§ 1601.25 and 1601.25c have been changed to refer to revised § 1601.28.

33. Sections 1601.70 through 1601.74 contain the provisions of former § 1601.13 (f) through (m) incorporated as published at 40 FR 3210 M (Jan. 20, 1975). The provisions remain substantially unchanged, but with appropriate cross-references revised. These provisions concerning the 706 agency designation process are separated from the charge deferral procedures in § 1601.13 in order to provide a more logical and sequential picture of the Commission's charge processing procedures in Subpart E of the regulations. Section 1601.72 was the former § 1601.13(j) and is amended to reflect that the 706 status of an agency having criminal enforcement authority alone will be evaluated on the basis of the agency's effective utilization of its criminal authority. The section has also been modified by deleting the ambiguous phrase "where state or local law allows" which appeared to permit continued certification of an agency which could not under its law provide for back-pay or other compensation to the victims of unlawful discrimination.

NOTE.—It is hereby certified that the revised regulation has been assessed for the need of an Inflationary Impact Statement. Because of the nature of the changes this revision does not require an Inflationary Impact Statement.

Dated: August 15, 1977.

ELEANOR HOLMES NORTON,
Chair, Equal Employment Opportunity Commission.

It is proposed to revise 29 CFR Part 1601 to read as follows:

V 42 161 AUG 19 77 UM

PART 1601—PROCEDURAL REGULATIONS

Sec
1601.1 Purpose.

Subpart A—Definitions

1601.2 Terms defined in Title VII of the Civil Rights Act of 1964, as amended.
1601.3 Other definitions.
1601.4 Vice Chairman's functions.
1601.5 Region; district; supervisory authority.

Subpart B—Procedure for the Prevention of Unlawful Employment Practices

1601.6 Submission of information.
1601.7 Charges by or on behalf of persons claiming to be aggrieved.
1601.8 Where to make a charge.
1601.9 Form of charge.
1601.10 Withdrawal of a charge by a person claiming to be aggrieved.
1601.11 Charges by members of the Commission.
1601.12 Contents of charge; amendment of charge.
1601.13 Filing; deferrals to State and local agencies.
1601.14 Service of a notice of charge.

Investigation of a Charge

1601.15 Investigative authority.
1601.16 Access to and production of evidence; testimony of witnesses: Procedure and authority.
1601.17 Witnesses for public hearings.
1601.18 Right to inspect or copy data.

Procedure Following Filing of a Charge

1601.19 Dismissal: Procedure and authority.
1601.20 Negotiated settlement.
1601.21 Reasonable cause determination: Procedure and authority.
1601.22 Confidentiality.

Procedure To Rectify Unlawful Employment Practice

1601.23 Preliminary or temporary relief.
1601.24 Conciliation: Procedure and authority.
1601.25 Failure of conciliation; notice.
1601.26 Confidentiality of endeavors.

Procedure Concerning the Institution of Civil Actions

1601.27 Civil Actions by the Commission.
1601.28 Notice of right to sue: Procedure and authority.
1601.29 Referral to the Attorney General.

Subpart C—Notices to Employees, Applicants for Employment and Union Members

1601.30 Notices to be posted.

Subpart D—Interpretations and Opinions by the Commission

1601.31 Request for interpretation or opinion.
1601.32 Contents of request; where to file.
1601.33 Issuance of interpretation or opinion.

Subpart E—Construction of Rules

1601.34 Rules to be liberally construed.

Subpart F—Issuance, Amendment or Repeal of Rules

1601.35 Petitions.
1601.36 Action on petition.

Subpart G—Case Processing Under Section 707 of Title VII

1601.50 Purpose.
1601.51 Delegation of authority.
1601.52 Initiation of section 707 charge.
1601.53 Service of notice of charge.
Sec.
1601.54 Deferral.
1601.55 Investigation.
1601.56 Issuance of subpoenas; petitions to revoke subpoenas; enforcement of subpoenas.
1601.57 Commission reasonable cause finding.
1601.58 Voluntary compliance; settlements; Commission authority to file suit.
1601.59 Notice to persons claiming to be aggrieved and persons filing charges on behalf of such persons.

Subpart H—706 Agency Designation Procedures

1601.70 706 Agency designation.
1601.71 Commission determinations on 706 Agency applications.
1601.72 706 Agency performance standards.
1601.73 706 Agency conference.
1601.74 Designated 706 and Notice Agencies.

Appendix A—Resolution Adopted At Commission Meeting of July 20, 1977

Appendix B—Statement of Eleanor Holmes Norton, Equal Employment Opportunity Commission

Authority: Sec. 713(a), Civil Rights Act of 1974.

§ 1601.1 Purpose.

The regulations set forth in this part 1601 contain the procedures established by the Equal Employment Opportunity Commission for carrying out its responsibilities in the administration and enforcement of Title VII of the Civil Rights Act of 1964, as amended. Based upon its experience in the administration of the Act and upon its evaluation of suggestions and petitions for amendments submitted by interested persons in accordance with § 1601.35, the Commission may from time to time amend and revise these procedures.

Subpart A—Definitions

§ 1601.2 Terms defined in Title VII of the Civil Rights Act of 1964, as amended.

The terms "person," "employer," "employment agency," "labor organization," "employee," "commerce," "industry affecting commerce," "State" and "religion" as used herein shall have the meanings set forth in section 701 of Title VII of the Civil Rights Act of 1964, as amended.

§ 1601.3 Other definitions.

For the purposes of this Part, the term "Title VII" or "the Act" shall mean Title VII of the Civil Rights Act of 1964 as amended by the Equal Employment Opportunity Act of 1972; the term "Commission" shall mean the Equal Employment Opportunity Commission or any of its designated representatives; the term "706 Agency" shall mean a state or local agency which the Commission has determined satisfies the criteria stated in section 706(c) of Title VII; and the term "verified" shall mean sworn to or affirmed before a notary public, designated representative of the Commission, or other person duly authorized by law to administer oaths and take acknowledgements, or supported by an unsworn declaration in writing under penalty of perjury.

The delegations of authority in subpart B of this part are applicable to charges filed pursuant to either section 706 or section 707 of Title VII.

§ 1601.4 Vice Chairman's functions.

The member of the Commission designated by the President to serve as Vice Chairman shall act as Chairman in the absence or disability of the Chairman or in the event of a vacancy in that office.

§ 1601.5 Region; district; supervisory authority.

The term "region" as used herein shall mean that part of the United States or any territory thereof fixed by the Commission as a particular region. The term "regional director" shall refer to that person designated as the Commission's chief officer in each region. The term "district" shall mean that area within a region fixed by the Commission as a particular sub-unit of a region. The term "district director" shall refer to that person designated as the Commission's chief officer in each district. The regional director is hereby delegated all of the authority granted in this part to district directors to be exercised within the scope of his or her supervisory authority over each district director in his or her region, except with regard to model offices. The term "model office" refers to a district office which, although located within a region, has been designated by the Commission to operate under the direct supervision of the Executive Director and the General Counsel. The Executive Director is hereby delegated all of the authority granted in this part to directors of model offices to be exercised within the scope of his or her authority over such model offices. The regional offices of the General Counsel are under direct control of the Commission's General Counsel.

Subpart B—Procedure for the Prevention of Unlawful Employment Practices

§ 1601.6 Submission of information.

The Commission shall receive information concerning alleged violations of Title VII from any person. Where the information discloses that a person is entitled to file a charge with the Commission, the appropriate office shall render assistance in the filing of a charge. Any person or organization may request the issuance of a Commissioner charge for an inquiry into individual or systematic discrimination. Such request, with any pertinent information, should be submitted to the nearest District Office.

§ 1601.7 Charges by or on behalf of persons claiming to be aggrieved.

(a) A charge that any person has engaged in or is engaging in an unlawful employment practice within the meaning of Title VII may be made by or on behalf of any person claiming to be aggrieved. A charge on behalf of a person claiming to be aggrieved may be made by any person, agency, or organization. The written charge need not identify by name the person on whose behalf it is made. The person making the charge, however, must

provide the Commission with the name, address and telephone number of the person on whose behalf the charge is made. During the Commission investigation, Commission personnel shall verify the authorization of such charge by the person on whose behalf the charge is made. Any such person may request that the Commission shall keep his or her identity confidential. However, such request for confidentiality shall not prevent the Commission from disclosing the identity to federal, state or local agencies that have agreed to keep such information confidential. If this condition is violated by a recipient agency, the Commission may decline to honor subsequent requests for such information.

(b) The person claiming to be aggrieved has the responsibility to provide the Commission with notice of any change in address and with notice of any prolonged absence from that current address so that he or she can be located when necessary during the Commission's consideration of the charge.

§ 1601.8 Where to make a charge.

A charge may be made in person or by mail at the offices of the Commission in Washington, D.C., or any of its district or regional offices or with any designated representative of the Commission. The addresses of the Commission's district and regional offices appear in § 1610.4.

§ 1601.9 Form of charge.

A charge shall be in writing and signed and shall be verified.

§ 1601.10 Withdrawal of a charge by a person claiming to be aggrieved.

A charge filed by or on behalf of a person claiming to be aggrieved may be withdrawn only by the person claiming to be aggrieved and only with the consent of the Commission. The Commission hereby delegates authority to District Directors and the Director of the Office of Compliance Programs as appropriate, to grant consent to a request to withdraw a charge, other than a Commissioner charge, where the withdrawal of the charge will not defeat the purposes of Title VII.

§ 1601.11 Charges by members of the Commission.

Any member of the Commission may file a charge with the Commission. Such charge shall be in writing and signed and shall be verified.

§ 1601.12 Contents of charge; amendment of charge.

(a) Each charge should contain the following: (1) The full name, address and telephone number of the person making the charge except as provided in § 1601.7;

(2) The full name and address of the person against whom the charge is made, if known (hereinafter referred to as the respondent);

(3) A clear and concise statement of the facts, including pertinent dates, constituting the alleged unlawful employment practices: See § 1601.15(b);

(4) If known, the approximate number of employees of the respondent employer or the approximate number of members of the respondent labor organization, as the case may be; and

(5) A statement disclosing whether proceedings involving the alleged unlawful employment practice have been commenced before a State or local agency charged with the enforcement of fair employment practice laws and, if so, the date of such commencement and the name of the agency.

(b) Notwithstanding the provisions of paragraph (a) of this section, a charge is sufficient when the Commission receives from the person making the charge a written statement sufficiently precise to identify the parties and to describe generally the action or practices complained of. A charge may be amended to cure technical defects or omissions, including failure to verify the charge, or to clarify and amplify allegations made therein. Such amendments and amendments alleging additional acts which constitute unlawful employment practices related to or growing out of the subject matter of the original charge will relate back to the original filing date. A charge that has been so amended shall not be required to be redeferred.

§ 1601.13 Filing; deferrals to State and local agencies.

(a) The timeliness of a charge shall be measured for purposes of complying with section 706(e) of Title VII by the date on which the charge is received by the Commission.

(b) Deferral policy. (1) In order to give full weight to the policy of section 706(c) of the Act, which affords State and local fair employment practice agencies that come within the provisions of that section an opportunity to remedy alleged discrimination concurrently regulated by Title VII and State or local law, the Commission adopts the following procedures with respect to allegations of discrimination filed with the Commission where there is no evidence that such allegations were earlier presented to an appropriate 706 Agency. It is the intent of the Commission to thereby encourage the maximum degree of effectiveness in the State and local agencies. The Commission shall endeavor to maintain close communication with the State and local agencies with respect to all matters forwarded to such agencies and shall provide such assistance to State and local agencies as is permitted by law and as is practicable. It is the experience of the Commission that because of the present procedures, persons who seek the aid of the Commission are often confused and even risk loss of the protection of the Act. Accordingly, it is the intent of the Commission to simplify filing procedures for parties in deferral States and localities and thereby avoid the accidental forfeiture of important Federal rights.

(2) Section 706(c) of Title VIII grants States and their political subdivisions the exclusive right to process allegations of discrimination filed by a person other than a Commissioner for a period of sixty days or 120 days during the first year after the effective date of the qualifying State or local law. This right exists where pursuant to Subpart I of this part it has been demonstrated to the Commission that a State or local law prohibits the employment practice alleged to be unlawful and a State or local agency has been authorized to enforce and does enforce that law through civil or criminal proceedings. After the expiration of the exclusive processing period, the Commission may commence processing of the allegation of discrimination.

(3) A 706 Agency may waive its right to the period of exclusive processing of charges provided under section 706(c) of Title VII with respect to any charge or category of charges. Where a 706 Agency has waived its right to the exclusive processing period with respect to any category of charges, the Commission will assume jurisdiction over charges within that category. Copies of such charges shall be forwarded to the appropriate 706 Agency.

(c) The following procedures shall be followed with respect to cases arising in the jurisdiction of "706 Agencies."

(1) Where any document, whether or not verified, is received by the Commission as provided in § 1601.8 which may constitute a charge cognizable under Title VII, and where the 706 Agency has not waived its right to the period of exclusive processing with respect to that document, that document shall be deferred to the appropriate 706 Agency as provided in the procedures set forth below:

(i) All such documents shall be dated and time stamped upon receipt.

(ii) If the original document does not meet the requirements of § 1601.12(a), the Commission shall endeavor to obtain a perfected complaint meeting those requirements. A copy of the original document and of the perfected complaint, if applicable, shall be transmitted by registered mail, return receipt requested, to the appropriate State or local agency, or, where the State or local agency has consented thereto, by certified mail, by regular mail or by hand delivery. State or local proceedings are deemed to have commenced on the date such document is mailed or hand delivered.

(iii) The person claiming to be aggrieved and any person filing a charge on behalf of such person shall be notified, in writing, that the document which he or she sent to the Commission has been forwarded to the State or local agency pursuant to the provisions of section 706(c).

(2) For purposes of satisfying the filing requirement of section 706(c) of Title VII, the Commission shall assume jurisdiction over a document described in paragraph (c)(1) of this section as follows:

(i) Where the document on its face constitutes a charge within a category of charges over which the 706 Agency has waived its right to the period of exclusive processing referred to in paragraph (b)(3) of this section, the Com-

V 42 161 AUG 19 77 UM

mission will assume jurisdiction over the charge upon receipt of the document;

(ii) Where the document is submitted to the Commission within 180 days from the date of the alleged violation but beyond the period of limitation of the appropriate 706 Agency, the Commission shall assume jurisdiction on receipt of the document;

(iii) Where the proceedings of a 706 Agency have been commenced pursuant to paragraph (c)(1) of this section, the Commission shall assume jurisdiction sixty (or where appropriate 120) days after the 706 Agency proceedings have been commenced, except where the Commission is earlier notified of the termination of State proceedings, it shall immediately assume jurisdiction upon receipt of such notice.

(iv) Where the proceedings of a 706 Agency have been commenced less than sixty (or, where appropriate, 120) days prior to the time the Commission receives the document and those proceedings have not previously been terminated, the Commission shall assume jurisdiction 60 (or, where appropriate, 120) days after the 706 Agency proceedings have been commenced, except where the Commission is earlier notified of the termination of state proceedings, it shall immediately assume jurisdiction upon receipt of such notice.

(d) In addition to the provisions in paragraphs (a), (b) and (c) of this section and pursuant to section 705(g)(1) and section 709(b) of Title VII, the Commission shall endeavor to enter into agreements with 706 Agencies and other fair employment practice agencies to establish effective and integrated resolution procedures. Such agreements may include, but need not be limited to, cooperative arrangements to provide for processing of certain charges by the Commission, rather than by the 706 Agency during the period specified in section 706(c) and section 706(d) of Title VII.

(e) Notwithstanding the deferral provisions of this section, the Commission may commence judicial action for immediate, temporary or preliminary relief pursuant to section 706(f)(2) of Title VII.

(f) The Commission will notify a 706 Agency when an allegation of discrimination is made by a member of the Commission concerning an employment practice occurring within the jurisdiction of the 706 Agency. The 706 Agency will be entitled to process the charge exclusively for a period of not less than sixty days if the 706 Agency makes a written request to the Commission within ten days of receiving notice that the allegation has been filed. The sixty day period shall be extended to one hundred and twenty days during the first year after the effective date of the qualifying State or local law.

§ 1601.14 Service of a notice of charge.

(a) Within ten days after the filing of a charge in the appropriate Commission office, the Commission shall serve respondent a copy of the charge, by mail or in person, except when it is determined that providing a copy of the charge would impede the law enforcement functions of the Commission. Where a copy of the charge is not provided, the respondent will be served with a notice of the charge within ten days after the filing of the charge (including the date, place, circumstances and identity of the person filing the charge, or, in the case of a charge filed on behalf of any individual, the identity of the person or organization so filing).

(b) The District Directors, the Director of the Office of Compliance Programs, and the designated representative of each are hereby delegated the authority to issue the notice described in paragraph (a) of this section.

INVESTIGATION OF A CHARGE

§ 1601.15 Investigative authority.

(a) The investigation of a charge shall be made by the Commission, its investigators, or any other representative designated by the Commission. During the course of such investigation, the Commission may utilize the services of State and local agencies which are charged with the administration of fair employment practice laws or appropriate Federal agencies, and may utilize the information gathered by such authorities or agencies. As part of each investigation, the Commission will accept any statement of position or evidence with respect to the allegations of the charge which the person claiming to be aggrieved, the person making the charge on behalf of such person, if any, or the respondent wishes to submit.

(b) As part of the Commission's investigation, the Commission may require the person claiming to be aggrieved to provide a statement which includes: (1) A statement of each specific harm that the person has suffered and the date on which each harm occurred;

(2) For each harm, a statement specifying the act, policy or practice which is alleged to be unlawful;

(3) For each act, policy, or practice alleged to have harmed the person claiming to be aggrieved, a statement of the facts which lead the person claiming to be aggrieved to believe that the act, policy or practice is discriminatory.

(c) The Commission may require a fact-finding conference with the parties prior to a determination on a charge of discrimination. The conference is primarily an investigative forum intended to define the issues, to determine which elements are undisputed, to resolve those issues that can be resolved and to ascertain whether there is a basis for negotiated settlement of the charge.

(d) The Commission's authority to investigate a charge is not limited to the procedures outlined in paragraphs (a), (b) and (c) of this section.

§ 1601.16 Access to and production of evidence; testimony of witnesses; Procedure and authority.

(a) To effectuate the purposes of Title VII, any member of the Commission shall have the authority to sign and issue a subpoena requiring: (i) The attendance and testimony of witnesses;

(ii) The production of evidence including, but not limited to; books, records, correspondence, or documents, in the possession or under the control of the person subpoenaed; and

(iii) Access to evidence for the purposes of examination and the right to copy.

Any District Director or any representatives designated by the Commission may sign and issue a subpoena on behalf of the Commission. The subpoena shall state the name and address of its issuer, identify the person subpoenaed, the person to whom and the place, date, and the time at which it is returnable or the nature of the evidence to be examined or copied, and the date and time when access is requested. A subpoena shall be returnable to a duly authorized investigator or other representative of the Commission. Neither the person claiming to be aggrieved nor the respondent shall have the right to demand that a subpoena be issued.

(b) Any person served with a subpoena who intends not to comply therewith shall, within five days (excluding Saturdays, Sundays and Federal legal holidays) after the date of service of the subpoena upon him or her, petition the Director of the Office of Compliance Programs by mail to revoke or modify the subpoena. Such petition shall be mailed to 2401 E Street NW., Washington, D.C. 20506, and a copy thereof shall be served on the person who issued the subpoena. The petition shall separately identify each portion of the subpoena with which the petitioner does not intend to comply and shall state, with respect to each such portion, the grounds upon which the petitioner relies. A copy of the subpoena shall be attached to the petition and shall be designated "Attachment A." Within eight days after receipt thereof, or as soon thereafter as practicable, the Director of the Office of Compliance Programs, shall make a determination upon the petition, stating reasons, and shall submit the petition and determination to the Commission for its review. The Commission shall review the petition and make a final determination. A Commissioner who has issued a subpoena shall abstain from reviewing any petition to modify or revoke the subpoena. The Commission shall serve a copy of the final determination of the petition upon the petitioner. For purposes of this section, service shall be made and proof thereof established pursuant to section 11(4) of the National Labor Relations Act, as amended, 29 U.S.C. 161(4), as made applicable to Commission hearings and investigations by section 710 of Title VII.

(c) Upon the failure of any person to comply with a subpoena issued under this section, the Commission may utilize the procedures of section 11(2) of the National Labor Relations Act, as amended, 29 U.S.C. 161(2), to compel enforcement of the subpoena.

(d) Witnesses who are subpoenaed pursuant to § 1601.16(a) shall be entitled

to the same fees and mileage that are paid witnesses in the courts of the United States.

§ 1601.17 Witnesses for public hearings.

(a) To effectuate the purposes of Title VII, any Commissioner, upon approval of the Commission, may demand in writing that a person appear at a stated time and place within the State in which such person resides, transacts business, or is served with the demand, for the purpose of testifying under oath before the Commission or its representative. If there be noncompliance with any such demand, the Commission may utilize the procedures of section 710 of Title VII to compel such person to testify. A transcript of testimony may be made a part of the record of each investigation.

(b) Witnesses who testify as provided in paragraph (a) of this section shall be paid the same fees and mileage that are paid witnesses in the courts of the United States.

§ 1601.18 Right to inspect or copy data.

A person who submits data or evidence to the Commission may retain or, on payment of lawfully prescribed costs, procure a copy or transcript thereof, except that a witness may for good cause be limited to inspection of the official transcript of his or her testimony.

PROCEDURE FOLLOWING FILING OF A CHARGE

§ 1601.19 Dismissal: Procedure and authority.

(a) Where a charge on its face, or as amplified by the statements of the person claiming to be aggrieved discloses, or where after investigation the Commission determines, that the charge and every portion thereof is not timely filed, or otherwise fails to state a claim under Title VII, the Commission shall dismiss the charge: *Provided, however*, That a charge which raises a claim exclusively under section 717 of Title VII shall also be dismissed.

(b) Where the Commission determines after investigation that there is not reasonable cause to believe that Title VII has been violated, the Commission shall dismiss the charge.

(c) Where the person claiming to be aggrieved fails to provide requested necessary information, fails or refuses to appear or to be available for interviews or conferences as necessary, fails or refuses to provide information requested by the Commission pursuant to § 1601.15(b), or otherwise refuses to cooperate to the extent that the Commission is unable to resolve the charge, and after due notice, the charging party has had thirty days in which to respond, the Commission may dismiss the charge.

(d) Where the person claiming to be aggrieved cannot be located, the Commission may dismiss the charge: *Provided*, That reasonable efforts have been made to locate the charging party and the charging party has not responded within 30 days to a notice sent by the Commission to the person's last known address.

(e) Where a respondent has made a settlement offer which is in writing and specific in its terms, the Commission may dismiss the charge if the person claiming to be aggrieved refuses to accept the offer: *Provided*, That the offer would afford full relief for the harm alleged by the person claiming to be aggrieved and the person claiming to be aggrieved fails to accept such an offer within 30 days after actual notice of the offer.

(f) A written notice of disposition, pursuant to paragraphs (a), (b), (c), (d), or (e) of this section, shall be issued to the person claiming to be aggrieved and to the person making the charge on behalf of such person, where applicable; in the case of a Commissioner charge, to all persons specified in § 1601.28(b)(2); and to the respondent. Such notice shall be issued together with the reasons therefor, and appropriate notices of right to sue shall be issued pursuant to § 1601.28.

(g) The Commission hereby delegates authority to its District Directors and to the Director of the Office of Compliance Programs, as appropriate, to dismiss charges, as limited by § 1601.21(d). The authority of the Commission to reconsider decisions and determinations as set forth in § 1601.21 (b) and (d) shall be applicable to this section.

§ 1601.20 Negotiated settlement.

(a) Prior to the issuance of a determination as to reasonable cause, the Commission will encourage the parties to settle the charge on terms that are mutually agreeable. District Directors and the Office of Compliance Programs shall have the authority to sign any settlement agreement which is agreeable to both parties. The Commission shall limit its undertaking in such settlements to an agreement not to process that charge further. Such settlements shall note that the Commission has made no judgment on the merits of the charge and the appropriateness of the settlement. Such an agreement shall not affect the processing of any other charge, including, but not limited to, a Commissioner charge or a charge, the allegations of which are like or related to the individual allegations settled.

(b) In the alternative, the Commission may facilitate a settlement between the person claiming to be aggrieved and the respondent by permitting withdrawal of the charge pursuant to § 1601.10.

§ 1601.21 Reasonable cause determination: Procedure and authority.

(a) Where a charge has not been settled or dismissed, the Commission shall, after making investigative efforts, determine whether reasonable cause exists to believe that Title VII has been violated. A determination as to reasonable cause is based on, and limited to, evidence obtained by the Commission and does not reflect any judgment on the merits of allegations not addressed in the determination.

(b) The Commission shall provide prompt notification of its determination under paragraph (a) of this section to the person claiming to be aggrieved, the person making the charge on behalf of such person, if any, and the respondent, or in the case of a Commissioner charge, the person named in the charge or identified by the Commissioner in the third-party certificate, if any, and the respondent. The Commission's determination is final when issued. The Commission may, however, on its own initiative reconsider its decision or the determination of any of its designated officers who have authority to issue Letters of Determination. When it does reconsider, the Commission shall provide prompt notification of its decision to amend, alter or revoke such decision or Letter of Determination to the person claiming to be aggrieved, the person making the charge on behalf of such person, if any, and the respondent, or in the case of a Commissioner charge, the person named in the charge or identified by the Commissioner in the third-party certificate, if any, and the respondent.

(c) Where a member of the Commission has filed a Commissioner charge, he or she shall abstain from making a determination in that case.

(d) The Commission hereby delegates to District Directors and to the Director of the Office of Compliance Programs the authority, in those cases in which previously issued Commission Decisions serve as precedent for the determination and in those cases in which the Commission's Guidelines provide a statement of policy which serves as authority for the determination, upon completion of an investigation, to dismiss a charge, make a determination, issue a Letter of Determination and serve a copy thereof upon the parties. Such determination is final when the Letter of Determination is issued. However, the Director of the Office of Compliance Programs and each District Director for determinations issued by his or her office may on his or her own initiative reconsider determinations. When he or she has done so, the issuing Director shall promptly notify the person claiming to be aggrieved, the person making the charge on behalf of such person, if any, and the respondent, or in the case of a Commissioner charge, the person named in the charge or identified by the Commissioner in the third-party certificate, if any, and the respondent of his or her decision to amend, alter or revoke such Letter of Determination.

(e) In making a determination as to whether reasonable cause exists, substantial weight shall be accorded final findings and orders made by designated 706 Agencies to which the Commission defers charges pursuant to § 1601.13. For the purposes of this section, the following definitions shall apply:

(i) "Final findings and orders" shall mean: (i) The findings of fact and order incident thereto issued by a 706 Agency on the merits of a charge; or

(ii) The consent order or consent decree entered into by the 706 Agency on the merits of a charge.

Provided, however, That no findings and order of a 706 Agency shall be considered final for purposes of this section unless

V 42 161 AUG 19 77 UM

the 706 Agency shall have served a copy of such findings and order upon the Commission and upon the person claiming to be aggrieved and shall have informed such person of his or her rights of appeal or to request reconsideration, or rehearing or similar rights; and the time for such appeal, reconsideration, or rehearing request shall have expired or the issues of such appeal, reconsideration or rehearing shall have been determined.

(2) "Substantial weight" shall mean that such full and careful consideration shall be accorded to final findings and orders, as defined above, as is appropriate in light of the facts supporting them when they meet all of the prerequisites set forth below:

(i) The proceedings were fair and regular; and

(ii) The practices prohibited by the State or local law are comparable in scope to the practices prohibited by Federal law; and

(iii) The final findings and order serve the interest of the effective enforcement of Title VII: *Provided*, That giving substantial weight to final findings and orders of a 706 Agency does not include according weight, for purposes of applying Federal law, to such Agency's conclusions of law.

§ 1601.22 Confidentiality.

Neither a charge, nor information obtained pursuant to section 709(a) of Title VII, nor information obtained from records required to be kept or reports required to be filed pursuant to section 709 (c) and (d) of Title VII, shall be made matters of public information by the Commission prior to the institution of any proceedings under this Title involving such charge or information. This provision does not apply to such earlier disclosures to charging parties or their attorneys, respondents or their attorneys, or witnesses where disclosure is deemed necessary for securing appropriate relief. This provision also does not apply to such earlier disclosures to representatives of interested Federal, State, and local authorities as may be appropriate or necessary to the carrying out of the Commission's function under Title VII, nor to the publication of data derived from such information in a form which does not reveal the identity of charging parties, respondents, or persons supplying the information.

Procedure To Rectify Unlawful Employment Practices

§ 1601.23 Preliminary or temporary relief.

(a) In the interest of the expeditious procedure required by section 706(f)(2) of Title VII, the Commission hereby delegates to the Director of the Office of Compliance Programs and each District Director the authority, upon the basis of a preliminary investigation, to make the initial determination on its behalf that prompt judicial action is necessary to carry out the purposes of the Act and recommend such action to the General Counsel. The Commission authorizes the General Counsel to institute an appropriate action on behalf of the Commission in such a case not involving a government, governmental agency, or political subdivision.

(b) In a case involving a government, governmental agency, or political subdivision, any recommendation for preliminary or temporary relief shall be transmitted directly to the Attorney General by the Director of the Office of Compliance Programs or the District Director. Nothing in this section shall be construed to prohibit private individuals from exercising their rights to seek temporary or preliminary relief on their own motion.

§ 1601.24 Conciliation: Procedure and authority.

(a) Where the Commission determines that there is reasonable cause to believe that an unlawful employment practice has occurred or is occurring, it shall endeavor to eliminate such practice by informal methods of conference, conciliation, and persuasion. In conciliating a case in which a determination of reasonable cause has been made, the Commission shall attempt to achieve a just resolution of all violations found and to obtain agreement that the respondent will eliminate the unlawful employment practice and provide appropriate affirmative relief. Where such conciliation attempts are successful, the terms of the conciliation agreement shall be reduced to writing and shall be signed by the Commission's designated representative and the parties. A copy of the signed agreement shall be sent to the respondent and the person claiming to be aggrieved who are signatories thereto.

(b) District Directors, the Director of the Office of Compliance Programs and their designated representatives are hereby delegated authority to enter into informal conciliation efforts. District Directors and the Director of the Office of Compliance Programs are hereby delegated the authority to sign conciliation agreements. When a suit brought by the Commission is in litigation, the General Counsel is hereby delegated the authority to negotiate and sign conciliation agreements where, pursuant to section 706(f)(1) of Title VII, a court has stayed proceedings in the case pending further efforts of the Commission to obtain voluntary compliance.

(c) Proof of compliance with Title VII in accordance with the terms of the agreement shall be obtained by the Commission before the case is closed. In those instances in which a person claiming to be aggrieved or a member of the class claimed to be aggrieved by the practices alleged in the charge is not a party to such an agreement, the agreement shall not extinguish or in any way prejudice the rights of such person to proceed in court under section 706(f)(1) of Title VII.

§ 1601.25 Failure of conciliation; notice.

Where the Commission is unable to obtain voluntary compliance as provided by Title VII and it determines that further efforts to do so would be futile or nonproductive, it shall, through the appropriate District Director, the Director of the Office of Compliance Programs, or their designated representatives, so notify the respondent in writing.

§ 1601.26 Confidentiality of endeavors.

(a) Nothing that is said or done during and as part of the informal endeavors of the Commission to eliminate unlawful employment practices by informal methods of conference, conciliation, and persuasion may be made a matter of public information by the Commission, its officers or employees, or used as evidence in a subsequent proceeding without the written consent of the parties concerned. This provision does not apply to such disclosures to the representatives of Federal, State or local agencies as may be appropriate or necessary to the carrying out of the Commission's functions under Titile VII: *Provided however*, That the Commission may refuse to make disclosures to any such agency which does not maintain the confidentiality of such endeavors in accord with this section or in any circumstances where the disclosures will not serve the purposes of the effective enforcement of Title VII.

(b) Factual information obtained by the Commission during such informal endeavors, if such information is otherwise obtainable by the Commission under section 709 of Title VII, for disclosure purposes will be considered by the Commission as obtained during the investigatory process.

Procedure Concerning the Institution of Civil Actions

§ 1601.27 Civil actions by the Commission.

The Commission may bring a civil action against any respondent named in a charge not a government, governmental agency or political subdivision, after thirty (30) days from the date of the filing of a charge with the Commission unless a conciliation agreement acceptable to the Commission has been secured: *Provided, however*, That the Commission may seek preliminary or temporary relief pursuant to section 706(f)(2) of Title VII, according to the procedures set forth in § 1601.23 hereof, at any time.

§ 1601.28 Notice of right to sue: Procedure and authority.

(a) Issuance of notice of right to sue upon request. (1) When a person claiming to be aggrieved requests, in writing, that a notice of right to sue be issued and the charge to which the request relates is filed against a respondent other than a government, governmental agency or political subdivision, the Commission shall promptly issue such notice as described in § 1601.28(e) to all parties, at any time after the expiration of one hundred eighty (180) days from the date of filing of the charge with the Commission, or in the case of a Commissioner charge 180 days after the filing of the charge or 180 days after the expiration of any period of rerefence under Section 706(d) of Title VII as appropriate.

(2) When a person claiming to be aggrieved requests, in writing, that a notice of right to sue be issued, and the charge to which the request relates is filed against a respondent other than a government, governmental agency or political subdivision, the Commission may issue such notice as described in § 1601.28(e) with copies to all parties, at any time prior to the expiration of 180 days from the date of filing the charge with the Commission: *Provided*, That the District Director or the Director of the Office of Compliance Programs has determined that it is probable that the Commission will be unable to complete its administrative processing of the charge within 180 days from the filing of the charge and has attached a written certificate to that effect.

(3) Issuance of a notice of right to sue shall terminate further processing of any charge not a Commissioner charge unless the Director of the Office of Compliance Programs, the appropriate District Director, or the General Counsel, determines at that time or at a later time that it would effectuate the purposes of Title VII to further process the charge. Issuance of a notice of right to sue shall not terminate the processing of a Commissioner charge.

(4) The issuance of a notice of right to sue does not preclude the Commission from offering such assistance to a person issued such notice as the Commission deems necessary or appropriate.

(b) Issuance of notice of right to sue following Commission disposition of a charge. (1) Where the Commission has found reasonable cause to believe that the Act has been violated, has been unable to obtain voluntary compliance with Title VII, and where the Commission has decided not to bring a civil action against the respondent, it will issue a notice of right to sue on the charge as described in § 1601.28(e) to:

(i) The person claiming to be aggrieved, or,

(ii) In the case of a Commissioner charge, to any member of the class who is named in the charge, identified by the Commissioner in a third-party certificate, or otherwise identified by the Commission as a member of the class,

and provide a copy thereof to all parties.

(2) Where the Commission has dismissed a charge pursuant to § 1601.19, it shall issue a notice of right to sue as described in § 1601.28(e) to:

(i) The person claiming to be aggrieved, or,

(ii) In the case of a Commissioner charge, to any member of the class who is named in the charge, identified by the Commissioner in a third-party certificate, or otherwise identified by the Commission as a member of the class,

and provide a copy thereof to all parties.

(3) The issuance of a notice of right to sue does not preclude the Commission from offering such assistance to a person issued such notice as the Commission deems necessary or appropriate.

(c) The Commission hereby delegates authority to District Directors and the Director of the Office of Compliance Programs to issue notices of right to sue, in accordance with this section, on behalf of the Commission.[1]

(d) Notices of right to sue for charges against Governmental respondents. Requests for notices of right to sue in cases where the respondent is a government, governmental agency, or a political subdivision thereof, shall be referred to the Attorney General, who has the authority to issue such notices.

(e) Content of notice of right to sue. The notice of right to sue shall include:

(1) Authorization to the aggrieved person to bring a civil action pursuant to section 706(f)(1) of the Act within 90 days from receipt of such authorization;

(2) Advice concerning the institution of such civil action by the person claiming to be aggrieved, where appropriate;

(3) A copy of the charge and a copy of the Commission's decision, determination, or dismissal, where appropriate.

§ 1601.29 Referral to the Attorney General.

If the Commission is unable to obtain voluntary compliance in a charge involving a government, governmental agency or political subdivision, it shall inform the Attorney General of the appropriate facts in the case with recommendations for the institution of a civil action by him or her against such respondent or for intervention by him or her in a civil action previously instituted by the person claiming to be aggrieved.

Subpart C—Notices to Employees, Applicants for Employment and Union Members

§ 1601.30 Notices to be posted.

(a) Every employer, employment agency, labor organization, and joint labor-management committee controlling an apprenticeship or other training program, as the case may be, shall post and keep posted in conspicuous places upon its premises where notices to employees, applicants for employment, members, and trainees, are customarily posted the following notice:

Equal Employment Opportunity is the Law

Discrimination is prohibited

By the Civil Rights Act of 1964, as amended, and by Executive Order Numbers 11246 and 11375.

Title VII of the Civil Rights Act of 1964, as amended, administered by the Equal Employment Opportunity Commission prohibits discrimination because of Race, Color, Religion, Sex, or National Origin, by employers with 15 or more employees, by Labor Organizations having a hiring hall or 15 or more members, by Employment Agencies, and by Joint Labor-Management Committees for Apprenticeship or Training

Any person who believes he or she has been discriminated against should contact:

The Equal Employment Opportunity Commission, 2401 E Street N.W., Washington, D.C. 20506 or any of its district offices.

Executive Order Numbers 11246 and 11375 administered by the Office of Federal Contract Compliance Programs prohibits discrimination because of Race, Color, Religion, Sex or National Origin, and requires affirmative action to ensure equality of opportunity in all aspects of employment by all Federal Government Contractors and Subcontractors, and by contractors and subcontractors performing work under a Federally assisted construction contract regardless of the number of employees in either case.

Any person who believes he or she has been discriminated against should contact:

The Office of Federal Contract Compliance Programs, U.S. Department of Labor, Washington, D.C. 21210.

(b) Copies of such notice may be obtained on request from the Commission.

(c) Section 711(b) of Title VII makes failure to comply with this section punishable by a fine of not more than $100 for each separate offense.

Subpart D—Interpretations and Opinions by the Commission

§ 1601.31 Request for interpretation or opinion.

Any interested person desiring a written interpretation or opinion from the Commission may make a request therefor. However, issuance of such interpretations or opinions is discretionary.

§ 1601.32 Contents of request: where to file.

A request for an "opinion letter" shall be in writing, signed by the person making the request, addressed to the Chairman, Equal Employment Opportunity Commission, 2401 E Street NW., Washington, D.C., 20506, and shall contain:

(a) The names and addresses of the person making the request and of other interested persons.

(b) A statement of all known relevant facts.

(c) A statement of reasons why the interpretation or opinion should be issued.

§ 1601.33 Issuance of interpretation or opinion.

Only (a) a letter entitled "opinion letter" and signed by the General Counsel on behalf of the Commission or (b) matter published and specifically designated as such in the Federal Register may be relied upon as "written interpretation or opinion of the Commission" within the meaning of section 713 of Title VII

Subpart E—Construction of Rules

§ 1601.34 Rules to be liberally construed.

These rules and regulations shall be liberally construed to effectuate the purpose and provisions of Title VII.

Subpart F—Issuance, Amendment, or Repeal of Rules

§ 1601.35 Petitions.

Any interested person may petition the Commission, in writing, for the issuance, amendment, or repeal of a rule or regulation. Such petition shall be

[1] *Formal Ratification*—Notice is hereby given that the EEOC at a Commission meeting on March 12, 1974, formally ratified the acts of the District Directors of EEOC District Offices in issuing notices of right to sue pursuant to Commission practice instituted on October 15, 1969, and continued through March 18, 1974. 39 FR 10178 (March 18 1974).

V 42161 AUG 19 77 UM

filed with the Equal Employment Opportunity Commission, 2401 E Street NW., Washington, D.C. 20506, and shall state the rule or regulation proposed to be issued, amended, or repealed, together with a statement of grounds in support of such petition.

§ 1601.36 Action on petition.

Upon the filing of such petition, the Commission shall consider the same and may thereupon either grant or deny the petition in whole or in part, conduct an appropriate proceeding thereon, or make other disposition of the petition. Should the petition be denied in whole or in part, prompt notice shall be given of the denial, accompanied by a simple statement of the grounds unless the denial be self-explanatory:

Subpart G—Case Processing Under Section 707 of Title VII

§ 1601.50 Purpose.

The General Counsel shall process charges designated for processing under the Commission's authority as set forth in Section 707 of the Act in accordance with this subpart. The provisions of this subpart shall not apply when such charges are processed under Subpart B of this part.

§ 1601.51 Delegation of authority.

The General Counsel is hereby delegated authority to give notice of and to defer charges to State and local 706 Agencies as defined in § 1601.3, to give notice of charges to respondents, to investigate charges, to sign and issue subpoenas, and to conciliate charges of employment discrimination.

§ 1601.52 Initiation of Section 707 charge.

Any member of the Commission may designate a charge for Section 707 processing under this subpart. Any related charge shall be processed under this subpart if the General Counsel determines that it should be consolidated with the charge designated for Section 707 processing by a member of the Commission.

§ 1601.53 Service of notice of charge.

Within 10 days of the filing of a charge, the General Counsel shall furnish the respondent with a notice of the charge (including the date, place and circumstances of the alleged unlawful employment practice) by mail or in person. The General Counsel need not furnish such notice if, prior to the designation of the charge for Section 707 processing, the notice has been furnished pursuant to § 1601.14.

§ 1601.54 Deferral.

(a) Where the alleged unlawful employment practice occurs in a State or political subdivision of a State which has a State or local law prohibiting the practice alleged and establishing or authorizing a State or local agency to grant or seek relief from such practice (or to institute criminal proceedings), the General Counsel shall notify, on behalf of the Commission, the appropriate State or local 706 Agency, as defined in § 1601.3, before taking any action with respect to a Commissioner charge.

(b) The General Counsel, on behalf of the Commission, shall not defer such Commissioner charge unless the State or political subdivision notified in paragraph (a) of this section within 10 days of receipt of such notice requests submission of the charge to its jurisdiction.

(c) Where deferral is made by the General Counsel in paragraph (b) of this section, the deferral shall be for no less than 60 days, unless a shorter period is requested.

(d) Charges filed by individuals shall be deferred pursuant to the provisions of § 1601.13, except that they shall be deferred by the General Counsel.

§ 1601.55 Investigation.

The General Counsel shall investigate any charge designated for Section 707 processing or any charges consolidated with that charge pursuant to § 1601.52.

§ 1601.56 Issuance of subpoenas; petitions to revoke subpoenas; enforcement of subpoenas.

(a) To effectuate the purposes of Title VII the General Counsel of the Commission shall have the authority to sign and issue a subpoena requiring:

(1) The attendance and testimony of witnesses;

(2) The production of evidence including, but not limited to books, records, correspondence, or documents, in the possession or under the control of the person subpoenaed; and

(3) Access to evidence for the purposes of examination and the right to copy.

The subpoena shall state the name and address of the issuer; and identify the person or evidence subpoenaed, and the person to whom and the place, date, and time at which it is returnable or the nature of the evidence to be examined or copied, or the date and time when access is requested. A subpoena may be returnable to any attorney designated in the subpoena. The General Counsel shall not issue a subpoena upon the request of a person filing a charge, a person on whose behalf a charge was filed or a respondent.

(b) Any person served with a subpoena who intends not to comply with the subpoena shall, within five days (excluding Saturdays, Sundays and Federal legal holidays) of the service of the subpoena, petition the Commission in writing to revoke or modify the subpoena. The petition shall be served on the Director of the Office of Compliance Programs by mail at the Equal Employment Opportunity Commission, 2401 E Street, NW., Washington, D.C. 20506, and a copy shall be served on the Commission attorney to whom the subpoena is returnable. The petition shall separately identify each portion of the subpoena with which the petitioner does not intend to comply and shall state, with respect to each portion, the grounds upon which petitioner relies. A copy of the subpoena shall be attached to the petition and shall be designated "Attachment A." Within eight days of receipt, or as soon thereafter as practicable, the Commission shall pass on the petition and shall serve a copy of its determination on the petitioner. For the purposes of this section, service shall be made and proof thereof established pursuant to Section 11(4) of the National Labor Relations Act, as amended, 29 U.S.C. Section 161(4), as made applicable to the proceeding hereunder by Section 710 of Title VII, 42 U.S.C. (Supp. II) 2000e9.

(c) If any person fails to comply with a subpoena, the General Counsel may institute enforcement proceedings in the appropriate district court pursuant to Section 11(2) of the National Labor Relations Act, as amended, 29 U.S.C. 161(2).

(d) Witnesses who are subpoenaed pursuant to Section 1601.56(a) shall be entitled to the same fees and mileage that are paid witnesses in the courts of the United States.

§ 1601.57 Commission reasonable cause finding.

Upon completion of the investigation, the Commission shall determine whether there exists reasonable cause to believe that the respondent is engaged in a pattern or practice of unlawful discrimination within the meaning of section 707 (a) of Title VII. A finding of no reasonable cause shall constitute dismissal of the charge.

§ 1601.58 Voluntary compliance; settlements; Commission authority to file suit.

A finding of reasonable cause by the Commission shall be deemed to authorize the General Counsel to endeavor to eliminate the alleged unlawful employment practices by informal methods of conference, conciliation and persuasion. Should such endeavors fail to produce a conciliation agreement satisfactory to the General Counsel, the General Counsel may commence litigation upon approval by the Commisison.

§ 1601.59 Notice to persons claiming to be aggrieved and persons filing charges on behalf of such persons.

In any charge designated for processing under this subpart, the General Counsel shall issue the notice as required by § 1601.28.

Subpart H—706 Agency Designation Procedures

§ 1601.70 706 Agency Designation.

(a) Because of the large number of State and local fair employment practice agencies, only those agencies which notify the Commission of their qualifications under section 706(c) of Title VII and this section and request designation as "706 Agencies" or "Notice Agencies" or both will be eligible for such designation. Such notification must be submitted by written request to the Director of the Office of Compliance Programs. The request shall include the following materials and information:

(1) A copy of the agency's fair employment practices law and any rules, regulations and guidelines of general interpretation issued pursuant thereto.

(2) A chart of the organization of the agency responsible for administering and enforcing said law.

(3) The amount of funds made available to or allocated by the agency for fair employment purposes.

(4) The identity and telephone number of the agency attorney whom the Commission may contact in reference to any legal questions that may arise in the process of its review of the agency's application.

(5) A statement certifying the following:

(i) That the State or political subdivision has a fair employment practice law;

(ii) That such law authorizes the applicant agency to grant or seek relief from employment practices found to be illegal under such law or that it authorizes the agency to institute criminal proceedings; and

(iii) That such agency has been established and is operational and processing charges filed under such law.

(b) Where both State and local 706 Agencies exist, the Commission reserves the right to defer to the State 706 Agency only. However, if the Commission determines that it would best serve the purposes of the Act, it may defer to either or both State and local 706 Agencies.

(c) The continued designation of a 706 Agency for certain bases of discrimination will be dependent upon the 706 Agency's continuing operation and ability to grant or seek relief or to institute criminal proceedings with respect to those bases of discrimination.

§ 1601.71 Commission determinations on 706 agency applications.

The Commission, after examining the materials and application required in § 1601.70(a) and after applying criteria outlined in section 706(c) of Title VII, shall make a determination.

(1) If the Commission determines that an agency shall be designated as a 706 Agency, it shall notify the agency that it proposes to issue such designation. Such proposed designation shall be published in the FEDERAL REGISTER and shall provide any person or organization not less than 15 days in which to file written comments with the Commission. If after evaluating any comments so received, the Commission is still of the opinion that issuance of the proposed designation as published in the FEDERAL REGISTER is appropriate, it shall effect such designation by issuance and publication of an amendment to § 1601.74. Thereafter, the procedure in § 1601.13(c) and § 1601.13(f) shall be followed for charges in the jurisdiction of the 706 Agency, except as modified by agreement pursuant to § 1601.13(d).

(2) If the Commission determines that any agency shall not be designated as a 706 Agency, it shall notify the applicant agency of its decision and such notice shall provide the reason(s) why it proposes not to designate the agency and shall grant it not less than 15 days to request a conference concerning the matter in accordance with § 1601.73.

(3) Where the Commission determines that a State or local agency does not come within the definition of a 706 Agency for purposes of a particular basis of discrimination or where the agency applies for designation as a Notice Agency, the Commission shall notify that agency of the filing of charges for which the agency is not a 706 Agency. For such purposes the State or local agency will be deemed a Notice Agency.

§ 1601.72 706 Agency performance standards.

(a) The continued designation of a 706 Agency will be dependent upon the 706 Agency's willingness and ability to administer its law in such a manner that, in fact, the practices prohibited are comparable in scope to those practices prohibited under Federal law and satisfy the performance standards set forth below:

(1) In all cases where the 706 Agency finds cause to credit the allegations of a charge, it shall effectively eliminate the discrimination and provide for full compensatory and prospective relief consistent with applicable Federal law, except where State or local law authorizes no relief except to allow the agency to institute criminal proceedings. Where State or local law does no more than authorize the agency to institute criminal proceedings, the agency must utilize its authority effectively to eliminate the discrimination.

(2) In all cases where the 706 Agency enters into a conciliation agreement, consent order, or order after public hearing, it shall include in any such agreement or order mechanisms for monitoring compliance with the terms thereof and mechanisms for enforcing compliance in the event any terms thereof are not implemented.

(b) The Commission may upon its own motion, withdraw the designation as a 706 Agency previously issued to any agency based upon:

(1) Reconsideration of the request and materials and the information referenced in § 1601.70; or,

(2) consideration of the agency's performance as set forth in paragraph (a) of this section.

Whenever the Commission has reason to believe that such designation as a 706 Agency no longer serves the interest of effective enforcement of Title VII, it may, after following the procedures below, including the opportunity for a conference provided for in § 1601.73, withdraw such designation. Before taking such action it shall notify the 706 Agency of its proposed withdrawal of such designation. Such notification shall set forth the reasons for the proposed withdrawal and provide the agency not less than 15 days to submit data, views, and arguments in opposition and to request a conference in accordance with § 1601.73. Such proposed withdrawal of designation shall also be published in the FEDERAL REGISTER and shall provide any persons or organizations who take an interest at least 15 days in which to file written comments on the proposal with the Commission and to request a conference. If a request for a conference in accordance with § 1601.73 is not received within the time period provided, the Commission shall evaluate any arguments or comments it has received from the agency and from any persons and organizations who take an interest. If, after such evaluation, the Commission still is of the opinion that designation should be withdrawn because it has determined that such designation no longer serves the interest of effective enforcement of Title VII, the Commission shall so notify the Agency. The withdrawal shall be effected by the issuance and publication of an amendment to § 1601.74.

§ 1601.73 706 Agency Conference.

In order to provide a State or local agency full opportunity to present its views whenever, pursuant to § 1601.71 or § 1601.72(b), a conference is requested within the time allowed by said section for making such request, the Executive Director or his or her designee shall hold such a conference. Said conference official shall issue a pre-conference order. The order shall indicate the issues to be resolved and any initial procedural instructions which might be appropriate for the particular conference. It shall fix the date, time, and place of the conference. The date shall not be less than 20 days after the date of the order. The date and place shall be subject to change for good cause.

(1) A copy of such pre-conference order shall be served on the State or local agency. After service of the order or of a notice designating a conference officer, and until such officer submits his or her recommended determination, all communications relating to the subject matter of the conference shall be addressed to him or her. The conference officer shall have authority to regulate the course and conduct of the conference. A transcript shall be made of the proceedings at the conference. The transcript and all comments and petitions relating to the proceedings shall be made available for inspection by interested persons.

(2) The conference officer shall prepare his or her proposed findings and recommended determination, a copy of which shall be served on the agency. Within 20 days after such service the agency may file written exceptions. After the expiration of the period for filing exceptions, the conference officer shall certify the entire record, including his or her proposed findings, and recommended determination and exceptions thereto to the Commission, which shall review the record and issue a final determination.

(3) Such determination shall become effective by the issuance and publication of an amendment to § 1601.74.

§ 1601.74 Designated 706 and notice agencies.

(a) The designated 706 Agencies are:

Alaska Commission for Human Rights.
Alexandria Human Rights Office.
Allentown Human Relations Commission.
Arizona Civil Rights Division.

V 42161 AUG 19 77 UM V

Baltimore Community Relations Commission.
Bloomington Human Rights Commission.
California Fair Employment Practices Commission.
Charleston Human Rights Commission.
Colorado Civil Rights Commission.
Connecticut Commission on Human Rights and Opportunities.
Dade County Fair Housing and Employment Commission.
Delaware Department of Labor.
District of Columbia Office of Human Rights
East Chicago Human Relations Commission.
Evansville (Indiana) Human Relations Commission.
Fairfax County Human Rights Commission.
Fort Wayne (Indiana) Metropolitan Human Relations Commission.
Fort Worth (Texas) Human Relations Commission.
Gary Human Relations Commission.
Howard County (Maryland) Human Rights Commission.
Hawaii Department of Labor and Industrial Relations.
Idaho Commission on Human Rights.
Illinois Fair Employment Practices Commission.
Indiana Civil Rights Commission.
Iowa Commission on Civil Rights.
Kansas Commission on Civil Rights.
Kentucky Commission on Human Rights.
Lexington-Fayette Urban County Human Rights Commission.
Madison (Wisconsin) Equal Opportunities Commission.
Maine Human Relations Commission.
Maryland Commission on Human Relations.
Massachusetts Commission Against Discrimination.
Michigan Civil Rights Commission.
Minneapolis Department of Civil Rights.
Minnesota Department of Human Rights.
Missouri Commission on Human Rights.
Montana Commission for Human Rights.
Montgomery County Human Relations Commission.
Nebraska Equal Opportunity Commission.
Nevada Commission on Equal Rights of Citizens
New Hampshire Commission for Human Rights.
New Jersey Division on Civil Rights, Department of Law and Public Safety.
New York City Commission on Human Rights.
New York State Division of Human Rights.
Ohio Civil Rights Commission.
Oklahoma Human Rights Commission.
Omaha Human Relations Department.
Oregon Bureau of Labor.
Orlando (Florida) Human Relations Department.
Pennsylvania Human Relations Commission.
Philadelphia Commission on Human Relations.
Pittsburgh Commission on Human Relations.
Prince Georges County (Maryland) Human Relations Commission.
Rhode Island Commission for Human Rights.
Rockville (Maryland) Human Rights Commission.
St. Paul Department of Human Rights.
Seattle Human Rights Commission.
Sioux Falls (South Dakota) Human Relations Commission.
South Bend (Indiana) Human Rights Commission.
South Carolina Human Affairs Commission.
South Dakota Human Relations Commission.
Springfield (Ohio) Human Relations Department.
Tacoma Human Rights Commission.
Utah Industrial Commission.
Vermont Attorney General's Office, Civil Rights Division.
Virgin Island Department of Labor.
Washington State Human Rights Commission.
West Virginia Human Rights Commission.
Wheeling Human Rights Commission.
Wichita Commission on Civil Rights.
Wisconsin Equal Rights Division, Department of Industry, Labor and Human Relations.
Wyoming Fair Employment Practices Commission.

(b) The designated Notice Agencies are:

Arkansas Governor's Committee on Human Resources.
Florida Commission on Human Relations.
Georgia Governor's Council on Human Relations.
Montana Department of Labor and Industry.
North Dakota Commission on Labor.
Ohio Director of Industrial Relations.
Raleigh (North Carolina) Community Relations Commission.

APPENDIX A.—RESOLUTION ADOPTED AT COMMISSION MEETING OF JULY 20, 1977

CHANGES IN THE PROCEDURES, PRACTICES AND ORGANIZATION OF THE EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

I. Purpose

The Commission reaffirms its commitment to the full, fair and effective implementation of rights created by Congress in Title VII of the Civil Rights of 1964 and expanded in the Equal Employment Opportunity Act of 1972. The broad and sympathetic interpretation of these rights by the courts and by the Commission, was ratified by the Congress in 1972 when it gave additional enforcement powers to the Commission. Experience dictates that the practices and procedures of the Commission be revised to improve our capacity to carry out the mission of the agency.

Accordingly, the Commission hereby revises its overall programs, and authorizes the necessary modifications of practices, procedures and organization as set forth below.

II. "Model Office" Approach Implementation

The program outlined below is to be initiated through a "model office" approach. Selected offices, not to exceed five in the first instance, shall be chosen to be organized in accordance with the plan submitted to the Commission on July 20, 1977. The experience gained in these model offices will be applied to successive offices until the entire field structure of the Commission has been shaped in accordance with the principles outlined below. The existing regional office and litigation center structure will continue until a phasing plan has been approved.

III. Modification of Charge-Processing Practices and Procedures to Establish a National Uniform Charge-Processing System

(1) *Rapid Charge-Processing.* A comprehensive intake and counseling procedure, face-to-face fact-finding conferences, and emphasis on early settlement procedures shall be utilized in the processing of individual charges.

(2) *Systematic Approach to Backlog.* A systematic program to evaluate, stabilize and reduce the backlog shall be implemented by specialized personnel in every district office on a continuing basis. The program shall include management review of all cases where the investigation has not been completed, charging party contact, consolidation of charges, and an attempt to settle every case.

(3) *Reasonable Cause Decision to be a Litigation Decision.* The reasonable cause decision shall constitute a determination that the claim has sufficient merit to warrant litigation if the matter is not thereafter conciliated by the Commission or the charging Party. Decisions authorizing litigation will be made by the Commission.

(4) *Integration of Compliance and Litigation Functions.* District offices shall report directly to headquarters. Litigation shall normally be conducted in the district office in which the charge was filed. General Counsel and administrative functions shall be organized in accordance with the chart dated July 20, 1977. This shall be subject to Paragraph II.

(5) *Systemic Discrimination Program.* A Systemic Discrimination staff shall be established in each district office and shall function in accordance with a Systemic Discrimination Program developed in headquarters. This program shall be based on information contained in EEO reports and other information available, and shall be designed to identify and correct employment practices which have excluded or restricted employment opportunities of minorities and women.

IV. Training Programs

Training programs to implement the new system shall be developed and managed centrally in order to insure uniform standards.

V. Management Accountability

The Performance Management System shall be redesigned to measure and monitor the new procedures and to evaluate staff performance. This new management system shall be applied to all operations of the Commission.

VI. Affirmative Implementation of Title VII

A headquarters unit shall be established with the function of aiding the Commission in setting policies, issuing guidelines, regulations, other general rulings, holding hearings and otherwise seeking to implement Title VII through the affirmative use of administrative process.

VII. Implementation Procedure

The Commission hereby authorizes the implementation of the above principles. The Chair shall report monthly on the progress of implementation. Changes in regulations or manuals necessary to the implementation of the principles shall be submitted to the Commission for its approval.

APPENDIX B.—STATEMENT OF ELEANOR HOLMES NORTON, EQUAL EMPLOYMENT OPPORTUNITY COMMISSION, WEDNESDAY, JULY 27, 1977

Mr. Chairman, distinguished members of the Committee, I am pleased to be here today to present to you the first results of our efforts to reshape the Equal Employment Opportunity Commission. I shall be presenting a comprehensive plan—much of it already being implemented—that can only be characterized as the total redesign of the Commission and its functions. It represents the most extensive overhaul of the agency structure and processes since the establishment of the Commission in 1965. Among its purposes are to integrate the litigation powers Congress gave the Commission in 1972 with the pre-existing investigative and conciliation functions of the agency to overcome a much criticized dual agency structure where investigators work at cross purposes with lawyers instead of in partnership to fruitfully develop cases.

But I stress that the plan is much more than a reorganization or structural redesign, as important as that is. Its chief purpose is functional: to improve the enforcement of Title VII. For it is the operations of the Commission where the most serious problems exist—in case processing, litigation of significant cases, internal management and information systems, and the like. Thus, structure has been addressed only as a means of improving specific functions.

I am pleased to announce that this plan was drawn with the explicit cooperation of the sitting commissioners, Vice Chair Ethel Bent Walsh, Commissioner Daniel Leach, and the General Counsel Abner Sibal, utilizing their staffs alongside my own. The Commission unanimously approved the plan last Wednesday. The development and approval of such fundamental changes in so short a time could simply not have been accomplished otherwise. I have been at EEOC only six weeks. Only the most disciplined self-analysis drawing all parties into the process could have produced this result in that brief time. Thus, in this first important effort of my term, I believe I have reversed the long-existing situation where commissioners were inadequately informed and utilized and insufficiently involved in policy-making, a result which in the past contributed to internal conflict that has taken its toll at the agency. We believe the intensive cooperation of Vice Chair Walsh, Commissioner Leach, and General Counsel Sibal in producing this plan in itself represents a significant accomplishment. I intend to pursue reform of the agency on each and every issue in this collegial fashion.

With your permission, I should like to insert into your record a copy of the resolutions unanimously adopted by the Commission on July 20, 1977, setting the reform of the Commission in motion. The changes which we have adopted and are now implementing include: [1]

(1) Introduction of a new Rapid Case Processing System with emphasis on expanded intake procedures, face-to-face fact-finding and settlement.

(2) A separate backlog case processing system to give systematic and priority attention to presently back-logged cases.

(3) A "direct service" consumer oriented structure patterned after the National Labor Relations Board, introduced through a model office approach in three to five locations now being selected.

(4) Integration of litigation, investigation and conciliation functions.

(5) Establishment of a program to deal with systemic discrimination, addressing first those whose actions have demonstrated clear disregard for the purpose of Title VII.

(6) A new Program Office to place the Commission in an affirmative posture for developing Title VII through guidelines, interpretations, and other rulings.

(7) A new management accountability and information system to insure that the above programs take hold and are implemented.

(8) A national training program and standards to assure that the staff will be able to effectively administer the new systems.

This set of changes was hammered out in intensive and detailed discussions during the last six weeks, but they did not spring full blown in that short period of time. Rather they build upon studies made by the staff of this Committee, by the General Accounting Office, by the Commission on Civil Rights and by other analysts over a number of years, reflecting a growing concern over the quality of the implementation of Title VII. Thus we are able to move confidently ahead knowing that these first steps follow the direction that most studies of the Commission agree are appropriate to improve the performance of the agency.

I would like to make one important point before I proceed. We are deeply concerned to mitigate problems that change will bring to our employees. The installation of new systems will inevitably involve the unfamiliar and some dislocation among staff can be expected. We have already had, and will continue to have, appropriate discussions with the representatives of the employees concerning these matters. I come to the EEOC with a record of deep respect for the rights of employees and am confident that the necessary changes can be installed with the cooperation and understanding of the present staff. This is especially important in an agency which in the past has had serious personnel problems We will do everything possible to minimize hardship on our employees that may come out of the effort to better serve the public.

I would like to discuss the principles and the basic plan which we have adopted to reform Commission activities.

(1) *Rapid Charge Processing System.* The first principle that has received priority is the need for expedited charge resolution. I am determined that we will no longer deny justice by delaying it. We are therefore instituting a rapid charge processing system to handle new complaints as they come in.

This will involve a much more detailed pre-charge counseling and interviewing process than took place under the old system. There has been inadequate analysis of the problems of complainants at the time they seek aid of the EEOC. As a consequence we take many cases which are clearly outside our jurisdiction, or where detailed inquiry of the complainant would establish that he or she did not have a viable Title VII claim. For example, a Black person was rejected on the basis of his resume alone but the resume provided no direct or indirect indication of race through name, address, schools, work history, or other information. Intake officers will be trained to make meaningful referrals elsewhere to parties whose claims should not become a part of our caseload.

At the same time we fail to seek emergency relief for those complainants who may be entitled to it. The old system makes it difficult to secure temporary restraining orders in situations where an employee is about to be fired, or to be disciplined for filing a charge, or where acts of overt discrimination are continuing, or in similar situations. The new system will correct both of these problems.

The detailed intake interview with the complainant will enable the drafting of a precise charge and the preparation of a request for information from the respondent directed to the specific issues in the case. This interrogatory will be sent to the respondent along with a copy of the charge within 10 days. The respondent will be on notice as to what precisely is involved in the charge of discrimination.

In the history of the Commission, there have been periods when charges were not served in a timely manner upon respondents. Originally the practice of serving the charge only when the investigator arrived at the respondent's establishment was developed for fear of possible retaliation against those who filed charges with the Commission. Very few episodes of retaliation under Title VII have occurred. I do not believe that the delayed service of charge is any longer appropriate. Congress in 1972 indicated that employers should receive a notice of the charge within ten days of its filing. I now believe that it is appropriate to serve the charge itself as part of our rapid processing system and intend to so recommend to the Commission. Our rapid charge processing system will be possible only if respondents are promptly served with the complaint. When a respondent becomes aware that a charge has been filed, it will have the option to secure a just resolution of the grievance without further processing. The respondent will be encouraged to settle early in the process.

The importance of encouraging settlement of Title VII claims cannot be overstated. The Congressional intent to encourage settlement is clear in the statutory language mandating conciliation. But the practical imperative is even more demanding: With a filing rate this year projected at more than 80,000 charges, no formal process can avoid being swamped. Therefore if the system is to function, it must use resolution techniques which do not require exhausting the entire process. Swamping of the process harms complainants and respondents alike and threatens the very existence of charge-processing as a system.

Thus we must vigorously pursue settlement as the primary method of administrative enforcement of the law and as the only technique which can secure a remedy for a significant number of complainants in a timely fashion. All of our procedures are being shaped with the objective of encouraging prompt and fair conciliations.

We believe that early settlement practice will produce fair results for individual complainants. During my tenure at the New York City Commission on Human Rights, almost 50% of complainants chose to settle in the first three months after the case was filed. Many of these cases could not have survived the rigor of the more formal parts of the case process and would have gotten no remedy at all if settlement had not been introduced as a possibility early and aging of the case foreclosed. At the same time, we will continue to recognize the individual right to pursue Title VII claims through litigation.

If initial attempts at settlement fail, the case moves to the next step in the process: a fact-finding conference. This is a new investigative technique for the Commission. It has been used to good effect in New York City and some other Sec. 706 deferral agencies. We believe this new technique will: (1) Substantially reduce the time it takes to investigate a case; (2) improve the quality of the information which the Commission obtains; and (3) enhance the possibility of settlement. Prior to the conference, information which has been requested as a result of the initial intake interview with the charging party is supplied to an investigator by the respondent. The investigator presides at the fact-finding conference. Both charging party and respondent are present. The investigator questions both parties to develop a clear understanding of the factual background and the nature of the particular dispute. At the same time, the fact-finding conference provides a way for the parties to develop a deeper understanding of each other's position, which in turn provides a realistic atmosphere conducive to serious settlement discussions. The settlement effort may be concluded at the fact-finding conference, or within a short time thereafter. If settlement is not achieved the facts developed at the conference may be sufficient to allow an early decision that the case does not have merit or that reasonable cause should be found.

However, if the facts developed through the fact-finding conference do not clearly establish that there is "no cause" or that the respondent has violated the statute, further in-depth investigation will take place. The familiar techniques of interrogatories, field visits, witness interviews and document examination will be utilized. But the time required for this investigation will be substantially reduced because of information de-

[1] While the general outline of the programs discussed here have been submitted to the Commission, detailed regulations and manual changes including some of the details discussed in this testimony will be submitted for specific approval pursuant to Paragraph VI of the Resolution of July 20, 1977.

V 42 161 AUG 19 77 UM V

veloped and issues defined at the fact-finding conference and at intake.

There is another matter which I wish to touch upon in connection with the new method of taking charges and conducting the investigation. In the past the Commission has tended to construe charges of discrimination broadly and has sometimes encouraged complainants to file charges that contain broad and general allegations of discrimination. The purpose of the Commission in encouraging and accepting such charges was clearly laudatory. It was to use the individual charges to secure evidence concerning possible discrimination against any employee. This was a necessary approach because the Commission did not have any other effective program to deal with systemic discrimination. Under those conditions, the broadening of the charge to deal with discrimination made sense.

History, however, has demonstrated that this approach has had an adverse effect on individual complainants. The broad investigation has turned out to be long and delayed and has contributed substantially to the build-up of aging cases in the backlog. Very few of these cases have resulted in "cause" findings, conciliation agreements, or Commission-initiated litigation. The aging of the case while the broad investigation was conducted has, in turn, made it more difficult to obtain relief for the individuals who initially filed charges.

Thus the effort of the agency to secure justice as quickly as possible to those who sought the aid of the Commission was frustrated by the long and involved investigation. Since many of these investigations did not prove fruitful, the result was that neither the complainant's interest nor the general public interest in eliminating employment discrimination was served.

We will better serve both the complainant's interest and the larger public interest in eliminating discrimination by separating insofar as possible the processing of the individual complaint and the elimination of systemic discrimination. Thus we will construe complaints as relating to the harm that the individual has suffered. We will investigate that harm. In that investigation, of course, we will examine the extent to which the employers' restriction or exclusion of minorities or women as a class may have contributed to a particular individual employment decision. However, we will do this by a sharply focused investigation of the general statistics of the employer and the activities in the particular unit in which the discrimination is alleged to have occurred. Thus individuals will no longer be able to automatically invoke a systemic investigation by the Commission. However, individuals or organizations will be able to formally petition for a systemic inquiry. This petition will then be considered by the systemic program, which I will discuss shortly.

We realize that there cannot be a rigid separation of individual and systemic matters and that there will be circumstances in which it is desirable to expand the individual complaint investigation into "like and related" matters and conduct a full scale investigation of the respondent's operations. But this will be done only after a careful analysis and conclusion that such a step would further the overall purposes of Title VII.

This represents an important policy change. By affirmatively developing systemic or class cases we expect to maximize our impact. The Commission has been unable to deploy its resources to target the most serious instances of discrimination. Instead, it has allowed individual complainants to randomly choose targets and issues. This has diverted the use of the Commission's own expertise and policy-making responsibility to affirmatively, rationally, and fairly choose class-action targets. The result has been to dilute the impact of the Commission on discrimination against minorities and women. The decision to separate individual from class claims is therefore an important corrective.

(2) *Backlog Case Processing System.* The next principle that underlies this plan, one that necessarily has high priority, is to systematically reduce the backlog of cases. We will give effective priority treatment on a systematic and continuous basis to the cases that are presently in the system until the inventory is at a reasonable and manageable level. Alongside the rapid charge processing system will be an independently staffed backlog charge processing system. This new system utilizes a positive management approach to the backlog. It involves grouping files by respondent and selecting those with the largest number of charges for first review. A special management review team in each office will oversee the endeavor and will move each case forward with the next steps delineated, staff assignments made and time frames set. After special referral of cases with litigation potential, we will inquire of every charging party concerning his or her desire to proceed with the case. Some charges will be closed at this point. We will then contact by phone or visit every respondent to encourage it to engage in no-fault settlement discussions. If settlement fails, investigative interrogatories will be sent immediately with mandated follow-up to conclude the case as quickly as possible.

These cases will be processed under current Commission policies and procedures except that we will limit the scope of the case to individual matters unless we make a conscious decision that a systemic approach is required. As mentioned earlier, many charging parties whose cases are in the backlog have been denied justice in part by the very breadth of the charges which the Commission itself sometimes had encouraged them to file.

I reemphasize that this approach to the backlog will be continuous and systematic. This distinguishes this effort from the crash programs of the past that temporarily increased productivity by disposing of large numbers of charges. While certain defects in procedures were criticized, those efforts have generally been praised. Unfortunately, many of the sound management innovations were not carried over into permanent streamlining of the Commission's overall processes.

It is important to note that the backlog figure of nearly 130,000 cases is deceptive and misleading. Worse, it is useless for operational and managerial purposes. It appears that EEOC has allowed "backlog", a term meaning old cases, to be used synonymously with "inventory", a reference to all cases received. Cases that were filed years ago and cases that were filed yesterday are reported to the Congress and the public as "backlog". Current subcategories make no sense and do not measure the work of the agency. The Commission is designing a reporting-measurement system which will enable it to know the stage of the charge and how long it has been there as against how long it should be there under management goals and standards for charge processing. The information systems we have found at the Commission must be totally revised to make such information available. For example, charges categorized under "pending assignment" may have been substantially investigated but moved back into the category upon the departure or transfer of the investigator previously handling the case. We are moving to redesign this information system to reflect the location of the cases in the various processes of the agency. We will draw upon the experience of the National Labor Relations Board which uses "time in stage" standards rather than gross numbers. This approach gives precise information on the age of cases rather than lumping all cases together as part of an undifferentiated backlog.

The systematic approach to backlog through a separate charge processing system has several advantages. It allows immediate conversation to a new system with rapid charge processing staff. It assures special and priority treatment of the backlog in a systematic way. It avoids the total absorption of personnel in backlog cases allowing instead for planned allocation of staff among all the priorities of the system.

(3) *Headquarters-to-Field Service Oriented Model Offices.* The third principle which has guided reform is direct service to those who have been discriminated against through a lean rather than a multi-tiered model. This will mean the adoption of direct headquarters-to-field model offices and, I would propose, the eventual elimination of intermediate regional offices and regional litigation centers. In the new model offices, investigators and lawyers will work together, handling cases. We are introducing a new technique, a formal investigator-lawyer conference, to eliminate the much publicized conflict over standards between the legal and investigative staffs.

In adopting a direct service model, we have drawn heavily upon the experience provided by the National Labor Relations Board. The Board has had forty years of experience in complaint processing using a direct headquarters-to-field office system. We intend to move carefully toward such a system because it will involve all staff in service delivery, where the emphasis of our operations must be to meet mounting workload requirements.

Under the present structure cases are litigated from five regional centers while the 32 district offices are supervised by seven regional offices. Thus, there are situations in which the Commission has three separate offices—a district office, a regional office and a regional litigation center in the same city—but they often are not in the same building and too often have little communication. The difficulty of communication created by the fact that litigators are physically separated from investigators means that there is frequently a wide gap between what the investigators secure and what the lawyers require. We believe that the integration of litigation and investigation functions in a single field office will not only enable the more rapid processing of cases but will improve the ability among the staff to achieve effective enforcement.

As we establish this unified field office system we recognize that there will be many problems that cannot be foreseen and we intend to introduce the system very carefully. We will begin in 3 to 5 offices now being selected to test the new process. As we move forward to successive offices we will build on the experience we have gained in instituting the procedures in the first set of offices.

During the period the new structure is being phased in, we will maintain the existing structure to provide continuity of management and case handling to allow adequate planning for reassignment of staff, and to provide advance and adequate training and sufficient time to adapt to the new model.

The designation of the model offices has been put on the Commission agenda for next Tuesday, August 2, 1977.

(4) *Integration of Litigation, Investigation, and Conciliation Functions.* The fourth principle of reform has been that there must be an integration of the investigation and conciliation processes with the power to litigate given to the Commission by Congress in 1972. Virtually all who have studied the Commission's processes have made this recommendation, including this Subcommittee. In the last six weeks we believe we have solved the difficult technical problem of how to accomplish the integration. The integration will take place as Chart A (attached) indicates at the point of the decision that there is reasonable cause to believe that there may be discrimination.

Historically the finding of reasonable cause meant only that there was sufficient evidence to attempt to settle the case. This definition was developed when the Commission first went into operation in 1965. At that time there was a great uncertainty as to the legal concept of discrimination and hence a need for a finding by the Commission before conciliation was attempted. An attempt to settle a case without a reasonable cause finding back in 1965 would have left the parties in confusion as to what the law required. Thus it was appropriate that the standard for reasonable cause be sufficient evidence to warrant settlement efforts.

Today the vast expansion, strength, and definition of the law concerning discrimination and the widespread knowledge of Title VII among those who deal in employment matters mean that we no longer need a reasonable cause decision as a predicate for settlement efforts. The high settlement rate of the New York City Commission, discussed earlier was almost all obtained before the finding stages. It is time EEOC moved to dispose of cases before a finding to get maximum justice for complainants before cases are allowed to deteriorate through aging.

The Commission continued to define reasonable cause to mean that conciliation should be attempted even after Congress gave it the power to litigate in 1972. Since this standard required less evidence than that necessary to go to litigation, few cases in which reasonable cause was found were taken to court. This meant that the Commission did not secure leverage in settlement from the prospect of litigation, and that there was a double standard—one for conciliation and one for litigation.

As we move into our new system we will redefine reasonable cause to mean that the case is worthy of litigation. The attorneys and investigators—now located into the same office—will participate in a litigation-investigation conference before the finding of reasonable cause. With the knowledge that the reasonable cause decision means the case is litigation-worthy, conciliation efforts will be much more successful. Those cases which do not meet the new standard of reasonable cause will be "no cause" and a notice of right-to-sue issued. We will explain that the standard of reasonable cause has been upgraded so as not to disable those whose cases are rejected from having a fair opportunity to litigate if they wish to do so.

Cases in which conciliation has failed may be taken by private attorneys or referred to the General Counsel for recommendation to the Commission for litigation. If the Commission approves the recommendation the case will be sent back to the district office and the litigation will be conducted in that office under the direction of the General Counsel.

There need be no fear that this new and tighter standard of evidence for finding reasonable cause will adversely affect remedies for complainants. Based on actual experience from other agencies, the tightened standard of reasonable cause should (1) Increase the rate of remedies at earlier stages; and (2) increase the likelihood of successful conciliation after the reasonable cause decision. Under our rapid charge processing system, cases will move much more quickly to the reasonable cause stage, and cause may be found in cases which, under the old system, would have been dismissed as stale. Thus I am confident that the Commission will do justice for more people than under the old system.

(5) *Systemic Discrimination Program.* The next principle is the necessity to establish an effective program to attack systemic discrimination. As I stated to the Senate Committee on Human Resources at my confirmation hearing, I am convinced that only by an effective attack on entire systems that discriminate can we have any significant impact on discrimination and ultimately achieve the objectives which Congress established in Title VII. Only an organized program can cope with patterns of employment discrimination. The primary vehicle for our systemic program will be use of Commissioner charges.

I am aware that the filing of a Commissioner's charge alleging discrimination will require considerable time, effort, and expense by respondents. It is only fair that the initiation of these charges of discrimination be organized on a rational basis before the government imposes such costs on respondents. We intend to develop a rational and sensible basis for proceeding on systemic discrimination matters. A first indicator will be a poor statistical profile of minorities and women. The Supreme Court in the Hazelwood School case indicated that, where relevant statistics demonstrate an employer has fallen significantly below comparable employers, there exists a prima facie case of discrimination. This decision provides support for aggressive action to correct discriminatory patterns.

We have already begun an analysis of our own statistical data to identify appropriate subjects for further inquiry. While we will emphasize the statistics, the net judgment as to whether to proceed will be based not only on the statistics but on all other information available to us and to other government agencies, as well as on an analysis of petitions for a systemic inquiry filed by individuals and organizations.

Settlement will be as important in systemic cases as in individual cases. At all stages we will be prepared to settle with respondents with an agreement which ends the past discrimination, to take affirmative action to assure that there will not be discrimination in the future and to provide appropriate compensation for identifiable victims of discrimination. Strict monitoring of agreements and assistance to employers in meeting Commission requirements will be important elements in the program. My experience in New York is an indication of the high impact systemic work can have. Last year in a particularly entrenched economy, the New York City Commission secured new jobs and promotions for women and minorities, of the value of $20 million.

Generally, the systemic program will be developed in headquarters and executed in the district offices except for those matters which transcend district boundaries.

(6) *Affirmative Enforcement of Title VII.* The next principle is that the Commission must make affirmative use of the wide range of administrative powers available to it to enforce Title VII. By advising those subject to the law of our interpretation of it, we hope to reduce dependency on the litigation of individual cases in achieving compliance with Title VII, the slowest and most arduous way to achieve conformity with law. We have already begun this process. Before the Commission secured the power to litigate, it engaged in very effective, creative administrative activities, particularly in issuing guidelines and publishing reasonable cause decisions. In this fashion, the Commission played a major role in developing the law of Title VII. For example, the Commission shaped the interpretation of the "bona fide occupational qualification" exemption and the concept that selection procedures which adversely affect minorities or women were required to be job related.

The Commission will formally establish its activities in the field of interpretations and guidelines, in order to secure wide-scale conformity to Title VII with a minimum of specific individual proceedings. We began this function on July 12, 1977 when we issued our interpretation of the decision of the Supreme Court in *Teamsters* v. *United States* and *Evans* v. *United Airlines*. To assure that this activity continues we will establish a headquarters program to support on an ongoing basis the affirmative enforcement aspects of the administrative process. This program will consider and recommend to the Commission the adoption of interpretations, guidelines and the holding of hearings, as well as other Commission-initiated activities.

(7) *Management Accountability and Information System.* The next underlying principle is the need for sound and careful management in order to balance the three priorities described above—the processing of old cases in the backlog, converting to a new rapid case processing system and developing a systemic program. Balancing these priorities in district offices will require a highly effective management system. That system will be modeled after the system which I installed in New York, whose results were so effective that the New York City Commission on Human Rights became the first agency in city government to win decentralized authority over important personnel and budget decisions. A system which holds managers of all functions at the Commission accountable for their performance will be instituted. The Management System will have four major parts: (a) A prioritized and detailed statement of the agency's missions and program objectives within each mission; (b) a performance and resource plan with objectives and goals jointly developed by line managers and the executive director; (c) a systematic way to identify and correct specific operational deficiencies with deadlines for accomplishment; and (d) a system for anticipating critical issues which must be faced during each quarter, thus avoiding management by crisis. Agency managers will be held accountable for meeting the objectives of the management plan and will be evaluated accordingly.

Our computerized and manual information systems are already being revised to assure that the new case processing system is measured from the first day of implementation. Both management and planning depend on good and timely information. We have found several independent and uncoordinated information systems at the Commission, and this fragmentation makes effective planning and management virtually impossible. We are transforming them into a unified information network so that management and planning can take place effectively. Within this information network we will be able to encompass all the operations of the Commission and of the 706 deferral agencies along with as much information about private Title VII litigation as possible.

(8) *Uniform Staff Training and Standards.* The final principle is that systematic training of staff will be necessary if the reforms I have described are to take hold and prove effective. The Commission resolution of July 20th has centralized in headquarters responsibility for training. This will facilitate the development of uniform and high quality standards of staff performance. Already in progress are ten training modules. These are to be used not only to introduce the new

V 42 161 AUG 19 77 UM

programs, but also to train new personnel who come to the Commission after the new programs are in effect. Thus they will afford an ongoing training capability which the Commission has not had before. They will also be available for use by state and local civil rights agencies. Examples of training modules in preparation include materials to assist lawyers and investigators in working together under the new standard of reasonable cause; to develop investigative skills necessary to conduct a fact-finding conference; and to train personnel for in-depth interviewing of complainants and the drafting of more precise charges as part of the new comprehensive intake procedures.

• • • • •

PROGRESS ON OTHER ISSUES

In addition to fundamental issues of organizational and procedural reform, which I have just discussed, I have also addressed a number of basic issues and operational matters that have long concerned this Committee and the public. I should like briefly to report on progress concerning them.

These issues include the dual set of selection guidelines, the problem of centralized line authority at EEOC, financial responsibility, vacancies and hiring control, grievance procedures, union relationships, state and local agencies, the private bar and the role of other Commissioners.

1. *Selection Guidelines.* First, on the morning I took office on June 6th, I set in motion the process of resolving the separate and competing federal selection guidelines. This most exasperating dilemma had been under negotiation for four years, ending with an impossible situation in which employers are confronted with two sets of standards from the federal government. I am most pleased to report now that there has been excellent cooperation among the Assistant Attorney General for Civil Rights, Drew Days, Civil Service Commissioners Campbell, Poston and Sugarman and the Assistant Secretary of Labor, Don Elisberg; that the staffs of the agencies have been directed to develop unified guidelines; that an informal draft prepared by Justice and EEOC has been developed; and that comments on this draft have served to sharpen and narrow the issues, to the point where I am now hopeful that we will shortly produce draft uniform guidelines for public comment.

2. *Orderly Line of Reporting at EEOC.* Second, we have met the criticism of diffuse authority within EEOC by establishing a reporting line of command directly through my newly appointed Executive Director to me. I moved immediately on arrival to consolidate the fragmentation and the separate and often competing efforts among staff units. In the first week of my administration, headquarters offices were ordered to go through the Executive Director on all matters that were to come before the Commission, and this is being uniformly adhered to. In the second week, line authority was reestablished directly from the regional offices to the office of the Executive Director. Weekly meetings were organized with all office directors to coordinate activities, report on new developments, and review all matters affecting more than one office.

3. *Installation of New Financial System.* Third, I moved to clarify a tangled financial situation and to establish fiscal responsibility. Immediately upon coming to EEOC I found a difference of opinion between the financial office and the Internal Audit unit, on an over-obligation matter that had previously been raised by the General Accounting Office. A special investigation, which I ordered immediately, has now resolved the issue, revealing that there was no over-obligation, but that the former fiscal system was in such poor repair, that it was virtually impossible to make a proper accounting. An improved system, fully accountable had since been developed and we are working on the computer capability to make functional. We have reported fully to the General Accounting Office. A copy of our final report is being made available to this Subcommittee. We are now moving on target toward a completely reliable financial system to be operational by the beginning of the new fiscal year.

4. *Vacancy Rate Corrected.* Fourth, we have corrected the situation in which we were carrying a large number of vacancies without appropriate personnel action. Today the opposite situation obtains. A new vacancy control unit has been established which is not only approving vacancies but must control them so that jobs are filled only when absolutely required and only when consonant with projected reorganization.

5. *Employee Use of Internal Grievance Processes.* Fifth, I am taking action on a distressing grievance situation in which an unprecedented number of complaints were brought against management either through the standard labor-management grievance machinery or through the equal opportunity discrimination apparatus. This has produced an unfortunate climate in which some managers hesitate to make difficult decisions and evaluations. I have ordered a study of the various grievance mechanisms to see where and how this might be approached. I have also informed all managers that their job is to manage and that I will stand behind them firmly if they demand accountability and are fair in their evaluations. I believe that the climate of charge and counter-charge is already being reversed.

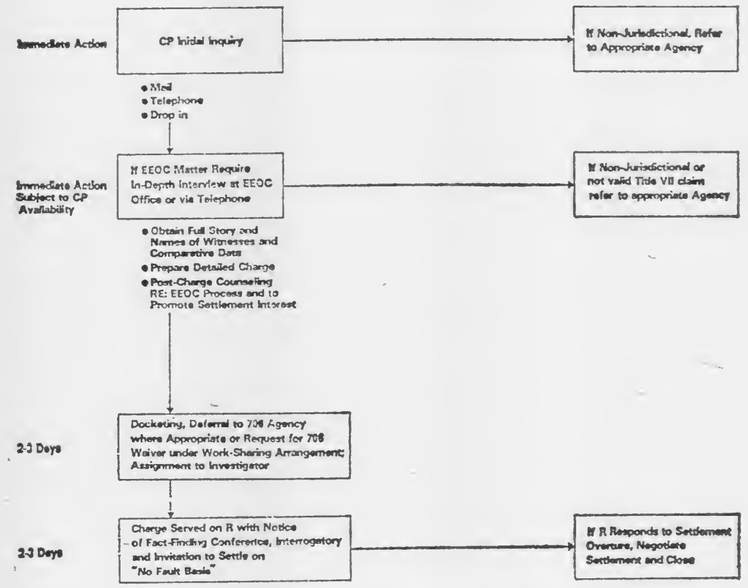
6. *Labor-Management Relations.* Sixth, I sought a meeting with the union at the agency during my first week in office in order to establish a relationship that will minimize tension in labor-management affairs. Any difficulties flowing from reorganization can be dealt with through open consultation and exchange of opinion. We have already begun to consult with union officials on a regular basis to provide them with information and to receive the benefit of their thinking.

7. *Sec. 706 Deferral Agencies, Private Bar, Law School, and Legal Organizations.* I am moving to use available outside resources to help the Commission in its operations. Heretofore, these groups and agencies, which receive grants from the Commission, have often had no systematic relationship to the workload of EEOC but operated entirely independently. As the 706 agencies, the law schools, the public interest legal organizations and the private bar begin to handle an increased case load, it becomes apparent that we need to view them as an integral part of the overall equal opportunity machinery. We are beginning to fashion improved and uniform standards for national intake and charge notification forms, procedures for the efficient sharing of work and a formula for a fair and rational allocation of funds. The 706 agencies will be brought into our training system, and in the next round of negotiations we will build in quality case processing standards, not contracts based on numbers of cases processed alone. Contracts with the law schools, will similarly emphasize the need to produce programs responsive to, and integrated with, on-going EEOC operations.

I view the state and local 706 and 709 agencies as associates in a national anti-discrimination effort. They are neither adjuncts of the EEOC nor unrelated institutions. At our request, Congress recommended in its most recent appropriations bill for EEOC, that we establish a system of improved and uniform standards for the more expeditious processing of charges for FEP agencies. We are establishing a national case processing system with national standards, universal forms and procedures, and standardized reporting. State and local agencies will be better used in case processing. Currently over 60% of the charges filed with EEOC are deferred to these agencies. Yet they process only 22% of the annual resolutions. The reasons for the fall-off are varied. Many of these agencies are backlogged. Large numbers of charges are sent back or not filed with the local agencies, with the loss of 60 days of valuable processing time. And, the lack of clearly articulated uniform standards for investigation and charge resolution may result in the rejection of local agency findings. The EEOC has the responsibility to address these problems and is currently doing so. Of course, we will fully consult with the state agencies as these plans and programs are being worked out.

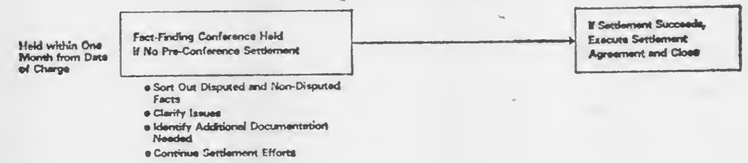
The law schools and legal organizations are another important resource which has not been used to the maximum benefit of the Commission. We are currently renegotiating all private bar funding contracts so they will contain provisions ensuring the promotion of a national litigation system.

8. *Development of Collegial System to better use Commissioners in operations and policy-making.* Eighth, I am working to correct the criticism of this agency that commissioners have been underutilized, thus diminishing the Commission's overall capability. I am working with the commissioners to establish new roles, specific responsibilities and a collegial decision-making system, I have instituted weekly briefings for commissioners and their staffs to familiarize them with issues as they emerge so that they are involved and contributing well before an issue appears on the Commission agenda. Formal commission meetings are to be used for extensive reporting on agency operations and programs to get maximum participation from commissioners in the formation of policy and programs.



• • • • •

CONCLUSION



We believe that structural and procedural reforms I have described here today and the work being done to meet specific problem areas will correct the major deficiencies of the Equal Employment Opportunity Commission and make the Commission the effective instrumnet for eliminating discrimination that Congress intended it to be. This Committee over the years has done an outstanding job in focusing on the problems of the Commission and pointing it in new directions. I welcome your oversight and suggestions. I hope you will allow me to come back on a regular basis to report on our problems and progress.

[9 CFR Parts 1, 3]

ANIMAL WELFARE ACT

Proposed Standards and Regulations for the Humane Handling, Care, Treatment, and Transportation of Marine Mammals

AGENCY: Animal and Plant Health Inspection Service (USDA).

ACTION: Proposed rule.

SUMMARY: This document proposes regulations and standards under the Animal Welfare Act to remove marine mammals from the list of exempt species of warmblooded animals and to bring them under the jurisdiction and protection of the Animal Welfare Act. The Marine Mammal Commission has recommended that the Secretary of Agriculture adopt certain standards under the Animal Welfare Act to govern the humane handling, care, treatment, and transportation of marine mammals. This Department has evaluated the recommendations and data supplied in support thereof and has used such recommendations and data as a basis for proposing the following amendments to the regulations and standards under the Animal Welfare Act to govern the humane handling, care, treatment, and transportation of marine mammals.

DATE: Comments on or before October 18, 1977.

ADDRESSES: Comments to Deputy Administrator, USDA, APHIS, VS, Room 703, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Comments available for inspection at the above address during regular hours of business (8 a.m. to 4:30 p.m. Monday through Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27(b)).

FOR FURTHER INFORMATION CONTACT:

Dr. Dale F. Schwindaman, Senior Staff Veterinarian, Animal Care Staff, Veterinary Services, Animal and Plant Health Inspection Service, United States Department of Agriculture, Room 703, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, telephone number (301) 436-8271.

SUPPLEMENTARY INFORMATION: Notice is hereby given in accordance with the administrative provisions in 5 U.S.C. 553, that, pursuant to the provisions of the Animal Welfare Act (7 U.S.C. 2131 et seq.), the Department of Agriculture is proposing (1) to amend the regulations under the Act (9 CFR 1.1) to revise the definitions for "animal" to include marine mammals, for "primary enclosure" to add the term "pool", and to add a new definition for "minimum horizontal dimension"; and (2) to provide new standards (9 CFR 3.1 et seq.) regarding the humane handling, care, treatment, and transportation of marine mammals.

The Animal Welfare Act requires the Secretary to promulgate standards for the humane handling, care, treatment, and transportation of any live or dead dog, cat, monkey (nonhuman primate mammal), guinea pig, hamster, rabbit, or such other warmblooded animals as the Secretary may determine are being used or intended for use, for research, testing, experimentation, or for exhibition purposes or for use as a pet.

Section 1(b) of the Animal Welfare Act (7 U.S.C. 2131) contains the following Congressional statement of policy;

> The Congress finds that animals and activities which are regulated under this Act are either in interstate or foreign commerce or substantially affect such commerce or the free flow thereof, and that regulation of animals and activities as provided in this Act is necessary to prevent and eliminate burdens upon such commerce and to effectively regulate such commerce, in order—
>
> (1) To insure that animals intended for use in research facilities or for exhibition purposes or for use as pets are provided humane care and treatment;
>
> (2) To assure the humane treatment of animals during transportation in commerce; and
>
> (3) To protect the owners of animals from the theft of their animals by preventing the sale or use of animals which have been stolen.
>
> The Congress further finds that it is essential to regulate, as provided in this Act, the transportation, purchase, sale, housing, care, handling, and treatment of animals by carriers or by persons or organizations engaged in using them for research or experimental purposes or for exhibition purposes or holding them for sale as pets or for any such purpose or use.

Under provisions of the Marine Mammal Protection Act of 1972 (Pub. L. 92-522) the administrative responsibility for regulating marine mammals in the wild was given by Congress to the Departments of Commerce and Interior. Those Departments prescribe the regulations that apply to free ranging marine mammals found in the wild, but the authority to promulgate regulations and to set standards for the humane handling, care, treatment, and transportation of captive marine mammals by dealers, research facilities, exhibitors and operators of auction sales was given to the Secretary of Agriculture by the 1970 Amendments to the Animal Welfare Act (Pub. L. 91-579). Such authority of the Secretary was extended to cover carriers and intermediate handlers by the Animal Welfare Act Amendments of 1976 (Pub. L. 94-279). The Marine Mammal Commission, created by the Marine Mammal Protection Act of 1972, was given the responsibility to study and recommend to the Secretaries of Commerce and the Interior and to other Federal officials, such steps as it deems necessary or desirable for the protection and conservation of marine mammals. The Marine Mammal Commission recommended that the Secretary of Agriculture adopt certain standards for the humane handling, care, treatment, and transportation of marine mammals under the Animal Welfare Act. Such recommendations and supporting technical data have been used as the basis for proposing the following amendments to the regulations and standards under the Animal Welfare Act.

Although the Secretary of Agriculture was given authority under the Animal Welfare Act to promulgate standards for the humane handling, care, treatment, and transportation of warmblooded animals, aquatic or marine mammals were exempted by regulations due to a lack of sufficient information upon which to base minimum standards for marine mammals. Based on the recommendations of the Marine Mammal Commission and discussions with their committee of scientific advisors and other experts on marine mammals, the Secretary is now proposing that marine mammals be covered by the Animal Welfare Act and proposes certain regulations and standards to govern their humane handling, care, treatment, and transportation in commerce.

The proposed standards are intended to assure the humane handling, care, treatment, and transportation of marine mammals which are bought, held, sold, or transported in commerce, for purposes of research, testing, experimentation, exhibition or for use as pets. This should enhance their health and increase their life-span, thereby reducing the need to capture additional marine mammals from the wild population. The proposed standards apply to many orders and species of marine mammals which have significant differences with respect to their biological and behavioral requirements. In all cases, the goal of the proposed standards is to provide each individual marine mammal with at least minimum acceptable conditions consistent with its good health and well-being, in reference to its physical requirements and behavioral needs.

The Animal Welfare Act directs the Secretary of Agriculture to promulgate minimum standards governing the humane handling, care, treatment, and transportation of warmblooded animals, aquatic or marine mammals, exempted by regulations due to a lack of sufficient information upon which to base minimum standards for marine mammals. Based on the recommendations of the Marine Mammal Commission and discussions with their committee of scientific advisors and other experts on marine mammals, the Secretary is now proposing that marine mammals be covered by the Animal Welfare Act and proposes certain regulations and standards to govern their humane handling, care, treatment, and transportation in commerce.

The proposed standards are intended to assure the humane handling, care, treatment, and transportation of marine mammals which are bought, held, sold, or transported in commerce, for purposes of research, testing, experimentation, exhibition or for use as pets. This should enhance their health and increase their life-span, thereby reducing the need to capture additional marine mammals from the wild population. The proposed standards apply to many orders and species of marine mammals which have significant differences with respect to their biological and behavioral requirements. In all cases, the goal of the proposed standards is to provide each individual marine mammal with at least minimum acceptable conditions consistent with its good health and well-being, in reference to its physical requirements and behavioral needs.

The Animal Welfare Act directs the Secretary of Agriculture to promulgate minimum standards governing the humane handling, care, treatment, and transportation of warmblooded animals covered by the Act. Such standards include requirements with respect to handling, housing, feeding, watering, sanitation, ventilation, transportation, shelter from extremes of weather and temperature, adequate veterinary care, and separation by species.

The standards relating to the humane handling, care, treatment, and transportation of animals currently covered by the Animal Welfare Act are contained in 9 CFR Part 3, Subparts A, B, C, D, and E. The individual subparts are oriented to similar kinds or classes of animals and have many sections which are equally applicable to the humane handling, care and treatment of all animals. It is proposed that subpart E of the standards be redesignated as Subpart F and be renumbered accordingly, and that a new Subpart E be added to the standards containing the minimum standards for marine mammals.

The proposed minimum standards for marine mammals take into consideration that this group of animals have much

greater environmental requirements than nonaquatic species of animals. The physical plant necessary to maintain marine mammals is, therefore, much greater than for other species of animals. Since marine mammals spend all or most of their time in the water, minimum standards are proposed for both the quantity and quality of the water which shall be available to them. In most instances, this requires pumps for circulating the water, water filtration systems, and special equipment for monitoring and controlling the chemical content of the water.

It appears that there are certain general requirements that must be provided to meet the basic needs of both the marine mammals and the viewing public. Therefore, it is proposed that the facility should be constructed of such materials and be of such strength to safely contain the various species of marine mammals involved. It is also proposed that surfaces of the primary enclosure pool, ramps for entering or leaving the pool, resting areas and any other surfaces immediately surrounding the primary enclosure pool should be constructed from materials which provide a nonporous, waterproof finish, free of cracks or imperfect junctures. This proposed standard is to allow for thorough cleaning of the primary enclosure, with no cracks or crevices that would allow any bacterial buildup that could be a health hazard to the marine mammals contained therein.

The facilities must be safe not only for the marine mammals, but also for person attending to them, and to the viewing public. Therefore, it is proposed that the housing facilities should be structurally sound and should be maintained in good repair to protect the marine mammals from injury, to contain the marine mammals, and to restrict the entrance of other animals.

Captive marine mamals should be provided protection from public harassment, potential communicable human pathogens and possible ingestion of foreign bodies which may be intentionally or accidentally introduced into the primary enclosure. Therefore, it is proposed that, in the absence of effective physical barriers to such hazards (fences, walls, glass partitions, distance), constant supervision of persons who are or may come in contact with the marine mammals should be maintained.

A reliable source of water and power must be available. Therefore, it is proposed that auxiliary sources of water and power must be available in those instances where failure of the primary source of water or power may occur and the marine mammals' good health and well-being are dependent upon a continuous source of water or power to maintain the quality or exchange of water or air.

Proper drainage must be provided in order to maintain cleanliness and sanitary conditions. It is proposed that such drainage, especially if it is contaminated with animal and food wastes, must be disposed of in a manner consistent with all applicable local, State, and Federal laws.

It is proposed that food for marine mammals be stored in designated areas and, if it is subject to deterioration at warm temperatures, it shall be kept under proper refrigeration to maintain its palatability and nutritive value. It is proposed that food for marine mammals not be stored with other materials of any kind which might contaminate the food with substances harmful to marine mammals or which might otherwise affect the wholesomeness of the food. It is also proposed that non-food storage areas must also be designated or located so as not to pose a threat of contamination to food storage, food preparation, or other food handling areas.

Proper waste disposal is essential in maintaining the cleanliness and sanitary conditions of a facility housing marine mammals and directly affects the good health and well-being of such captive marine mammals. It is proposed that food and animal wastes, as well as dead animals, trash and debris, must be disposed of in a suitable manner to comply with environmental and public health standards. It is proposed that washrooms and bathroom facilities be provided for employees so that they can maintain cleanliness and good personal hygiene so as not to be a source of contagion to the marine mammals.

Maintaining appropriate ambient air and water temperatures is vital to the good health and well-being of marine mammals. Therefore, it is proposed that indoor facilities for marine mammals be equipped to control the ambient air and water temperature in which the marine mammals are housed. It is proposed that the air temperature in an indoor housing facility for marine mammals not be allowed to fall below 7.2°C. (45°F.) in order to prevent freezing of the water in the pool or in the filtration and circulating systems as well as providing an environment that would not hamper or impede employees in caring for such marine mammals.

While certain marine mammals can tolerate air and water temperatures in excess of 30°C. (85°F.) it is not in the best interests of their good health and well-being to so house them, especially if they have not been so acclimated. Therefore, it is proposed that the ambient air and water temperatures in an indoor housing facility for marine mammals not be allowed to exceed 30°C. (85°F.) It is also proposed that the water temperature in the pool of water should approximate those found in the subject marine mammals' natural habitat or other temperatures to which it has been acclimated and which are compatible with the good health and well-being of the subject marine mammal. However, such water temperatures shall not be allowed to fall below 1.7°C. (35°F.) in order to prevent freezing of the water in the pool or in the filtration and circulating systems as well.

Marine mammals are air breathing animals and ventilation is very important to assure that they are provided adequate fresh air for their respiratory needs in both quantity and quality. Therefore, it is proposed that a minimum air space of 2.44 meters (8 feet) be maintained over all pools of water and that ventilation of indoor housing facilities must be adequate to provide a flow of fresh air for the marine mammals. Any less air space above the pool would not seem to be adequate to allow sufficient space for normal servicing of the pool and would tend to concentrate volatile chemicals and odors that may be detrimental to the marine mammals housed therein.

It is proposed that indoor facilities for marine mammals must have sufficient light through natural or artificial means so that animal caretakers can observe the marine mammals both in and out of the primary enclosure pool of water to determine their general health and condition and so that they can observe and maintain good sanitary conditions. Lighting also appears necessary to simulate the approximate lighting conditions in the natural environment, allowing certain periods of darkness and daylight.

Marine mammals come from a great variety of climatic conditions, from equatorial waters to the polar ice caps. There is also a great temperature range of climatic conditions within the United States. Outdoor facilities are completely dependent upon the local environmental conditions. Therefore, it is proposed that captive marine mammals housed in outdoor facilities must be able to adapt to the variations of climatic conditions which exist in that geographical area during the period they are so housed. If the local climatic conditions of the outdoor facility vary from the conditions in which they were previously housed, the marine mammals must be acclimated to their new environment before being placed in such outdoor housing facilities.

It is proposed that marine mammals housed in outdoor facilities have shaded areas in their primary enclosure at all times to provide them with shelter from excessive sunlight which may cause overheating or sunburn. It is also proposed that shelter be available to protect marine mammals from inclement weather, when such inclement weather is likely to cause discomfort to such animals.

It is proposed that the pools of water in outdoor facilities shall be kept free of ice. Iced over pools could deny marine mammals access to such pool for both excercise and drinking or obstruct their free access to sufficient air for normal breathing.

Space requirements for the wide variety of marine mammals is quite variable. The Marine Mammal Commission has furnished this Department with information concerning the research it has conducted into the space requirements for marine mammals. Such information appears to be reasonable and was used as the basis for the proposed minimum standards on space requirements for marine mammals. The proposed minimum space requirements appear to be adequate and necessary to assure the

V 42 161 AUG 19 77 UM V

health and well-being of marine mammals based on the information which the Department now has available to it.

Since cetaceans (e.g. whales, porpoises, and dolphins) spend all of their time in the water, it is proposed that their primary enclosure need consist of only a pool of water. It is proposed that cetaceans must be provided a pool of water with a minimum horizontal dimension (MHD) of two times the length of the longest cetacean contained therein as measured from the tip of its nose to the tip of its fluke.

It is proposed that "minimum horizontal dimension" means the diameter of a circular pool or in the case of a square, rectangular, oblong or other shape pool, the diameter of the largest circle that can be inserted within the confines of such a pool of water. The MHD for each marine mammal is calculated to give it adequate freedom of movement in the pool horizontally. Regardless of the number of cetaceans housed in a primary enclosure pool, the MHD cannot be less than the MHD required for the longest cetacean contained therein.

The minimum horizontal dimension (MHD) of the pool, which is proposed as two times the length of the longest cetacean contained therein has been recommended as giving adequate space to the cetacean for freedom of horizontal movement, which would allow the cetacean to turn about and swim without touching any limiting lateral structure. There would appear to be a sufficient volume of water in such a pool to allow two cetaceans, of equal length, in the pool to have adequate freedom of movement due to the large amount of communal space available to each.

The minimum depth of a primary enclosure pool for cetaceans should be at least one-half the length of the longest cetacean housed therein as measured from the tip of its nose to the tip of its fluke. The body height of cetaceans even with a dorsal fin completely extended, if present, is less than one-half the length of the cetacean. Therefore, computing proper depth, using this criteria, would allow the cetacean to be completely covered with water and still allow for vertical freedom of movement. It is therefore proposed that the minimum depth of a pool housing cetaceans shall not be less than 1.52 meters (5 feet) or one-half the length of the longest cetacean housed therein, whichever is greater. Regardless of the total number of cetaceans to be housed in the pool, the minimum depth cannot be less than the minimum determined for the longest cetacean housed therein. Such a pool of water has a sufficient volume of water for one or two cetaceans.

When more than two cetaceans are housed in a primary enclosure pool, the volume of the pool must be increased to accommodate the additional cetaceans. It is proposed that the required increase in the volume be based on the actual length of the cetacean computed in the same manner as for the first two cetaceans. This method would appear to give volume sufficient for two cetaceans, therefore, the computed volume needs to be divided by two to give the volume required for each additional cetacean. It is proposed that for each additional cetacean added to the pool, after the first two, that the minimum volume of water for the pool be increased by squaring the length of each such additional cetacean multiplied by π (3.14) and the sum thereof multiplied by the minimum depth required for such cetacean and divide the results by two. A table has been prepared (Table I) and included in the standards to give the exact volume of water which would be required for each cetacean to be added to the primary enclosure pool, more than two, based on the actual length of each such additional cetacean.

Sirenians (e.g. the dugong and the manatee) are slow moving, sluggish marine mammals that spend all of their time in the water. Therefore, it is proposed that their primary enclosure need only consist of a pool of water. Space requirements for sirenians would appear to be similar to the needs of cetaceans, and, therefore, it is proposed that their pool size be at least two times the length of the longest sirenians, as measured from the tip of its nose to the tip of its fluke, as the MHD, and that the minimum depth shall be 1.52 meters (5 feet) or one-half the length of the longest sirenian contained therein, whichever is greater. This size pool appears to be sufficient to house two sirenians. When more than two sirenians are housed in the same pool, the minimum volume of water in the pool must be increased to accommodate each such additional sirenian, more than two, in the pool must be known to determine the minimum required additional volume of water which would be computed in the same manner as previously described for cetaceans.

The space requirements for a primary enclosure housing pinnipeds (e.g. seals, sea lions, and walruses) should include a dry area for resting and social activities and a pool of water, as they spend much of their time out of the water. The space allowed for each pinniped for freedom of movement, mating, postural adjustments and sleep would be determined by their size and by the number of pinnipeds sharing the same enclosure. The size of the pinniped is important and the largest pinniped should have the greatest allotment of space. One pinniped appears to require a minimum dry area at least 50 percent larger than its own length squared. As more pinnipeds are added to the primary enclosure less space should be allotted per animal because of the greater amount of communal space available. This would be accomplished by reducing the multiplier of 50 percent for the first animal by 10 percentage points until more than five animals are housed together. However, no pinniped would ever be given less space of dry surface area for resting and social activity than its own length squared.

It is therefore proposed, that to compute the minimum dry space requirements for pinnipeds, the length of each pinniped housed in the primary enclosure shall be ascertained by measuring them from the tip of their nose to the tip of their hind flipper in a horizontal or extended position. The pinniped should then be arranged in descending order from the largest pinniped which would be animal number one, to the smallest pinniped at the end. It is proposed that the largest pinniped be given a minimum dry space of its own length squared, plus fifty percent, or its length squared times 1.5. The second largest pinniped would be given a minimum dry space of its own length squared, plus forty percent, or its length squared times 1.4. The third largest pinniped would be given a minimum dry space of its own length, plus thirty percent, or its own length squared times 1.3. This would be continued to the fifth largest pinniped which would receive a minimum dry space equal to its own length squared, plus ten percent, or its own length squared times 1.1. For all other pinnipeds (more than five) added to the primary enclosure, the space would be determined by giving each such pinniped a minimum dry space equal to its own length squared. The sum of such figures for each pinniped in a primary enclosure would be the minimum dry resting and social activity area required for such pinniped.

Pinnipeds appear to need a pool of water whose MHD is twice the length of the longest pinniped contained therein. Such a pool of water would appear to have sufficient surface area for two pinnipeds. However, additional surface area would be required when more than two pinnipeds are housed in the same primary enclosure. Pinnipeds spend one-half or less of their time in the water, and therefore, rarely would all pinnipeds in a primary enclosure be in the pool of water at one time. It is proposed that when more than two pinnipeds are housed in the same primary enclosure that the minimum surface area of the pool be two-thirds of the dry resting area required for such pinnipeds. It is further proposed that the minimum depth of the pool shall not be less than 1.52 meters (5 feet) or one-half the length of the longest pinniped contained therein, whichever is greater. The MHD of the pool shall not be less than two times the length of the longest pinniped contained therein.

The primary enclosure for polar bears appears to need open space, a den, and a pool of water. While polar bears spend much of their time out of water, the pool appears especially necessary in hot or temperate climates for polar bears to cool themselves. A den appears necessary to provide shade, privacy, and a means of escaping inclement weather. A den is also necessary to a pregnant female, which should have extreme privacy before parturition and for several months after the birth of young. It is proposed that a shaded area, other than the den, be provided for other polar bears in the same primary enclosure with a pregnant female. Polar bears are much more mobile on land than other marine

mammals. They are less gregarious than other marine mammals especially females in season, and therefore, require more dry space for adequate freedom of movement and social activities. Objective data concerning the minimum space requirements for polar bears is not available at this time to the Department's knowledge. However, it is the belief of experts on marine mammals, and it has been recommended by the Marine Mammal Commission that the following minimum space requirements be proposed. This Department has no information that would indicate that such proposals are not reasonable, necessary, appropriate or adequate for polar bears, and, therefore, has decided to issue such proposed minimum space requirements for polar bears as recommended by the Marine Mammal Commission.

It is proposed that a minimum dry resting area of 37.16 square meters (400 square feet) be provided for one or two polar bears and an additional 3.72 square meters (40 square feet) for each additional polar bear contained in a primary enclosure. It is also proposed that the den shall be at least 1.83 meters (6 feet) in width, depth and height, which would allow sufficient space for one polar bear to make normal postural adjustments. A separate den would be required for each adult female as a private enclosure. It is also proposed that sufficient shade, other than the den, be provided for all polar bears contained in the same primary enclosure. It is proposed that the pool in any primary enclosure for polar bears be a minimum of 2.44 meters (8 feet) be 3.66 meters (12 feet) and at least 1.52 meters (5 feet) deep.

Sea otters appear to need a dry resting area and a pool of water in their primary enclosures. It is necessary for sea otters to have a pool of water to keep their hair coat wet at all times for proper grooming and for insulation of the body, as they spend most of their time in the water. Sea otters cannot regulate their body temperature properly if the hair coat is allowed to dry. Sea otters will usually die of exposure or hypothermia if the hair coat becomes soiled or is allowed to dry. Objective data concerning the minimum space requirements for sea otters is not available at this time to the Department's knowledge. However, it is the belief of experts on marine mammals, and it has been recommended by the Marine Mammal Commission that the following minimum space requirements be proposed. This Department has no information that would indicate that such proposals are not reasonable, necessary, appropriate or adequate for sea otters and, therefore, has decided to issue such proposed minimum space requirements for sea otters as recommended by the Marine Mammal Commission.

It is proposed that the minimum horizontal dimensions (MHD) of a pool of water for sea otters be at least twice the length of the longest sea otter contained therein, as measured from the tip of its nose to the tip of its tail. It is also proposed that the minimum depth of the pool shall not be less than 0.91 meters (3 feet). The volume of water in such a pool would appear to be sufficient for one or two sea otters. It is proposed that the minimum dry resting area for one or two sea otters be equal to the minimum surface area of the pool required for such sea otters.

When more than two sea otters are housed in the same primary enclosure, both the dry resting area and the pool volume must be increased, based on the actual length of the sea otters, more than two, contained therein. It is therefore proposed that such additional space be computed by measuring the length of the sea otters (more than the two longest) from the tips of their noses to the tips of their tails. When the length of the sea otters has been determined, the surface area of the pool is calculated and that figure multiplied by 0.91 meters (3 feet), divided by two; and the result is the additional minimum volume of water the pool must contain for such sea otters. It is proposed that the minimum dry resting area for a primary enclosure housing more than two sea otters be increased by one-half the square of the length of each such additional sea otter times π (3.14). To assist in calculating the additional minimum dry resting area and the increased minimum water volume for each sea otter, more than two in the primary enclosure, Table II has been prepared based upon the length of such additional sea otters.

Most facilities housing marine mammals are not located where they can receive fresh food daily for their marine mammals. Therefore, these facilties are dependent upon frozen food supplies to feed their animals. Therefore, it is proposed that the storage, thawing, handling, and feeding of such frozen foodstuff be accomplished in a manner which will minimize bacterial and chemical contamination and maintain the wholesomeness, nutritive value and palatability of the food. Thawing food fish is especially difficult, because if it is not done properly, the center of the fish can still be frozen while enzymatic and bacterial decomposition has started on the surface and peripheral parts of the fish. Therefore, it is proposed that the thawed fish, or other foodstuffs, must be kept iced or refrigerated until fed to the marine mammals and that thawed foodstuffs shall be fed to such marine mammals within 18 hours after being removed from the freezer.

Water quality is extremely important for marine mammals and at least minimum water quality standards need to be maintained for the good health and well-being of the animals. Marine mammals are air breathing mammals and it is not necessary for the water to contain sufficient oxygen for respiratory functions as there is no gaseous exchange between marine mammals and the water. Therefore, it is proposed that the purity of the water be assured by keeping the coliform bacteria count below 1000 MPN (most probable number) per 100 ml. of water and that filtration systems be used to filter out particulate material. Cetaceans, sirenians, and to some degree pinnipeds, defecate in the water of their pool and the filtration system must be able to circulate the water through the filters to keep the water free of excrement, nitrogenous wastes, as well as dirt or other debris that gains entry to the pool. It is proposed that the filtration of recirculated water, or the addition of new water, be at a rate equal to the volume of the pool of water every 4 hours. Salinity of the water is essential for some marine mammals and desirable for others; however, many do very well in fresh water. Therefore, it is proposed that when salinized water is used, it be within the range of salinity of normal sea water. It is also proposed that the pH of the water be monitored to assure that it approximates the pH of normal sea water. Chemicals that are added to the pool to control bacteria or algae must not be so strong as to adversely affect the quality of the water to the point that it might be harmful or cause discomfort to the marine mammals.

Sanitation standards are proposed to assure that the facility which houses marine mammals is maintained in a clean and sanitary condition so as not to pose a health hazard to the marine mammals contained therein, or to the employees who work at the facility, or to the viewing public.

It is proposed that the primary enclosure be cleaned daily to keep animal and food wastes from accumulating in both the pool and any dry areas surrounding the pool. It is proposed that the water be circulated through the pool so that fecal material, as well as any trash or debris that enters the pool is filtered out or in some manner not allowed to reenter the pool. It is also proposed that the wall and bottom surfaces of pools of water be cleaned as necessary to remove accumulations of algae in order to maintain the required water quality.

It is proposed that food storage, food handling, and food preparation areas must be routinely cleaned and sanitized to prevent any bacterial buildup, and that utensils and other equipment involved in any way with the feeding of marine mammals must also be routinely cleaned and sanitized. This is essential to ensure the wholesomeness of the foodstuffs fed to the marine mammals and to their continued good health.

Housekeeping and general practices used in maintaining buildings and grounds at any facility are very important to the good health and well-being of marine mammals housed therein. It is proposed that buildings and grounds must be clean and in good repair and that loose objects lying about, or objects with sharp points or edges must be eliminated to prevent injury or trauma to the marine mammals.

Pest control must be done safely and efficiently. Avian and mammalian pests as well as flying insects must be controlled throughout the facility. A program to keep ectoparasites from infesting the marine mammals is also necessary. Therefore, it is proposed that when insecticides, rodenticides, or other chemicals are used to control pests, it shall be done with the attending veterinarian's knowledge and permission, as the choice

V 42161 AUG 19 77 UM

of the therapeutic agent used in case of accidental poisoning of any marine mammal would depend on his knowledge of the type of chemical involved.

It is proposed that a sufficient number of employees be present daily at the facility to adequately take care of the marine mammals and to do other supportive functions necessary to maintain the animals in good health and to provide for their needs. It is proposed that employees who actually are responsible for the care and feeding of the marine mammals must have a background in marine mammal care or be supervised by a person who has had training in marine mammal husbandry and care. It is proposed that marine mammals being trained for performing acts, shall be trained by experienced trainers and that physical punishment or abuse to the marine mammals shall not be allowed to occur during the training process.

It is proposed that marine mammals that are not compatible must not be housed in the same primary enclosure. Not only incompatible species shall be separated, but also animals of the same species must be separated if the good health and well-being of any animal contained therein is in jeopardy. It is also proposed that marine mammals that are incompatible shall not be placed in adjacent primary enclosures if any resulting frustration, fear, or anxiety will affect the good health of any of the marine mammals involved.

It is proposed that each facility which houses marine mammals must have a complete program of veterinary care under the direction of a veterinarian who is a graduate of an approved school of veterinary medicine. This program can be a written or an oral one, but both the facility management and the veterinarian must be knowledgable of the preventive medicine procedures adopted and how routine and emergency procedures will be conducted. It is proposed that the marine mammals must be observed daily by an animal caretaker knowledgeable about marine mammals and that any sick, diseased, stressed, lame, or injured marine mammal, or any marine mammal exhibiting any other deviation from its normal state of good health, be promptly reported to the facility's veterinarian for his professional evaluation.

It is proposed that marine mammals used in research, tests, or experiments shall be afforded the same protection in the use of anesthetics, analgesics, and tranquilizing drugs as other animals covered by the Animal Welfare Act.

It is proposed that newly acquired marine mammals which are to be added to the existing collection, shall go through a period of quarantine to determine their health status before they can be added to the collection. If an infectious or communicable disease condition is observed in a new marine mammal, the condition must be corrected before such new marine mammal is introduced to the collection so as not to expose the other marine mammals to any such condition or disease. It is proposed that any primary enclosure that has contained a marine mammal with an infectious or contagious disease must be cleaned and sanitized, as directed by the facility's veterinarian, before other marine mammals can again be housed in that primary enclosure, in order to prevent the spread of any such disease.

Handling marine mammals is difficult because of the huge size of some of these animals. The handling of marine mammals, especially out of water, their natural environment, can cause overheating and discomfort to the animal and may cause emotional stress or physical harm. Therefore, it is proposed that isolation and treatment and handling devices of a proper design for marine mammals so as to minimize overheating and discomfort to the animal and to prevent injury to the marine mammal or its handlers. As these animals are generally large and powerful, it is proposed that care shall also be taken to protect the attendants and handlers from injury by the marine mammals.

It is proposed that the handling and displaying of performing marine mammals be consistent with their good health and not cause them a discomfort. It is proposed that sufficient distance be allowed, or barriers placed between, the marine mammals and the viewing public to assure the safety of both the marine mammals and the viewing public. It is also proposed that a period of rest be provided performing marine mammals between performances at least equal to the time required for one performance.

Section 13 of the Animal Welfare Act (7 U.S.C. 2143) requires the Secretary to promulgate standards to govern the humane handling, care, treatment, and transportation of animals by dealers, research facilities, and exhibitors. Provisions of the Animal Welfare Act Amendments of 1976, enacted on April 22, 1976 (Pub. L. 94-279), also require the Secretary of Agriculture to promulgate standards to govern the transportation in commerce, and the handling, care, and treatment in connection therewith, by intermediate handlers and carriers of animals consigned by any dealer, research facility, exhibitor, operator of an auction sale, or other person, or any department, agency, or instrumentality of the United States or of any State or local government, for transportation in commerce. The Secretary was also given authority to promulgate such rules and regulations as he determines necessary to assure humane treatment of animals in the course of their transportation in commerce, including requirements such as those wth respect to containers feed, water, rest, ventilation, temperature, and handling

The proposed transportation standards contained herein have been written to provide marine mammals with the same general protection and care as that proposed for all other species of animals covered by the Animal Welfare Act, and published in the FEDERAL REGISTER on March 18, 1977, at 42 FR 15210.

Some marine mammals, however, do have different transportation requirements than most other animals. The size of some marine mammals, such as killer whales, require very special handling and care. These animals are out of their natural environmental element while being transported; therefore, an artificial environment must be created that will sustain life and not cause the marine mammal undue injury or discomfort. This is true primarily with marine mammals in the order cetaceans and sirenia. Pinnipeds and marine carnivores (polar bears and sea otters) would not appear to require quite such elaborate transporting methods, and, therefore, their proposed transportation standards are more in line with the proposed transportation standards for other warmblooded animals covered by the Animal Welfare Act.

Most shipments or marine mammals will be consigned to private transporting concerns that specialize in transporting marine mammals. These business concerns should have the experience and the equipment to assure the safe delivery of the marine mammals to their destinations. It appears that very few marine mammals would be transported by the normal common carrier or intermediate handler. However, the proposed transportation standards for marine mammals would apply to all dealers, exhibitors, research facilities, carriers, and intermediate handlers.

Requirements for primary enclosures for transportation of the different orders of marine mammals are divided into two categories in this proposal. Pinnipeds and the marine carnivores (polar bears and sea otters) are in one category, and it is proposed that they can be shipped in crates similar to those that are used in transporting other zoo animals. It is important that these animals be given sufficient space in the primary enclosure used for transportation to assure that they have room to move or lie down in normal postural positions without impeding their appendages. The second category includes the cetaceans and sirenians, and it is proposed that they be transported in devices which are designed to support their body weight and provide easy accessibility to the animals for employees to administer to their needs in transit. Without the buoyancy of water on their bodies, these marine mammals move with great difficulty. Therefore, it is proposed that cetaceans and sirenians be transported in well padded straps, slings, harnesses, or other devices for body support that are designed to protect the animal while in transit and to allow attendants to administer to their needs. The proposed standards for transporting cetaceans and sirenians take into account the need for these animals to be supported and protected from injury during transportation.

Marine mammals are generally not fed while in transit and, in most cases, it is an accepted practice to actually fast the animals for a short period prior to

shipment. The sea otter is an exception to this general rule in that they should have food available to them while in transit.

The water intake of marine mammals generally needs to be sufficient prior to starting their transportation to allow them to reach their destination without requiring water while in transit. Every precaution, however, should be taken to prevent dehydration of the animals while in transit and they should be closely observed for evidence of dehydration. Therefore, it is proposed that marine mammals be watered within 4 hours prior to transportation and that water must be offered to the marine mammals during transportation whenever indicated by dehydration. If it is not practical to water the animals sufficiently while in transit, and dehydration appears to be excessive, it is proposed that the transportation must be ended, before the good health and well-being of the marine mammal is jeopardized. In such instances, water must be provided the marine mammal to satisfy its needs.

The transportation of marine mammals can be very exacting and only knowledgable people can assess the physical needs of the animals and properly administer the necessary intransit care. Therefore, it is proposed that an attendant be required to accompany shipments of cetaceans, sirenians, walruses, and sea otters, because of the problems associated with their size, or required special handling, feeding, and watering requirements. The skin of cetaceans and sirenians needs to be kept moist in transit or protected by some substance such as lanolin to keep the skin from drying. It is important that the pectoral fins of both cetaceans and sirenians have full mobility as these animals cannot breath properly if pectoral fins are not free to move about. Positional adjustments must be made for cetaceans and sirenians transported in straps, slings, harnesses, or other body supportive devices to prevent pressure necrosis of the skin over bony prominences or other points where extreme pressure is concentrated from the weight of the animals. It is proposed that retaining straps, securing the cetacean or sirenian to the sling, harness or other device, shall be tight enough to restrain the marine mammal, but not so tight that they become irritating to the animal. Struggling and thrashing about should be minimized to prevent overheating of the marine mammal.

Sea otters must keep their hair coat wet for proper insulation and temperature control of their body. They will not groom their fur if it dries or becomes soiled with feces. It is proposed that a primary enclosure used to transport sea otters shall have a small pool of water contained therein for the animal to keep its fur wet or a spray of water be provided for such purposes. It is also proposed that a dry area be available in the primary enclosure used to transport a sea otter so the animal can get out of the pool or spray of water for resting or grooming purposes.

It is possible to encounter a wide variation of temperature ranges during transportation and the ambient temperature extremes need to be designated to prevent discomfort to the marine mammal or to be detrimental to its good health and well-being. Marine mammals are generally more susceptible to hot temperatures than they are to cool or cold temperatures. It is therefore proposed that the ambient temperature around the marine mammal during transportation shall not exceed 35° C. (95° F.) for a period of more than 45 minutes nor fall below 7.2° C. (45° F.) for a period of more than 45 minutes unless the person transporting the marine mammal knows that it is acclimated to such higher or lower temperatures. These temperatures appear to be in a range that all marine mammals can tolerate without undue discomfort or lasting harmful effects.

PART 1—DEFINITION OF TERMS

Accordingly, it is proposed that the regulations and standards (9 CFR 1.1 et seq.) be amended as follows:

§ 1.1 [Amended]

1. It is proposed that the second sentence in § 1.1(n) of the regulations (9 CFR 1.1(n)) be amended to delete the words "aquatic animals," following the word "birds" and before the word "rats".

2. It is proposed that § 1.1(cc) of the regulations (9 CFR 1.1(cc)) would be amended by inserting a comma after the word "compartment" and adding the word "pool" immediately thereafter and before the word "or".

3. It is proposed that a new definition for minimum horizontal dimension (MHD) be added to the end of § 1.1 of the regulations (9 CFR 1.1) as follows:

• • • • •

(mm) "Minimum horizontal dimension" (MHD) means the diameter of a circular pool of water, or in the case of a square, rectangular, oblong or other shape pool, the diameter of the largest circle that can be inserted within the confines of such a pool of water.

PART 3—STANDARDS

4. It is proposed that the Table of Contents in Part 3—STANDARDS of Title 9, Code of Federal Regulations, be amended by making present Subpart E of the Table of Contents, Subpart F, and renumbering §§ 3.11 to 3.114 thereof to §§ 3.125 through 3.138, respectively, and by adding a new Subpart E as follows:

Subpart E—Specifications for the Humane Handling, Care, Treatment, and Transportation of Marine Mammals

FACILITIES AND OPERATING STANDARDS

3.100 Facilities general.
3.101 Facilities, indoor.
3.102 Facilities, outdoor.
3.103 Space requirements.

ANIMAL HEALTH AND HUSBANDRY STANDARDS

3.104 Feeding.
3.105 Water quality.
3.106 Sanitation.
3.107 Employees.
3.108 Separation.
3.109 Veterinary care.
3.110 Handling.

TRANSPORTATION STANDARDS

3.111 Consignments to carriers and intermediate handlers.
3.112 Primary enclosures used to transport live animals.
3.113 Primary conveyances (motor vehicle, rail, air, and marine).
3.114 Food and water requirements.
3.115 Care in transit.
3.116 Terminal facilities.
3.117 Handling.
3.118 Ambient temperature.

5. It is proposed that present Subpart E of Part 3—STANDARDS (9 CFR Part 3, Subpart E) would be redesignated as Subpart F and §§ 3.100 to 3.114 thereof would be renumbered as §§ 3.125 through 3.138, respectively, and a new Subpart E would be added to read as follows:

Subpart E—Specifications for the Humane Handling, Care, Treatment, and Transportation of Marine Mammals

§ 3.100 Facilities, general.

(a) *Construction requirements.* (1) Housing facilities for marine mammals shall be structurally sound and shall be maintained in good repair, to protect the animals from injury, to contain the animals, and to restrict the entrance of other animals.

(2) All marine mammals shall be provided with reasonable protection from abuse and harassment by the viewing public by the use of a sufficient number of employees to supervise the viewing public, or physical barriers, such as fences, walls, glass partitions, or distance, or both.

(3) Any primary enclosure pool, including ramps for entering or leaving the pool, resting areas, and any other surfaces immediately surrounding the primary enclosure pool, shall be constructed of materials which provide a nonporous, waterproof finish, that is free of cracks or imperfect junctures.

(b) *Water and power supply.* Reliable and adequate sources of water and electric power shall be provided. Alternate emergency sources of adequate water and electric power shall be available in order to assure compliance with the standards in this subpart whenever failure of the primary adequate source of water or power supply may occur.

(c) *Drainage.* (1) Adequate drainage shall be provided for all primary enclosure pools and shall be located so as to rapidly eliminate all of the water contained in such pools when necessary for cleaning the pool or for other purposes. Drainage effluent from primary enclosure pools shall be disposed of in a manner that complies with all applicable Federal, State, and local pollution control laws.

(2) Drainage shall be provided for the primary enclosure and the area immediately surrounding the pool. Drains shall be located so as to rapidly eliminate excess water (except in pools). Drainage, except from ramps for entering or leaving the pool, shall be away from the pool towards the drains. Such drainage effu-

V 42 161 AUG 19 77 UM

ent shall be disposed of in a manner that complies with all applicable Federal, State, and local pollution control laws.

(d) *Storage.* Supplies of food shall be stored in facilities which adequately protect such supplies from deterioration, molding, or contamination by vermin. Refrigerators and freezers shall be provided for perishable food. No substances which are or may be toxic or harmful to marine mammals shall be stored or maintained in the marine mammal food storage or food preparation areas.

(e) *Waste disposal.* Provision shall be made for the removal and disposal of animal and food wastes, dead animals, trash, and debris. Disposal facilities shall be so provided and operated as to minimize vermin infestation, odors, and disease hazards. All waste disposal procedures must comply with all applicable Federal, State, and local laws pertaining to pollution control or protection of the environment.

(f) *Washroom facilities.* Facilities such as washrooms, basins, showers, or sinks, shall be provided to maintain cleanliness among the marine mammal caretakers.

§ 3.101 Facilities, indoors.

(a) *Ambient temperature.* (1) The air temperature in indoor facilities shall be sufficiently regulated by heating or cooling to protect the marine mammals from extremes of temperature, to provide for their good health and well-being and to prevent their discomfort. The ambient air temperature shall not be allowed to fall below 7.2° C. (45° F.) nor allowed to exceed 30° C. (85° F.). Rapid changes in air temperatures within such maximum and minimum temperatures shall be avoided.

(2) The water temperature in pools in primary enclosures housing marine mammals shall approximate the water temperature of such marine mammals' natural habitat or to temperature ranges to which they have been acclimated. Such temperature ranges must be compatible with the good health and well-being of the species involved.

(3) The water temperature in pools in primary enclosures housing marine mammals shall not be allowed to fall below a minimum temperature of 1.7° C. (35° F.) nor exceed a maximum temperature of 29.4° C. (85° F.). Rapid changes in water temperatures within such maximum and minimum temperatures shall be avoided.

(b) *Ventilation.* Indoor housing facilities shall be ventilated by natural or artificial means to provide a flow of fresh air for the marine mammals and to minimize the accumulation of chlorine fumes or other objectionable odors. A vertical air space of at least 2.44 meters (8 feet) shall be maintained in all primary enclosures housing marine mammals, including over their pools of water.

(c) *Lighting.* Indoor housing facilities for marine mammals shall have ample lighting, by natural or artificial means, or both, of good quality, distribution, and duration, as appropriate for the species involved, to permit adequate observation and cleaning of all parts of the primary enclosure including any den areas. Lighting of primary enclosures shall be designed to prevent overexposure of the marine mammals contained therein to excessive illumination.

§ 3.102 Facilities, outdoors.

(a) *Environmental temperatures.* Marine mammals shall not be housed in outdoor facilities unless the ambient air and water temperature ranges which they may encounter during the period they are so housed are compatible with the health and comfort of such marine mammal. A marine mammal shall not be introduced to an outdoor housing facility until it is acclimated to the ambient air and water temperature ranges which it will encounter therein. Water in pools in outdoor primary enclosures shall be kept free of ice.

(b) *Shelter from sunlight.* Sufficient shade, by natural or artificial means, shall be provided to allow all marine mammals kept outdoors to protect themselves from overheating or discomfort due to direct sunlight.

(c) *Shelter from inclement weather.* Natural or artificial shelter which is appropriate to the local climatic conditions for the species concerned, shall be provided for all marine mammals kept outdoors to afford them protection and to prevent discomfort to such animals due to inclement weather.

§ 3.103 Space requirements.

(a) *General.* Primary enclosures, including pools of water housing marine mammals, shall be constructed and maintained so as to provide sufficient space, both horizontally and vertically, to allow each marine mammal contained therein, to make normal postural and social adjustments with adequate freedom of movement, in or out of the water, or both, as the case may be.

(b) *Cetaceans.* (1) Primary enclosure housing cetaceans shall contain a pool of water and may consist entirely of the pool of water. The pool of water for cetaceans shall have a minimum horizontal dimension (MHD) of at least twice the length of the longest cetacean contained therein, as measured from the tip of its nose to the tip of its fluke. The minimum depth of the pool shall be at least one-half the length of the longest cetacean contained therein, or 1.52 meters (5 feet), whichever is greater. A pool of water for cetaceans meeting the MHD and minimum depth for the longest cetacean contained therein, as computed above, has a sufficient volume of water for two cetaceans. However, the minimum volume of water necessary for a pool of water containing more than two cetaceans shall be determined in the following manner:

(i) The length of all cetaceans contained in the same pool of water shall be ascertained, as measured from the tip of their noses to the tip of their flukes and listed in order from the largest to the smallest cetacean contained therein.

(ii) The minimum volume of water necessary for the largest two cetaceans shall be determined by squaring the length of the larger cetacean and multiplying that figure by π (3.14), and such result shall be multiplied by one-half of the length of the larger cetacean or 1.52 meters (5 feet), whichever is greater.

(iii) The additional minimum volume of water necessary for each additional cetacean, more than the two largest cetaceans, shall be one-half the sum of the square of the length of each such additional cetacean contained therein multiplied by π (3.14), and each such total shall be multiplied by one-half of the length of each such additional cetacean or 1.52 meters (5 feet), whichever is greater.

(2) The following formulas are to be used in determining the space requirements for cetaceans:

Minimum horizontal dimension (MHD) = 2× the length of the longest cetacean.

Minimum depth = ½ the length of the longest cetacean or 1.52 meters (5 feet), whichever is greater.

For 1 or 2 cetaceans: Minimum volume of water = square the length × π (3.14) × minimum depth

For each cetacean more than 2: Minimum volume of water = $\frac{\text{square the length}}{2} \times \pi$ (3.14) × minimum depth

TABLE I[1]

Length of cetacean		MHD		Minimum required depth		Additional volume of water required per cetacean, over—	
Meters	Feet	Meters	Feet	Meters	Feet	$2m^3$	$2ft^3$
1.83	6	3.66	12	1.52	5	7.99	282.60
2.13	7	4.26	14	1.52	5	10.83	384.65
2.44	8	4.88	16	1.52	5	14.21	502.40
2.74	9	5.48	18	1.52	5	17.92	635.85
3.05	10	6.10	20	1.52	5	22.20	785.00
3.66	12	7.32	24	1.83	6	38.49	1,356.48
4.27	14	8.54	28	2.14	7	61.26	2,154.04
4.88	16	9.76	32	2.44	8	91.23	3,215.36
5.49	18	10.98	36	2.75	9	130.13	4,578.12
6.10	20	12.20	40	3.05	10	178.18	6,280.00
6.71	22	13.42	44	3.36	11	237.51	8,358.68
7.32	24	14.64	48	3.66	12	307.89	10,851.84
7.92	26	15.84	52	3.96	13	389.98	13,797.16

[1] All calculations are rounded off to the nearest hundreth. A conversion factor of 1 ft equals .3048 m is used in converting the length of cetaceans from feet to meters. Due to rounding of meter figures as to the length of the cetacean, the correlation of meters to feet in subsequent calculations of MHD and additional volume of water required per cetacean, over 2, may vary slightly from a strict feet to meters ratio.

(c) *Sirenians.* Primary enclosures housing sirenians shall contain a pool of water and may consist entirely of a pool of water. The minimum size requirements for such a pool of water for sirenians is calculated by using the same formulas as used for cetaceans in subsection (b) of this section, based on the length of such sirenians as measured from the tips of their noses to the tips of their flukes.

(d) *Pinnipeds.* (1) Primary enclosures housing pinnipeds shall contain a pool of water, a dry resting or social activity area and a ramp for entering or leaving the pool. (2) The minimum size of the dry resting or social activity area of the primary enclosure for pinnipeds (exclusive of the pool of water and the ramp for entering or leaving the pool) shall be based on the length of each pinniped contained therein, as measured in a horizontal or extended position, from the tip of its nose to the tip of its hind flipper. The minimum size of the dry resting and social activity area shall be computed using the following method:

Measure all pinnipeds and arrange them by length in descending order from the longest pinniped to the shortest pinniped. Square the length of each pinniped. Multiply the length squared of the longest pinniped by 1.5, the second longest by 1.4, the third longest by 1.3, etc. The sixth pinniped an[illegible] each, etc., shall have space equal to their length and social activity area required for such pinnipeds:

1 pinniped (length × 1.5) = total for resting and social activity area
2 pinniped (length × 1.4) = total for resting and social activity area
3 pinniped (length × 1.3) = total for resting and social activity area
4 pinniped (length × 1.2) = total for resting and social activity area
5 pinniped (length × 1.1) = total for resting and social activity area
Over 5 (length × 1.0) = total for resting and social activity area

Sum total for minimum dry resting and social activity area

(3) The minimum surface area of the pool of water for pinnipeds (exclusive of the ramp area) shall be at least two-thirds of the minimum dry resting and social activity area required for the pinnipeds contained therein. The pool of water shall be at least 1.52 meters (5 feet) deep or one-half the length of the longest pinniped contained therein, whichever is greater. The MHD of the pool of water shall not be less than two times the length of the longest pinniped contained therein.

(e) *Polar bears.* Primary enclosures housing polar bears shall consist of a pool of water, a dry resting and social activity area, and a den. A minimum of 37.16 square meters (400 square feet) of dry resting and social activity area shall be provided for one or two polar bears, with an additional 3.72 square meters (40 square feet) of dry resting and social activity area for every polar bear more than two. The dry resting and social activity area shall be provided with a shaded area large enough to accommodate all polar bears contained in such primary enclosure at the same time. The pool of water shall be at least 2.44 meters (8 feet) by 3.66 meters (12 feet) with a minimum depth of 1.52 meters (5 feet). The den shall be at least 1.83 meters (6 feet) in width, depth and height. The interior of the den shall not be in sight of the viewing public. A separate den shall be provided for each adult female in the same primary enclosure.

(f) *Sea otters.* (1) Primary enclosures for sea otters shall consist of a pool of water and a dry resting area. The minimum horizontal dimension (MHD) of the pool of water for sea otters shall be at least twice the length of the longest sea otter contained therein as measured from the tip of its nose to the tip of its tail and not less than 0.91 meters (3 feet) deep. When more than two sea otters are housed in the same primary enclosure, additional dry resting area, as well as pool volume is required to accommodate the additional sea otters.

(2) The minimum volume of water in the pool required for a primary enclosure for sea otters shall be based on the length of each sea otter contained therein, as measured from the tip of its nose to the tip of its tail. The minimum volume of water required in the pool shall be computed using the following method. Measure all sea otters in the primary enclosure and arrange them by length in descending order from the longest sea otter to the shortest sea otter. Multiply the square of the length of the longest sea otter by 3.14 and multiply the total by 0.91 meters (3 feet). This space is satisfactory for one or two sea otters. For more than two sea otters, multiply one-half of the square of the length of the third sea otter, and each additional sea otter (more than two) in the primary enclosure, by 3.14 times 0.91 meters (3 feet).

(3) The minimum dry resting area required for more than two sea otters (exclusive of the ramp for entering and leaving the pool) shall be based on the length of each sea otter contained therein, as measured from the tip of its nose to the tip of its tail. The minimum dry resting area shall be computed using the following method: Measures all sea otters in the primary enclosure and arrange them by length in descending order from the longest sea otter to the shortest sea otter. Square the length of the longest sea otter and multiply the total by 3.14. Add one-half of the square of the length of the third sea otter, and each additional sea otter (more than two sea otters) in the primary enclosure, and multiply that sum by 3.14.

TABLE II—*Additional space required for each sea otter more than 2 in a primary enclosure*

Length of sea otter		Resting area		Pool Volume	
Meters	Feet	Square meters	Square feet	Cubic meters	Cubic feet
0.91	3.0	1.30	14.13	1.18	42.30
1.07	3.5	1.80	19.28	1.54	55.70
1.22	4.0	2.31	25.12	2.13	75.36
1.37	4.5	2.95	31.75	2.68	95.38
1.52	5.0	3.63	39.25	3.30	117.75
1.68	5.5	4.43	37.19	4.03	142.48

NOTE.—All calculations are rounded off to the nearest hundreth. A conversion factor of 1 ft equals .3048 m is used in converting the length of the sea otter from feet to meters. Due to rounding of meter figures as to the length of the sea otter, the correlation of meters to feet in subsequent calculations of additional resting area and pool volume required per sea otter, more than 2, may vary slightly from a strict feet to meter ratio.

§ 3.104 Feeding.

(a) The food for marine mammals shall be wholesome, palatable, and free from contamination, and be of sufficient quantity and nutritive value to maintain all of the marine mammals in a state of good health. The diet shall be prepared with consideration for the age, species, condition, size, and type of marine mammal being fed. Marine mammals shall be offered food at least once a day, except as directed by veterinary treatment, normal fasts, or other professionally accepted practices.

(b) Food receptacles, if used, shall be located so as to be accessible to all marine mammals in the same primary enclosure and shall be placed so as to minimize contamination of the food contained therein. Such food receptacles shall be cleaned and sanitized after each use.

(c) Food, when given to each marine mammal individually, shall be given by a competent employee who has the knowledge to assure that each marine mammal receives an adequate quantity of food to maintain the marine mammal in good health. This employee shall have the ability to recognize any deviation from a normal state of good health in each marine mammal and can adjust the food intake accordingly.

(d) Food preparation and handling shall be conducted so as to minimize bacterial or chemical contamination and to assure the wholesomeness and nutritive value of the food. Frozen fish or other frozen food shall be stored in freezers which are maintained at a temperature of at least −15° C. (5° F.) Thawing of the frozen food shall be conducted in a manner to minimize contamination and to retain nutritive value and wholesome quality. The thawed product shall be kept iced or refrigerated until feeding time which shall be within 18 hours following the removal of such food from the freezers.

§ 3.105 Water quality.

(a) *General.* Water supplied to the primary enclosure pool shall be of good quality in order to maintain the marine mammals in a state of good health. The Water quality in such pools is unacceptable if the marine mammals using such pools exhibit eye infections, poor condition of the skin or hair coat, or contaminated surface wounds.

(b) *Bacterial standards.* (1) The coliform bacteria count of the primary enclosure pool shall not exceed 1,000 MPN (most probably number) per 100 ml. of water.

(2) When the water is chemically treated, the chemicals shall be added so as not to cause harm or discomfort to the marine mammals.

(3) Water samples must be taken and tested at least weekly for coliform count and at least daily for chemical additives (chlorine and copper). Records must be kept concerning when all such samples were taken and the result thereof. All such tests shall be made available for inspection purposes.

V 42 161 AUG 19 77 UM

(c) *Salinity.* Primary enclosure pools of water shall be salinized for all marine mammals which require salinized water for their good health and well-being. The salinity of the water in such pools shall be maintained within a range of 15–30 parts per thousand.

(d) *pH Standards.* The hydrogen ion concentration of the water in any primary enclosure pool shall be maintained between a pH of 7.3 and 8.5.

(e) *Filtration and water flow.*—(1) *Marine mammals, except polar bears.* The water in primary enclosure pools for marine mammals, except polar bears, shall not be stagnant. Water entering pools in the primary enclosure shall be filtered to remove visible particulate matter, or be from a source that is as clear as normal sea water. New water or recirculated water shall be added or filtered at a rate that at least equals the volume of such pool of water in every 4 hours.

(2) *Polar bears.* The water in pools for polar bears shall be completely drained and the pool cleaned as often as necessary maintain the required water quality, but at least once every two weeks.

§ 3.106 Sanitation.

(a) *Primary enclosures.* (1) Animal and food wastes in areas other than the pool of water shall be removed from the primary enclosure at least twice per week or more often as is necessary to prevent contamination of the marine mammals contained therein, to minimize disease hazards, and to reduce odors.

(2) Particulate animal and food wastes, trash or debris that enter the primary enclosure pool of water shall be removed as often as necessary to maintain the required water quality and to prevent health hazards to the marine mammals contained therein.

(3) The wall and bottom surfaces of the primary enclosure pool of water shall be cleaned as often as necessary to remove algae accumulations.

(b) *Food preparation areas and food receptacles.* Containers, such as buckets, tubs, and tanks, as well as utensils, such as knives and cutting boards, or any other equipment which has been used for holding, thawing or preparing food for marine mammals shall be cleaned and sanitized after each feeding, if the marine mammals are fed once a day, and at least daily if the marine mammals are fed more than once a day. Kitchens and other food handling and preparation areas shall be cleaned at least once daily and sanitized at least once every week. Sanitizing shall be accomplished by washing with hot water 82° C. (180° F.) and soap or detergent as in a mechanical dishwasher, or by washing all soiled surfaces with a detergent solution followed by a safe and effective disinfectant, or by cleaning all soiled surfaces with live steam.

(c) *Housekeeping.* Buildings and grounds as well as exhibit areas shall be kept clean and in good repair. Fences shall be maintained in good repair. Primary enclosures housing marine mammals shall not have any loose objects, sharp projections, and/or edges which may cause injury or trauma to the marine mammals contained therein.

(d) *Pest control.* A safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained. Insecticides or other such chemical agents shall not be applied in a primary enclosure housing marine mammals except when deemed essential by an attending veterinarian.

§ 3.107 Employees.

A sufficient number of adequately trained employees shall be utilized to maintain the prescribed level of husbandry practices set forth in this subpart. Such practices shall be under the supervision of a marine mammal caretaker who has a background in marine mammal husbandry or care. Training of marine mammals shall be done by experienced trainers without physical punishment or abuse being used or inflicted upon the marine mammals.

§ 3.108 Separation.

Marine mammals housed in the same primary enclosure shall be compatible. Marine mammals shall not be housed near animals that interfere with their health or cause them discomfort.

§ 3.109 Veterinary care.

(a) Programs of disease prevention, parasite control, euthanasia, and adequate veterinary care shall be established and maintained for all marine mammals, under the supervision of an attending veterinarian.

(b) Marine mammals shall be observed daily by the person in charge of the care of the marine mammals or by someone working under his direct supervision. Sick or diseased, stressed, injured, or lame marine mammals shall be provided with adequate veterinary care or humanely destroyed, unless such action is inconsistent with the research purposes for which the marine mammal was obtained and is being held.

(c) (1) In the case of a research facility, the program of adequate veterinary care shall include the appropriate use of anesthetic, analgesic, or tranquilizing drugs, when such use would be proper in the opinion of the attending veterinarian of the research facility. The use of these three classes of drugs shall be in accordance with the currently accepted veterinary medical practice as cited in appropriate professional journals or reference guides which shall produce in the individual subject animal a high level of tranquilization, anesthesia, or analgesia consistent with the protocol or design of the experiment.

(2) It shall be incumbent upon each research facility through its Animal Care Committee and attending veterinarian to provide guidelines and consultation to research personnel with respect to the type and amount of tranquilizers, anesthetics, or analgesics recommended as being appropriate for each species of marine mammals used by that institution.

(3) The use of tranquilizers, anesthetics, or analgesics shall effectively minimize the pain and discomfort of the marine mammal while under experimentation.

(d) Newly acquired marine mammals shall be isolated from resident marine mammals until such newly acquired marine mammals can be reasonably determined to be in good health. Any communicable disease condition in a newly acquired marine mammal must be remedied before it is placed with other resident marine mammals.

(e) Any primary enclosure which has contained a marine mammal with an infectious or contagious disease shall be cleaned and sanitized in the manner prescribed in § 3.106 of the standards before any other animal is again housed in that primary enclosure.

(f) Adequately and properly designed restraining devices or primary enclosures shall be provided for isolation, medication, and treatment of all marine mammals.

§ 3.110 Handling.

(a) Handling marine mammals shall be done as expeditiously and carefully as possible in a manner that does not cause unnecessary discomfort, overheating, behavioral stress, or physical harm to the marine mammal. Care should also be exercised to avoid harm to the handlers of such marine mammals.

(b) Marine mammals, to which the public is afforded direct contact, shall only be displayed for periods of time and under conditions consistent with the animals' good health and not leading to their discomfort.

(c) During public display, all marine mammals must be handled so that there is minimal risk of harm to the public or the marine mammal, with sufficient distance allowed, or barriers placed between the marine mammal and the viewing public to assure safety to both the public and the marine mammal. Performing marine mammals shall be allowed a rest period between performances equal to the time for one performance.

§ 3.111 Consignments to carriers and intermediate handlers.

(a) Carriers and intermediate handlers shall not accept any marine mammal presented by any dealer, research facility, exhibitor, operator of an auction sale or other person or any department, agency, or instrumentality of the United States or of any State or local government for transportation, in commerce, more than 4 hours prior to the scheduled departure of the primary conveyance on which it is to be transported.

(b) Carriers and intermediate handlers shall attempt to notify the consignee at least once in every 6 hour period following the arrival of any live marine mammal at destination. The time, date, and method of notification to the consignee and the person notifying the consignee shall be noted on one of the documents accompanying the marine mammal.

§ 3.112 Primary enclosures used to transport marine mammals.

(a) Primary enclosures used to transport marine mammals, other than cetaceans and sirenians, shall be constructed in such a manner that (1) the structural strength of the enclosure shall be sufficient to contain the marine mammals and to withstand the normal rigors of transportation; (2) the interior of the enclosure shall be free from any protrusions that could be injurious to the marine mammals contained therein; (3) no part of the marine mammal shall be exposed outside of the primary enclosure which may cause injury to the animal or to persons who are nearby or who handle the primary enclosure; (4) the openings which provide access into the primary enclosure shall be secured with locking devices capable of preventing accidental opening; (5) the openings of such primary enclosure are easily accessible at all times for emergency removal of any live marine mammal contained therein; (6) there are ventilation openings located on at least both ends of the primary enclosure which are at least 8 percent of the total surface area of each such end; (7) projecting rims or other devices shall be placed on the ends and sides of any primary enclosure which has ventilation openings to provide a minimum air circulation space of 1.9 centimeters (0.75 inches) between the primary enclosure and any adjacent cargo or conveyance wall; and (8) adequate handholds or other devices for lifting shall be provided on the exterior of the container to enable the primary enclosure to be lifted without unnecessary tilting and to ensure that the persons handling the primary enclosure will not come in contact with any marine mammal contained therein.

(b) Live marine mammals transported in the same primary enclosure shall be of the same species and maintained in compatible groups. Marine mammals which have not reached puberty shall not be transported in the same primary enclosure with adult marine mammals other than their dams. Female marine mammals in season (estrus) shall not be transported in the same primary enclosure with any male marine mammals.

(c) Primary enclosures used to transport live marine mammals shall be large enough to assure that (1) each polar bear and sea otter contained therein has sufficient space to turn about freely in a stance whereby all four feet are on the floor and it can sit in an upright position and lie in a natural position; (2) each pinniped contained therein has sufficient space to lie in a natural position whereby all extended flippers shall not be in contact with any walls of the primary enclosure, and (3) each cetacean and sirenian contained therein has sufficient space for support of its body in slings, harnesses or other supporting devices (as prescribed in subparagraph (d) of this subsection) without being in contact with the supporting framework, adjacent walls, floor or ceiling, or other solid materials capable of causing contact injury to such cetacean or sirenian.

(d) Straps, slings, harnesses, or other devices for body support, used to transport cetaceans and sirenians shall be (1) designed to provide access to such mammal by attendants during transportation to administer intransit care; (2) designed to allow special padding to prevent trauma or injury at critical weight pressure points on the body of the marine mammal; and (3) designed so that straps or other restraining devices are provided to keep the animal from thrashing about and causing injury to itself or it its attendants, and so that such straps or other restraining devices are padded or otherwise protected so as not to cause injury, or be an irritant to the animal.

(e) Before being used to transport live marine mammals, primary enclosures, if previously used, shall be cleaned and sanitized in the manner prescribed in § 3.106 of the standards.

(f) Primary enclosures used to transport live marine mammals shall be clearly marked on the top and on one or more sides with the words "Wild Animal" in letters not less than 2.5 cm. (1 inch) in height, and with arrows or other markings, to indicate the correct upright position of the container.

(g) Documents accompanying the shipment shall be attached in an easily accessible manner to the outside of a primary enclosure which is part of such shipment.

§ 3.113 Primary conveyances (motor vehicle, rail, air and marine).

(a) The animal cargo space of primary conveyances used in transporting live marine mammals shall be designed and constructed to protect the health and assure the safety and comfort of the marine mammals contained therein at all times.

(b) The animal cargo space shall be constructed and maintained in a manner to prevent the ingress of engine exhaust fumes and gases.

(c) No marine mammal shall be placed in an animal cargo space that does not have a supply of air sufficient for normal breathing for each live animal contained therein, and the primary enclosures shall be positioned in the animal cargo space of the primary conveyance in such a manner that each marine mammal contained therein has access to sufficient air for normal breathing.

(d) Primary enclosures shall be positioned in the primary conveyance in such a manner that in an emergency the live marine mammals can be removed from the primary conveyance within a 5 minute time period.

(e) The interior of the animal cargo space shall be kept clean.

(f) Live marine mammals shall not be transported with any material, substance or device which may be injurious to the health and well-being of such marine mammals unless proper precaution is taken to prevent such injury.

§ 3.114 Food and water requirements.

(a) All marine mammals shall be offered potable water within 4 hours prior to being transported in commerce or offered for transportation in commerce. Marine mammals shall be watered as often as necessary and appropriate to the species involved to prevent excessive dedhydration which would jeopardize the good health and well-being of the marine mammal.

(b) Marine mammals shall not be transported for more than a period of 24 hours without being offeredd food. When an attendant is required to accompany a shipment of a marine mammal, as provided in § 3.115 of the standards, such marine mammal shall be fed during transit as often as necessary to provide for the good health and well-being of such marine mammal.

§ 3.115 Care in transit.

(a) An attendant or other employee of the shipper or receiver of any marine mammal being transported, in commerce, knowledgeable about the subject marine mammal being transported, shall accompany cetaceans, walruses, sirenians and sea otters during periods of transportation to provide for their good health and well-being, to observe such marine mammals and to determine whether they need veterinary care and to obtain any needed veterinary care as soon as possible. No cetacian, sirenian or walrus in need of veterinary care shall be transported in commerce.

(b) An attendant or other employee of the shipper or receiver of any marine mammal being transported, in commerce, shall provide for cetaceans and sirenians during periods of transport by (1) keeping the skin moist with intermittant spraying of water or protected by applying a nontoxic emollient, such as lanolin, to prevent drying of the skin; (2) assuring that the pectoral flippers shall be allowed freedom of movement at all times; (3) making adjustments in the position of such marine mammals at 30 minute intervals to prevent necrosis of the skin at weight pressure points; and (4) calming such marine mammals to avoid struggling, thrashing, and other unnecessary activity which may cause overheating or physical trauma to such marine mammals.

(c) Primary enclosers used to transport sea otters shall have sufficient water for each sea otter contained therein to immerse its body or such sea otters shall receive sufficient intermittent spraying with water to allow each such sea otter to maintain its hair coat and to prevent drying of its hair coat. No sea otter in need of veterinary care shall be transported in commerce.

(d) Live polar bears and pinnipeds, other than walruses, need not be accompanied by an attendant or other employee of the shipper or receiver, unless the period of transportation will exceed 12 hours in duration. During surface transportation, it shall be the responsibility of the driver or employee to inspect polar bears and pinnipeds, other than walruses, unaccompanied by an attendant, at least every 2 hours to determine whether they need veterinary care and to provide any needed veterinary care as soon as possible. When transported by air, live polar bears and pinnipeds, other than walruses, unac-

V 42 161 DG 19 77 UM A V

companied by an attendant, shall be inspected by the carrier at least every 2 hours if the animal cargo space is accessible during flight. If the animal cargo space is not accessible during flight, the air carrier shall inspect such live unattended marine mammals whenever loaded and unloaded and whenever the animal cargo space is otherwise accessible to determine whether such unattended live marine mammals need veterinary care, and the carrier shall provide any needed veterinary care as soon as possible. No polar bear or pinniped in need of veterinary care shall be transported in commerce.

(e) During the course of transportation, in commerce, live marine mammals shall not be removed from their primary enclosure unless placed in another primary enclosure or other facility conforming to the requirements provided in this subpart.

§ 3.116 Terminal facilities.

(a) *Indoor facilities.* Carriers and intermediate handlers shall provide a designated indoor animal holding area which shall not be used for general cargo, but may be located within the general cargo area. The indoor animal holding area shall be provided with fresh air either by means of windows, doors, vents, or air conditioning and shall be ventilated so as to minimize drafts, odors, and moisture condensation. The ambient temperature shall neither be allowed to fall below 7.2°C (45°F.) nor be allowed to exceed 29.5°C (85°F.) at any time. The indoor animal holding area shall be cleaned and santized in the manner prescribed in § 3.106 of the standards often enough to prevent an accumulation of debris, or excreta, minimize vermin infestation, and to prevent a disease hazard.

(b) *Outdoor facilities.* Carriers and intermediate handlers in transporting live marine mammals from the indoor animal holding area of the terminal facility to the primary conveyance and from the primary conveyance to the indoor animal holding area of the terminal facility, including loading and unloading procedures, shall provide the following:

(1) *Shelter from sunlight.* When sunlight is likely to cause overheating or discomfort, sufficient shade shall be provided to protect the live marine mammals from the direct rays of the sun.

(2) *Shelter from snow.* Transporting devices shall be covered to provide protection for live marine mammals during snow.

(3) *Shelter from cold weather.* Transporting devices shall be covered to provide protection for live marine mammals when the atmosphere temperature falls below 10° C. (50° F.)

§ 3.117 Handling.

(a) Carriers and intermediate handlers are responsible for moving live marine mammals from the indoor animal holding area of the terminal facility to the primary conveyance and from the primary conveyance to the indoor animal holding area of the terminal facility as expeditiously as possible.

(b) Care shall be exercised to avoid handling of the primary enclosure in such a manner that may cause physical or emotional trauma to the live marine mammal contained therein.

(c) Primary enclosures housing live marine mammals shall not be tossed, dropped, or needlessly tilted and shall not be stacked in a manner which may result in their falling.

§ 3.118 Ambient temperature.

The ambient temperature within the primary enclosure used to transport live marine mammals shall not exceed 35° C. (95° F.) for a period of more than 45 minutes and shall not fall below 7.2° C. (45° F.) for a period of more than 45 minutes unless the person transporting such live marine mammals knows that such live marine mammals are acclimated to such lower or higher temperatures.

All written submissions made pursuant to this notice will be made available for public inspection at the Federal Building, 6505 Belcrest Road, Room 703, Hyattsville, Maryland, during regular hours of business (8 a.m. to 4:30 p.m., Monday through Friday, except holidays) in a manner convenient to the public business (7 CFR 1.27 (b)).

Comments submitted should bear a reference to the date and page number of this issue in the FEDERAL REGISTER.

Done at Washington, D.C., this 16th day of August 1977. The Animal and Plant Health Inspection Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107. However, an economic impact statement has been drafted and a copy of said draft statement may be obtained by writing to the Deputy Administrator, USDA, APHIS, VS, Room 703, Federal Building, 6505 Belcrest Road, Hyattsville, Md. 20782.

NORVAN L. MEYER,
Acting Deputy Administrator,
Veterinary Services.

OFFICE OF MANAGEMENT AND BUDGET

■

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION AND DEPARTMENT OF THE TREASURY

Budget Deferral

V 42 161 AUG 19 77 UM V

OFFICE OF MANAGEMENT AND BUDGET

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION AND DEPARTMENT OF THE TREASURY

Budget Deferral

TO THE CONGRESS OF THE UNITED STATES:

In accordance with the Impoundment Control Act of 1974, I herewith report one new deferral of budget authority amounting to $11.3 million for the Energy Research and Development Administration's Intense Neutron Source Facility. In addition, I am reporting a revision to a previously transmitted deferral for the anti-recession financial assistance fund in the Office of the Secretary of the Treasury.

The details of each deferral are contained in the attached reports.

Jimmy Carter

THE WHITE HOUSE, August 16, 1977.

D77-57A

SUPPLEMENTARY REPORT

Report Pursuant to Section 1014(c) of Public Law 93-344

This report revises Deferral No. D77-57 transmitted to the Congress on April 28, 1977, and printed as House Document 95-135.

This revision of a deferral for the Antirecession financial assistance fund in the Office of the Secretary of the Treasury increases the previously reported deferral from $6,030,000 to $8,453,000. This increase of $2,423,000 is the net effect of releases, adjustments, and additional budgetary resources made available to this account in P.L. 95-29.

CONTENTS OF SPECIAL MESSAGE
(in thousands of dollars)

Deferral #	Item	Budget Authority
D77-57A	Department of the Treasury: Office of the Secretary Antirecession financial assistance fund....	8,453
D77-64	Energy Research and Development Administration: Plant and capital equipment.....	11,300
	Total, deferrals.....	19,753

SUMMARY OF SPECIAL MESSAGES
FOR FY 1977
(in thousands of dollars)

	Rescissions	Deferrals

Deferral No: D77-57A

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

Agency: Department of the Treasury	New budget authority (P.L. 94-447 & 95-29): $1,570,000,000*
Bureau: Office of the Secretary	Other budgetary resources: 312,500,000
Appropriation title & symbol: Antirecession Financial Assistance Fund 207/80108 1/	Total budgetary resources: 1,882,500,000*
	Amount to be deferred: Part of year: $; Entire year: 8,453,000*
OMB identification code: 20-0108-0-1-852	Legal authority (in addition to sec. 1013): [X] Antideficiency Act; [X] Other P.L. 94-369
Grant program: [X] Yes [ ] No	
Type of account or fund: [ ] Annual; [X] Multiple-year September 30, 1978 (expiration date); [ ] No-year	Type of budget authority: [X] Appropriation; [ ] Contract authority; [ ] Other

*Justification

The Secretary of the Treasury must hold a portion of this account in reserve to meet valid claims from State and local governments that past antirecession financial assistance payments to them were too small. Because the total amount appropriated for all governments is fixed, the alternative to such a reserve is recurring recomputations of entitlements of 39,000 governments for prior entitlement periods. Accordingly, the Office of Revenue Sharing has withheld from obligation an amount equal to one-half of one percent of the amounts appropriated for the transition quarter and FY 1977.

This cumulative unobligated reserve, totaling $8.5 million, is available to the Secretary of the Treasury to satisfy legitimate claims against the fund for prior entitlement periods. The unobligated amount retained in the fund will be reduced whenever the Secretary determines that a lesser amount is adequate to meet foreseeable liabilities against the fund. The reduction will be made by paying the additional amount to recipients as part of a regular distribution.

Estimated Effect

This action will postpone distribution of the amount of the reserve until necessary adjustments and corrections have been identified. It will also avoid substantial confusion and complexities in the administration of the program.

1/ This account is the subject of another deferral, D77-60.
* Revised from previous report.

* Outlay Effect (estimated in millions of dollars)

Comparison with President's 1978 Budget:

1. Budget outlay estimate for FY 1977	$1,250.0
2. Outlay savings, if any, included in the budget outlay estimate	-0-

Current Outlay Estimates for FY 1977:

3. Without deferral	1,707.0
4. With deferral	1,698.5
5. Current outlay savings (line 3 - line 4)	+8.5
Outlay savings for FY 1978	-8.5
Outlay savings for FY 1979	-0-

* Revised from previous report.

Deferral No: D77-64

DEFERRAL OF BUDGET AUTHORITY
Report Pursuant to Section 1013 of P.L. 93-344

Agency: U.S. Energy Research and Development Administration	New budget authority (P.L. 94-355 & 94 - 373): $1,634,630,000
Bureau:	Other budgetary resources: 106,534,747
Appropriation title & symbol: Plant and Capital Equipment 1/ 89X0103	Total budgetary resources: 1,741,164,747
	Amount to be deferred: Part of year: $; Entire year: 11,300,000
OMB identification code: 89-0103-0-1-999	Legal authority (in addition to sec. 1013): [ ] Antideficiency Act; [ ] Other
Grant program: [ ] Yes [X] No	
Type of account or fund: [ ] Annual; [ ] Multiple-year (expiration date); [X] No-year	Type of budget authority: [X] Appropriation; [ ] Contract authority; [ ] Other

Justification: The Administration has determined that project 76-5-a, 14 MEV Intense Neutron Source Facility, Los Alamos Scientific Laboratory, New Mexico, is not required as part of its Magnetic Fusion Energy Program. The Administration's proposed FY 1978 authorization bill for the Energy Research and Development Administration (ERDA) includes a provision to eliminate the existing authorization for appropriations for this project. Pending final congressional action on the ERDA FY 1978 authorization bill, funds not required to maintain ongoing project activities will be deferred. The purpose for this deferral is to minimize the use of additional funds while the authorization bill is being considered.

Estimated Effects: This deferral will have no effect on current project activities. If the authorization for the project is not eliminated, the total cost and completion date of the project will not be significantly affected by this deferral since the deferral will terminate not later than the end of FY 1977, a period of less than two months.

Outlay Effect:

There is no outlay effect resulting from the deferral since it will be in effect for only a brief time.

1/ This account is the subject of another deferral, D77-56.

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

V42 161 AUG 19 77 UM

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, (37 FR 21138) and of Secretary of Labor's Orders 12-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

MODIFICATIONS AND SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24-70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates (37 FR 21138) and of Secretary of Labor's Orders 13-71 and 15-71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

d. Holidays: A through F; Washington's Birthday, Election Day for President of the United States and Election of Governor of New York (provided employee works the day before and the day after the holiday).

e. Holidays: Labor Day and Independence Day.

DECISION NO. NY77-3114

LABORERS: HEAVY AND HIGHWAY CONSTRUCTION	Basic Hourly Rates	Fringe Benefits Payments H & W	Pensions	Vacation	App. Tr
CLASS A	$8.04	.70	.70	a	
CLASS B	8.24	.70	.70	a	
CLASS C	8.44	.70	.70	a	
CLASS D	8.64	.70	.70	a	

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; E-Christmas Day.

FOOTNOTE:
a. Paid Holidays A through F, provided the employee has worked the day before and after the holiday.

LABORERS: HEAVY AND HIGHWAY CONSTRUCTION:

CLASS A
Laborers, drill helper, flagmen, outboard and hand boats.

CLASS B
Bull float, chain saw, concrete aggregate, bin, concrete bootman, gin buggy, hand or machine vibrator, jackhammer, mason tender, mortar mixer, pavement breaker, handlers of all steel mesh, small generators for laborers' tools, installation of bridge drainage pipe, pipelayers, vibrator type rollers, tamper, drill doctor, tail or screw op. on asphalt paver, water pump op. (1½" and single diaphragm), nozzle (asphalt, gunnite, seeding and sand blasting), laborers on chain link fence erection, rock splitter and power unit, pusher type concrete saw and all other gas, electric, oil and air tool operators, wrecking laborer.

CLASS C
All rock or drilling machine operators (except quarry master and similar type), acetylene torch op., asphalt raker, powderman.

CLASS D
Blasters, form setters, stone or granite curb setters.

DECISION NO. NY77-3114

FOOTNOTE:

a. Holidays: A through F; (provided an employee works the day before and the day after the holiday).

POWER EQUIPMENT OPERATORS - BUILDING CONSTRUCTION

Class I - Cranes with boom and jib, 175 feet and over.

Class II - Cranes with boom and jib, 130 feet and over.

Class III - Cranes with boom and jib 100 feet and over.

Class IV - Automatic fine grader, backhoe, cableway, caisson auger, cherry picker (straddle mobile type), cherry picker (hydralic crane) over 5 ton, compressor, pump, generator or welding machines (when used in a battery or not more than four (4), crane derrick, diesel power unit, dragline, excavators (gradall type, hydraulically operated), front end loader (4 cubic yards and over), high speed conveyors (in one line), piledriver, shovel, two and three drum hoist, vibra or sonic hammer controls (when not mounted by rig operator), tower crane.

Class V - "A" frame truck (when used in setting of installation of material), bulldozer, carry-all scraper, cherry picker (5 ton or under), compressor (300 cubic feet and over), concrete paver and mixer, (16S and over), concrete pump, core boring machine, machine, crop dryer (when used as heater), dinkey locomotive, elevator cage hoist, fork lift, full time welder on maintenance, front end loader (under 4 cubic yard), grease truck, high pressure boiler, one drum hoist, maintenance engineer, post hole digger, power grader, pumps (4 inch and over), roller, side boom, test boring machine, tractor mounted backhoe, trenching machine, two cage elevator hoist, tugger hoist, vibro tamp, well drill, well point system.

Class VI - Concrete mixer (under 16S), conveyor, (over 12 foot), firemen, hydraulic pumps, oiler, mechanical heaters (more than two (2) mechanical heaters), power driven welding machine

DECISION NO. NYT7-3115

PAID HOLIDAYS:
A-New Year's Day; Memorial Day; Independence Day; Labor Day; Thanksgiving Day; Christmas Day

FOOTNOTES:

a. Paid Holidays: A through F.

b. Employer contributes 4% basic hourly rate for 5 years or more of service or 2% basic hourly rate for 6 months to 5 years of service as Vacation Pay.

c. Paid Holidays: A through F, Washington's Birthday, Good Friday, and Christmas Eve providing the employee has worked 30 full days during the 90 calendar days prior to the holiday and the regular scheduled work days immediately preceeding and following the holiday.

d. Paid Holidays: A through F, Washington's Birthday, Election Day for President and Election of Governor of New York, provided the employee works the day before and the day after the holiday.

e. Paid Holidays: A,C,D,E,F.

f. On any election day workmen will be given sufficient time off with pay for the purpose of voting in compliance with New York State Law.

g. Paid Holidays: C and D.

Bull float, chain saw, concrete aggregate, bin, concrete bootman, gin buggy, hand or machine vibrator, jackhammer, mason tender, mortar mixer, pavement breaker, handlers of all steel mesh, small generators for laborers' tools, installation of bridge drainage pipe, pipelayers, vibrator type rollers, tamper, drill doctor, tail or screw op. on asphalt paver, water pump op. (1½" and single diaphragm), nozzle (asphalt, gunnite, seeding and sand blasting), laborers on chain link fence erection, rock splitter and power unit, pusher type concrete saw and all other gas, electric, oil and air tool operators, wrecking laborer.

CLASS C
All rock or drilling machine operators (except quarry master and similar type), acetylene torch op., asphalt raker, powderman.

CLASS D
Blasters, form setters, stone or granite curb setters.

DECISION NO. NY77-3115

BUILDING CONSTRUCTION - POWER EQUIPMENT OPERATORS :

GROUP I - Cranes (cable and hydraulic, climbing and tower)
I - A 121 ft. and under
I - B 121 ft. and 151 ft.
I - C 151 ft. and 201 ft.
I - D 201 ft. and 251 ft.
I - E 251 ft. and 301 ft.
I - F 301 ft. and 351 ft.
I - G 351 ft. and 401 ft.
I - H 401 ft. and 451 ft.

GROUP II - Air tugger, derrick, dredge, big generator plant, cableway, backhoe, clamshell, dragline, shovel and similar machines over 3/8 cubic yards capacity (factory rating), bridge crane (all types), caisson auger and similar type machine, forklift (with factory rating of 15 ft. or more of lift), hoist (on steel erection), mucking machines, rose carrier (and similar types), three drum hoist (when all three drums are in use)

GROUP III - A frame truck, backfilling machine, hoist (1 or 2 drums), barber green and similar type machine, maintenance engineer (mechanic), mechanical slurry machines (all kinds), belt crete and similar type machines, bituminous spreading machine, post hole digger, bulldozer, carry all type scraper, core drill, pumps, (regardless of motive power) no more than (4) in number not to exceed .20 inches in total capacity), fine grade and finish rollers, side boom tractor, stone crusher, compressors: 4 not to exceed 2000 cfm combined capacity 3 or less with more than 1200 CFM, but not to exceed 2000 CFM, concrete mixer, concrete placer, concrete pumps, tournadozer and similar types, crane-hoe-shovel 3/8 yd. capacity or less (factory rating), tournapull and similar types, dinky locomotives (all types), tower-mobile and similar types, elevating grader, elevator trenching machines, fine grade machines (all kinds), welder, front end loader, forklift, with factory rating of less than 15 feet of lift, well drill, well point system, high pressure boiler, side boom, Exception: single electric pumps up to and including 4 inches not be manned.

GROUP IV - Any combination (not to exceed 3 pieces of equipment), welding, machine or mechanical conveyor (over 12 ft in length), fireman, belt creto generator, mechanical heater, roller (fill & grade), pumps (regardless of motive power) no more than (3) in number, not to exceed twelve inches total capacity, rubber tired tractor, compressor 3 or less, not to exceed 1200 CFM combined capacity, longitudinal float, Exception: single gasoline driven welding machines up to 300 amps need not be manned.

DECISION NO. NY77-3115

POWER EQUIPMENT OPERATORS: HEAVY AND HIGHWAY CONSTRUCTION CONT'D.

Group III - A-frame truck, compressors (4 not to exceed 2000 C.F.M. combined capacity or 3 or less with more than 1200 C.F.M. but not to exceed 2000 C.F.M.), compressors (any size but subject to other provisions for compressors), dust collectors, generators, pumps, welding machines (4 of any type of combination), concrete pavement spreaders and finishers, conveyor, drill-core, drill-well, electric pumps used in conjunction with well point system, farm tractor with accessories, fine grade machine, fork lift (under 15 ft.), gunite machine, hammers (hydraulic-self-propelled), post hole digger and post driver, power sweeper, roller (grade and fill), submersible electric pump (when used in lieu of well point system), tractor with towed accessories, vibratory compactor, vibro tamp, well point.

Group IV - Aggregate plant, boiler (used in conjunction with production), cement and bin operator, compressors (3 or less not to exceed 1200 C.F.M. combined capacity), compressor (any size, but subject to other provisions for compressors) dust collectors, generator pumps, welding machines (3 or less of any type or combination), concrete paver or mixer (16S and under), concrete saw (self-propelled), fireman, form tamper, hydraulic pump (jacking system), lighting plants, mulching machine, oiler parapet- (concrete or pavement grinder), power broom (towed), power heaterman, revinius widener, shell winder, steam cleaner, tractor.

DECISION NO. NY77-3115

TRUCK DRIVERS: HEAVY AND HIGHWAY CONSTRUCTION	Basic Hourly Rates	Fringe Benefits Payments H & W	Pensions	Vacation	App. Tr.
CLASS 1	$8.04	.65	.70	a	
CLASS 2	8.09	.65	.70	a	
CLASS 3	8.14	.65	.70	a	
CLASS 4	8.29	.65	.70	a	
CLASS 5	8.44	.65	.70	a	

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

FOOTNOTE:
a. Paid Holidays A through F, provided the employee has worked the working day before and after the holiday.

TRUCK DRIVERS: HEAVY AND HIGHWAY CONSTRUCTION:

CLASS 1
Warehouseman, yardmen, truck helpers, pickups, panel trucks, flatboy material trucks (straight jobs), single axel dump trucks, dumpsters, material checkers and receivers, greasers, truck tiremen, mechanic helpers and parts chaser.

CLASS 2
Tandems, batch trucks, mechanics and dispatcher.

CLASS 3
Semi-trailers, low-boy trucks, asphalt distributor trucks, agitator, mixer trucks and dumpcrete type vehicles, truck mechanic.

CLASS 4
Specialized earth moving equipment - euclid type or similar off-highway equipment, where not self loaded, and straddle (ross) carrier.

CLASS 5
Off-highway tandem back-dump, twin engine equipment and double-hitched equipment where not self loaded.
